V.—*A List of State and Local Floras of the United States
and British America.*

BY N. L. BRITTON.

Read Feb. 21, 1890.

In the *Bulletin of the Torrey Botanical Club*, vols. viii, *et seq.*, there are published "Contributions towards a List of the State and Local Floras of the United States," by Mr. W. R. Gerard and myself. The present paper is an attempt to bring this up to date and supply the numerous omissions of the former work, with the addition of lists published for the Canadian Territory. In this I have been greatly aided by botanists all over the country, and it is believed that the present enumeration contains most of the local floras. No attempt has been made to incorporate all the notes and short lists of local observations, but it has been found difficult to draw the line in many cases. As in the former contribution lists of species without exact localities have been indicated by (A); those giving stations by (B); those giving stations with notes or occasional descriptions by (C); and descriptive floras by (D).

I cannot hope to have covered all the literature of this subject, and will be grateful for further notes and memoranda in the view of preparing a supplementary list. The present is brought down to May, 1890.
