SOME NEW HYBRIDS.

BY HAROLD J. SHEPSTONE.

The recent purchase by the Indian government of two zebra-horse hybrids from Prof. J. Cossar Ewart, of Edinburgh University, Scotland, has called attention to the work of this gentleman, and, incidentally, to the experiments in cross-breeding of Mr. Carl Hagenbeck, the animal dealer at Hamburg, who has for some seven years past given serious consideration to this subject. During this comparatively short period Mr. Hagenbeck has produced an entirely new variety of sheep, deer, and pheasant by crossing the stronger, wilder species with tame, domestic specimens.

It should be stated at once, perhaps, that the one aim in conducting these experiments has been to obtain a stronger and better animal—that is to say, better blood. That this has been accomplished in the case of the zebra-horse cross there is not the slightest doubt. The new animal, which has been named the zebrule, has been produced with the object of taking up the work of the ordinary military mule. It is a little larger than the average mule, and when once broken to harness is much more tractable and far more intelligent. Furthermore, the new animal does not possess that stubborn will and dangerous tricks often

found in the common mule. It is also hardy, a good trotter, very sure of its footing, and capable of adapting itself to great changes of climate and temperature.

Prof. Ewart seriously commenced his experiments nine years ago. He obtained a fine, healthy zebra stallion, "Matopo," now the sire of many zebrules. The first hybrid was born in August, 1896, at Penicuik, in Midlothian, Scotland, the dam being a pony, selected from a first-class breed, the sire, of course, being "Matopo." The foal proved strong and hardy, very easily broken to saddle and harness, while its intelligence surprised those in charge of it. The animal was produced merely for scientific purposes, but it was such a success that Prof. Ewart came to the conclusion that the new hybrid would be an ideal animal for ordnance and commissariat work.

several in his park at Stellingen, near Hamburg, and when in that city recently the writer went for a drive behind two of these interesting creatures.

Full-grown they stand about 14 hands high, and have a girth measurement of about 63 inches. They are therefore somewhat larger than a mule. At first sight they strike one as strange, the zebra striping in some instances being very distinct, though, of course, by no means so conspicuous as in the wild zebra. They answer to the reins instantly, are not at all nervous of electric cars or traffic, and fast trotters.

Mr. Lawrence Hagenbeck and a Team of Zebra-Horse Hybrids.

Prof. Ewart, in speaking of the hybrid in his book, "A Guide to Zebra Hybrids," says: "Zebrules are usually better able to take care of themselves than pure-bred animals, are more alert, more active, and altogether more vigorous and intelligent. From the first, zebra hybrids are more friendly, more curious and confiding than ordinary foals. With time and care most of them can be trained to any kind of work. It is almost impossible and far from safe to break in a young mule by itself, but quite possible to break in by itself a zebra hybrid."

It was hoped that the British War Office would take the new animal, but it stolidly refused to touch them. It is as well, perhaps, that the animals are to be tried first in India, where it is well known the natives manage their mules with more tact and patience than the British soldier. The animals have already arrived at

gists is the lion and tiger cross, a number of which may now be seen at the Hagenbeck establishment in Hamburg. The oldest is four years of age, and is a fine animal, called "Prince." He was recently seen performing with several other animals in one of the Hagenbeck trained groups in New York. When only three years of age he weighed five hundredweight and measured 10 feet from the tip of his tail to the tip of his nose, and stood four feet high to the top of the shoulder. The peculiarity of this beast is that he has a tiger's body and a lion's head, the stripes, of course, not being so distinct as in the common tiger. Prince's father was a Senegal lion and his mother a Bengal tiger. This one animal is valued by its owner at \$10,000.

"The first successful experiment I made in the crossing of animals," said Mr. Hagenbeck, in speaking of this side of his interesting work, "was about seven years ago, when I crossed a leopard and a puma. The only living animal of the litter, which, fortunately, was a very healthy one, I sold some time ago to the Berlin Zoological Garden, where it is still in the collection. I am now busy endeavoring to obtain a new variety of sheep by crossing the giant sheep of Central Asia with our common domestic animal."

