

## NANOFEED IS MSCA – RISE PROJECT FOCUSED ON:

- Development of nano- and microparticle – based feed supplements delivery systems to cure dietary disorders of cattle
- Encapsulation of bio-based food additives to prevent their metabolism in the rumen and release in abomasum or small intestine
- Controlled nutrient delivery, animal feed improvements, increased cattle immunity and illness prevention

### PROJECT COORDINATOR

NanoFEED receives funding from the European Union's H2020 program under Marie Skłodowska-Curie grant agreement No. 778098

### PROJECT PARTNERS

NATIONAL AGRICULTURAL  
AND FOOD CENTRE

## NANOSTRUCTURED CARRIERS FOR IMPROVED CATTLE FEED
