A BIBLIOGRAPHY OF CHILD STUDY IN POLAND.

By ANNA GRUDZIŃSKA.

The Polish movement in child study was inaugurated by the now venerable psychologist, Vladyslaw David, a man of high philosophical training and a well known pedagogist. His contributions to child study are:

VL. DAVID. *Programme of Psychological Observations on a Child from the First Day to the Twentieth Year.* Warsaw, 1887.

— *The Contents of Children's Minds.* Warsaw, 1895.

This book is based on a questionnaire of 136 questions answered by 476 Warsaw children, after the method of Berthold Hartmann.

These publications were the first step in child study and two of Prof. David's assistants, Miss A. Szyk and Miss Iz. Moszczńska have since then become independent workers. Following the publication of Prof. David's book, Miss Szyk gathered material from 500 Warsaw children by means of a questionnaire of 55 questions based upon those of Prof. David, the results of which she published in book form.
