La Stérilité chez la Femme son Traitement par les Agents Physiques. Par le Dr. E. HUGON. Paris, 1907: Vigot Frères, Éditeur. Prix 2 francs.

The various causes conducive to sterility in the female are reviewed, and the treatment appropriate to each condition described. The excellent results obtained by the judicious use of physiatrical modalities are set forth, and some of the more important details of technique are discussed. This monograph serves a useful purpose, as it extends the sphere of application of physical therapeutics.
