response to interferon−gamma
cellular response to interferon−gamma
defense response to other organism
innate immune response
adaptive immune response
positive regulation of immune response
immunoglobulin mediated immune response
positive regulation of immune system process
lymphocyte mediated immunity
response to virus
regulation of cytokine production
immune effector process
regulation of immune response
regulation of response to external stimulus
adaptive immune response based on somatic recombination of immune receptors built from immunoglobulin superfamily domains
regulation of leukocyte activation
cytokine production
regulation of defense response
regulation of cell activation
inflammatory response
