White Ants; with some Account of their Habits and Depredations.

By WALTER W. FROGGATT, New South Wales Government Entomologist.

Specimens of potatoes were received from Mr. Broughton Corrie, Colo Vale, about the middle of February, with the information that when harvesting his crop he had found those in one corner of the field covered with white ants, which were burrowing into and gnawing the centres out of otherwise perfectly sound tubers; but as none of the insects were sent with this consignment, further information was asked for.

In response to my request, further samples of potatoes were sent down swarming with live soldiers and workers of these destructive little creatures, and so honeycombed with their attacks that only
