

Supplementary Materials for: *The Privacy-Value-App Relationship and the Value-Centered Privacy Assistant*

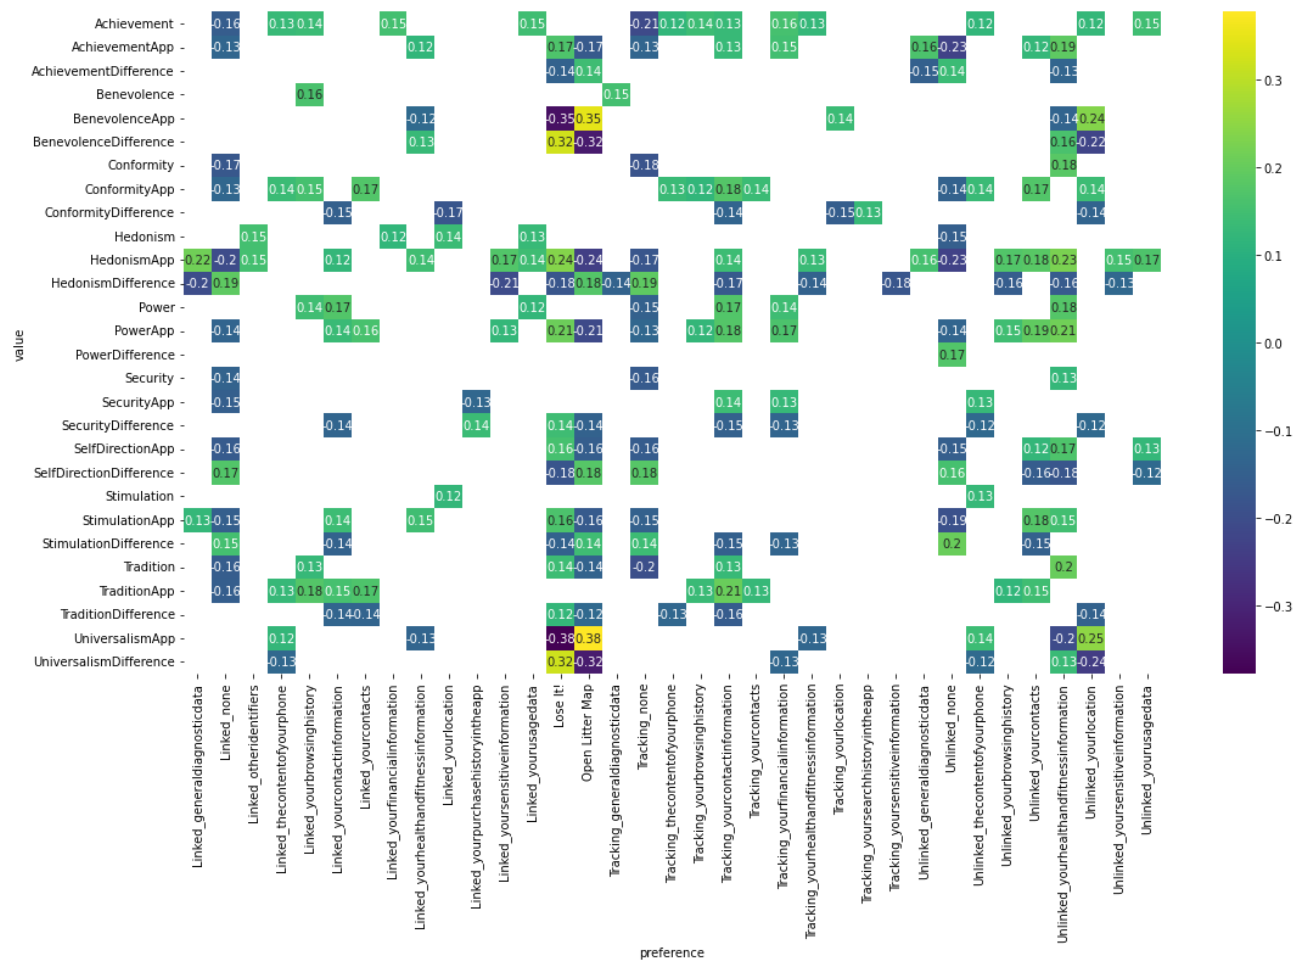

**Supplementary Table I:** Ten values and value questions for online survey (Phase I)

Value Questions	
<b>General Value Scores:</b> Please, rate the overall importance of [definition] as life-guiding principles for you. These principles are part of the personal value: [Value]	<b>App Value Scores:</b> Please, rate the overall importance of [definition] on your decision whether or not to download [app]. These principles are part of the personal value: [Value]
Value	Definition
Power	social power, authority, and wealth
Achievement	being successful, ambitious, and influential
Hedonism	gratifying your desires, enjoying life, and self-indulgence
Stimulation	living a varied, challenging and exciting life
Self-Direction	creativity, freedom, curiosity, independence, and choosing your own goals
Universalism	being broad-minded and wise; pursuing social justice, a world at peace, or equality; and protecting the environment
Benevolence	being helpful, honest, forgiving, loyal, and responsible
Tradition	being humble, modest, and respecting tradition
Conformity	being obedient, honoring your parents and others, self-discipline, and being polite
Security	national security, family security, personal security, and social order

