

Western Tigray in 165 historical and 33 ethno-linguistic maps (1475-2014)

Graphical abstract

Western Tigray in 165 historical and 33 ethno-linguistic maps (1475-2014)

Version 7

- Meta-analysis of co-eval historical maps representing Western Tigray (Ethiopia)
- Welkait part of Tigray in 1707-1794; 1829-1898; 1908-1909; 1935-1941; 1991-ongoing
- Welkait mapped as Amhara in 1891-1896 and Gondar in 1944-1990
- Not any evidence that “Welkait was *always* part of Amhara”
- Language maps largely show Tigrinya on both sides of Tekeze River

Summary

There is a wide array of historical maps and records which jointly reveal that the territorial organisation of northern Ethiopia has tremendously changed over the last four centuries.

Historical maps representing the Western Zone of the Tigray Region (Welkait and adjacent districts, Fig. 1) have been retrieved from well-established repositories. Only maps prepared in the same period (co-eval maps) were used. Each map was screened for representation of internal borders, indicating sway or territorial control. Out of 165 maps, spanning the period 1475-1967, 159 were precise enough to be analysed, of which 93 display territorial control. Descriptive statistics of the dataset as a whole are presented.

Starting from the late 16th C., territorial control is frequently and clearly shown, with 57 maps (between 1570 and 1941) displaying a boundary that is located well south of the Tekeze River, or even south of the Simien mountains (Fig. 2). Welkait is explicitly included within a larger Tigray confederation (periods 1707-1794, 1829-1898, 1908-1909, and 1935-1941) (Fig. 3); it is briefly mapped as part of Amhara in 1891-1896 and part of Gondar from 1944-1990. At other periods it appears independent or part of a larger Mezaga (“dark earth”) lowland region. The Amhara/Gondar – Tigray border is mapped on the Tekeze River at short intervals in 1844-1847, 1860-1872, and 1891-1896 and then more permanently between 1944 and 1990. The meta-analysis of the historical maps shows that for the larger part of the last 300 years, Western Tigray has been under Tigray jurisdiction (Fig. 5). However, at times of upheaval, the territory has been briefly reorganized under either the Amhara polities or was autonomous.

These maps demonstrate that the argument that Welkait was “*always* a part of Begemdir”, or else Amhara, is not based on evidence, apart from a territorial reorganisation in the mid-twentieth century. In contrast, contemporary Tigray is a valid territory, whose legitimacy stems from modern federalism’s faculty to create a region away from concepts of the Ethiopian empire-state. In 1991-4, when the boundaries of the Tigray Region were established as part of federal Ethiopia, local self-determination was way more important than historical maps. Remarkably, the consensus of the 20th C. ethno-linguistic maps of the Ethiopian state sustains the current extent of the Tigray region.

In other words: the Amhara nationalist narrative that there was continuous ancestral ownership of Western Tigray is not confirmed by a meta-analysis of the historical maps. We conclude with the suggestion to especially consider the recent and subrecent actual world, including language maps.

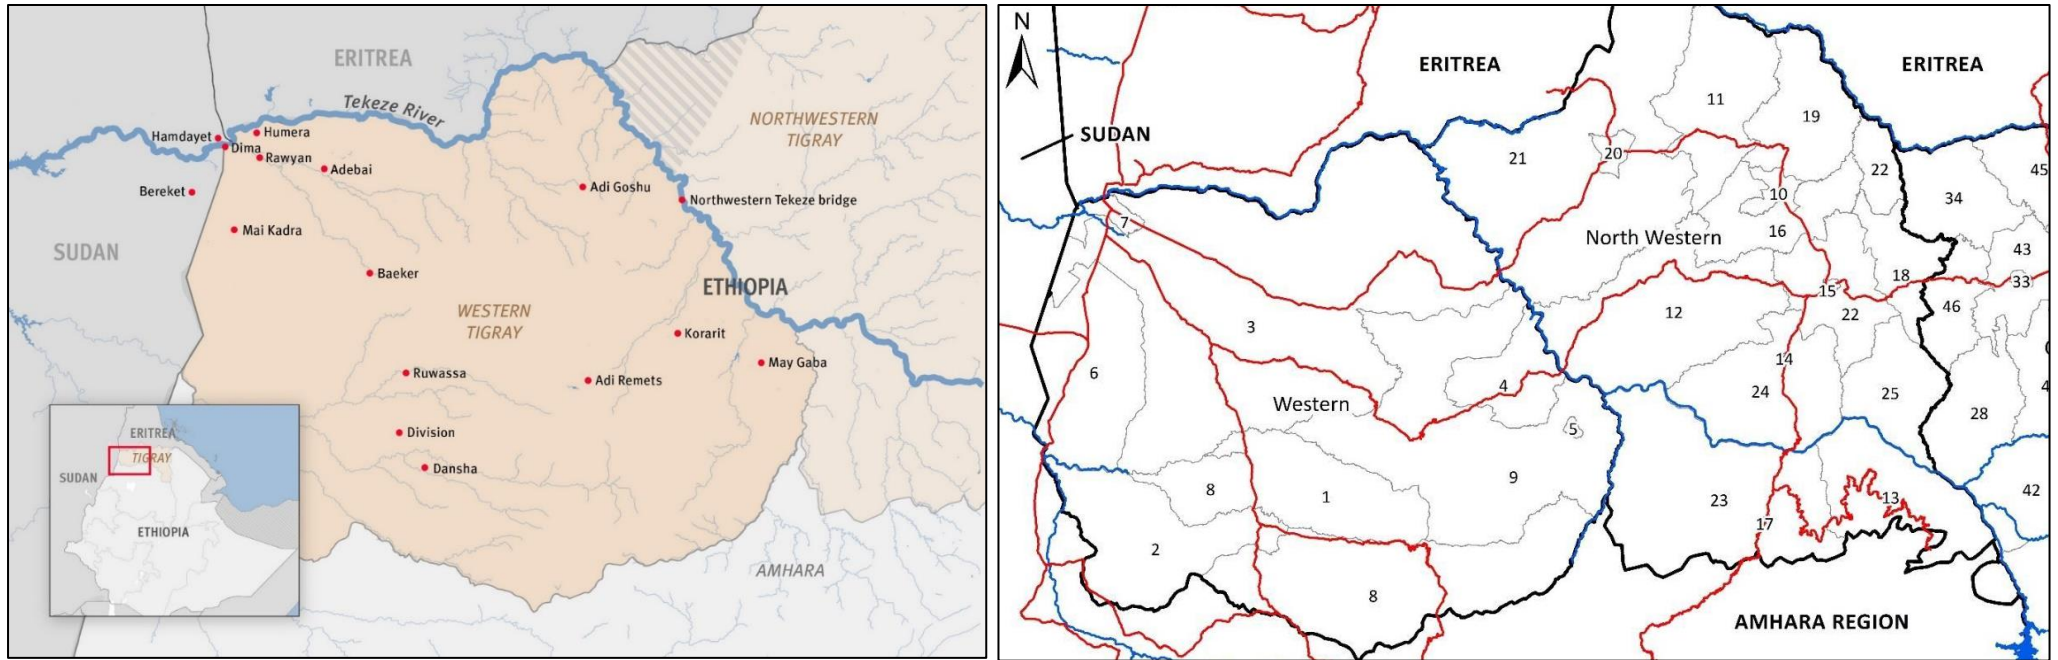

Fig. 1. Location of Western Tigray: at left with major towns (© Human Rights Watch & Amnesty International, 2022 (1)); at right woredas (districts): 1 Awrora, 2 Dansha town, 3 Kafta Humera, 4 Korarit, 5 May Gaba, 6 May Kadra, 7 Setit Humera, 8 Tsegede, 9 Welkait. Besides Western Tigray, the districts 23 Tselemti and 13 Dima as well as 17 May Tsebri town in Northwestern Tigray are also claimed by Amhara nationalists. Downloaded from <https://data.humdata.org/dataset> (2)).

Introduction

This dataset focuses on historical maps of Western Tigray (Fig. 1), which is not only notable for the multiple war crimes committed there during the Tigray War (1), but is also a contested area in Ethiopia between the Tigray and Amhara regions.

The Ethiopian constitution stipulates that the ethno-linguistic demography of a region, rather than the historical control of a group on that territory, determines the regional organisation. As a result, districts in Western Tigray were incorporated into the Tigray region in 1991-4, because a large majority

of Tigrayans lived there at the time of inclusion. However, many Amhara nationalists have claimed historical possession of these lands. Although this “historical ownership” argument is irrelevant to the current federal setup, Amhara irredentist claims should be scrutinized more closely. After all, Amhara irredentism has been a driving force in the Tigray war. Removing this most productive zone from Tigray appears also to be part of a strategy to impoverish and subjugate Tigray (3). Again, Ethiopian regime supporters proudly stated on July 2021: “Let them go! The defeated *Great Tigray* had to abandon the fertile regions it had stolen from the Amharas in the 1990s, and had to retreat to its arid *heimat*. (...) Tigray has no more modern agriculture and industry, the infrastructure is destroyed (...) The map of Greater Tigray was twice as large as the current poor Tigray” (4). Amhara irredentism (sensu 5) indeed had been one of the drivers of the war against Tigray.

Giovanni Ellero (6) hinted already at identity issues and territorial conquest in one of Western Tigray’s districts called Welkait (see Fig. 1), in the early 20th Century. Two verses from his article can be used to summarize it.

To characterise the indomitable character of the Welkait people, Ellero mentioned a verse commonly used by the Welkait farmers:

ዓደይ ትግራይ፡ ማሕረሰይ ወልቃይት
 ላሕመይ ሕንጊድ፡ ሰበይተይ ኮራይት
 ተራኺበን ክልተ ኣራዊት (7),

contextually translated from Tigrinya as:

My land is Tigray, my croplands Welkait
My cow is wild, my wife angry
Now, the two have joined their forces

Reversely, the Gondarines had this verse:

ወልቃይት ፅገዴ ሰሜን ኣርማጭሆ
 ኣልገዛም ኣልሽ፡ ተገዛሽ እነሆ,

translated from Amharic as:

Welkait, Tseghedie, Semien, and Armachoho
You said “I will not surrender” and yet! You have been subjugated (8)

In an interesting webinar on 13 April 2022 at the *Wissenschaftlicher Arbeitskreis Horn von Afrika*, Prof. Wolbert Smidt (9) showed for the first time extracts of a map that contradicts the official Gondarine narrative of the history of Western Tigray, in which it is claimed that “Welkait has always belonged to Amhara” (5). A detailed search brought about several maps of the mid-19th Century, in which Western Tigray is clearly mapped as part of the then Tigray confederation. Two representative maps are:

Weiland, C.F., 1841. Das nordoestliche Africa oder Aegypten, Nubien, Habesch, Kordofan und Dar-Fur, 1:5 000 000. Weimar: Verlage des geograph. Instituts [in German]. A scan of this map may be accessed and downloaded from the David Rumsey Center at Stanford University (<https://www.davidrumsey.com/luna/servlet/detail/RUMSEY~8~1~280071~90053341:Northeastern-Africa-or-Egypt,-Eritr>).

Handtke, F.H., 1849. Nordöstliches Afrika, Ca. 1:5 600 000. In: Sohr, K., Supplement-Band zum Hand-Atlas der neueren Erdbeschreibung, 85. Flemming, Glogau/Głogów and Leipzig [in German]. Scans of this map may be downloaded from repositories at Estonia’s national library (<https://www.digar.ee/arhiiv/nlib-digar:429790>) and at David Rumsey (<https://www.davidrumsey.com/luna/servlet/detail/RUMSEY~8~1~33543~1171029:Composite—NO-Afrika->).

Historical maps of the Horn provide a lot of information about toponyms, regional names, and the territorial extent of groups, as well as local ideas of boundaries and routes, political claims overlapping, and ethnic conflicts and interactions. They were not only the work of visiting cartographers and scholars; they were the outcome of intensive local assistance and contacts

with seasoned local partners who were experts in territorial knowledge and sociopolitical practices (9). Besides, such maps allow pointing sometimes at different co-eval perceptions of territorial control. This relates not only to the position of internal boundaries but also to the extent of some territories that were very remote at that time, such as Mezaga.

On maps, boundaries will appear as lines, but the reality in Ethiopia is that it are also zones where a broad cooperation and interaction between ethnic groups takes place (10).

Methods

Historical maps have been retrieved from three specialised online repositories: The David Rumsey Historical Map Collection at Stanford (<https://www.davidrumsey.com>), the AfriTerra collection (<https://afriterr.org/>), a private philanthropic foundation in Boston (MA, USA), and the Ethiomap repository (<https://ethiomap.huma-num.fr>), a project by the École des Hautes Études en Sciences Sociales, Paris (France); Forschungszentrum Gotha der Universität Erfurt (Germany); Centre Français des Études Éthiopiennes (Ethiopia); and Mekelle University (Ethiopia). Additional maps were obtained from other online map collections (UBBasel, Switzerland; Atlas UGent, Belgium; British Library; Istituto Geografico

Militare Italiano; Library of Congress; Gallica Digital Library; African Studies Centre Leiden; University of Illinois; Staatsbibliothek zu Berlin; Berkeley University, The London Library; Smithsonian Library; U. Columbia), as well as infold maps in books held at various libraries.

Only co-eval maps were used, i.e. maps that are contemporary with the displayed geography. All maps in the dataset are formally kept in well-established repositories (Table 1). No secondary sources, nor maps drawn in later periods were used. The language maps (at the end of the dataset) were mostly scanned by ourselves from the original works.

Table 1. Overview of historical maps in this dataset

	Number of maps	Poor accuracy	Good accuracy	Internal borders shown	Position of lettering suggests territorial control	Number of maps used in the analysis
15 th - 17 th C.	16	6	10	4	5	9
18 th C.	19	0	19	13	3	16
19 th C.	97	0	97	31	20	51
20 th C.	33	0	33	13	4	17
Total	165	6	159	54	32	93

From each map, we extracted the area comprised between 35°40' and 42°20'E, 11°30' and 15°20'N. The historical maps were organised in chronological order. Each map was screened for representation (or absence) of borders, or possible positioning of lettering representing sway or territorial control. Especially in the oldest maps, the projection is often distorted and distances not proportional. In such cases, relative positions with respect to rivers and mountains were verified. Descriptive statistics on the dataset as a whole are presented. The meta-analysis of the maps is also summarised in a graphical way, using timelines.

Thirty-two language maps (1903-2014) were retrieved from linguistic works as well as Ethiopian atlases. Maps representing only the extent of Semitic

Quantitative meta-analysis

One hundred sixty-five co-eval historical maps were retrieved, spanning the period 1475-1967. Contrary to common belief, the name “Amhara” is used as a territorial unit since 1640, with the exception of the years 1944-1990.

Out of the 165 maps, 159 provide sufficient precision and detail to be analysed, but six maps had very poor locational accuracy and were not used in the descriptive statistics (period 1656-1695).

On 61 maps, internal borders within “Habesch” or “Abyssinia” are drawn. On the other hand, on another 98 maps, no boundary between Tigray and Amhara/Gondar/Begemder is established, but on 32 of these the position of lettering allows estimating the location of the border (Table 1). Hence, in total 93 maps could be examined for the location of internal borders.

languages without precisions on the Amharic-Tigrinya interface, such as Beke's (11) or Borreli's maps (12), were not incorporated in the dataset. The language maps were interpreted as a separate set, since the extent of a language does not necessarily fit with boundaries of political control. Particularly, we verified which were the languages of the communities in Western Tigray, as mapped by the different authors, who were often senior linguists. To enhance its accessibility, we have also summarised a book written in Italian and with high locational accuracy (considering it as an additional map): the field notes on Welkait by ethnographer Giovanni Ellero, recorded in 1939-1940 (13).

On 57 maps, spanning the period 1570-1941, the boundary coincides with the crestline of the Simien mountains (31 maps, 33%), is established south of Simien (22 maps, 24%), or between Simien and Tekeze (four maps, 4%). Cartographers de L'Isle (1707), Bonne (1782) or Cassini (1798) mapped Tigray's southern border close to Chelga (= Aykel) and Emfraz, two towns that are west and southeast of Gondar. Overall, on more than half of the analysed maps, large territories southwest of Tekeze River are mapped as part of Tigray (Fig. 2).

On 19 maps (20%), spanning the periods 1844-1847, 1860-1872, 1891-1896 and 1942-1990, the boundary between Tigray, and Amhara/Begemder closely follows the Tekeze River.

Fig. 2. Location of the border between Tigray/Tigrai/Tigre and Amhara/Gondar/Begemder, according to historical maps (n = 93). Every dot represents a map in the dataset. Gaps between subsequent maps must be understood as “no information” or “period of shifting sway”. Conflicting display of territorial control in certain periods points to different information by cartographers. The power of such a large dataset is that the overall picture of the situation can be better grasped.

On 66 maps, the territorial control of Welkait is clearly indicated. On 24 of those maps, spanning the periods 1683-1693 and 1790-1838 and some isolated moments, Welkait is mapped neither as part of Tigray, nor of Amhara/Begemder (Fig. 3). On 26 other maps (39%), Welkait is explicitly included within a larger Tigray confederation (periods 1707-1784 and 1844-1886, and again briefly in 1939-1941); it is mapped as part of Amhara on 24% of the maps, i.e. in 1844, 1860-1867, 1891-1896 (four maps), 1909, 1925, 1938 and from 1942-1990 (six maps).

Whereas the study area was mapped in detail as Tigrinya speaking as early as 1903 (14), maps by Checchi et al (1906, republished in 1912) and Cohen (1924, republished in 1936) displayed the Amharic language up to the

Tekeze River (15-18). Starting 1921, Conti Rossini (19, 20) however mapped the Tigrinya language on both sides of the Tekeze, which remains a clear pattern on all subsequent linguistic maps. Two major ethnographic fieldwork campaigns by Ellero (1939-1940) (13) and Simoons (1960) (21) indeed recorded the whole area between the Tekeze (Setit) River and Angareb River as Tigrinya speaking, with passive knowledge of the administrative language Amharic. Detailed maps by Bryan (22), Perham (23), Trimingham (24), Leslau (25), Kuls (26) and especially Bender et al. (1976) (27) have become widely accepted among linguists and consistently map the area as Tigrinya speaking. The latter map was also reproduced in the authoritative Encyclopaedia Aethiopia (Volume V, 2014) (28).

Fig. 3. Territorial control of Welkait, according to historical maps ($n = 66$). Every dot represents a map in the dataset.

