Opposizione 1895 Maggio 17. Grandezza = 11^m8.

Teramo, Osservatorio privato, Pasqua del 1895.

V. Cerulli.

Notiz betr. die Zerstörung des Seismologischen Observatoriums in Tokio.

Am 17. Februar 1895 verlor Prof. John Milne in Tokio durch eine Feuersbrunst seine sämtlichen seismologischen Instrumente nebst Bibliothek und Manuscripten. In Bezug hierauf theilt Dr. v. Rebeur-Paschwitz aus einem Briefe von Prof. J. Milne Folgendes mit:

»Could you send a note for me to some Scientific Paper in Germany saying that out of a possible 500 or 600 more or less damaged Transactions Seism.-Soc. and Seismolog. Journal I shall be glad to complete, so far as I am able, sets of such series — also to send a copy of Vol. IV of the Journal, which fortunately was all with the printer. For the latter address to me, care of »Japan Mail Office« Yokohama, and for the former to care of the Geological Society, Burlington House, London. Also add to the note, that I should like to receive spare copies of any papers bearing upon Earth Movements in exchange.«

Kr.

Schreiben von Prof. Holden betr. die Schenkung eines dreifüssigen Reflectors.

A large Reflector for the Lick Observatory. Mr. Edward Crossley, of Halifax England, proposes to give to the Lick Observatory the 3 foot Reflecting Telescope and its Dome, which now form part of his private observatory. The grateful thanks of the Lick Observatory are offered to him for this most generous and highly appreciated gift.

Mount Hamilton, 1895 April 4.

Edward S. Holden.
