A NEW NAME FOR LITHOMYRMEX CARP.  
(HYMENOPTERA)

In my revision of the fossil ants (Bull. Mus. Comp. Zoöl., 70 (1) : p. 36), which was published in January, 1930, I established the myrmicine genus *Lithomyrmex* for two species, *rugosus* and *striatus*, from the Miocene shales of Florissant, Colorado. Unfortunately, the same generic name was used by Dr. J. Clark a few months earlier for a recent species of ant, *glauerti*, from West Australia (Journ. Roy. Soc. W. Australia, 14: p. 36, 1929). I therefore propose the new name *Eulithomyrmex* for *Lithomyrmex* Carp. (*nec Lithomyrmex* Clark, 1929), to include the two extinct species from the Florissant shales—F. M. Carpenter.