Discussion

Welkait was not “always”, rather “occasionally” part of Amhara

Overall, these maps demonstrate that the argument that Welkait was *always* a part of Begemdir or Amhara is not based on evidence, apart from a territorial reorganisation in the mid-twentieth century (29, 30). Indeed, the Abyssinian emperors Menelik and Haile Selassie divided the country into provinces, replacing territories that were formerly semi-autonomously governed. As colonial powers did elsewhere, Haile Selassie cut into these existing territories and used this territorial reorganisation as a way to reward his allies. The resulting provinces were hence constructed along the strength of local powers (zones of influence of major towns), regardless of ethnic composition. For instance, the northern third of Haile Selassie’s

Gondar province was inhabited by Tigrinya speaking population (Fig. 4); the Dejena mountain range in Welkait (up to 2700 metres high) became, around 1980, the main base for Tigray resistance against the Derg regime that was in power at the time (31). A rare communication document between Derg’s military command and the Ministry of Defense, dating back to 1984 has been retrieved, where they lament that the population of Welkait and Tsegede supports the TPLF, because the people are Tigrinya speakers (32).

The numerous historical maps that show Welkait, Tsegede, Tselemti and adjacent districts (see Fig. 1) as part of Tigray were systematically omitted in Achamyelch Tamiru’s (5) review justifying Amhara nationalist claims on the area.

Fig. 4. Provinces and ethno-linguistic settlement patterns in northern Ethiopia, after by Trimingham (1965) (24), republished by Westphal (33). The Gondar province extended from Lake Tana up to the then province of Eritrea, with the Tekeze River forming the boundary. Besides a majority of Amharic speakers, Gondar comprised large areas inhabited by Tigrinya and Gumuz speakers, as well as Kwara, Kemant, Kayla and Yaju Oromo (in the eastern part of Gondar province). Population groups in the 1965 Tigray Province comprised Tigrinya speakers, Saho, Afar and Raya Oromo. Provincial capitals Gondar, Mekelle and Asmara are represented by large dots. Eritrea has since become an independent state. The post-1992 Tigray region encompasses the Tigrinya-speaking areas of Ethiopia.

The current extent of the Tigray Region is in line with language maps

In contrast, contemporary Tigray is a valid territory, whose legitimacy stems from the intention of modern federalism to create federated states on a

new basis not derived from concepts of the Ethiopian empire-state (*sensu* 34). In 1991-4, when the boundaries of the Ethiopian federal regions, including those of the Tigray Region were established, local self-determination was way more important than historical maps (29). Remarkably, 27 out of the 33 language maps of the Ethiopian state sustain the current extent of the Tigray region. As an exception among language maps (pages 187 to 226), Levine's (35) map (page 210) shows an extent of the Amhara language up to the Tekeze river. Ever since publishing the first edition of his "Greater Ethiopia – the evolution of a multiethnic society", Levine encountered much criticism for his vision of Ethiopia as a 'single societal system' and his advocacy for benefits of Menelik's conquests and Amhara dominance of the country under the cover of multi-ethnic evolution (29, 36). The other exception is the "Preliminary Atlas of Ethiopia" in 1962 (page 205), where Mesfin Woldemariam maps Tigrinya language southwest of Tekeze River, yet with relatively minor extent. In his comments related to the maps of religions and languages in Ethiopia, the author seems concerned that Orthodox Christian and Amhara extent are insufficiently represented, what may point to some bias. Hence, we consider these maps as "outliers" among all other language maps (since 1903) that show an extent of Tigrinya that fits with the borders of Western Tigray. On the maps, the Tigrinya-speaking area extends from the Sudanese border up to the Rift Valley escarpment at the east. Two major rivers cross the Tigrinya language area, the Mereb at north and the Tekeze in the southern part. The same language community lives on both sides of the rivers. This was also cartographed as such on four different maps established by organisms directly depending from the "Derg" military government, in 1977, 1979, 1985 and 1988 (pages 217 to 222).

Within Ethiopia, rivers appear seldom as ethno-linguistic borders. The rivers Abay, Awash, Kusa (Beles), Wabe Shebelle, Mereb, Gibe, and many more flow through the same linguistic area. Amhara nationalists frequently argue

that the Tekeze river constitutes an ethno-linguistic border. However, in Ethiopia and around the world, the same communities dwell across large rivers. In Ethiopia, only the 200 kilometres of the Blue Nile canyon form an ethno-linguistic boundary, though even this latter linguistic boundary is not sharp on Bender's (1976) map (27, 37).

On ethno-linguistic maps, boundaries will appear as lines, and at the scale of this map, these lines are strongly generalised, straightening sometimes convoluted boundaries and transition zones. The reality in Ethiopia is that boundaries are also zones where a broad cooperation and interaction between ethnic groups takes place (10). In addition to Tigrinya, the maps also show that Kunama is spoken on the southern shores of the lower Tekeze River.

The federalist approach is built into Ethiopia's legal constitutional framework: history is nowhere referred to in the constitution, as both Art 46.2 ('states shall be delimited on the basis of settlement patterns, language, identity and consent of the people concerned') and Art 39.5 ('a "nation nationality or people" for the purpose of this constitution, is a group of people who have or share a large measure of a common culture, or similar

customs, mutual intelligibility of language, belief in a common or related identities, a common psychological make-up, and who inhabit an identifiable, predominantly contiguous territory') make it clear that history or historical precedent are *not* acceptable legal bases either for the demarcation of states or for identifying the nations, nationalities and peoples which constitute legal right-bearers under the constitution.

As historical maps are a subject of research by the Ethiomap research project (38), with Wolbert Smidt working on maps of the Ethiopian highlands and northern territories, more findings on the context of these four centuries of maps are expected. Yet, there are clear major trends appearing from the meta-analysis of the historical maps.

Boundary timelines

Western Tigray has been inhabited by Tigrinya speaking populations and for the larger part of the last 300 years or more, as the maps show, it has been under Tigray jurisdiction, with a border running along or across the Simien massif (Fig. 5, Fig. 6).

Fig. 5. Timeline of the location of the boundary between Amhara/Begemder/Gondar and Tigray/Tigrai/Tigre, according to historical maps (n = 93). Individual maps are represented by dots, some of which are hidden by overlap. This timeline holds the same information as Fig. 2, displayed in such a way to represent the major tendencies as well as interruptions in them. Position of borders is represented with the same colours in Fig. 6. Hiatuses represent time steps for which no information is provided by historical maps.

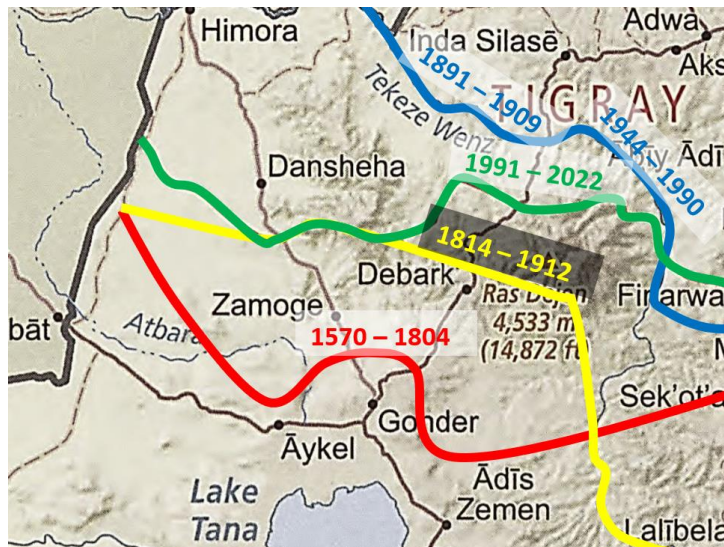

Fig. 6. Approximate location of the boundary between Amhara/ Begemder/ Gondar and Tigray/Tigrai/Tigre, according to historical maps ($n = 93$). Time steps and colours as in Fig. 5, and boundary courses in line with representative maps for the time steps: 1570 – 1804 (red, Bonne 1782); 1814 – 1912 (yellow, Handtke 1849); 1891 – 1909 and 1944 – 1990 (blue, De Agostini 1952); and current (green). The latter boundary course as well as the base map are from Library of Congress (2009).

Western Tigray has been inhabited by Tigrinya speaking populations and for the larger part of the last 300 years or more, as the maps show, it has been under Tigray jurisdiction, with a border running along or across the Simien massif (Fig. 5, Fig. 6). However, at times of upheavals like what is happening today (2020-2022), the territory has been briefly reorganized under either the Amhara polities or was by itself, as many provinces were under separate rulers. The general trend we see in the maps (Fig. 6), is supported by the Amharic verse on page 5 celebrating the subjugation of Welkait and surrounding districts.

Fig. 7. Screenshot of a contemporaneous mapping error by UNOCHA (2021), representing a territorial claim. In digital times such errors are rapidly intercepted and the map has been deleted (yet without acknowledging the mistake).

If one were to come in 50 years from now, some maps of 2020-2022 would appear as in 1844-1847, or 1891-1894, with Western Tigray displayed as part of Amhara. For instance, on June 10th, 2021, UNOCHA briefly published a map of Tigray (presumably using information provided by their staff in Addis Ababa) with large parts of Tigay incorporated in the Amhara Region (Fig. 7). Hence, the brief hiatuses in historical maps where Welkait ceased to be part of Tigray may be explained by situations similar to that of 2020-2022.

Conclusions

Historical cartography demonstrates that claims of long-standing Amhara dominance over Western Tigray (Welkait and surrounding districts) are not supported by historical facts and are therefore based on sand. The map that is presented as ‘historical Ethiopia, as it always was’ – the one on the back of exercise books in Ethiopia in Derg time – that map and its variants, appeared only in 1944.

If historical ownership arguments are to take place, they should include the full range of historical maps. Also, settlement of territorial conflicts should especially reflect the recent and sub-recent ethno-linguistic situation. This dataset supports such an approach.

Acknowledgments

We thank four internal reviewers, professionals who have a contextual understanding of the region, as well as all colleagues who forwarded maps as well as contextual information.

7. The term አራዊት [arawit], when used for people, points to someone who is not easy to handle.
8. The verse shows the sense of subjugating a region, a region that does not belong to them. If it were already under their jurisdiction, why would someone state "አልገዛም አልሽ" [algezam alsh] ("you said I will not surrender", "you" being here: Welkait, Tsegede, Simien, Armachiho, i.e., the contested lands of western Tigray and surrounding)? The verse indicates that at some points in time these areas were subjugated (by force or by decree) by Gondar.

Dataset

Maps in the dataset are reproduced as historical documents, without correcting the derogatory xenonyms for some ethnic groups. The maps are study objects, and we obviously do not endorse the undertakings of their authors (e.g. Derg regime, Italian invasion).

Martellus, c. 1475

One of the four known copies of the Egyptus Novelo map, held at Yale (39). North is to left. Pattern of rivers is more accurate than what appeared on later maps. Many place names and itineraries have been identified (40), but no hint to territorial control.

Henricus Martellus, c. 1475–80. Egyptus Novelo. Copy held at the Bibliothèque nationale de France https://link.springer.com/chapter/10.1007/978-3-319-76840-3_5/figures/2

Ortelius , 1570

Very poor locational accuracy. Note also the erroneous mapping of the river system. Blue Nile and Lake Tana not represented. The Atbara was assumed to meet the main Nile again upstream, and immediately splitting off again, creating “Guegere” or the “Island of Meroé” which persisted in maps for more than a century. The Tekezze is mapped already by Ortelius in 1570 (*Tagazi flu.*). On this map, and on other maps for more than a century, an area called **Tigremahon** is represented, west of Tekezze and including *Agoas populi* (Agaw people). In his early encyclopedia (Vol. 4, p. 452), Jacob Hofmann noted in 1698 that “Tigre is a kingdom in Africa, part of Abyssinia, whose viceroy is called Tigre mahon” (41). Hofmann cites the Portuguese Jesuit Jerónimo Lobo, who served in Ethiopia from 1625 to 1634, as his source (42). Also, by the mid-17th C., the Abyssinian lexicographer Abba Gorgoryos had observed maps with ‘Tigremahon’ and noted that this is not a proper place name but a rewording of ትግራይ ጦክነን [tigray mokonnen], (land under the) Governor of Tigray, as reported in Bruce’s *Travels* (43), p. 156. In his “Historia Aethiopica” of 1681 (44), Job Ludolf who worked closely with Abba Gorgoryos writes indeed that the name “Tigremahon is corrupted from Tigre Macuonen, the title of the viceroy” (Book I, Chapter 4, paragraphs 6 and 7). And Balthazar Telles (1710) insists in “The Travels of the Jesuits in Ethiopia” (p. 9) that “Tigremahon” is the same as “Tigre” (45). Hence, where “Tigremahon” is printed in large letters across a wider area on historical maps, we have interpreted this as an indication of Tigray’s territorial control.

Map Overview

Ortelius, A., 1570. Presbiteri Iohannis, Sive, Abissino; Rvm Imperii descriptio. Amsterdam. <https://catalog.afriterra.org/map/163>

Ortelius & Vrients, 1608 (various editions, de Jode, Mercator, Huygen, Ortelius, Hondius, Bertius, Van Linschoten, Quad & Bussemecher, 1578-1637)

Same geography was used in numerous maps at the time. For quantitative analysis, we considered all these maps as one, remarkably mapping “Tigremahon” west of *Tagazi flu.* (see previous map for details)

<https://www.davidrumsey.com/luna/servlet/detail/RUMSEY~8~1~275785~90048763:-125--Abissinorum->

De Almeida, 1640

Numerous smaller territories, including Tigre, Dambea, Amhara, and others in between them. Despite the large distortions, this is the first map that shows internal boundaries.

Map of Ethiopia and the Red Sea (c. 1640), in Manuel de Almeida's *Historia de Ethiopia a Alta ou Abassia*. Manuscript of the British Library. Photo from Beccari (46), Plate VII-VIII; <https://www.mjr.link/books--maps.html>. Map would depict the situation around 1630. For the context see Pennec (47). Many maps of the following century were partly based on de Almeida's map (46), including the wrong positioning of Abargale and Salaoa (west of Tacase in stead of east of the river).

Merian, 1650

Map inherited from Ortelius' time. No internal boundaries drawn, but the location of "Tigremahon" indicates Tigray governs also across Tekeze.

Map Overview	
Title	Aethiopia Superior vel Interior
Sub Title

Cartographers	Matthaeus/Matthaus Merian

Merian, M., 1650. Aethiopia Superior vel Interior. Frankfurt. <https://catalog.afriterra.org/map/585>

Sanson, 1656 (also 1659)

Mercator's map, with boundaries drawn; large Begemedri Regnum, up to Meroe; small Tigre Mahonur. Same important locational inaccuracy as the previous maps; note the large Meroe island (which is in reality a large peninsula between rivers (48)). River *Taccasus* is mapped, but points to the wrong river (Arekwa).

<https://www.davidrumsey.com/luna/servlet/detail/RUMSEY~8~1~294868~90065866:Partie-De-La-Haute-Aethiopie-ou-son>