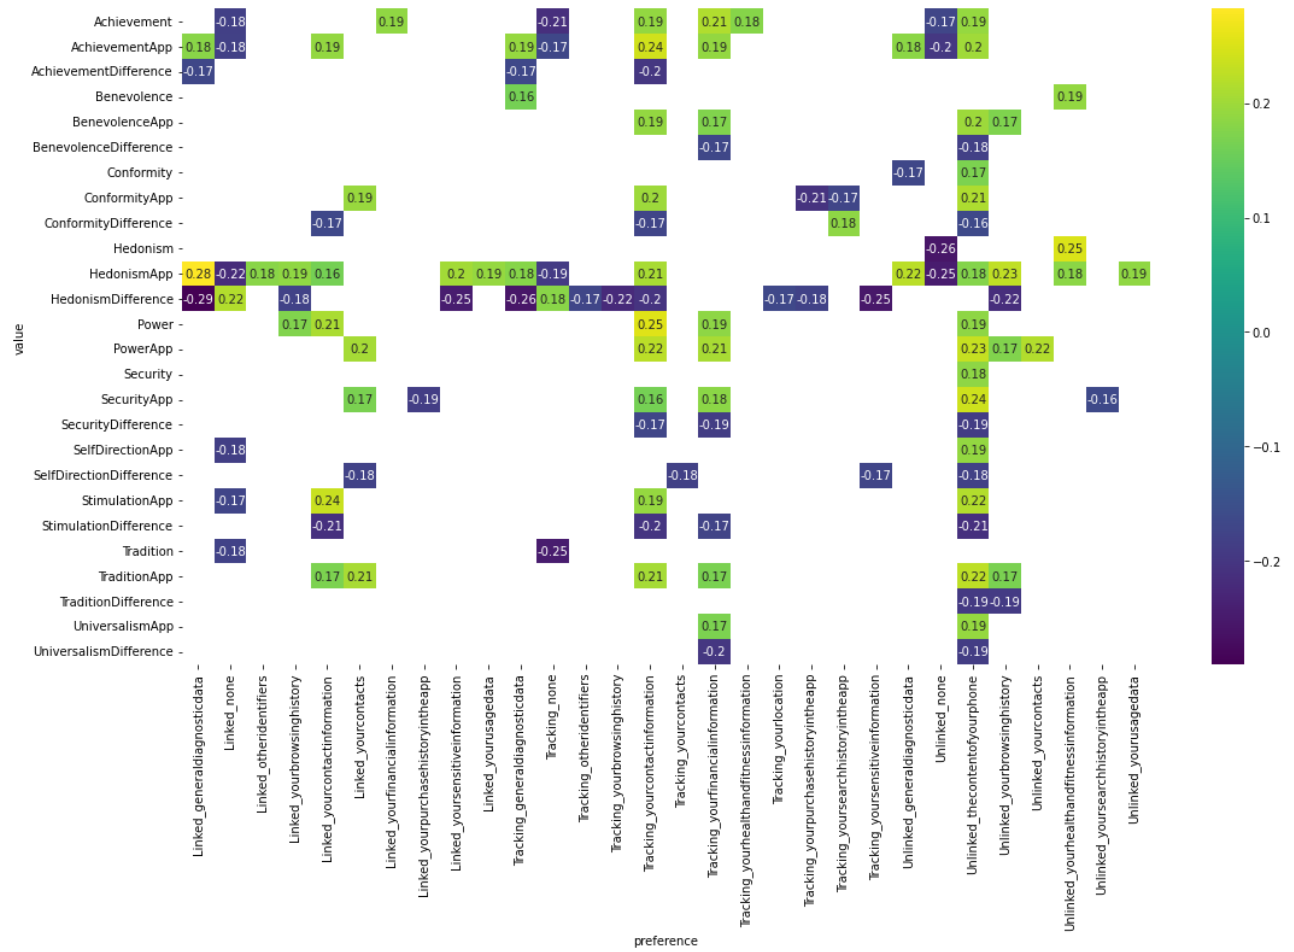

**Supplementary Table II:** Privacy preference questions on the online survey, where [App] was either Lose It! or OpenLitterMap.

Question	Unlinked	Linked	Tracking
	<p>If the data collected WILL NOT be linked to you ("unlinked" data), which data would you feel comfortable sharing with [App]? You may select multiple answers.</p> <p>In this case, unlinked data is data collected by the [App] and then stripped of your name and/or your phone's unique identifier. While these steps are taken to protect your identity, you could still, in theory, be identified if the data is combined with other data sets.</p>	<p>If the data collected WILL be linked to you, which data would you feel comfortable sharing with [App]? You may select multiple answers.</p>	<p>If the data collected from you was used for tracking, which data would you allow [App] to collect?</p> <p>In this case, tracking is linking data collected from you in the [App] with data from other apps or websites. This is often done to target you with specific advertisements.</p>
Options	<ul style="list-style-type: none"> <li>• Your <b>health and fitness information</b> (such as your health data and exercise data)</li> <li>• Your <b>financial information</b> (such as your credit card number, bank account number, form of payment, credit