XLIII.—*Species of Terrestrial Mollusca collected on the Island of San Lucia.* By RALPH TATE, Assoc. Linn. Soc., F.G.S., &c.

MR. BLAND, in his Catalogue of the Pulmoniferous Snails of the West Indies (Ann. Lyc. Nat. Hist. New York, vol. vii.), gives but two species (*Helix orbiculata* and *Bulimus aulacostylus*) as inhabiting San Lucia. About two hours' search on the island, in the early part of this year, has enabled me to add ten species, making a total of twelve now known; they are as follows:—

1. *Helix orbiculata*, Fér. This snail has much the same habit as *H. aspersa* in this country, and is tolerably abundant about the town of Castries.
2. *Helix ierensis*, Guppy, Proc. Scient. Assoc. Trinidad, 1869, p. 242. This species belongs to a section of the genus represented by *H. lamellata* in Europe and *H. labyrinthica* in North America; the tropical forms are *H. caeca*, Guppy, *H. ierensis*, Guppy, Trinidad; *H. bacticola*, Guppy, Trinidad and Venezuela, Guyana; *H. cœcoides*, Tate, Nicaragua; and *H. caratalensis*, Tate, n. sp., Venezuela, Guyana. Inhabits, among rubbish of old walls and houses, Castries.
3. *Bulimus tenuissimus*, Fér. A few dead shells.
4. *Bulimus aulacostylus*, Pfr. One dead shell, but with coloration.
5. *Bulimus caracasensis*, Reeve. Several individuals were obtained.
6. *Stenogyra plicatella*, Guppy, var. Abundant with *Helix ierensis*.
7. *Stenogyra coronata*?, Guppy, with the last.
8. *Stenogyra octona*, Chemnitz. Abundant in the woods around Castries.
9. *Tornatellina lamellata*, P. & M. With the last.
10. *Cylindrella costata*, Guild. Upon damp walls and among stones in shady places; common.
11. *Succinea approximans*, Shuttl. Damp pastures.
12. *Helicina plicatula*, Pfr. Common in the woods about Castries.

Bulimus aulacostylus, Pfr., is the only species peculiar to the island; *Helix orbiculata*, *Cylindrella costata*, and *Helicina plicatula* are common to San Lucia and the islands to the north; whilst the remainder occur in Grenada, Trinidad, or the northern coasts of South America.

BIBLIOGRAPHICAL NOTICES.

Notes on the Geology of North Shropshire. Small 8vo, pp. 88.
London: Hardwicke, 1869.

THIS little book, by Miss Charlotte Eyton, is well written and nicely printed, and must be a welcome companion to any intelligent inhabitant of Salop, or thoughtful tourist, if geologically inclined