Boisseau & Jollain, 1659

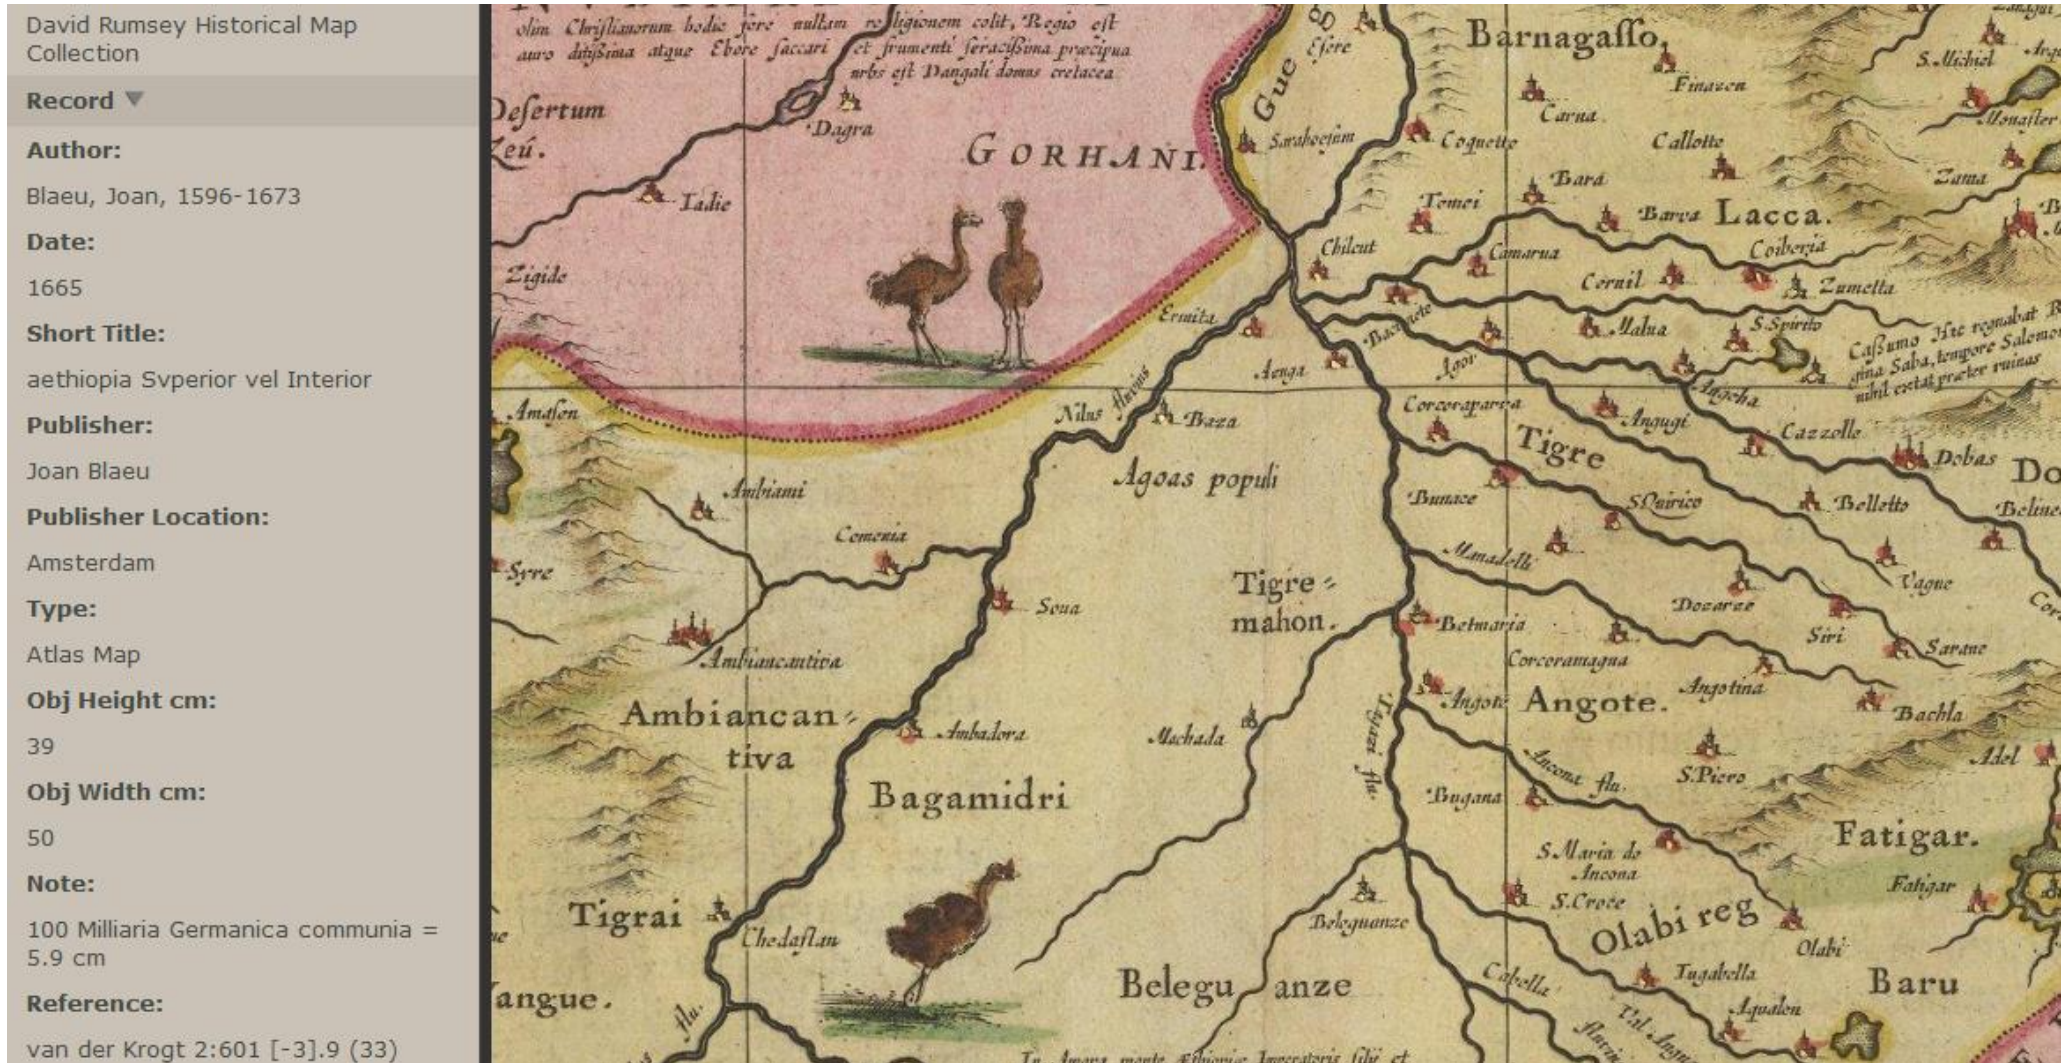

Many locational inaccuracies (see Amasen, Syre); boundaries not drawn.

<https://www.davidrumsey.com/luna/servlet/detail/RUMSEY~8~1~305808~90076154:Le-Royaume-Abyssin->

Blaeu, 1665, also in 1650 (reproduced by Hondius & Janssonius in 1663)

Largely based on Ortelius. Very poor locational accuracy. "Tigremahon" is mapped west of Tekeze. West of Bagamidri there is a non-identified "Tigrai".

<https://www.davidrumsey.com/luna/servlet/detail/RUMSEY~8~1~282839~90054346:aethiopia-Ssuperior-vel->

Sanson, 1669

Locational inaccuracies on stream network like Ortelius. Internal boundaries drawn within Abyssinia. Sanson maps a very wide Bagamedri, including “Agaofi Pop.” (Agaw) and the Meroe Island (“Guergere”).

Map Overview	
Title	A Mapp of the Higher and Lower Ethiopia Comprehending Ye Several Kingdomes. &c in Each. to Witt, in the Empire of the Abissines, the Coast of Zanguebar, Abes, and Aian, with the Kingdomes of Nubia, and Biafara, &c in the Lower Aethiopia the Kingdom of Congo, Ye empire of Monomotapa, and Monoemugy, Ye Coast and Lands of Cafres, and of this side Cape Negres, with the Isles of Madegascar, &c, designed by Monsr. https://ethiomap.huma-num.fr/public/?id_article=22

Another version of the map by Ludolf and Gorgoryos is held in a private collection (Clapham 2011) <https://www.anglo-ethiopian.org/publications/articles.php?type=L&reference=publications/articles/2011summer/mapping.php>

The map is coloured and internal boundaries are drawn, which are very different from the above, commonly reproduced map. The delimited territories have no names. This is the only known version of Ludolf's map that is coloured in this way. We are not aware of any study that would report whether the colouring was done at the moment of map preparation or in later years or centuries. At this stage, we use the first map (page 31) as primary Ludolf & Gorgoryos map in the meta-analysis.

Manesson-Mallet, 1683 (similar in 1685 and 1700)

Quite good relative position of hydrography. Size of lettering tends to indicate hierarchy in territorial control. "Tigre" spans Tacaze R. and includes "Samen" (smaller lettering).

Title

Empire des Abyssins.

Eschinardi, 1684

Despite locational inaccuracies, the overall physiography fits the real world. Many intermediate territories between Tigre and Bagamedri and Amahara. Olcait mapped as autonomous.

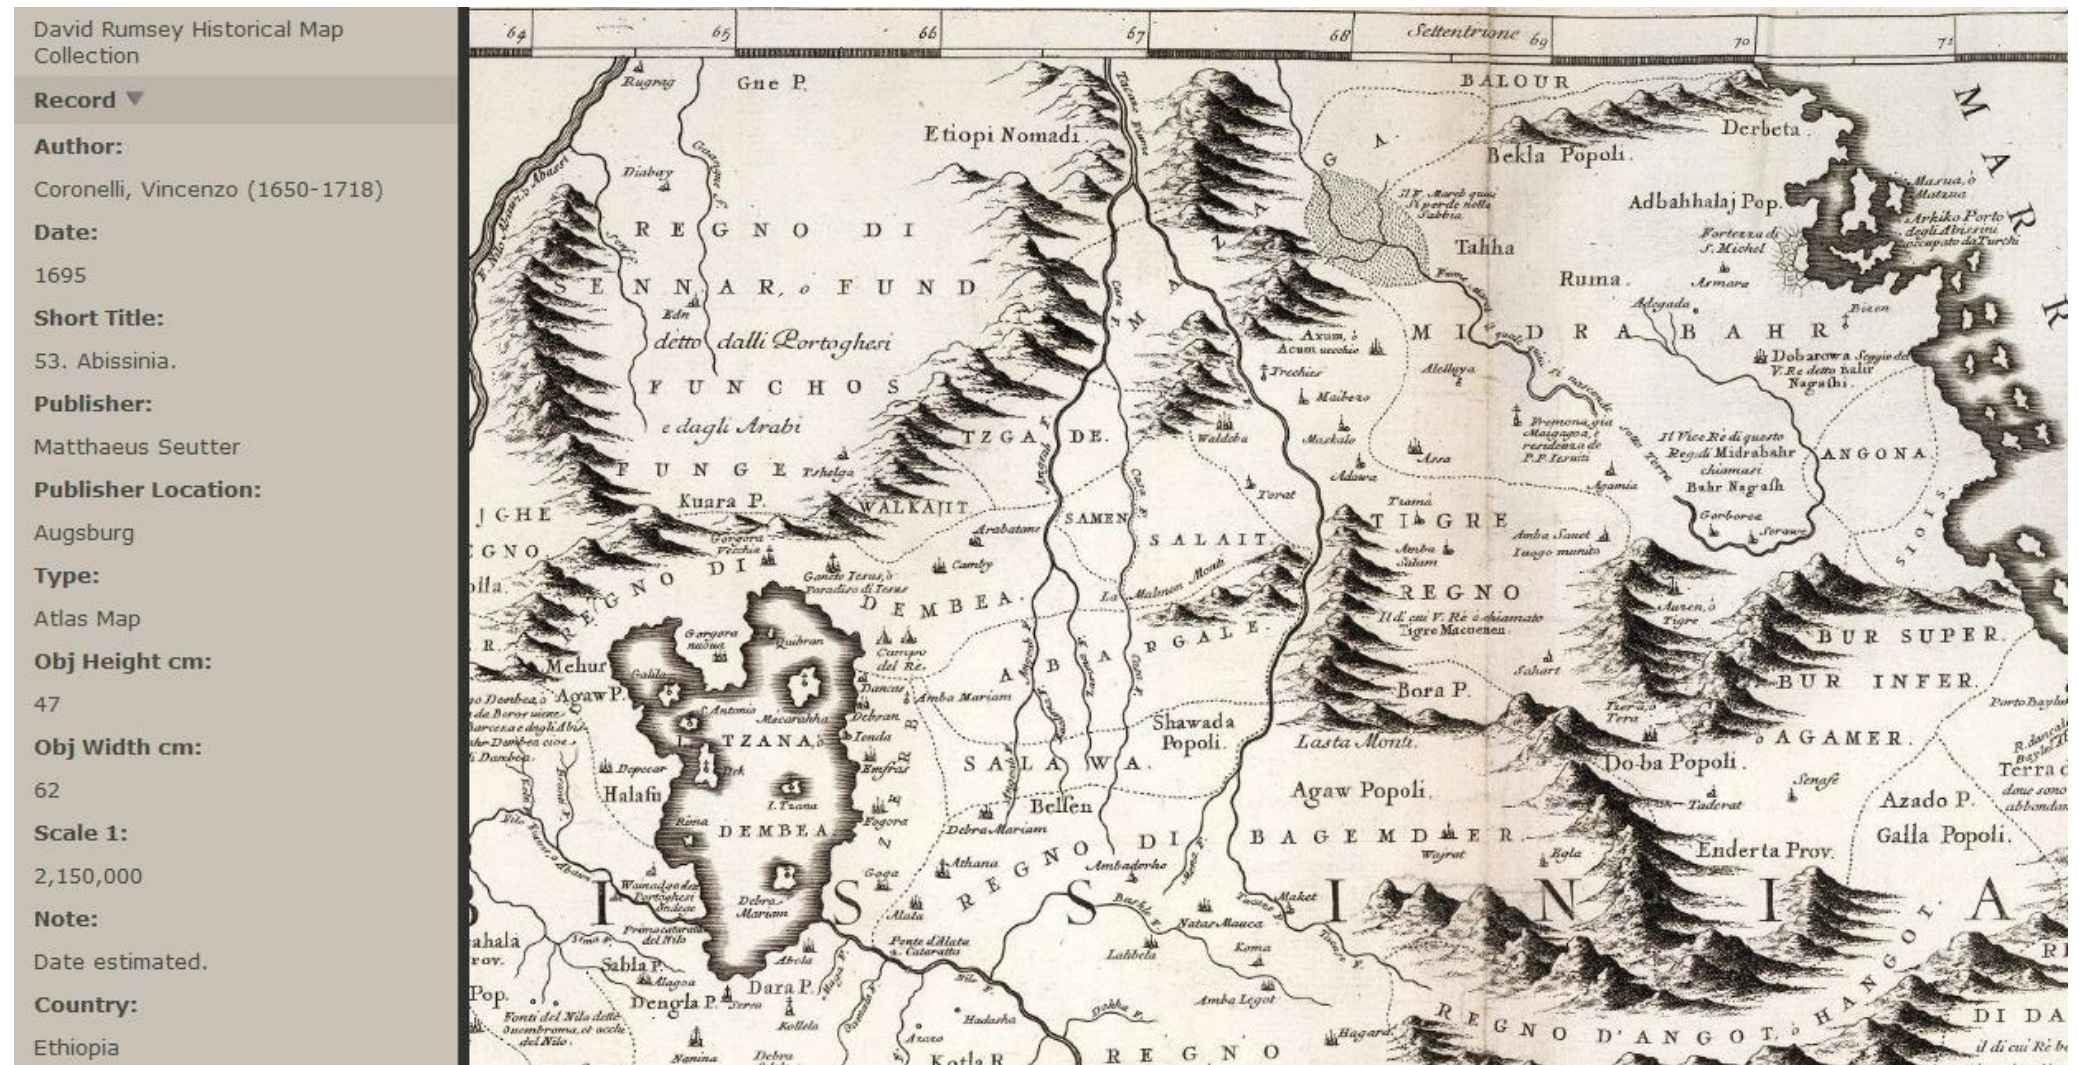

Map Overview	
Title	Imperii Abassini Tabvla Geographica, ex oculatis relationibus Patrum Soc les V aliorumque interse comparatis &c ad trutinam Regulæ geographicae examinatis reiectis ijs quae concordi eorumdemhistoriae que Mater est Geographiae repugnabant A Francisco Eschinardo S. Iesu

Valck & Schenck, 1700

Locational inaccuracies like Ortelius. No internal boundaries drawn within Abyssinia. Note names Tigremahon west of *Tagazi flu*. The map does not indicate how far this land “under the authority of the governor of Tigray” extends, but reasonably it is the wider area between Gorhani, Tigre and Bagamidri.

Combes & Tamisier, 1838

Numerous smaller territories with boundaries, and three main territories, Tigré, Semen and Amhara (boundaries do not allow to ascertain affiliations).

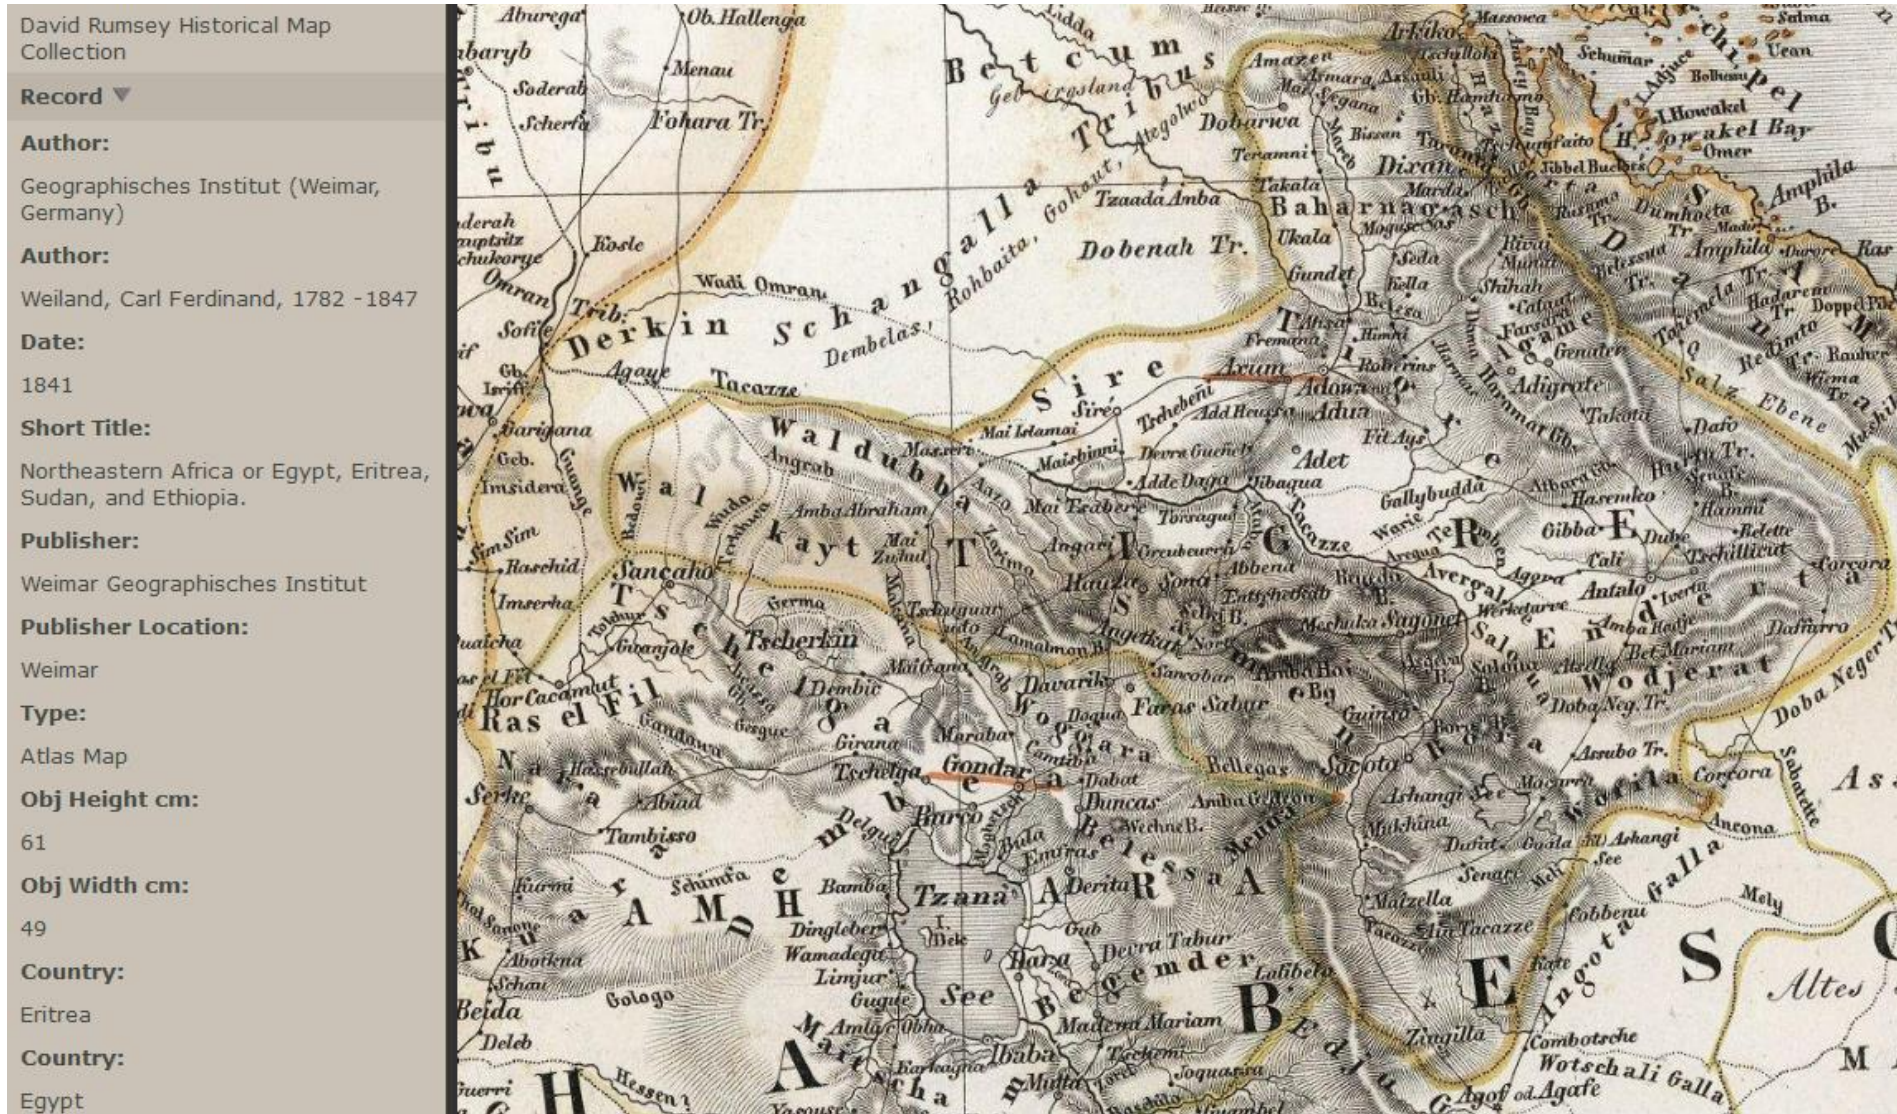

Carte de l'Abyssinie, du pays des Galla, de Choa et d'Ifat (Combes et Tamisier - 1838)

