10.) Mountain Laboratory of the University of Colorado.

Summer session of six weeks is held at Tolland, Colorado, altitude 8889 feet. The Laboratory is located in a natural mountain park with meadows, brooks and small lakes, five miles from the continental divide. In the neighborhood are sub-Alpine lakes, and considerable variety of conditions is to be found in the immediate neighborhood. Courses in Field Biology, Ecology, Biology of Ponds and Streams and Systematic Botany are offered. Fee \$ 20.00. For information address Prof. Francis Ramaley, University of Colorado, Boulder, Colorado. K.

11.) Marine biological survey of the Philippines.

The University of the Philippines and the Bureau of Science will combine this year to inaugurate a marine biological survey of the Philippines. The party to take the field will be composed of Mr. Alvin Seale, chief of the division of fisheries, Bureau of Science, Dr. Lawrence E. Griffin, associate professor of zoology, University of the Philippines, Dr. Reinhart P. Cowles, assistant professor of zoology, Mr. Lawrence D. Wharton and Mr. S. F. Light, instructors in zoology, and three Filipino assistants. The station this year will be at Puerto Galera, a small harbor on the northern coast of Mindoro, where marine life is extremely abundant and the facilities for collecting observations are unusually fine. The party will be in the field about three months. K.
