3 Years
project duration

2017
Till early 2020

FIT4RRI Objectives

The project will act on 2 key factors to bridge the gap and activate institutional changes in Research Funding and Performing Organisations:

- 1 Training**
Enhancing competencies and skills through an improvement of the training offer currently available in terms of training tools, actors and strategies.
- 2 Governance**
Institutionally embed RRI and OS practices and approaches by promoting the diffusion of more advanced governance settings (organisational practices, tools, arrangements and culture).

FIT4RRI Concept & Approach

1 Understanding

Analysing general trends, barriers, drivers, interests, values & advanced experiences related to RRI & OS.

2 Testing

4 co-creation experiments will be developed involving different RFPOs to test outputs & observe RRI & OS in action.

3 Promoting & Sharing

Development of practical **training tools & actions** as well as evidence based **guidelines on governance settings**.

EXPERIMENT 1
focused on **Energy Efficiency**

EXPERIMENT 2
focused on **Photonics**
(optical monitoring)

EXPERIMENT 3
focused on **Material Science**

EXPERIMENT 4
focused on **Text & Data Mining**

The Project Milestones

May 2017
Beginning of the project

August 2019 - Test
Experiments completed and findings capitalized

April 2020 - End of the project
Training and guidelines available on the website

June 2018 - Analysis
Findings shared among the partners to be used in further stands

December 2019 - Action
Final version of the e-learning environment with online courses and final training report available