https://ethiomap.huma-num.fr/public/?id_article=44

Weiland, 1841

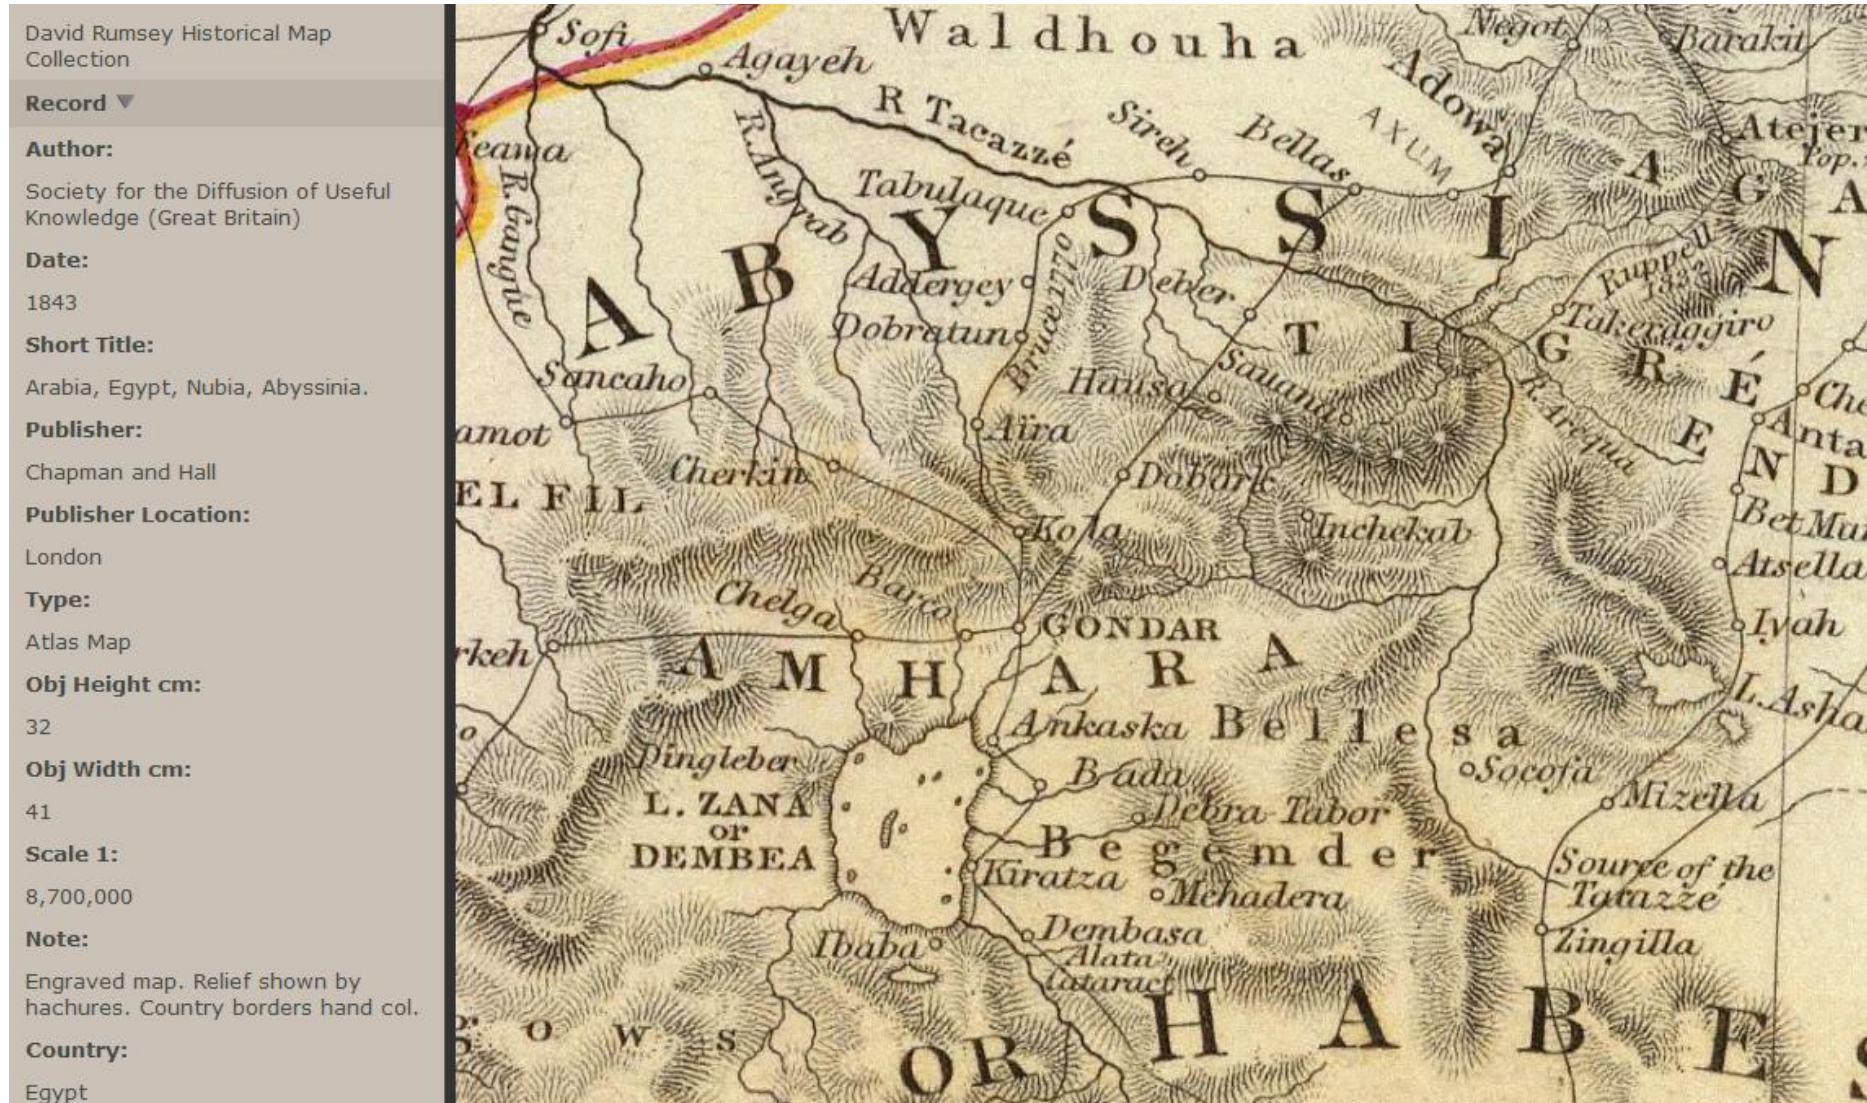

Internal border well south of Tacazze. Walkayt part of Tigre.

<https://www.davidrumsey.com/luna/servlet/detail/RUMSEY~8~1~280071~90053341:Northeastern-Africa-or-Egypt-Erit>

Society for the Diffusion of Useful Knowledge (GB), 1843 (also in 1865)

No internal borders drawn; lettering Tigré across Tekeze and Amhara north of Lake Tana, suggesting a border over Simien.

<https://www.davidrumsey.com/luna/servlet/detail/RUMSEY~8~1~20915~530016:Arabia,-Egypt,-Nubia,-Abyssinia->

Mc Queen & Isenberg, 1844

No boundaries; naming Tigre and Amhara suggests boundary is on Tekeze; Walkait a bit to the west. Data collection: 1839-1842 (see <https://www.abebooks.com/first-edition/Journals-Rev-Messrs-Isenberg-Krapf-Missionaries/30494935218/bd>)

Guèbrè Sellassié, Tèsfa Sellassié, De Coppet, 1909

This is based on the work of Menelik's chronicler Guèbrè Sellassié. Though published in 1930, the map refers to the period of Menelik's reign, more precisely 1909. Many elements taken from Rossetti (1907). At the position of the current Western Tigray, there were districts Oualqaït, Sèmién, etc., intermediate between Tigré and Béguè-Meder.

Consociazione Turistica Italiano, 1938

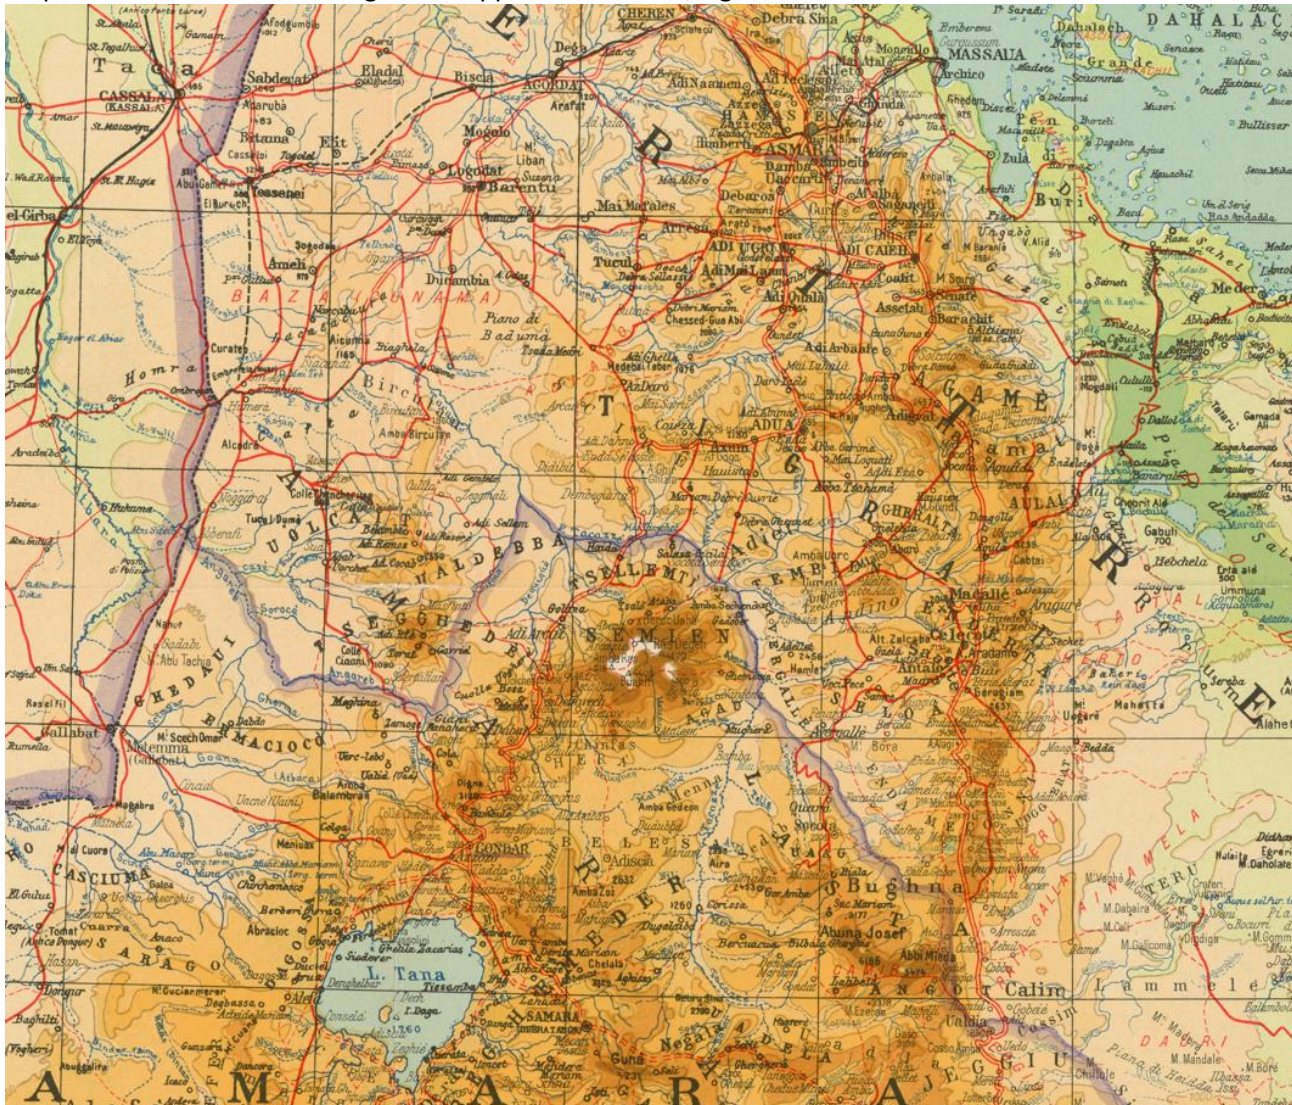

Widely published map. For a period of five years (1936-1941), most parts of the Horn of Africa were included in “Africa orientale Italiana” (AOI). Within this AOI, the Eritrean southern frontier lost its status of international boundary, as Eritrea was attached to Tigray, becoming a province of the newly formed AOI (49). The administrative borders are clearly represented on this map. Border between Eritrea/Tigray and Amara follows the Tekeze River. Numerous Italian maps published in 1936-1938 by IGMI but also by media display this course of the border between “Amara” and “Eritrea”. This situation was also reproduced on British/South African topographic maps of Ethiopia in the 1940s (50). Maps in 1939-1941 show a different situation.

https://catalyst.londonlibrary.co.uk/discovery/fulldisplay?docid=alma990004461790206436&context=L&vid=44LON_INST:LondonLib&lang=en&search_scope=MyInst_and_CI&adaptor=Local%20Search%20Engine&tab=Everything&query=any,contains,africa%20orientale%20italiana%201938&offset=0

Ministero dell'Africa Italiana, 1939

On 1 July 1939, the Italian coloniser made an administrative rearrangement: “Setit-Angareb” (Uolcalt) was included again with Eritrea/Tigray (Gov. Gen. Decree on 1 July 1939) (13, 51, 52). As of the second half of 1939, the change in administrative border between “Governo Eritrea” and “Governo Amara” is clearly represented on the Italian maps. Welkait and surroundings are mapped with Eritrea/Tigrai; Tselemti and Dima included in Amara. Compare to next page, and De Agostini, 1941.

Thomasten, ca. 1940 – fake map

Not used in the meta-analysis.

This map is often posted on social media as evidence that the Gonder-Tigray border has been on Tekeze since the time of the Abyssinian empire. The map shows numerous flaws. See non-existent “white settlement regions”, “Montevenoso”, “Colonia Vittoria”, railways and encroachment onto Sudan and Djibouti. The map is fake; it was created in 2009. Source is Ed Thomasten, a believer of Alternate History: <https://www.deviantart.com/edthomasten/art/Empire-of-Abyssinia-c-1940-145811981>. Colleagues fake mappers discuss the creation here: <https://www.deviantart.com/edthomasten/art/Empire-of-Abyssinia-c-1940-145811981>

De Agostini, 1941

Administrative border clearly represented. "Uolcalt" and surroundings mapped with Eritrea/Tigray; just east of it, Tselemti and Dima are mapped with the then Italian Amara province

HMSO, 1942

The maps in this book about the British warfare against the Italian army in Ethiopia reused the borders drawn on the 1938 Italian maps, and, hence, put the border between Eritrea/Tigre and Amara on Tekeze River.

Note that this reproduces the Meillet & Cohen (1924) "tentative" map

Ellero, 1939-1940. Ethnographic fieldwork

The notebooks of ethnographer Giovanni Ellero, holding field notes from Welkait, have been published as a book by Professors Dore, Mantel-Niečko and Taddia: “I Quaderni dal Wälqayt” (L’Harmattan Italia, 2005) (13).

Ellero was in Welkait in 1939-1940, where he was district administrator as part of the Italian occupying administration. He was taken prisoner by the British in 1941; his wife Pia Maria Pezzoli typed and organised the field notes when Ellero was prisoner and at the same time administrator in Eritrea under the supervision of S.F. Nadel SPO. In 1942 he was transferred to South Africa as prisoner of war, but he perished when the boat on which they travelled was sunk by the Japanese marine.

For his fieldwork, Ellero visited all villages of Welkait, and also part of Kafta. For every village he noted (among many other details) the number of inhabitants, the origin of the first inhabitants of the village, and the genealogy of how the inhabitants were related to the founders of the village. Language(s) practiced, religion, cropping system, and sometimes tales, habits and customs were also recorded. Ellero did not draw a language map, but his inventory is exhaustive. The notebooks included hand-drawn maps of all sub-districts visited (Fig. E1).

In almost all studied villages, the inhabitants remembered that, many generations earlier, their forefathers had migrated from a specific place of origin in the Tigray highlands; some villages were also inhabited by descendants of slaves, especially in the eastern plains (“Mezega Uolcalt”). In all villages, the people were reported to speak Tigrinya, with mostly passive knowledge of Amharic. Those who were literate wrote in Amharic; Ellero mentions the reason: all communication with the administration was in Amharic. The descendants of slaves had forgotten their original language, and all practiced Tigrinya for daily communication. However, the priests commonly preached in Amharic, as was common all over Ethiopia at the time.

Some examples:

(113-114) Belamba: “they speak Tigrinya, but Amharic is also understood. They write in Amharic due to the fact that the commanders were Amhara, and because Amharic is the official language”.

