

secondary sources. In this process many thousands of corrections have been made in the references taken from standard bibliographies. The direct references have been verified or twice compared with the original article by the cataloguer.

The Boy Geologist at School and in Camp.

By E. J. Houston, Ph.D. Henry Altemus Co., Philadelphia. 1907. Price \$1.00.

The facts of geology are told in the form of a story that ought to interest boys. A. T. ROBERTSON.

Indices to Diatessarica.. With a Specimen of Research.

By Edwin A. Abbott. Adam & Charles Black, Soho Square, London, England. 1907. Pages LXIII, 152. Price 2s. 6d.

Dr. Abbott pushes on to the end of his gigantic task. These Indices will be very helpful to those who have the other volumes of Diatessarica. They were prepared by Dr. Abbott's daughter. The Specimen of Research is about the Sweetening of the Waters of Marah. It is amazing to see all the ramifications in Jewish literature that this subject undergoes. Dr. Abbott makes it all very interesting and luminous and you draw your conclusions out of it all. A. T. ROBERTSON.

The Infinitive in Polybius Compared with the Infinitive in Biblical Greek.

By Hamilton Ford Allen, Ph.D. The University of Chicago Press, Chicago. 1907. Price 50 cents net, 54 cents postpaid.

The author gives a very useful bibliography in connection with his thesis for the doctorate. It is not exactly just to put as a subtitle "Biblical Greek" when he only uses Genesis, the Wisdom of Sirach, II. and IV. Maccabees in the comparison. The term "Biblical" is no longer distinctive anyhow in the linguistic realm. But the book furnishes interesting data about Polybius' use of the infinite in convenient form. Polybius is much more literary in his style than any of the New Testament writers as, for instance, is seen in the use of the infinitive with Greek and in many other ways. Still much is to be learned from him. A. T. ROBERTSON.
