The rates in the other towns ranged upwards to 28'2 in Liverpool, and 26'7 in Glasgow. The 5 deaths from whooping-cough corresponded with the number in the preceding week, while the 3 fatal cases of "fever" showed a further decline from the numbers in the previous two weeks. The causes of 22, or 13 per cent., of the deaths registered during the week were not certified.

HEALTH OF SCOTCH TOWNS.

The annual rate of mortality in the eight Scotch towns, which had been 19'7, 20'5, and 22'7 per 1000 in the preceding three weeks, was 22'5 in the week ending November 28th, and exceeded by 1'2 the mean rate during the same week in the twenty-eight English towns. The rates in the Scotch towns last week ranged from 10'0 in Perth and 13'7 in Leith, to 22'0 in Paisley and 26'7 in Glasgow. The 550 deaths in the eight towns last week were not certified either by a registrar of births, deaths, and marriages, or by a coroner. All the causes of death were duly certified in Manchester, Bristol, Leicester, Sunderland, and in three other smaller towns.

HEALTH OF DUBLIN.

The rate of mortality in Dublin, which had been 19'7, 20'5, and 22'7 per 1000 in the preceding three weeks, declined again to 20'1 in the week ending November 28th, and exceeded by 1'0 the mean rate during the same week in the twenty-eight English towns. The rates in the Dublin towns last week ranged from 10'0 in Parnell and 13'7 in Leith, to 22'0 in Paisley and 26'0 in Glasgow. The 550 deaths in the eight towns last week were not certified either by a registrar of births, deaths, and marriages, or by a coroner. All the causes of death were duly certified in Manchester, Bristol, Leicester, Sunderland, and in three other smaller towns.
