

**SUPPLEMENTARY MATERIAL: DEGREES OF FREEDOM FOR
PIECEWISE LIPSCHITZ ESTIMATORS**

FREDERIK RIIS MIKKELSEN AND NIELS RICHARD HANSEN

1. COMPUTATIONAL TIME AND NUMBER OF SELECTED PREDICTORS

FIGURE 1. The number of selected predictors divided by n (top), along with computational time of evaluating the estimator and tuning the λ -parameter estimator using the different methods (bottom). The design parameters were: $\sigma = 0.5$, $\gamma = 1$, $\alpha = 0.1$, and the design type was (S) with a constant correlation of $\rho = 0.1$ (see Section 4)

2. RISK ESTIMATES

Plots of the risk estimates relative to $n\sigma^2$ for the estimators $\hat{\mu}_{\text{OLS},1}^{\hat{\lambda}_{\text{df}_S}}$ and $\hat{\mu}_{\text{OLS},1}^{\hat{\lambda}_{\text{df}}}$. The dashed lines are the relative risks for the oracle-OLS estimator.

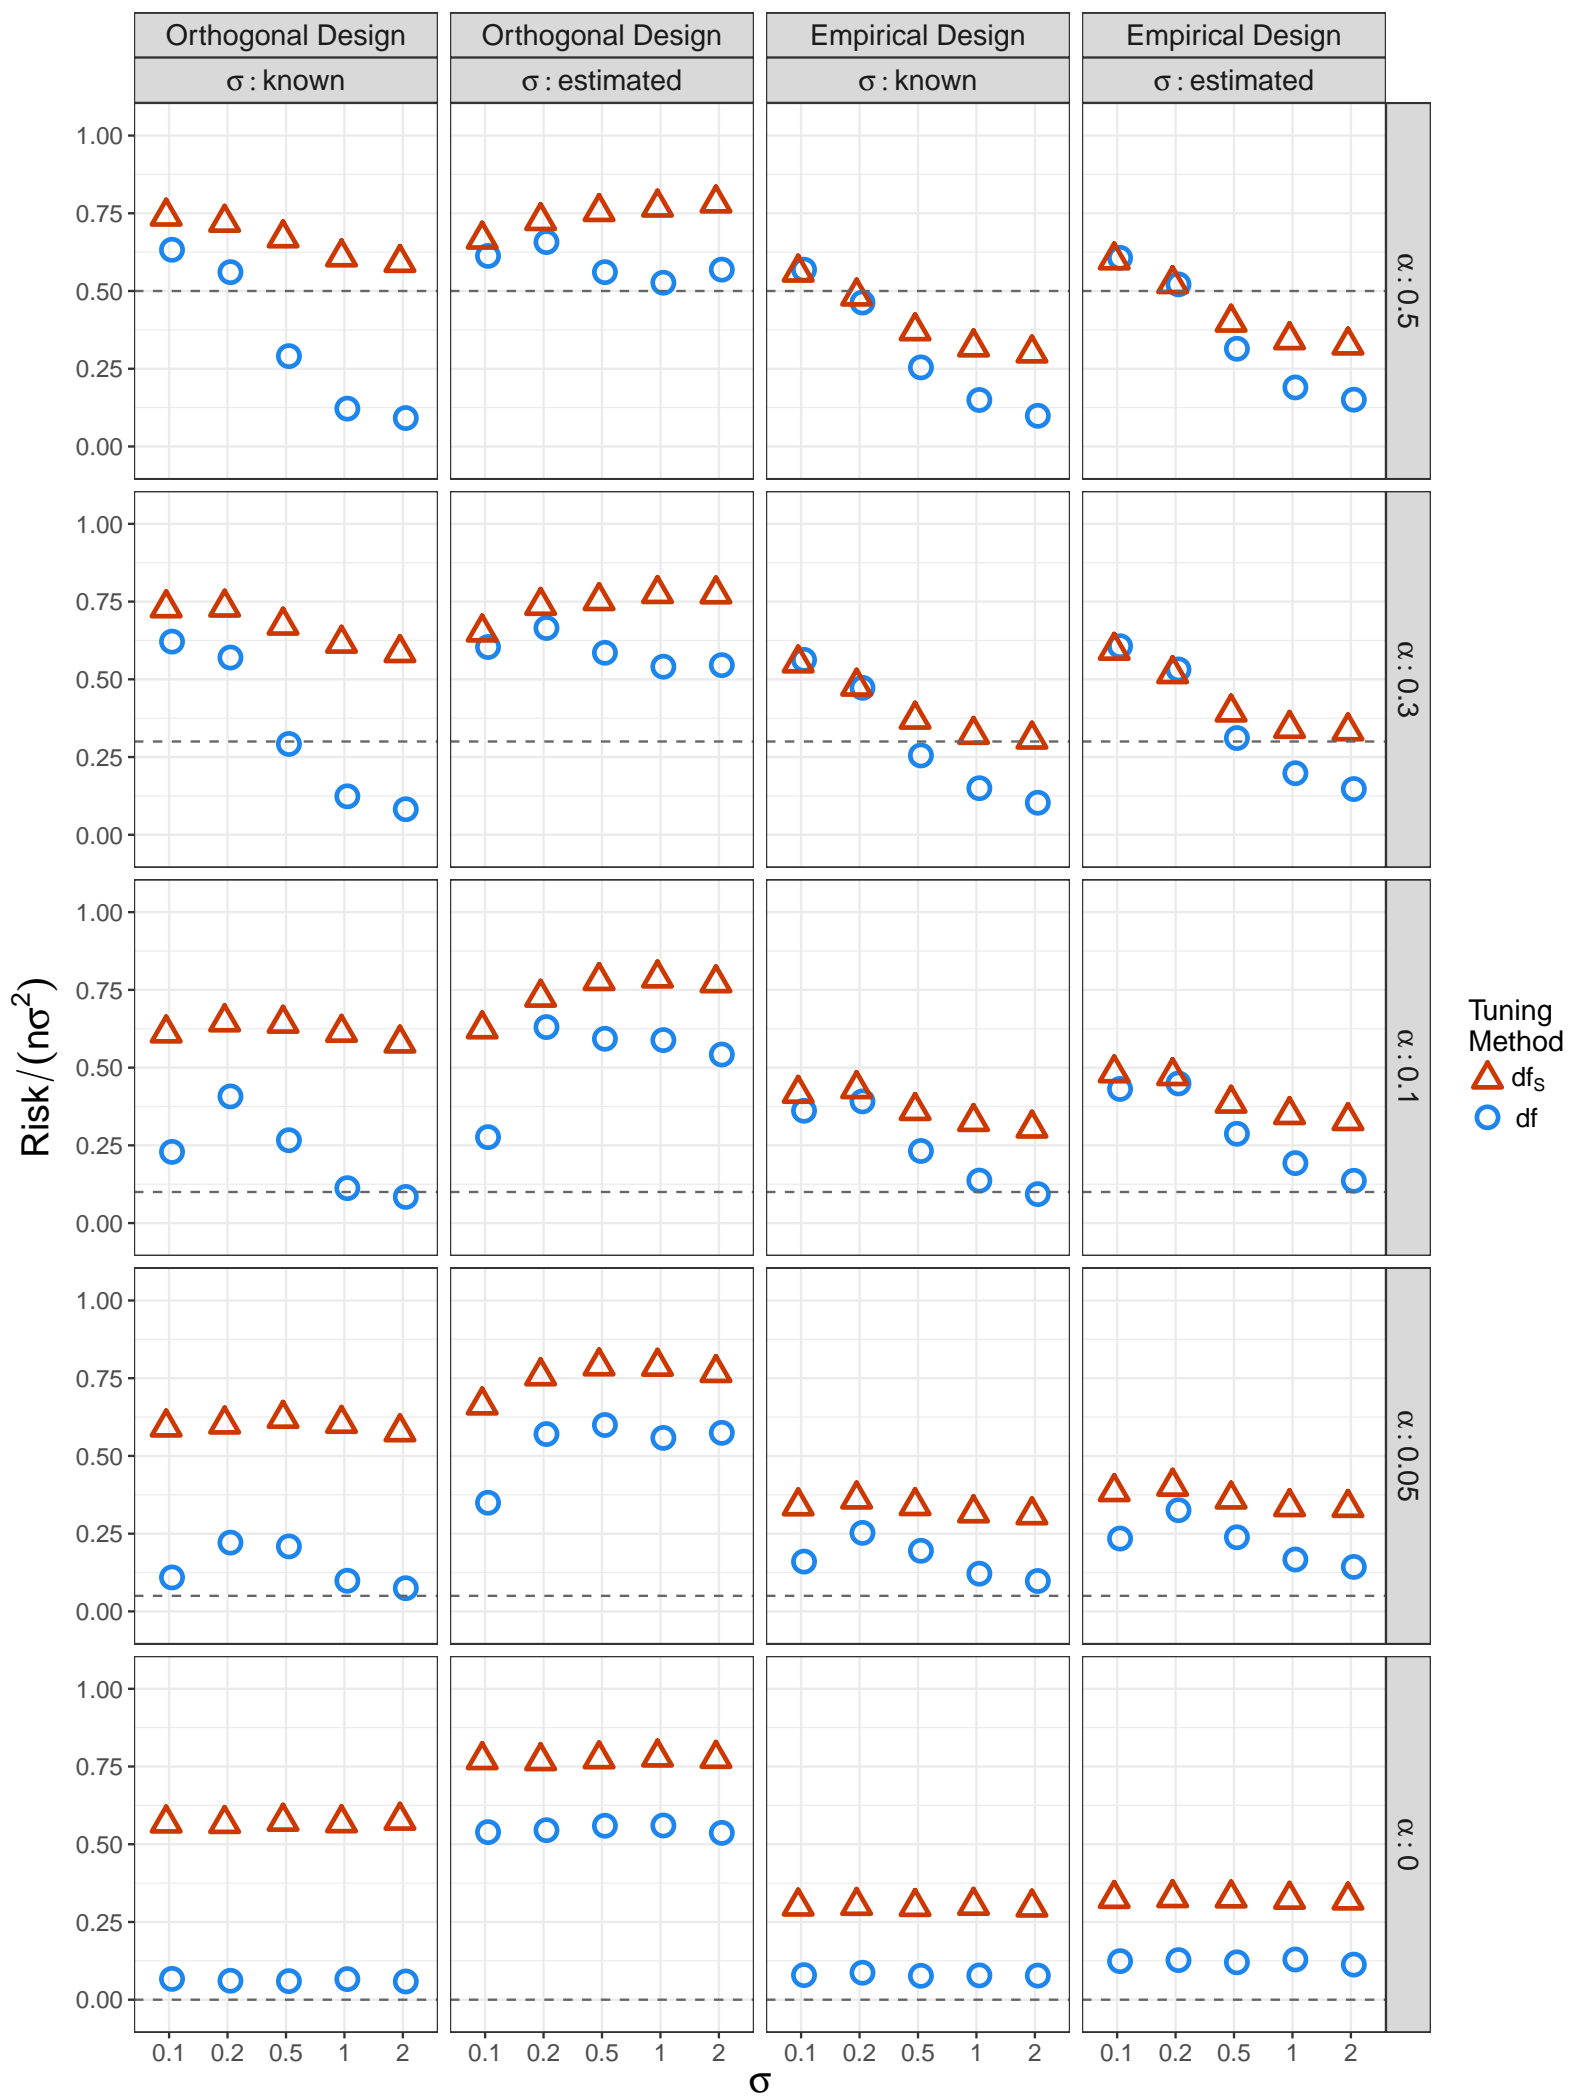

$\gamma = 1, n = 100$ and noise = N