Sportsmen will be particularly interested in the new pheasant which the Hamburg establishment has produced. It has been obtained by crossing pheasants from Central Asia with the European variety. The result is a larger bird, much stronger on the wing, and more prettily marked. The new pheasant very much resembles the English or common American pheasant in appearance. It is somewhat larger, however, and sportsmen have already discovered that it is very quick on the wing, and not so easy to bring to the ground. Mr. Hagenbeck has succeeded in securing several broods of these pheasants. The first of these were obtained in April of last year. They were quickly snapped up by the Duke of Bedford and Lord Rothschild, who own extensive shooting grounds in England, these two gentlemen taking the larger portion of them. Several broods were obtained again at the beginning of this year, and the birds are

Iceland Pony and Her Two Foals, the Smaller of Which is a Zebra Cross.

The Nine Months Old Progeny of a Lion and a Tiger.

SOME NEW HYBRIDS.

The experiments were therefore continued, and a number of zebrules bred from thoroughbreds, half-Arabs and Clydesdales. Several of these were purchased by Carl Hagenbeck, of Hamburg. Indeed, he had already bought the two which have been dispatched to India, but willingly gave them up to the Indian government when they decided to take them, as he is convinced from his experience and handling of the zebrule that it will be the mule of the twentieth century. He is endeavoring to get the German government to take some of these animals for use in their army. He has

their destination, Quetta, and are now undergoing a series of tests as to their suitability for mountain battery work. Although no official report has been received, it has been stated that the animals fulfill all the requirements set down by the Indian government. Indeed, so well have they behaved that a number of drives have been organized in the East Africa Protectorate for the capture of young zebra stallions for exportation to India, Jamaica, and elsewhere for breeding purposes.

A hybrid that has attracted the attention of zoolo-

all doing well. For years the European pheasant has been gradually declining, but with the introduction of the Asiatic variety it has received a new lease of life. In the same way several new varieties of deer have been secured by crossing Persian fallow deer with ordinary European deer.

Sleeping car service has been inaugurated on the electric line between Columbus, Ohio, and Indianapolis, Ind. The cars are complete sleepers, and are equipped with 600-horsepower motors.

Business and Personal Wants.

READ THIS COLUMN CAREFULLY.—You will find inquiries for certain classes of articles numbered in consecutive order. If you manufacture these goods write us at once and we will send you the name and address of the party desiring the information. **in every case it is necessary to give the number of the inquiry.**

MUNN & CO.

Marine Iron Works. Chicago. Catalogue free.

Inquiry No. 4745.—For castings and blue print of gasoline engines for bicycles and motor carriages.

AUTOS.—Duryea Power Co., Reading, Pa.

Inquiry No. 4746.—For makers of slot machines of every description.

"U. S." Metal Polish. Indianapolis. Samples free.

Inquiry No. 4747.—For manufacturers of a wood distilling apparatus.

Handle & Spoke Mch. Ober Mfg. Co., 10 Bell St., Chagrin Falls, O.

Inquiry No. 4748.—For a small glass blower of about 9 pounds pressure.

Send for a copy of "Dies and Die Making," \$1, post paid. J. L. Lucas, Bridgeport, Conn.

Inquiry No. 4749.—For makers of small inventions of wire, tin and wire netting.

Mechanics' Tools and materials. Net price catalogue. Geo. S. Comstock, Mechanicsburg, Pa.

Inquiry No. 4750.—For manufacturers of cast iron toys.

Sawmill machinery and outfits manufactured by the Lane Mfg. Co., Box 13, Montpelier, Vt.

Inquiry No. 4751.—For makers of mechanical figures or fixtures for show windows.

For SALE.—1903 patent for novel wire tie clip or scarf retainer. "Gooding," Box 673, New York.

Inquiry No. 4752.—For a machine for bending pipe without having to fill pipe before bending.

American inventions negotiated in Europe, Felix Hamburger, Equitable Building, Berlin, Germany.

Inquiry No. 4753.—For a machine for manufacturing nipples.

If making metal goods and needing special parts, write us. Metal Stamping Co., Niagara Falls, N. Y.