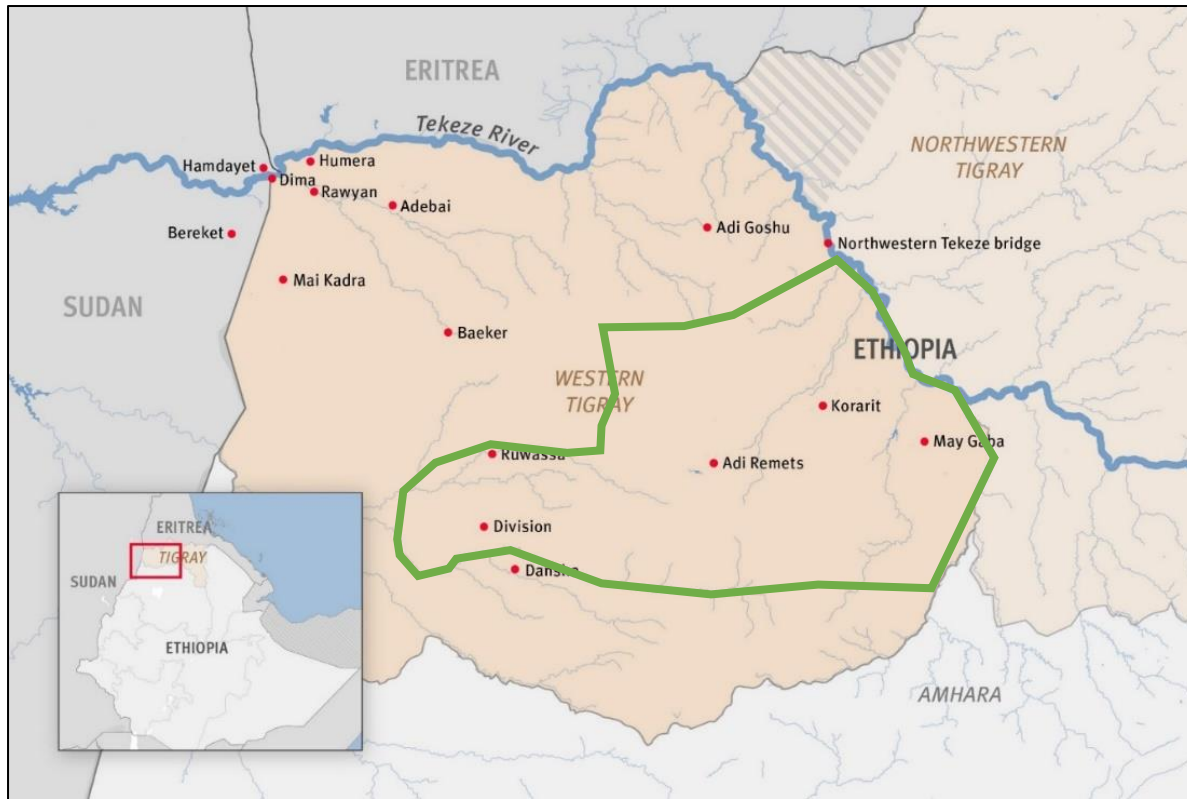

Fig. E2. Welkait in 1939-1940, according to Ellero's field notes (Fig. E1; generalised borders of Welkait in green colour). Here, every village was visited at the time by Ellero and his team; everywhere Tigrinya was the mother tongue; Amharic was understood and used at variable degrees. Base map © Human Rights Watch & Amnesty International, 2022 (1).

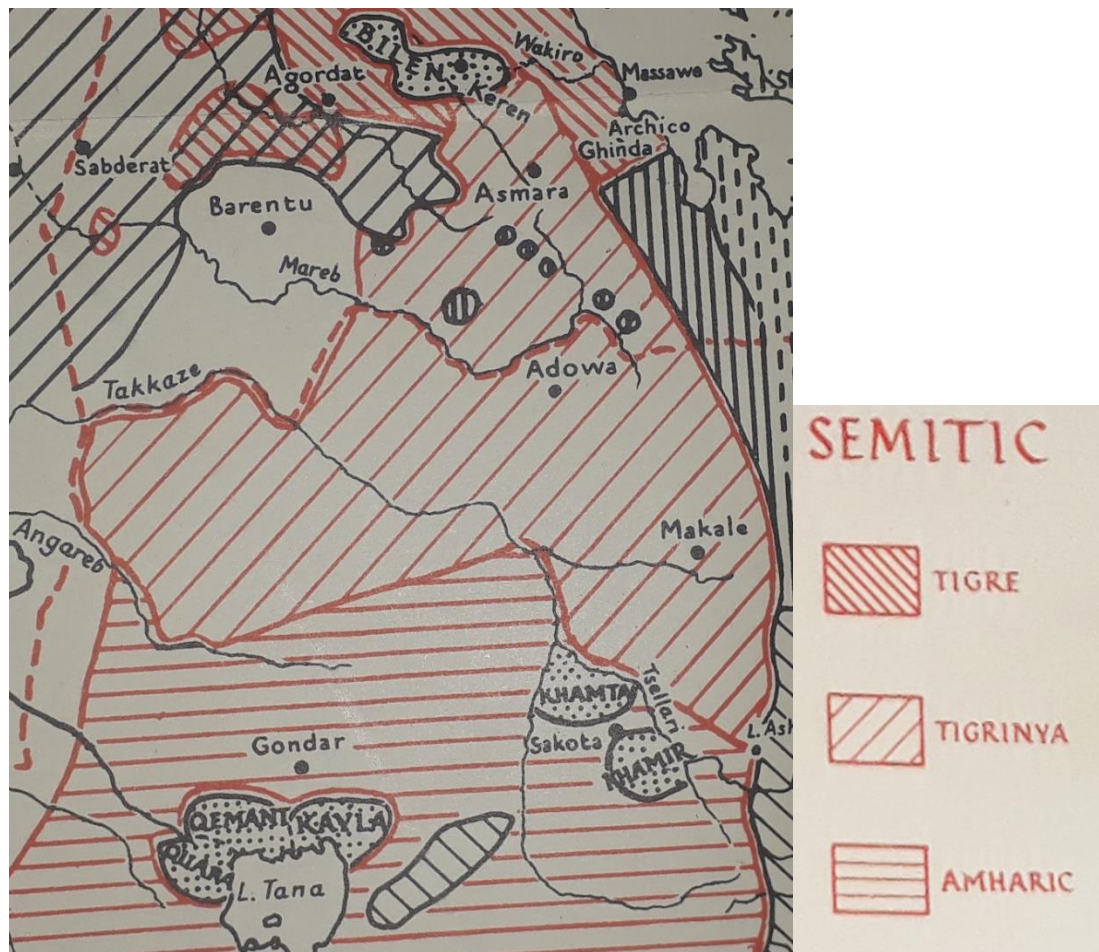

Pages 204-208 of the *Quaderni* hold a list of 116 place names with their etymology, obtained by Ellero and his translators. The etymology of most place names is of Tigrinya origin. Some exceptions for Addi Tinno (Oromo for a short person), Zua (Falasha), Batua Mariam (bible), In the whole list of place names, there are no locations that in 1939 held a name of Amharic origin. More specifically, among the 116 place names, there are

- 76 (more than half) locations named Addi ...
- 12 locations named Mai ...
- Selassa Aini (T: ሰላሳ ዓይን) – thirty eyes
- Seleste Codo (T: ስለስተ ኮዶ) – three fig trees, most probably *Ficus sur* (53)
- Agam (T: አጋም) – vernacular name for the shrub *Carissa edulis* (53)
- Edaga Hamus (T: ዕዳጋ ሃሙስ) – Thursday market
- Lahalai Uollel and Tahatai Uollel (T: ላዕለዋይ ዋለል; ታሕተዋይ ዋለል) – upper and lower part of Uollel village; the word “Uollel” according the inhabitants indicates a plain with a lot of grazing cattle
- Gual Emba (T: ዳል እምባ) – daughter of the mountain, typically used for a village on a hill, adjacent to a larger mountain
- Chessad Daga (T: ክሳድ ዕዳጋ) – market place on a mountain pass
- Chetri (T: ክትሪ) “Ketri”, river narrowing, by analogy used for mountain pass. See also current use of “ketri” for check dam.
- Many other place names, similarly transpiring the symbiosis between people and place may be discovered in the “Quaderni”, pp. 204-208.

In our understanding, this is the most detailed field investigation that has been done in the area by an ethnographer.

Bryan, 1948. Map of Semitic and Cushitic languages.

The southern border of the Tigrinya-speaking area is drawn as a straight line between the Angareb and Takkaze Rivers. Simoons (1960) draws it slightly curved. Bryan (1948) explicitly mentions that the strip to both sides of the southern border of Tigray is often a transitional (bilingual) zone.

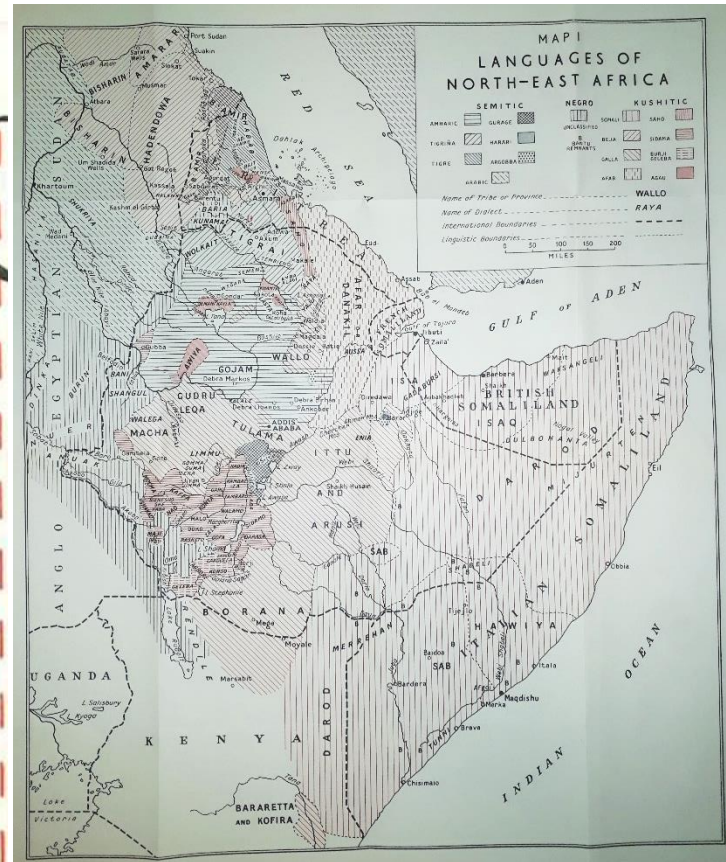

Semitic languages in red colours, Cushitic languages in black colours. Broken red lines represent international borders.

DATASET: HISTORICAL AND ETHNO-LINGUISTIC MAPS OF WESTERN TIGRAY - 202

Doresse, 1956. Semitic languages in Ethiopia.

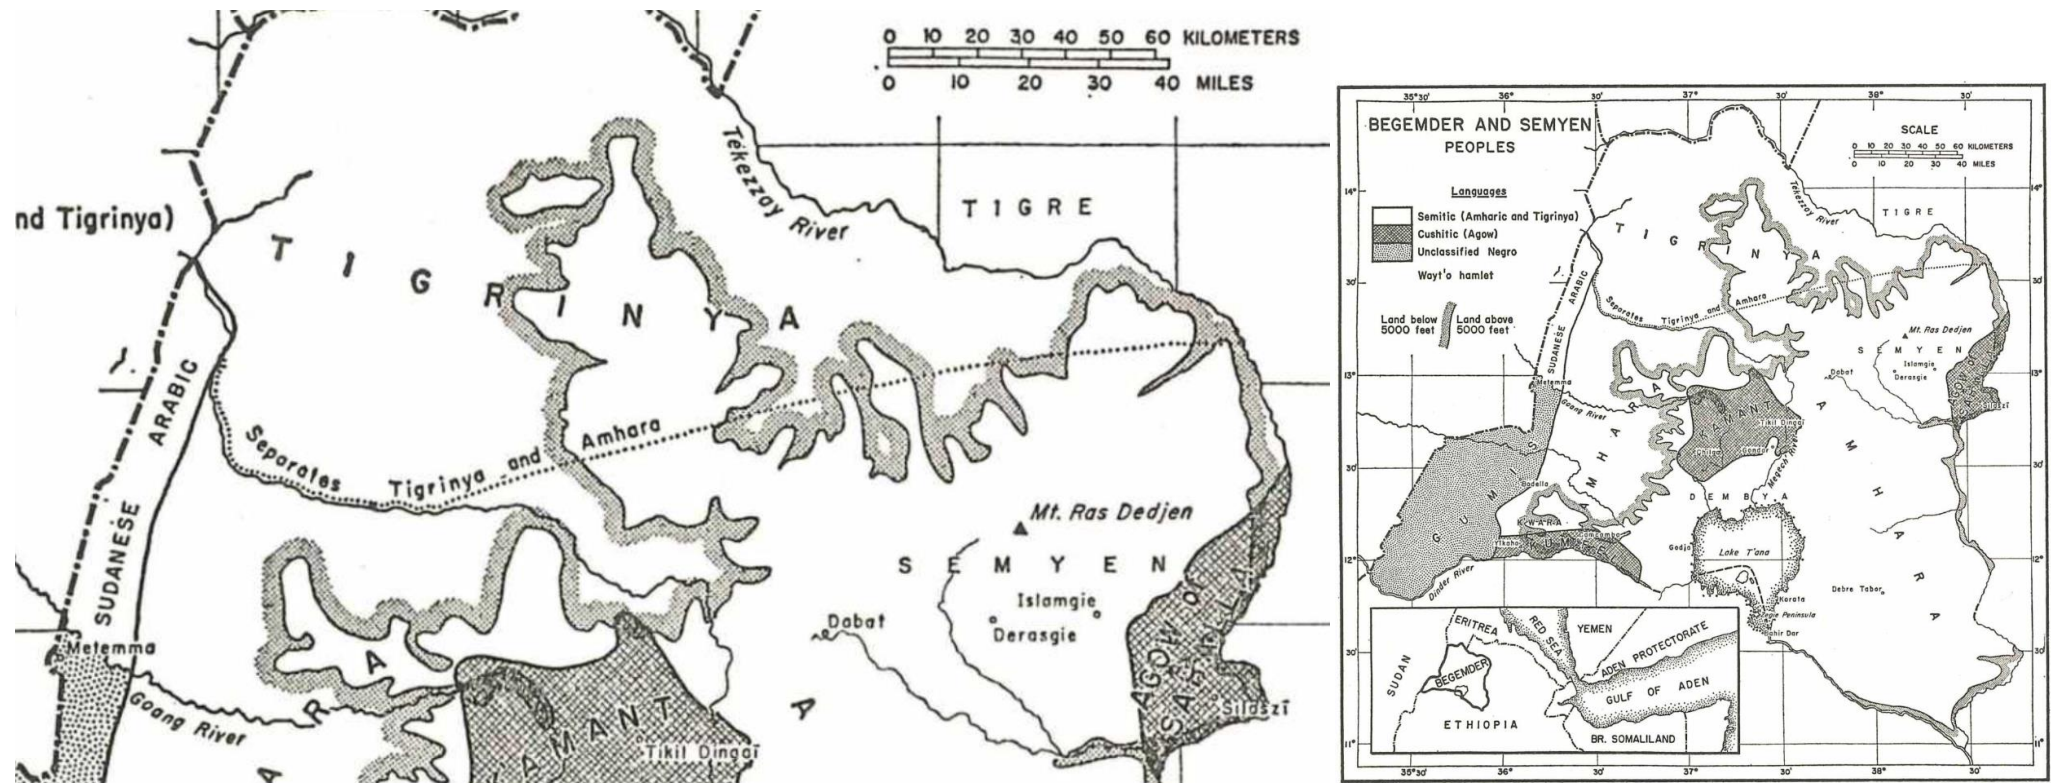

Doresse does not indicate the sources used to prepare this map, that shows Tigrinya spoken in the current Western Tigray, as well as south of it in the lowlands of Aramachiho up to the banks of Atbara River near Metemma. Contour lines with 1000 m interval in thin lines; rivers in thicker lines.

Doresse, J., 1956. Au pays de la reine de Saba – L'Ethiopie antique et moderne. Paris: Albert Guillot

Simoons, 1960. Begemder and Semyen, peoples.

