ANOTHER MIGRATION OF *ANOSIA PLEXIPPUS* FAB.

In the Canadian Entomologist, Vol. XLIV, pp. 366-367, 1912, the writer gave some observations on the autumn migratory bands of this butterfly witnessed by him in various parts of the country.

On October 28 and 29, 1913, these insects were present in myriads clinging to the limbs of trees about Fort Moultrie, on Sullivan's Island, near Charleston, S. C. The weather was cool for the latitude, but the butterflies did not seem to pay any attention to the temperature, winging their way about in the sunshine as is their habit farther north, finally drifting away. Judging from the numbers observed dead and cast up on the beach by the sea, not all of the migrants passed onward in safety. As usual, there were numerous individuals flying about after the migrating band had passed onward.

PROHIBITION OF THE IMPORTATION OF NURSERY STOCK INTO CANADA BY MAIL.

By an order in Council of December 4th, 1913, the Regulations under "The Destructive Insect and Pest Act" were amended as follows:

In Regulation 3, line 14, the words "Importations by mail shall be subject to the same Regulations" have been struck out and the following New Regulation, No. 18, has been passed:

"18. The importation of all nursery stock, including trees, shrubs, plants, vines, grafts, scions, cuttings, or buds, through the mails is prohibited, excepting greenhouse-grown florists' stock, cut flowers, herbaceous perennials, and bedding plants, which will be admitted provided that a detailed statement of the contents is attached to such parcels."

This Regulation will take effect on and after the first day of March, 1914.