Inquiry No. 4754.—For wood pulp to substitute for plaster for inside finish.

Let me sell your patent. I have buyers waiting. Charles A. Scott, Granite Building, Rochester, N. Y.

Inquiry No. 4755.—For makers of small galvanized iron stampings.

WANTED.—Capital to patent a remarkable invention, for interest in same; valuable. Carlos W. Adams, Lakeville, Conn.

Inquiry No. 4756.—For makers of bending machinery.

Special and Automatic Machines built to drawings on contract. The Garvin Machine Co., 149 Varick, cor. Spring Streets, N. Y.

Inquiry No. 4757.—For manufacturers of German silver wire.

The largest manufacturer in the world of merry-go-rounds, shooting galleries and hand organs. For prices and terms write to C. W. Parker, Abilene, Kan.

Inquiry No. 4758.—For first-class manufacturers of wax match-making machines.

We manufacture anything in metal. Patented articles, metal stamping, dies, screw mach. work, etc., Metal Novelty Works, 43 Canal Street, Chicago.

Inquiry No. 4759.—For makers of paint-grinding machinery.

Empire Brass Works, 106 E. 120th Street, New York. N. Y., have exceptional facilities for manufacturing any article requiring machine shop and plating room.

Inquiry No. 4760.—For a model for locomotive valve setting.

Inquiry No. 4761.—For makers of wooden novelties, such as fruit and vegetable crates and baskets.

The celebrated "Hornsby-Akroyd" Patent Safety Oil Engine is built by the De La Vergne Refrigerating Machine Company. Foot of East 138th Street, New York.

Inquiry No. 4762.—For makers of screw cider presses in Michigan, Ohio and Indiana.

Contract manufacturers of hardware specialties, machinery, stampings, dies, tools, etc. Excellent marketing connections. Edmonds-Metzel Mfg. Co., Chicago.

Manufacturers of patent articles, dies, metal stamping, screw machine work, hardware specialties, machinery and tools. Quadriga Manufacturing Company, 18 South Canal Street, Chicago.

Send for new and complete catalogue of Scientific and other Books for sale by Munn & Co., 361 Broadway New York. Free on application.

INDEX OF INVENTIONS

For which Letters Patent of the United States were Issued for the Week Ending October 27, 1903,

AND EACH BEARING THAT DATE

(See note at end of list about copies of these patents.)

Adding register, H. G. White 742,810
Adhesives, making, C. D. Ekman 742,174
Advertising and check protecting device, combined, A. A. Root 742,495
Advertising device, electric, G. W. Enright 742,407
Advertising display card and carton holder, L. C. Witkowski 742,545
Air brake, J. H. Blum 742,386
Air brake and signal system, T. J. Quirk 742,491
Air brake, automatic, C. H. Nelson 742,722
Alcohol, making trichloroisopropyl, Hermann & Bonhoeffer 742,430
Amber, ambroid, or the like, in mass, cigarette holders, pipe stems, etc., produced from, E. Simon 742,245
Angle finder, J. A. Traut 742,500
Animal shears, H. V. Dunn 742,615
Animal trap, C. W. Gillis 742,627
Annunciator, line, H. P. Clausen 742,165
Autocar dust guard, W. H. Brown 742,580
Automatic coupling, F. M. & H. C. Harvey 742,317
Automatic indicator, W. E. Laird 742,681
Awning, J. O. Sorenson 742,246
Bag, hand or like containing, W. W. McCormick 742,478
Bag holder, P. Brown 742,578
Ballot box, secret, H. J. Fox 742,783