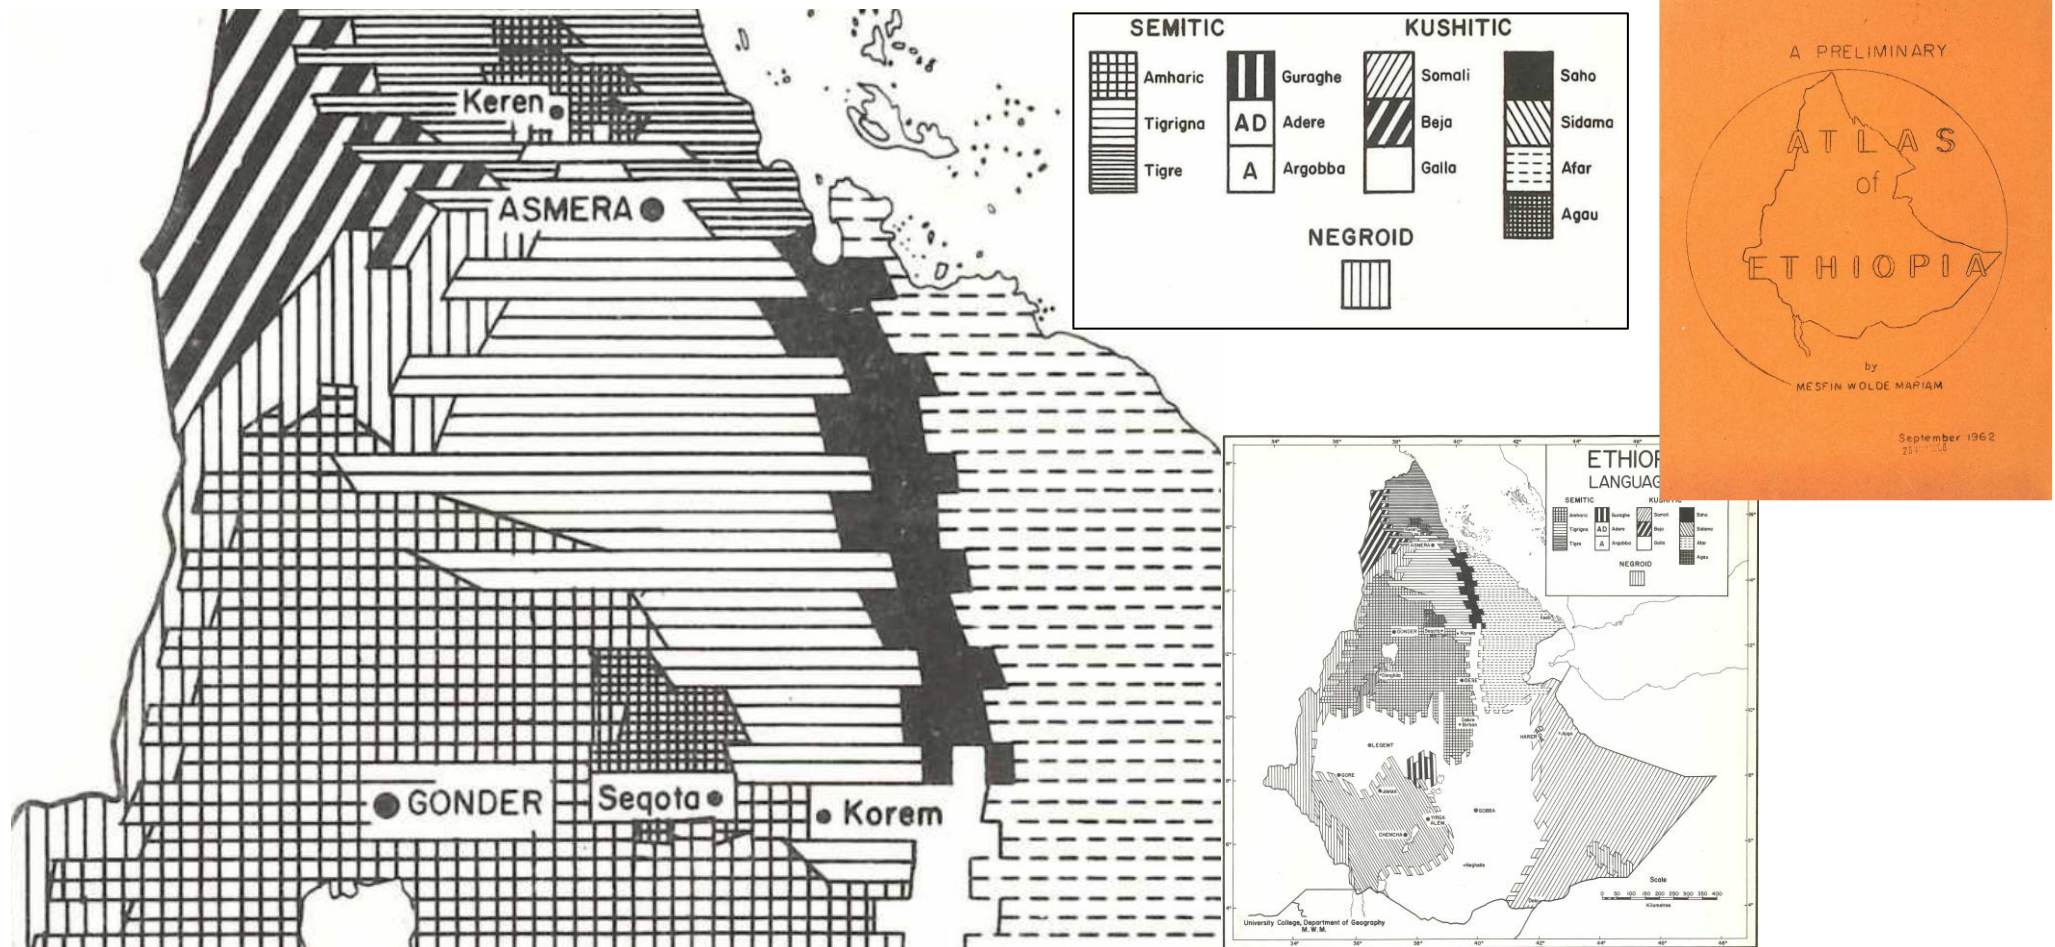

Tigrinya/Amharic language boundary drawn on a map displaying the political boundaries as they were in 1960. The northern one third of the then Begemder province inhabited by Tigrinya speakers. This fits closely with the current legal border between the Tigray and Amhara Regions.

Simoons, F.J., 1960. Northwest Ethiopia : peoples and economy. Madison (Wis): University of Wisconsin Press

Mesfin Woldemariam, 1962. A preliminary atlas of Ethiopia: Languages.

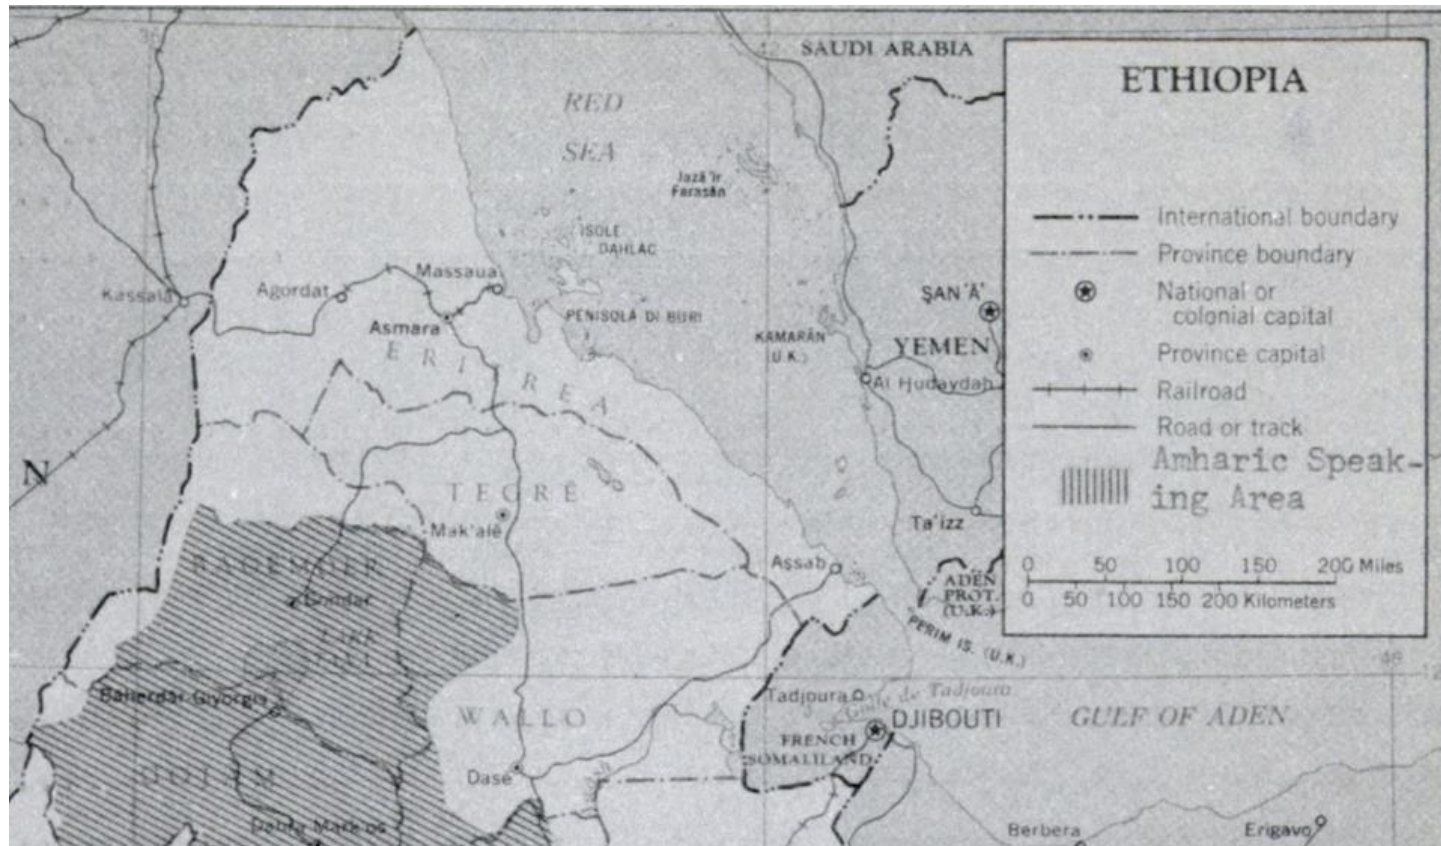

Source for language distribution not mentioned. Explanatory note with this map: "The attempt here is merely to show the distribution of the various language families and the major languages of each family. This is not because of any attempt to conceal the fact that there are many more dialects than are shown on the map but because an attempt has been made to avoid details and pretense to accuracy. For a better understanding and assessment it is necessary to look at this map with that of population density; otherwise one may fall easily into error". A similar note was written with the map of religions. Mesfin seemed to do a large effort to highlight Orthodox Christian and Amhara dominance of Ethiopia, what may downplay the significance of this map, which gives a minor place to the Tigrinya language in the area north of Gonder.

Mesfin Woldemariam, 1962. A preliminary atlas of Ethiopia. Addis Ababa.

Obolensky, Debebow, Mulugeta, 1964. Amharic speaking area

On this map, the northern part of the then Bagemder province is displayed as non-Amharic speaking area. That area corresponds to the current Western Tigray, as well as Tselemti and Dima woredas in Northwestern Tigray.

Kuls, 1972: Map of languages

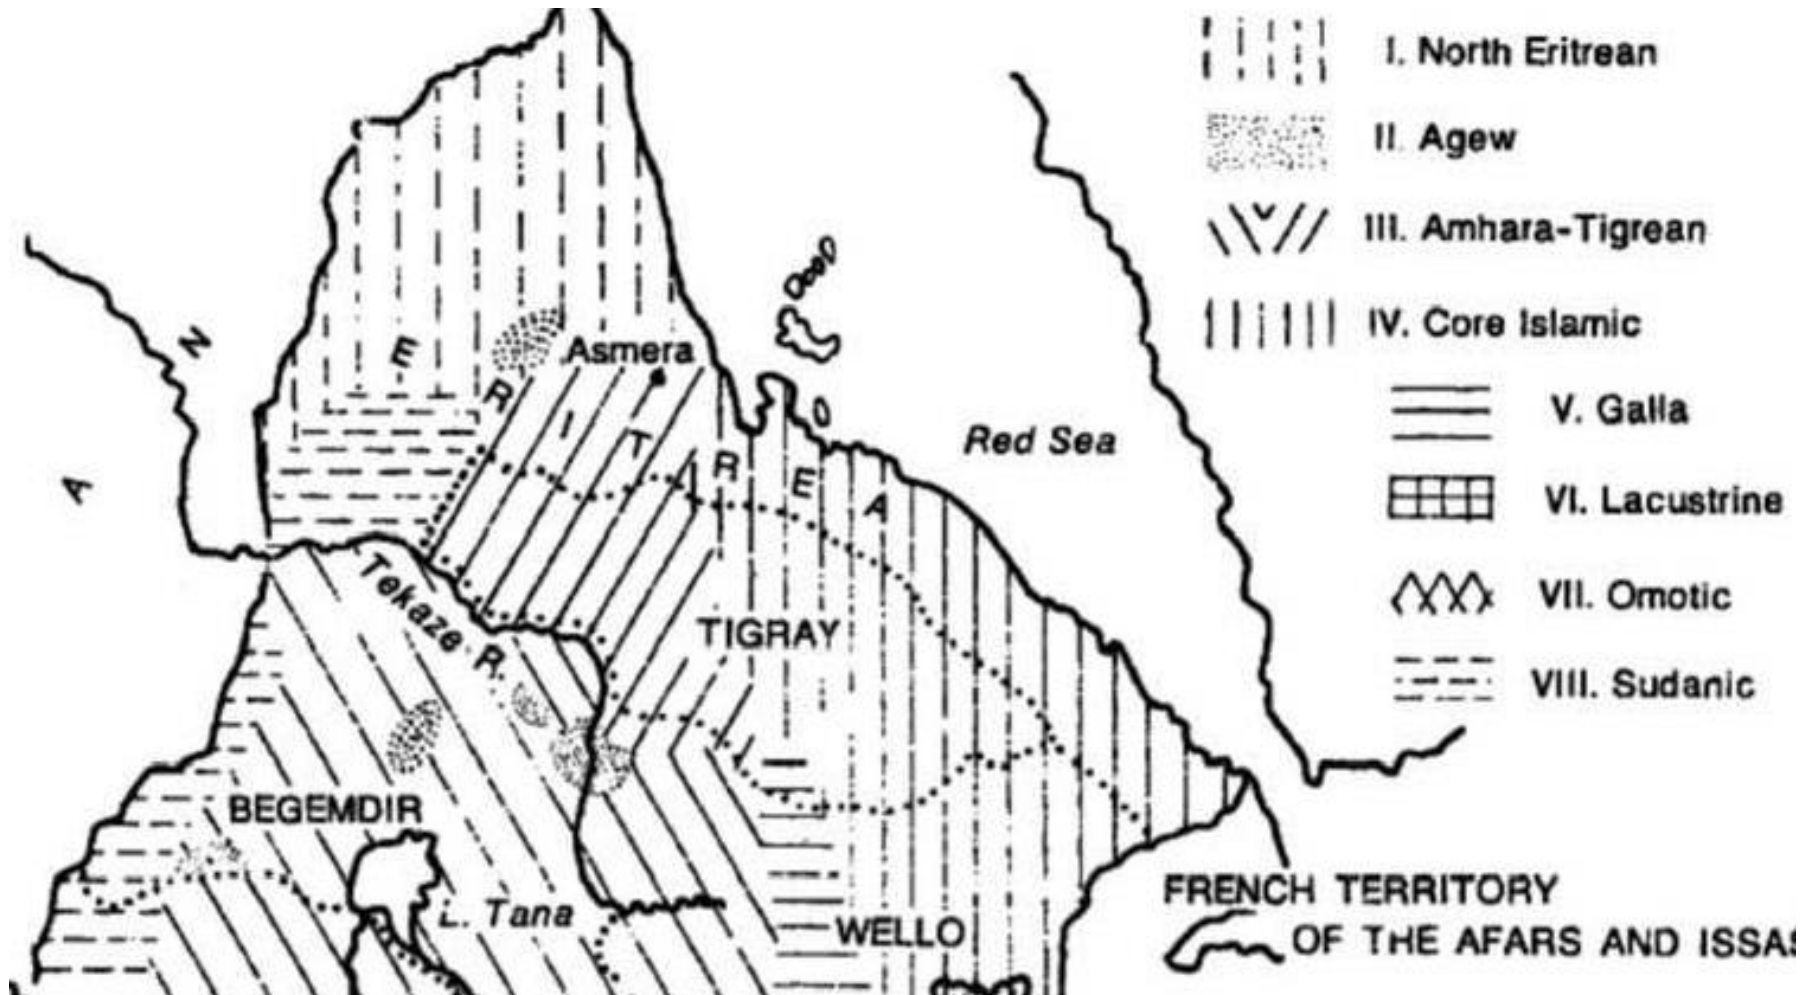

Tigrinya language with full East-West extent up to the Sudanese border, across the Tekeze River.

Schaller, K.F., Kuls, W., 1972. Äthiopien-Ethiopia. Eine geographisch-medizinische Landeskunde / A geomedical monograph. Geomedical monograph series, Heidelberg Akademie der Wissenschaften Math.-nat. Springer-Verlag Berlin, Heidelberg, New York.

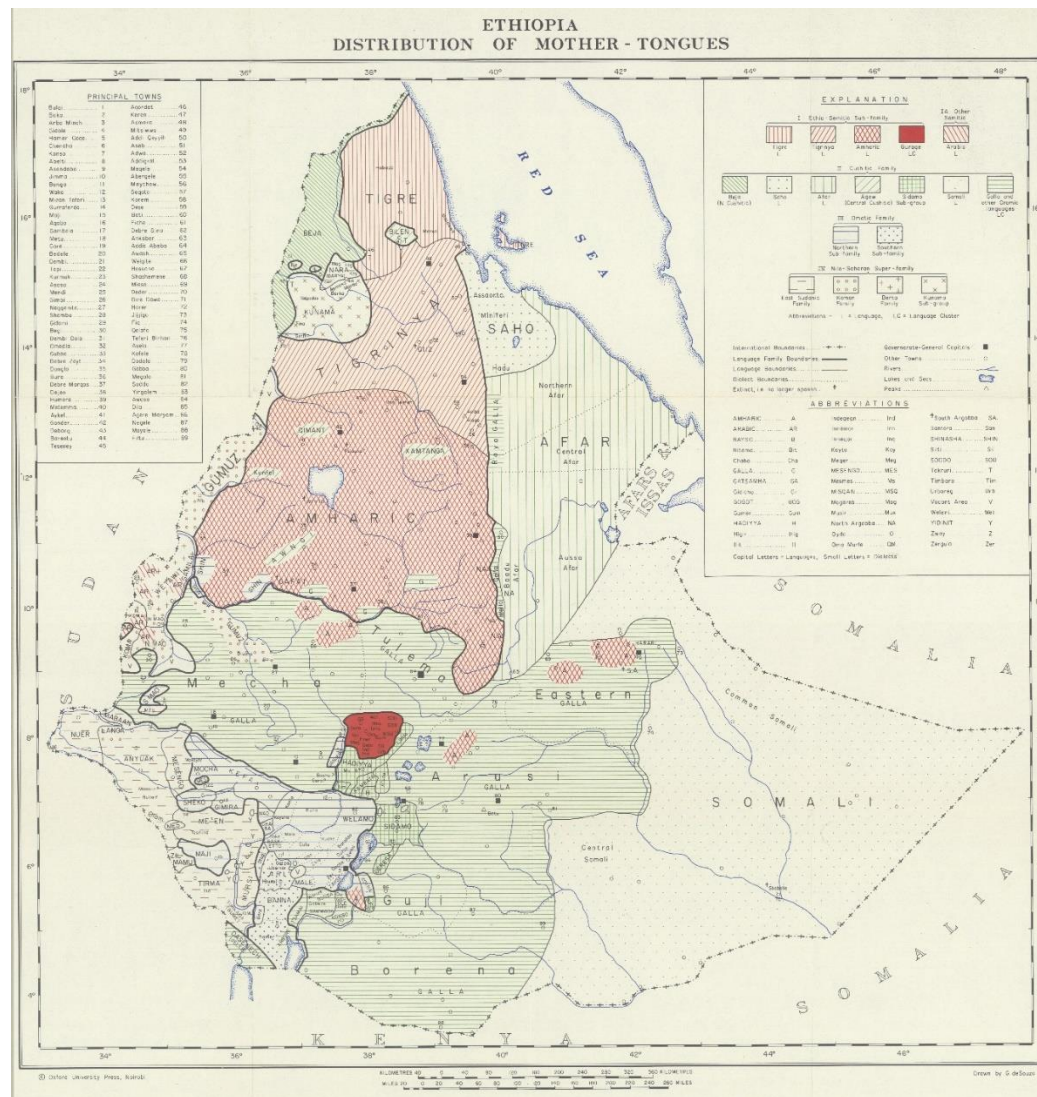

Levine, 1974: Language map

Besides an extent of Amhara language that is out of phase with all other language maps (pages 187 to 225), Levine's map holds numerous other inconsistencies. Tigre or Gurage are absent from the legend; dozens of Cushitic and Omotic ethnic groups as well as Gurage are lumped as "lacustrine"; Afar and Somali are merged into "core Islamic"; Amhara and Tigrean proposed for merger...