score, salary, income, and debts)</li> <li>• Your <b>location</b></li> <li>• Your <b>sensitive information</b> (such as your race, ethnicity, religion, political affiliation, or sexual orientation)</li> <li>• Your <b>contacts</b> (such as your address book)</li> <li>• The <b>content of your phone</b> (such as emails, text message, photos, and audio data)</li> <li>• Your <b>browsing history</b> (such as when you are browsing a website, outside of the app)</li> <li>• Your <b>search history</b> in the app</li> <li>• Your <b>purchase history</b> in the app</li> <li>• Your <b>usage data</b> (such as clicks, scrolls, taps, or advertisement views)</li> <li>• General <b>diagnostic data</b> (such as crash logs, launch time, and energy use)</li> <li>• None</li> </ul>		
		<ul style="list-style-type: none"> <li>• Your <b>contact information</b> (such as your name, email address, phone number, or physical address)</li> <li>• <b>Other identifiers</b> (such as your account username or the identifier for your phone)</li> </ul>	

**Supplementary Figure 1:** Heatmap of significant (Spearman correlation,  $p < 0.5$ ) for: total dataset value, value app, app, and privacy preference (first); value, value app, and privacy preference for Lose It! (second); and values, value app, and privacy preferences for OpenLitterMap (third).

Lose It!

## OpenLitterMap