Bearing for centrifugal machines, spring neck, Fleming & Anderson 742,178
Beating or whisking device, W. R. & N. B. Cain 742,773
Bed spring, J. W. Teas 742,521
Belt, apparel, M. Scheuer 742,746
Bicycle handle bar, Ruppel & Weaver 742,357
Blower, T. M. Eynon 742,618
Boat, miniature or toy submarine, A. F. Humphrey 742,326
Boats, etc., lifting apparatus for raising or lowering canal, R. Krell 742,450
Bodkin, G. J. Dixon 742,606
Boiler, O. S. Garretson 742,306
Boiler, J. M. McClellon 742,477
Boiler draft attachment, locomotive, J. J. Delaney 742,605
Book, manifold sales, C. Fester 742,176
Boots or shoes, making, H. Alberts 742,372
Bottle carrier for testers, T. L. Valerius 742,759
Bottle, non-refillable, M. C. Johnson 742,328
Bottle, non-refillable, H. A. Clinton 742,592
Bottle rinsing machine, F. N. Young 742,269
Bottle stoppering device, W. R. Green 742,312
Box, I. W. Allen 742,271
Box covering and corner staying machine, T. Morgan 742,343
Box fastener, C. W. Beecher 742,563
Boxes, apparatus for the manufacture of cardboard, K. E. Beschoner 742,383
Brackets, etc., support for, H. F. Keil 742,330
Brake beam, H. C. Buhoup 742,388
Brake beam fulcrum, G. B. F. Cooper 742,597
Brick, machine for making sand or chemical, C. W. Boyle 742,574
Broken rack, F. F. Burch 742,581
Buckle, trace, G. W. Williams 742,267
Buggy boot, J. W. Simmons 742,748
Buggy, storm, E. Heinselman 742,518
Burglar, H. E. Ashley 742,415
Cabinet, H. E. Harman 742,646
Cabinet, record, L. Nevius 742,347
Cables or wires, ground anchor for, A. Bearse 742,279
Can opener, R. O. Hammond 742,418
Canned goods, apparatus for treating, R. B. Polk 742,488
Cant hook, W. O. Leduc 742,457
Car brake, C. P. Moran 742,798
Car brake beam, railway, S. A. Crone 742,169
Car coupling, J. W. Barth 742,380
Car coupling, automatic, J. W. Barth 742,379
Car door, grain, C. L. Robbins 742,744
Car frame, motor, P. Arbel 742,272
Car heater, electric, E. E. Gold 742,310
Car mover, N. E. Bunting 742,157
Car reflector, street, F. M. Livingston 742,687
Car replacer, A. Bouvier 742,154
Carbon chloride, producing, F. J. Machalske 742,340
Carbon sheet or paper holder, lifter, and separator, G. W. Donning 742,610
Carbox holder, J. E. Hogg 742,399
Carburetor, H. L. Hogan 742,321
Carburetor, B. de Laite 742,452
Carburetor, E. Walther 742,533
Card clamp, Stewart & Neth 742,805
Card punching or stamping machine, W. W. Hodgson 742,789
Carriage door handle, J. C. Konrad 742,448
Cart or other vehicle, T. Hill 742,428
Cartridge shell resizing, decapping, and re-capping apparatus, E. L. Wetzig 742,768
Case, steel, case, J. P. S. Lawrence 742,684
Cast steel wheel, P. H. Noelting 742,218
Caster and socket, B. S. Noelting 742,591
Cement mixer, W. Clark 742,402
Chain link, A. Drost 742,592
Char drier, G. M. Newhall 742,723
Chip rack, A. Blach 742,567
Churn dasher, J. W. Morris 742,712
Cigarette box, etc., S. L. Felber 742,301
Cigarette machines, creasing device for continuous, F. J. Ludington 742,338
Clip or fastener, J. A. Bedworth 742,510
Clothes rack, M. Churchill 742,594
Clothes reel, P. K. Young 742,270
Clutch, P. E. Varney 742,816
Clutch for drilling swivels, ratchet, J. Kuny, et al 742,332
Clutch, friction, E. J. Moore 742,209
Clutch, friction, C. E. Torrance 742,524
Clutch mechanism, lever actuated interlocking, B. W. Grist 742,630
Coal screen, J. P. Burke 742,158
Coffee roaster, C. Constine 742,168
Colling machine, Schweitzer & Hausold 742,369
Coin receptacle, J. A. Steinmetz 742,512
Collars, manufacturing, G. J. Dornandy 742,400
Column, girder, or structure, metal, Zeh & Forsyth 742,549
Combining machine, I. Hey 742,425

TOOLS
Every kind of Tool for Steam, Gas, and Water Fitters. Every Tool has our personal guarantee. We have been the leading Tool Manufacturers for Fifty Years...
WALWORTH MFG. CO.,
128 TO 136 FEDERAL ST., BOSTON, MASS.