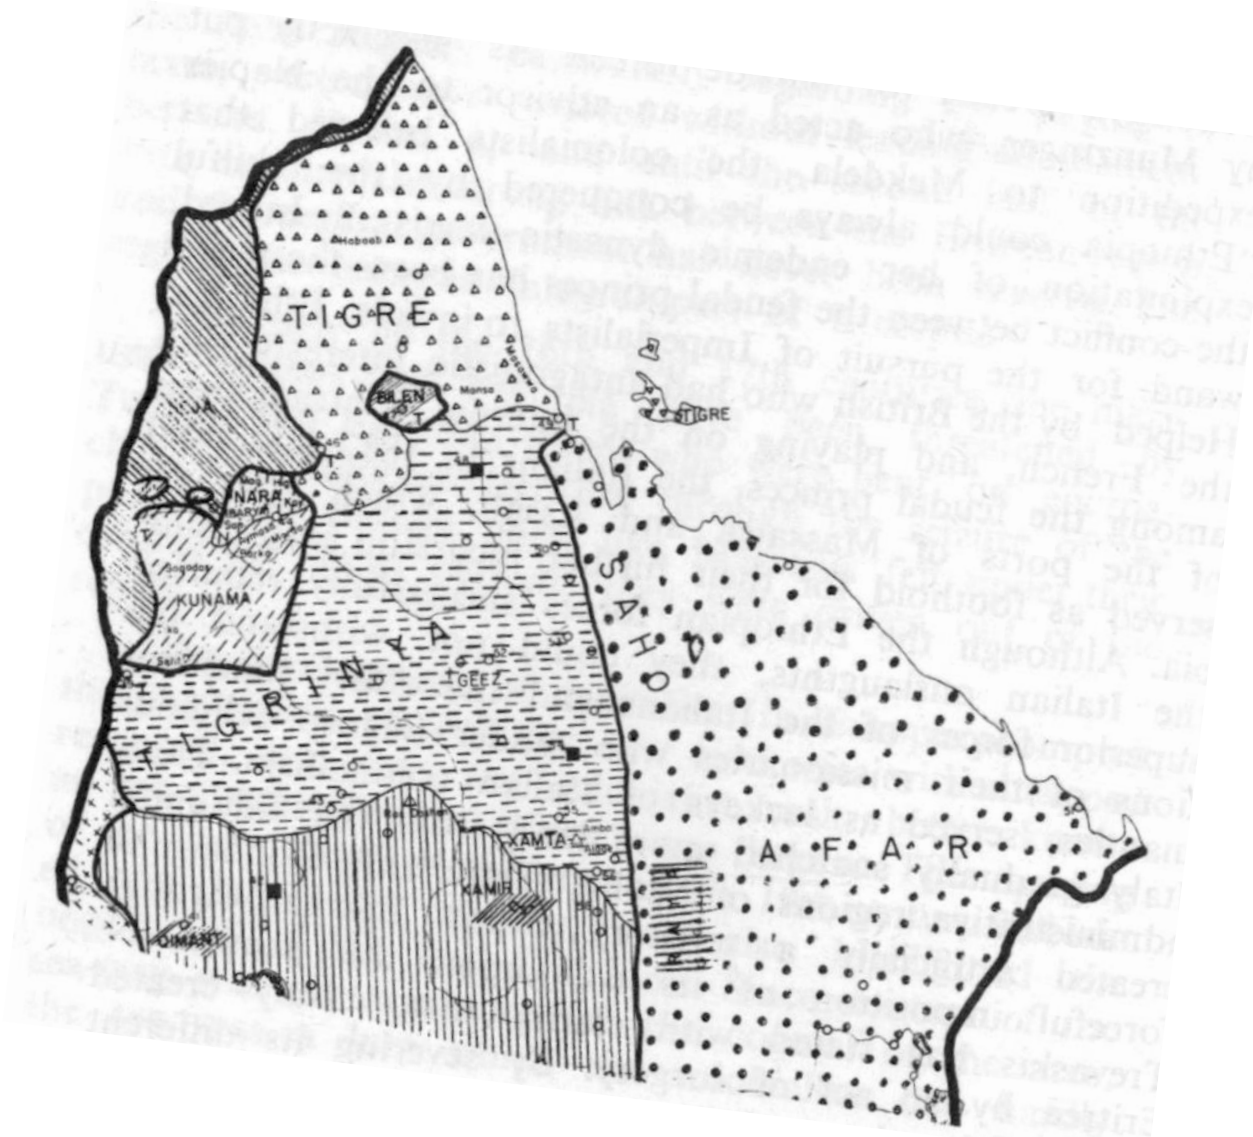

Levine D., 1974. Greater Ethiopia: The Evolution of a Multiethnic Society. Chicago: University of Chicago Press.

The current western Tigray mapped as Tigrinya-speaking, with Kunama along the shores of the lower Tekeze River. Localised “T” at Humera (39) for Takruri, people of West African origin who settled along their pilgrim route to Mecca (54).

DATASET: HISTORICAL AND ETHNO-LINGUISTIC MAPS OF WESTERN TIGRAY - 216

DERG, 1977. Distribution of nationalities in Northern Ethiopia.

THE ETHIOPIAN REVOLUTION

and

THE PROBLEM IN ERITREA

Ethiopian Revolution Information Center

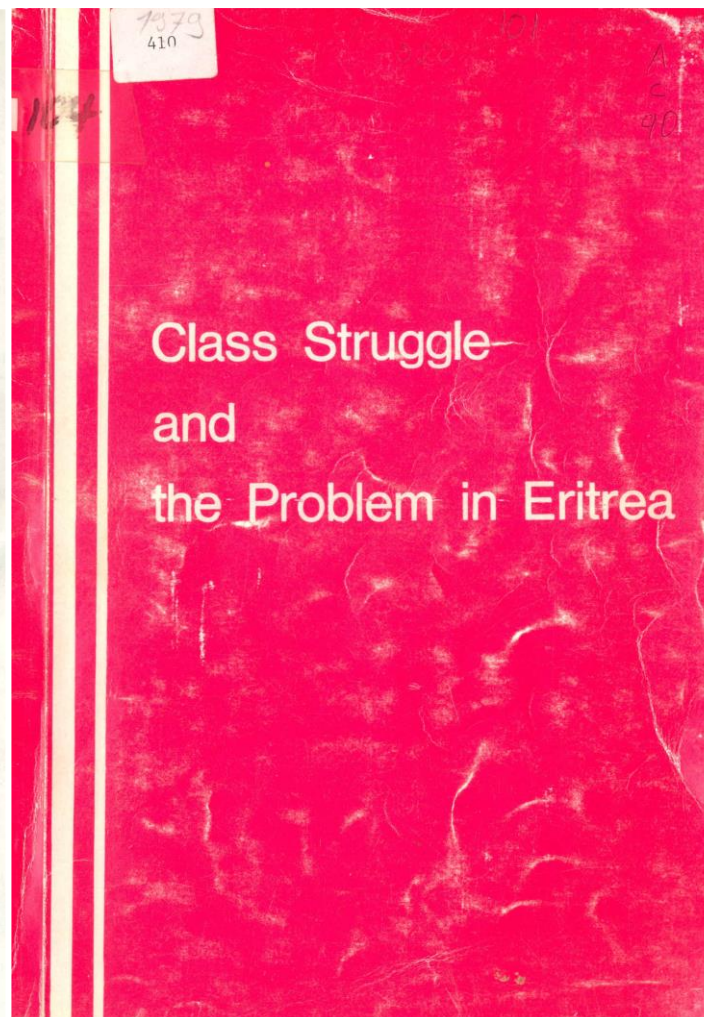

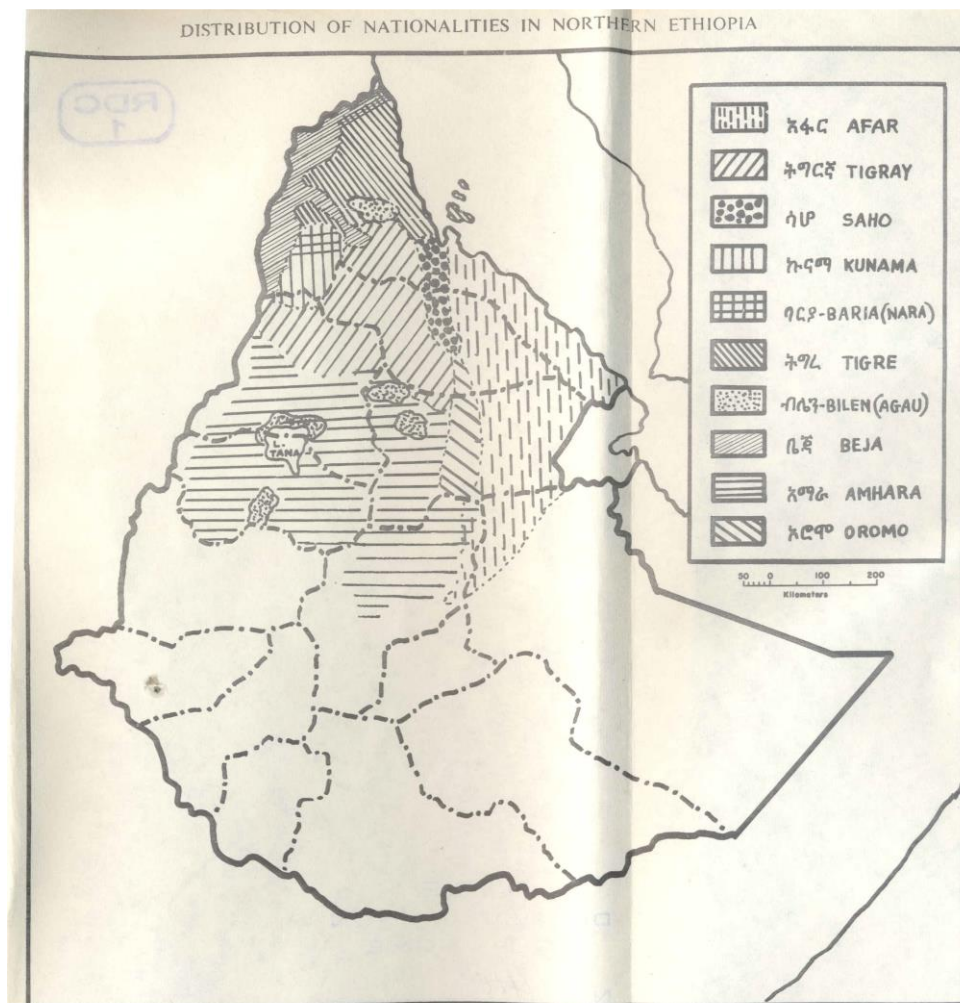

P. O. Box 2549 Addis Ababa, Ethiopia

July, 1977

Ethiopian Revolution Information Center, 1977. The Ethiopian Revolution and the Problem in Eritrea. Addis Ababa, Ethiopia. 24 p.

DERG, 1979. Distribution of nationalities in Northern Ethiopia.

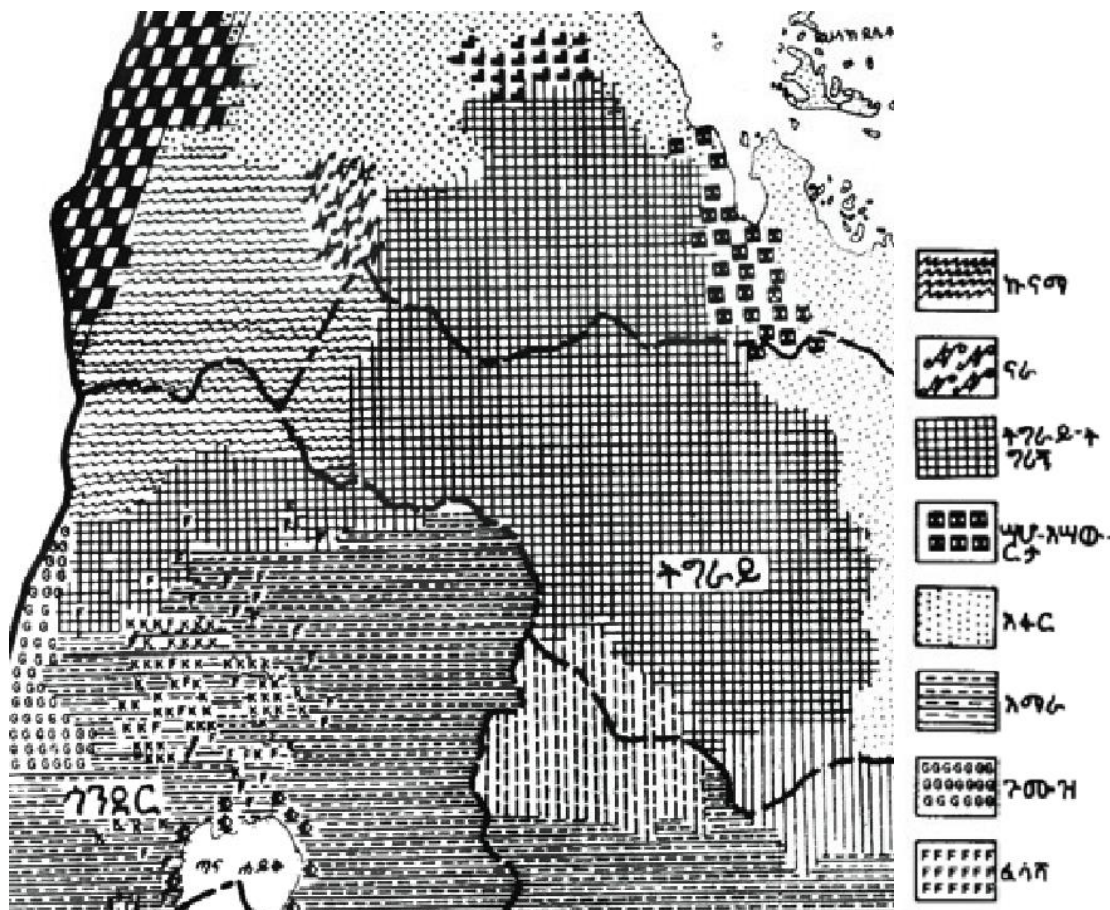

Tigrinya language area is mapped on both sides of the Tekeze River, reaching up to the Sudanese border. According to several occurrences in the book, at that time the Tigrinya language was spoken in areas that pertained to the Derg period provinces of Eritrea, Tigray, Gondar and Wollo. Areas mapped as Tigrinya-speaking correspond to the current extent of the Tigray region plus central Eritrea.

Ethiopian Revolution Information Center, 1979. Class struggle and the problem in Eritrea. Addis Ababa, Ethiopia. 139 p., map.

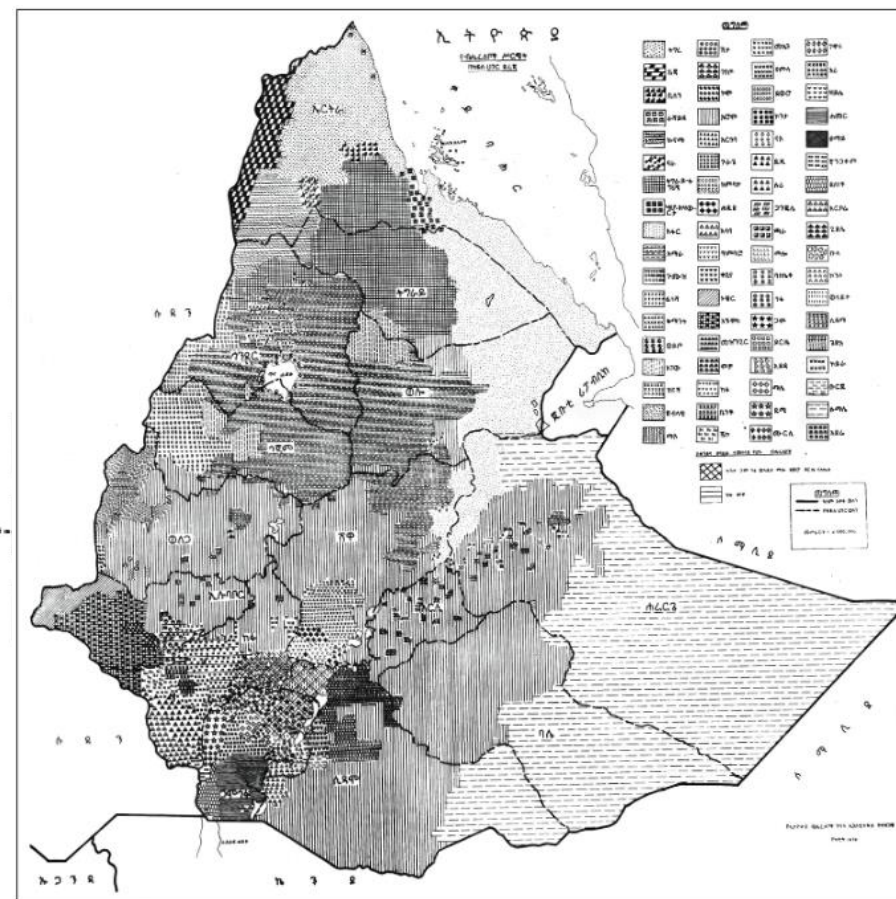

Institute for the Study of Ethiopian Nationalities, 1985. Catalogue and map of Ethiopian nationalities.

According to this map, the ethnic groups in Western Tigray are Tigrayans and Kunama. Kunama area does look rather too wide; compare to Bender et al., 1976. Small letters F for small groups of Falasha. Like on many language maps, in the extreme western part of the Tigrinya-speaking area, the latter borders with the Gumuz-speaking area.

