Publication Year: 2023

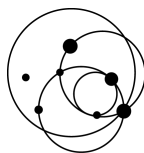

Project Info: **FEDORA (Future-oriented Science EDucation to Enhance Responsibility and Engagement in the Society of Acceleration and Uncertainty)**, funded by European Union, Horizon 2020 Programme. Grant Agreement num. 872841; <https://www.fedora-project.eu>

Data Set Contents

The dataset contains transcription and photos from the Intensive Creative Workshop I on Acceleration, Complexity, and Interdisciplinarity realised within the FEDORA project. The workshop was held in Bologna on 9th July 2021 and involved 16 participants with diverse backgrounds: science communicators, artists, graphic designers, novelists, photographers, researchers, school teachers, and video producers. They worked in two teams on the barriers, challenges and problems associated with introducing a transdisciplinary approach in science education and also with facing the issues of complexity and futurization by using and owning new languages.

The results are detailed in the deliverable D2.2: First draft of recommendations on “new languages” (Confidential Deliverable) for the design of materials; in the D2.3 Multimedia report of Intensive workshop I on acceleration, complexity and interdisciplinarity <https://doi.org/10.5281/zenodo.7518940> and they are part of the framework developed for

FEDORA

deliverable D2.5: Framework for aligning science education with society: the search for new languages and narratives to enhance imagination and the capacity to talk about contemporary challenges: <https://doi.org/10.5281/zenodo.7519100>