Veeder Ratchet and Rotary Counters

For voting machines, neostyles, telephones, cash registers, nickel-in-slot machines and automatic machines generally to register the number of pieces or quantity of material produced—for any purpose requiring a small, light and accurate counter.

THE VEEDER MFG. CO.
HARTFORD, CONN.
Makers of Cylometers, Odometers, Tachometers, Counters and Fine Castings. Price, \$1.00

OUR ROTARY MEASURE
Measures like magic. A useful time-saver for everybody. Is a cutting speed indicator for machine tools as well as an adding device for estimators. Measures curves, curved or flat surfaces, over or around corners, etc., quick as a wink. Positively accurate and simplifies itself. Price \$1.75. Your money back if not the fastest and most practical all around measure you ever saw. Illustrated circular for the asking.
STECKENREITER MFG. CO.,
96 Lake Street, Des Moines, ILL.

THE EUREKA CLIP
The most useful article ever invented for the purpose. Indispensable to Lawyers, Editors, Students, Bankers, Insurance Companies and business men generally. Book marker and paper clip. Does not mutilate the paper. Can be used repeatedly. In boxes of 100 for 25c. To be had of all bookellers, stationers and notion dealers, or by mail on receipt of price. Sample card, by mail, free. Manufactured by Consolidated Safety Pin Co., Box 121, Bloomfield, N.J.

GIANT STEAM SHOVELS
Toledo Ohio, U.S.A.
The Vulcan Iron Works Co.

YOU ARE EASY

If you need a carpenter to help you repair your roof with Warren's Natural Asphalt Sand Surfaced Roofing

The best and most serviceable prepared roofing on the market. It is durable, fire-proof, and does not require painting. Comes ready to lay in rolls containing 108 sq. ft.

Warren Chemical & Mfg. Co., 18 Battery Pl., New York

About Repairs

Each part of our engines is machined to gauge and always kept in stock. Repairs are made needed with the

OLDS Gas and Gasoline Engines
but when they are we can supply any part and we do not take advantage of your need and charge exorbitant prices. Send for new catalogue of all our Stationary and Portable Engines.
Olds Motor Works,