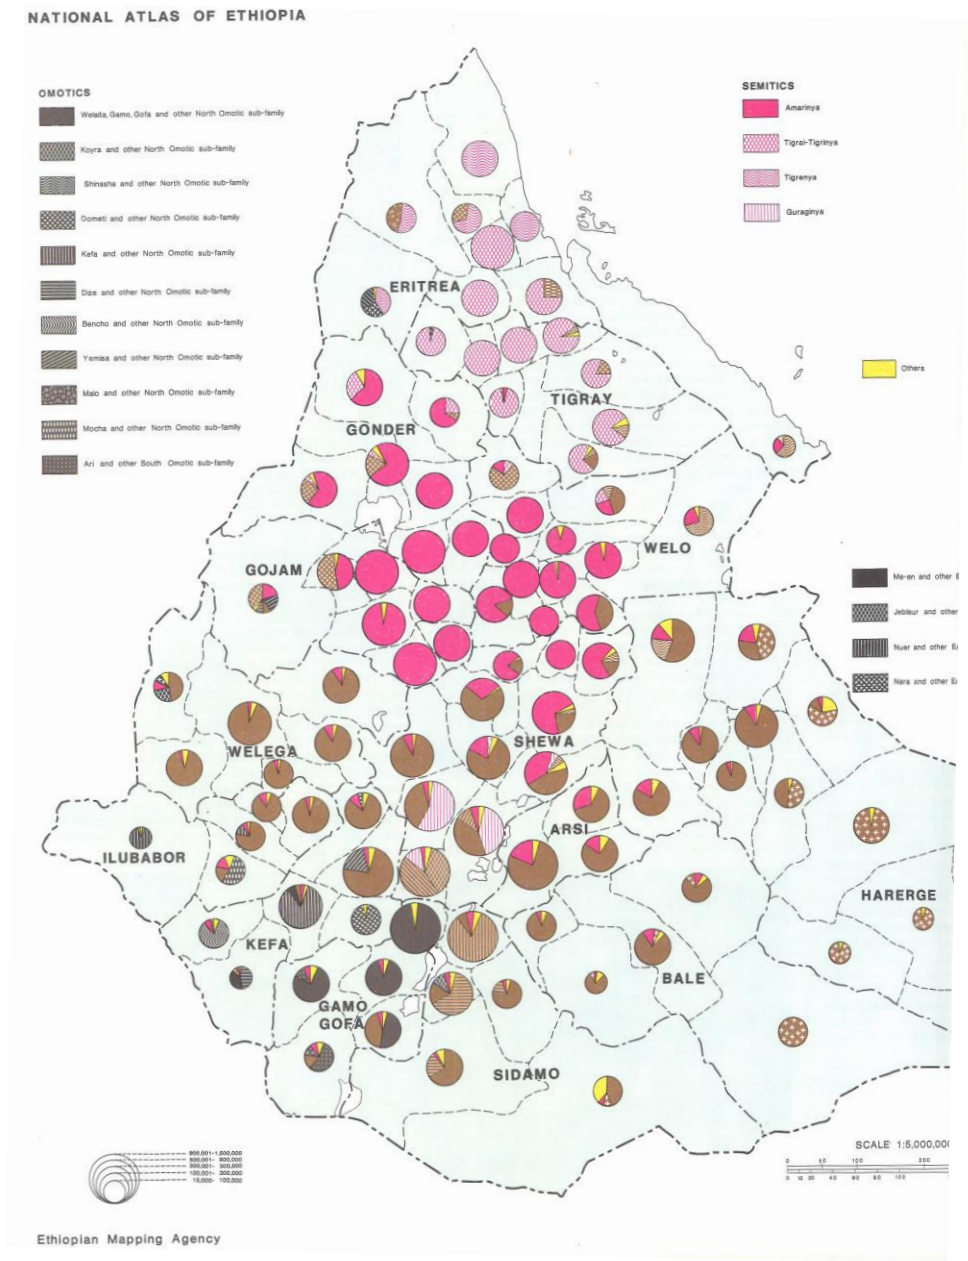

Legend, starting from the top: Kunama, Nara, Tigray-Tigrinya, Saho, Afar, Amhara, Gumuz, Falasha.

Map was republished by Mulatu Wubneh, 2017. Ethnic Identity Politics and the Restructuring of Administrative Units in Ethiopia. International Journal of Ethiopian Studies, 11 (1 & 2): 105–38. <https://www.jstor.org/stable/26586251>.

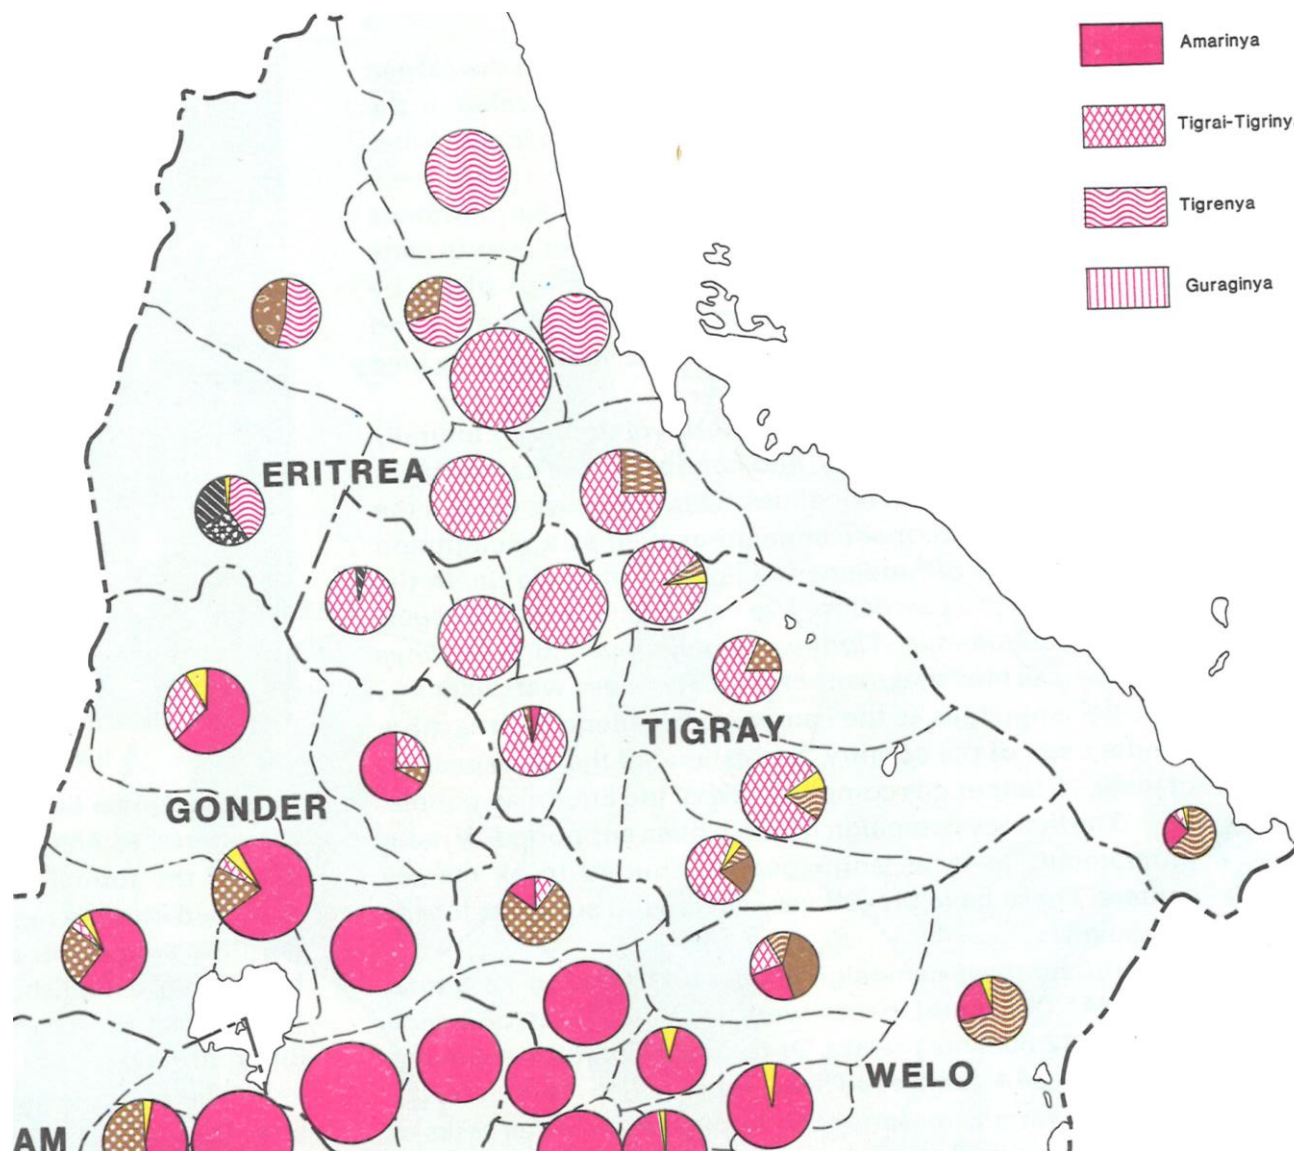

EMA, 1988: National Atlas of Ethiopia - Languages

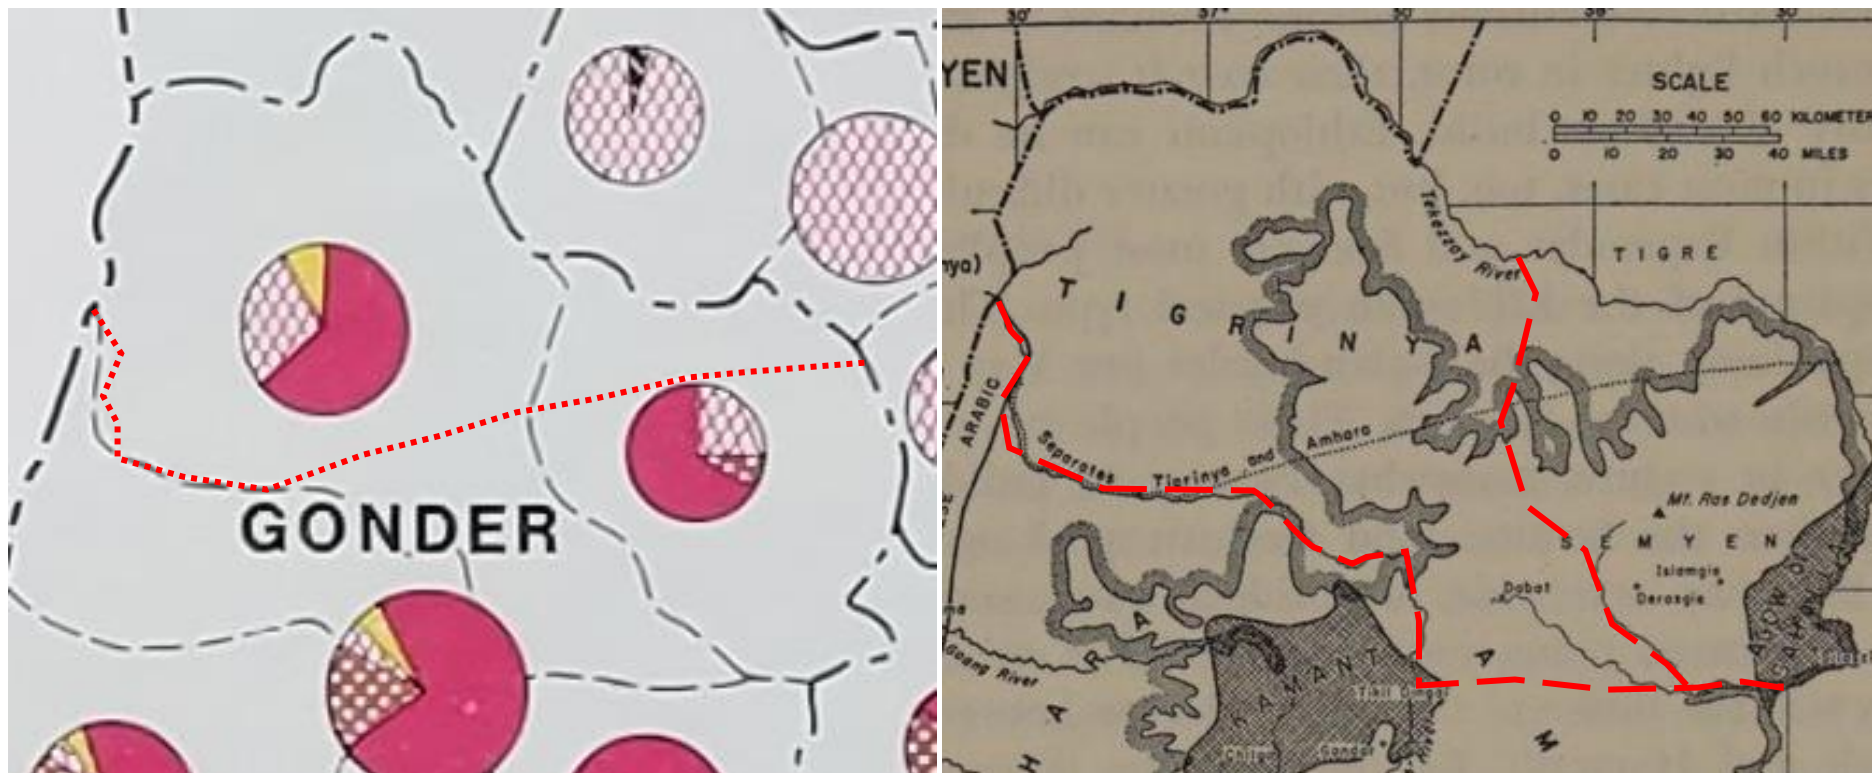

DATASET: HISTORICAL AND ETHNO-LINGUISTIC MAPS OF WESTERN TIGRAY - 220

The map in the 1988 National Atlas of Ethiopia actually does not represent a spatial distribution of languages, but pie charts of census results at the level of *awrajas*, an intermediate administrative level at the time. Details in the zone of interest show large shares of Tigrinya speakers in the northern *awrajas* of the then Gonder province. The ethnic groups are not homogeneously “mixed” in each *awraja*, rather the Tigrinya speakers occupied the northern part of the two northern *awrajas*. Contrast to Trimingham’s (1965) map.

Didactic exercise: how pie charts hide the spatial distribution of ethnic groups in the 1980s' Gonder province

How to link up the map in the 1988 Atlas of Ethiopia with the other maps of languages spoken in NW Ethiopia? Let us contrast the 1988 map holding pie charts with the best map at hand displaying the language border Amharic-Tigrinya; that is Simoons (1960). On the below maps, we plotted some crucial borders of EMA's (1988) map on Simoons' (1960) map; and vice versa.

At left, the EMA (1988) map with addition of the language boundary between Tigrinya and Amharic, as taken from Simoons' (1960) map. At right Simoons' (1960) map with outlining of the then awrajas Dabat/Welkait (at the west) and Simien/Tselemti (at the east). Superimposed lines are in red colour on both maps. Taking into account the areal share of the population groups, and the much higher population densities in the southern part of the awrajas (see next page), the population distribution in these two districts can be easily understood. The southern parts are uplands above 1500 m \approx 5000 feet, south of the thick greyish line on the map at right.

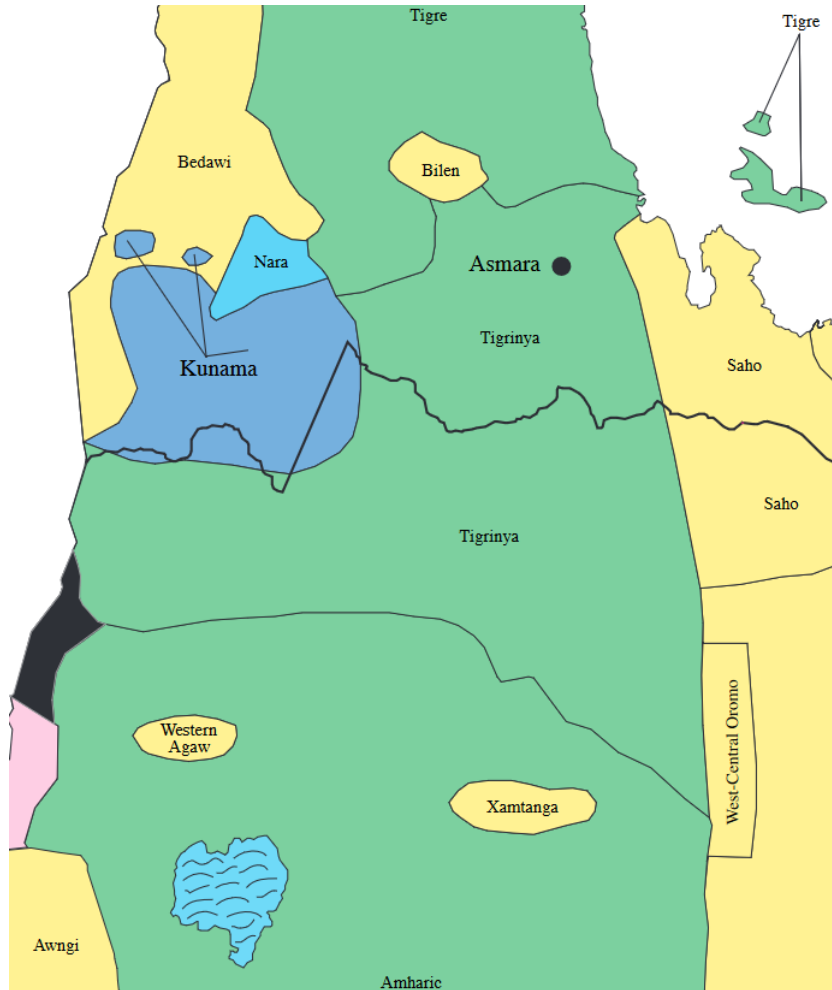

Population distribution in the northern part of the Begemder province in 1967, according to Central Statistical Office and the Imperial Ethiopian Mapping and Geography Institute (27). Every dot stands for 1000 rural inhabitants. Larger black dots are settlements and circles represent towns. The central part of the map is inhabited by Amhara-speakers, in the uplands, with high density. Lowland areas show low population density. Language boundary between Tigrinya and Amharic in broken red line, as taken from Simoons' (1960) map.

This exercise also allows understanding how, in the period 1943-1990, as represented by the three maps, not only provinces were drawn in such a way as to minorise the peripheral population groups at the benefit of the dominant Amhara ethnic group, but also *awraja* boundaries did not consider ethnicity, again imposing the dominant central language on the peripheral groups.

SIL Ethiopia, 2005. Languages of Ethiopia, Eritrea and Djibouti

Border lines quite generalised. Black colour for uninhabited area; in reality this in these areas there is shifting cropping by Gumuz who also displace their settlements regularly (21, 55).

<https://silethiopia.org/wp-content/uploads/2013/12/Language-Map-30.03.2005.pdf>

SIL International is an evangelical Christian non-profit organization whose main purpose is to study, develop and document languages, especially those that are lesser-known. SIL Ethiopia was founded in 1973 as a non-profit organization.

Ethnologue, 2009

Legend: 78 for Tigrinya, 2 Afar, 4 Amharic, 33 Gumuz, 48 Kunama, 66 Qemant Agaw, 67 Saho, 82 Oromo and 85 Xamtagna Agaw
