## Visual Astronomy Display: October 2017

Katie Frey • Updated on August 24, 2022 • [Leave a Comment](#)

### Highlights...

- **Farewell Cassini!** Scientists across the globe said goodbye as Saturnian probe gave its final bow and crashed into the atmosphere of the ringed planet;
- NASA Goddard explores the meaning of **the edge of the Solar System**;
- The Parker Solar Probe might provide a definitive answer to one of astronomy's greatest mysteries: **why is the Sun's corona so hot?**;
- It's a well known fact that **it is impossible to go faster than the speed of light**, but why? Fermilab's Don Lincoln explains;
- In her TED-Ed video, Amber L. Stuver talks about **gravitational waves, LIGO, and black hole collisions**; and
- Even though **New Horizon is well past the orbit of Pluto**, discoveries from that short fly by just keep rolling in.

## Bonus Videos...

- “[NASA Recap: Saturn End of Mission](#),” Hear from the team behind the Cassini mission and its epic Grand Finale, held at NASA’s Jet Propulsion Laboratory.
