THE AGE OF SCHISM. Being an Outline of the History of the Church from A. D. 1304 to A. D. 1503.

By Herbert Bruce, M.A., Lecturer and Head of the Department of History in the University College, Cardiff. New York. The Macmillan Company. 1907. Pages 278. Price, \$1.00 net.

The two centuries covered by this volume were a gloomy period for the kingdom of God. The high plane of the thirteenth century was not kept, the church plunged down a mighty precipice of power and influence. Divisions and strife were frequent, bitter and blasting. Learning and ability well nigh perished from the earth, as well as character. And yet it was an interesting and important period; for in it were laid the foundations of the Protestant Reformation.

Mr. Bruce has written an excellent account of Christianity in this period. He does not spare, avoid or condone the evils that gnawed at the life of the church from top to bottom, from pope and curia to priest and peasant; but neither does he forget that there was much good in the church at the same time. The relation of the papacy to the political world, the character and actions of the curia and popes, the lives and work of the great prelates, the contact of man with man in the parishes, all are told with admirable clearness and proportion. No other work of like proportions with which reviewer is acquainted presents so full and excellent a treatment of the period.
