

Neutral

Box plot showing the distribution of the number of iterations for three different methods. The y-axis represents the number of iterations, ranging from 0.00 to 0.08. A horizontal blue line is drawn at y = 0.02. The three methods are represented by different box plots: the first method (left) has a median around 0.008, the second method (middle) has a median around 0.019, and the third method (right) has a median around 0.006. The second method shows a large number of outliers, with values extending up to 0.08.
