

not reckon this a "modern" book, but they will find it easier to scout it as "*traditional*" than to refute it as *weak*.

The work will serve admirably to confirm the faithful, but it hardly seems suited as a guide to faith. An apologist ought to make some concessions in style to the *forms* of modern thought. This work does not move in that realm.

W. O. CARVER.

The Problem of Age, Growth, and Death: A Study of Cyto-morphosis, Based on Lectures at the Lowell Institute, March, 1907. By Charles S. Minot, LL.D. (Yale, Toronto), D. Sc. (Oxford), James Stillman Professor of Comparative Anatomy in the Harvard Medical School, President of the Boston Society of Natural History. Illustrated. G. P. Putnam's Sons, New York and London. 1908. Pp. xxii.+280.

This is a volume of the "Science Series" of these enterprising publishers and represents the patient and skillful investigations of many years into the physical conditions of the growth and decay of the body of a living organism. The aim is, of course, to apply the knowledge to the life of man. The present work may be called popularly technical, but as it is strictly scientific no extended review of it is proper here.

Geschichte der Klassischen Philologie. Von Dr. Wilhelm Kroll. G. J. Göschen'sche Verlagsbuchhandlung, Leipzig, Germany. S 152. Pr. 80 Pf.

Dr. Kroll, of Muenster, has here given a most admirable outline of the history of Classical Philology. There cannot, of course, be much discussion in so brief a treatment, but the main points in the development from Plato to Rohde. One regrets that the volume stops at 1875. The great work of Brugmann and Delbrueck ought to come in this volume. The author has elsewhere discussed this later period.

A. T. ROBERTSON.