Furnace charging and cleaning apparatus, T. Jones 742,196
Furnace cleaning apparatus, T. Jones 742,197
Furnace with automatic feeding, W. Josten 742,198
Furnaces, air heating apparatus for reverberatory, J. Reuleaux 742,740
Furniture, J. A. Staples 742,252
Furniture brace, J. L. White 742,266
Furniture fastening device, D. W. Tower 742,525
Furniture, means for securing casters to, C. F. Wheeler 742,770
Fuse switch box, electric, J. Sachs 742,499
Gage. See Railway track gage. 742,802
Galvanic battery, C. W. Roberts 742,365
Galvanic cell, W. Strickland 742,416
Game, G. P. Hall 742,498
Game, E. H. Roy 742,225
Garbage, treating, E. S. Peck 742,224
Garbage, treating, Peck & Scott 742,226
Garment hanger, A. Mieden 742,207
Garment supporter, O. Kraus 742,678
Gas burner, W. Collins 742,594
Gas burner, J. Harris 742,642
Gas burner, incandescent, L. J. Reinhardt 742,234
Gas furnace, recuperator, Mitchell & Dell 742,708
Gas generator, acetylene, J. J. Mosher 742,211
Gas, manufacturing, A. M. Gow 742,412
Gas manufacturing apparatus, A. M. Gow 742,411
Gas supply system regulator, R. M. Dixon 742,775
Gasoline engine, R. R. Gaskill 742,184
Gate, S. Ware 742,763
Gearing, P. B. T. Berner 742,382
Gearing, A. Winton 742,812
Glass articles, manufacturing hollow, P. T. Slevert 742,506
Glass blowing apparatus, P. T. Slevert 742,505
Glass blowing machine, E. S. Hutton 742,682
Glass cutter, P. S. Fletcher 742,176
Glass drawing machine, G. H. Harvey 742,420
Glass finishing apparatus, J. H. Crosby 742,601
Glass reflectors, making, O. A. Mygatt 742,345
Glassware, finishing, J. H. Crosby 742,602
Governor for steam engines or pumps, automatic pressure actuated, J. H. Clark 742,290
Governor spindle actuating device, G. B. Petsche 742,229
Grain divider, J. W. Pridmore 742,489
Grain scourer and cleaner, C. Stone 742,518
Gramophone reproducer support, E. R. Johnson 742,666
Grate attachment, W. A. Moreland 742,210
Grate, shaking, G. A. Gumpert 742,631
Grinding mill, Hodgkin & Pemberton 742,191
Grinding or polishing machine, J. B. Lobet 742,688
Gun, air, D. F. Polley 742,734
Gun, rapid fire, Meigs & Jakobson 742,702
Hair crimper, C. R. Linthicum 742,795
Hammer or tool, magazine, G. C. Fuller 742,624
Harness, T. Manners 742,694
Harrow, O. C. Vaughn 742,531
Harrow, N. W. Thompson 742,752
Harvester attachment for saving and securing down grain, W. M. Wadleigh 742,263
Harvester, beet, Beer & Crane 742,151
Harvester reel, L. V. Axtell 742,557
Harvesting machine, J. F. Steward 742,256
Hat fastener, lady's, E. Weissman 742,537
Hat, folding, R. Plato 742,731
Hay and stock rack, convertible, J. L. Staley 742,364
Heat alarm, H. F. Jones 742,195
Heating boiler, A. Scholl 742,677
Hinge, gate, F. Volberding 742,261
Hoist, chain, T. A. Weston 742,539
Hoisting, etc., drum for, C. W. Hunt 742,193
Hoisting hook, safety, J. M. Waid 742,761
Hoisting or hauling drum, A. McNamara 742,721
Holdback, vehicle, J. C. Joyce 742,668
Hooks. See Cant hook. 742,474
Hook and eye, C. C. Mund 742,474
Hook and eye, P. M. King 742,677
Horse blanket, G. A. Bulles 742,285
Horse blankets, tail wrapper and crupper for, G. A. Bulles 742,286
Horse nose band, M. Purcell 742,736
Horse stock, M. T. Bransfield 742,575
Horseshoe, J. MacLean 742,464
Horseshoe, jastic, E. J. Sinnott 742,362
Horseshoe, nailless, C. W. Smith 742,509
Horseshoe sharpening and calking device, H. A. Hess 742,190
Hose coupling, J. Homola 742,655
Hose cut off compressor, E. Horsey 742,656
Hose supporter, W. L. Myers 742,476
Hot air currents and liquid spray, machine for producing, J. C. Sherburne 742,244
Hydrocarbon burner, H. J. Myers 742,344
Hydrocarbon burner, J. B. & H. V. Gorrill 742,629
Hydrocarbon burner, O. Falkenwald 742,777
Ice cream freezer operating mechanism, W. W. T. Mosher 742,473
Ice machine, C. C. Palmer 742,482
Ice machine, T. H. Butler 742,584
Ice machine freezing tank, T. H. Butler 742,582
Ice table, T. H. Butler 742,585
Index tag, mangle, F. G. Elchorn 742,617
Inking plate for job presses, F. W. Weber 742,765
Interlooped fabric, F. Maussner 742,700
Internal combustion engine, L. Roedel 742,493
Internal combustion engine, O. P. Ostergren 742,799
Iron and steel, electrometallurgy of, H. Harmet 742,316
Jack, L. A. Conner, Jr. 742,595
Jar closure tightening attachment, G. M. Hughes 742,435
Jar holder, A. Roesch 742,238
Jar or bottle closure, J. Hirst 742,652
Journal box dust guard, J. W. Stephenson 742,755
Knitting machine, fancy, G. A. Sanders 742,358

(Continued on page 333.)