$\gamma = 1, n = 200$ and noise = N

$\gamma = 0.9$, $n = 100$ and noise = N

$\gamma = 0.9$, $n = 200$ and noise = N

Predictors with Constant Correlation: $\gamma = 1$ and $n = 100$ and noise = N

Predictors with Constant Correlation: $\gamma = 1$ and $n = 200$ and noise = N

Predictors with Constant Correlation: $\gamma = 0.9$ and $n = 100$ and noise = N

Predictors with Constant Correlation: $\gamma = 0.9$ and $n = 200$ and noise = N

Predictors with Constant Correlation: $\gamma = 1$ and $n = 100$ and noise = N

Predictors with Constant Correlation: $\gamma = 1$ and $n = 200$ and noise = N

Predictors with Constant Correlation: $\gamma = 0.9$ and $n = 100$ and noise = N

Predictors with Constant Correlation: $\gamma = 0.9$ and $n = 200$ and noise = N

Autoregressive Predictors: $\gamma = 1$ and $n = 100$ and noise = N

Autoregressive Predictors: $\gamma = 1$ and $n = 200$ and noise = N

Autoregressive Predictors: $\gamma = 0.9$ and $n = 100$ and noise = N

Autoregressive Predictors: $\gamma = 0.9$ and $n = 200$ and noise = N

Autoregressive Predictors: $\gamma = 1$ and $n = 100$ and noise = N

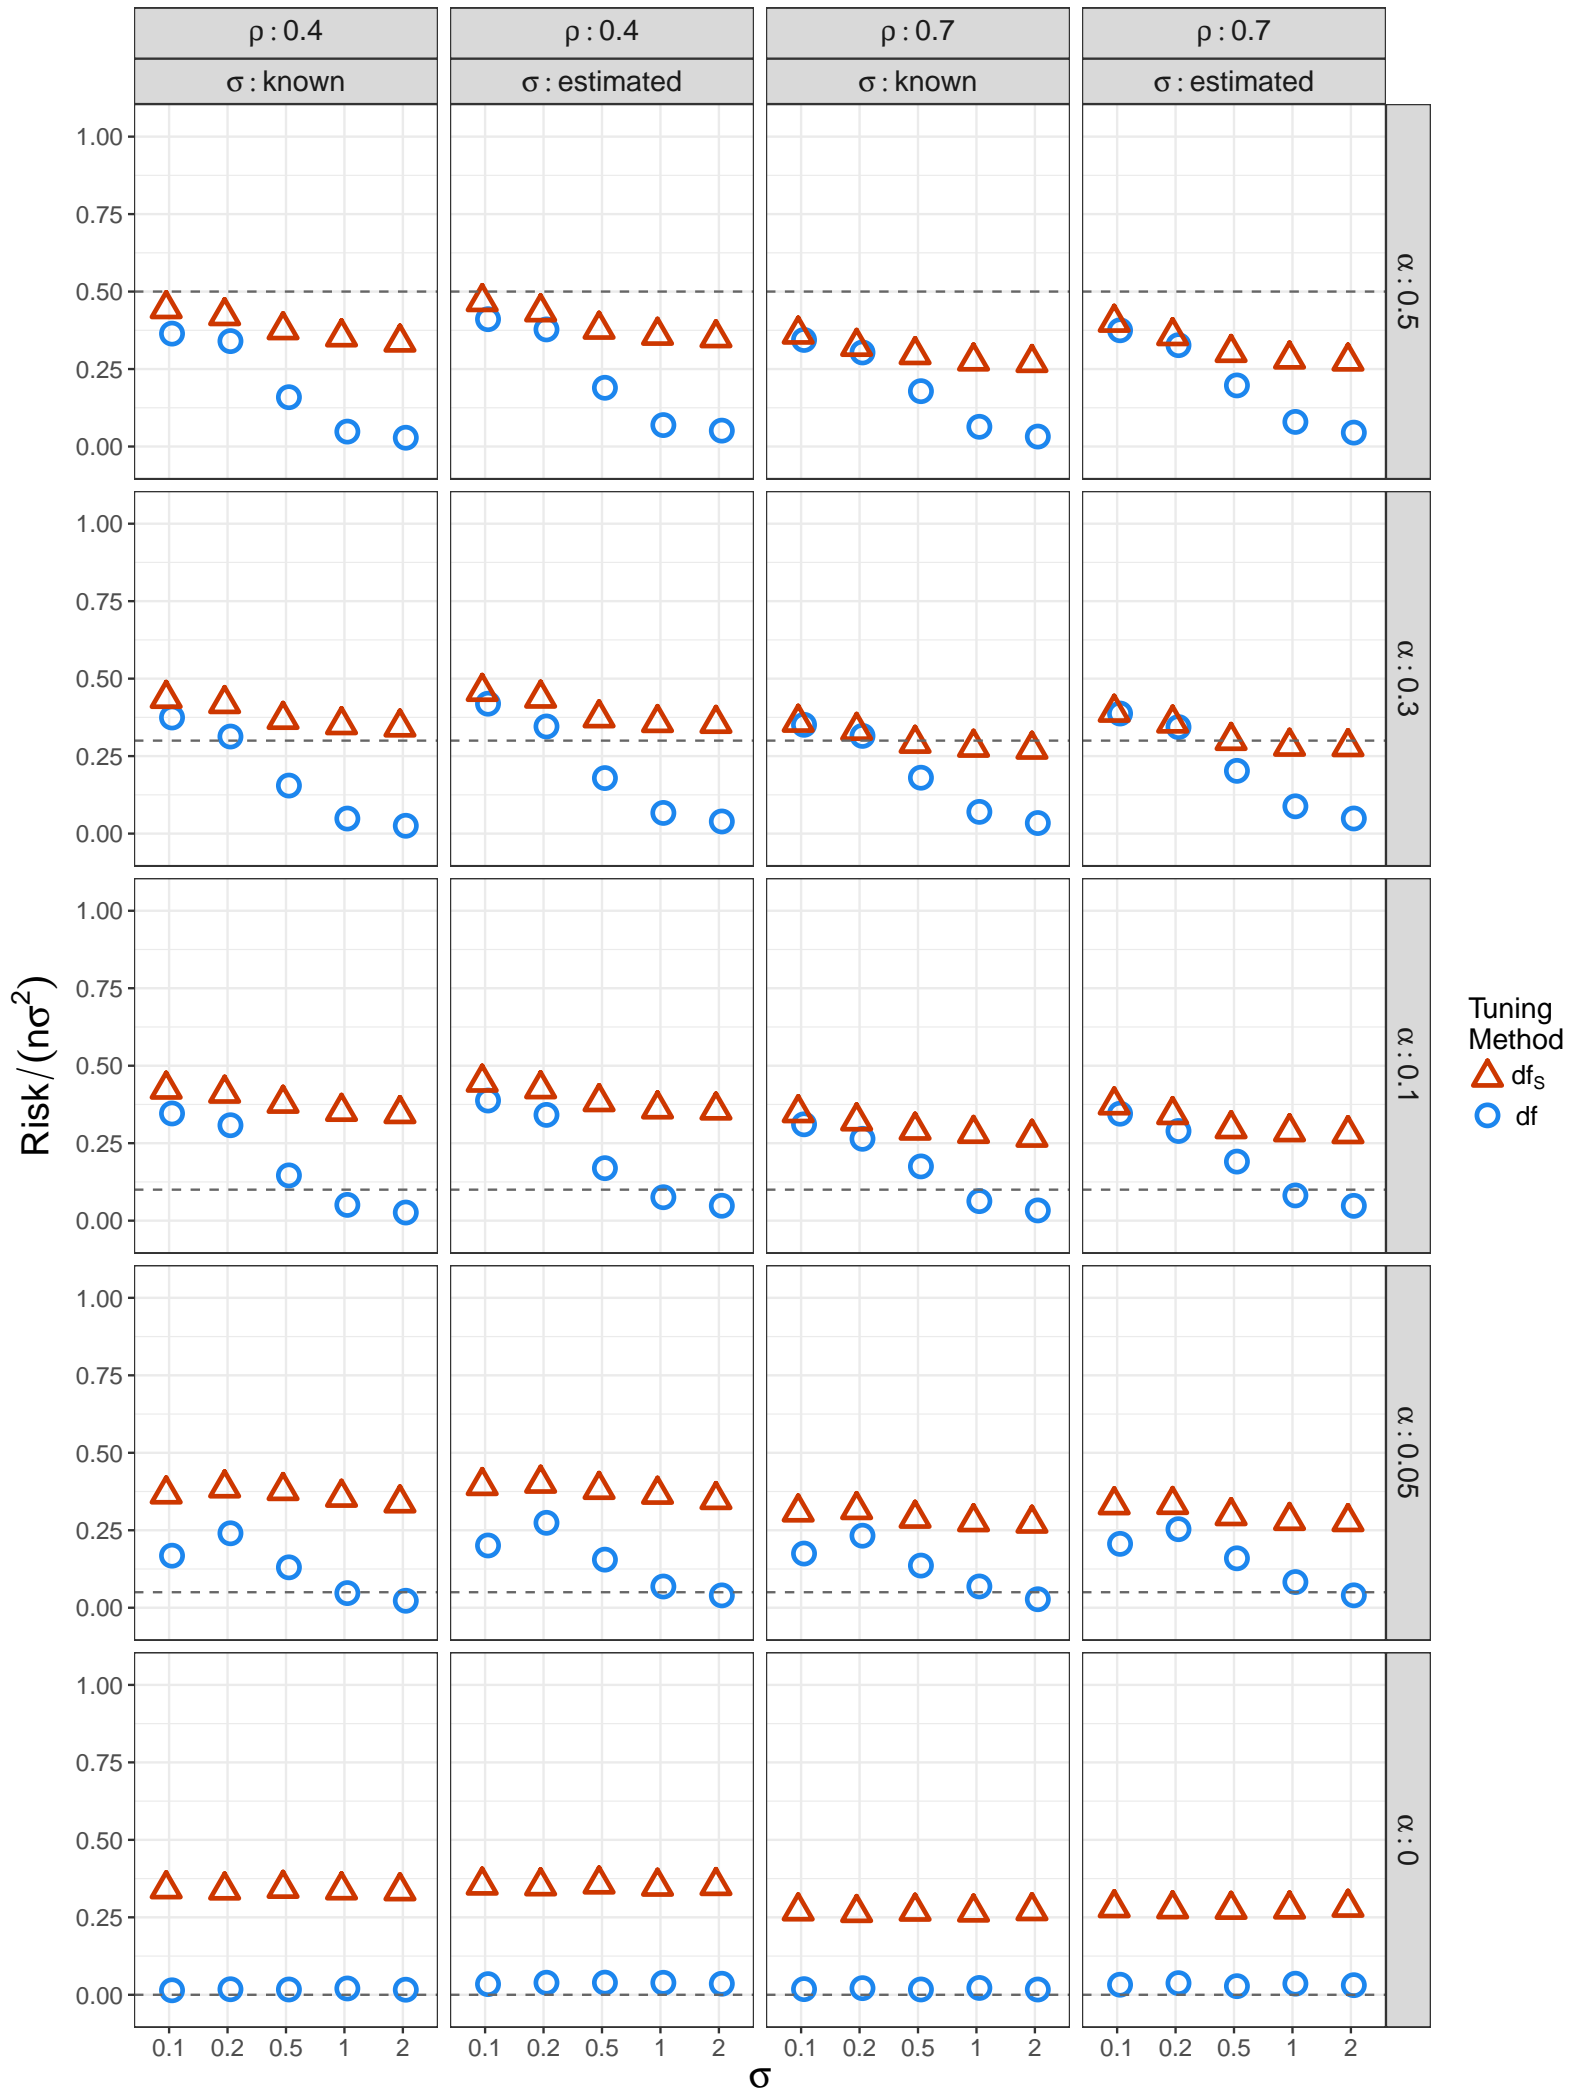

Autoregressive Predictors: $\gamma = 1$ and $n = 200$ and noise = N

Autoregressive Predictors: $\gamma = 0.9$ and $n = 100$ and noise = N

Autoregressive Predictors: $\gamma = 0.9$ and $n = 200$ and noise = N

Plots of the risk estimates relative to $n\sigma^2$ for the estimators $\hat{\mu}_{\text{OLS},1}^{\hat{\lambda}_{\text{df}}}$, $\hat{\mu}_{\text{OLS},1}^{\hat{\lambda}_{\text{CV}-5}}$, $\hat{\mu}_{\text{OLS},1}^{\hat{\lambda}_{\text{CV}-10}}$ and $\hat{\mu}_{\text{lasso}}^{\hat{\lambda}_{\text{df}_S}}$. The dashed lines are the relative risks for the oracle-OLS estimator.

$\gamma = 1, n = 100$ and noise = N

$\gamma = 1, n = 200$ and noise = N

$\gamma = 0.9$, $n = 100$ and noise = N

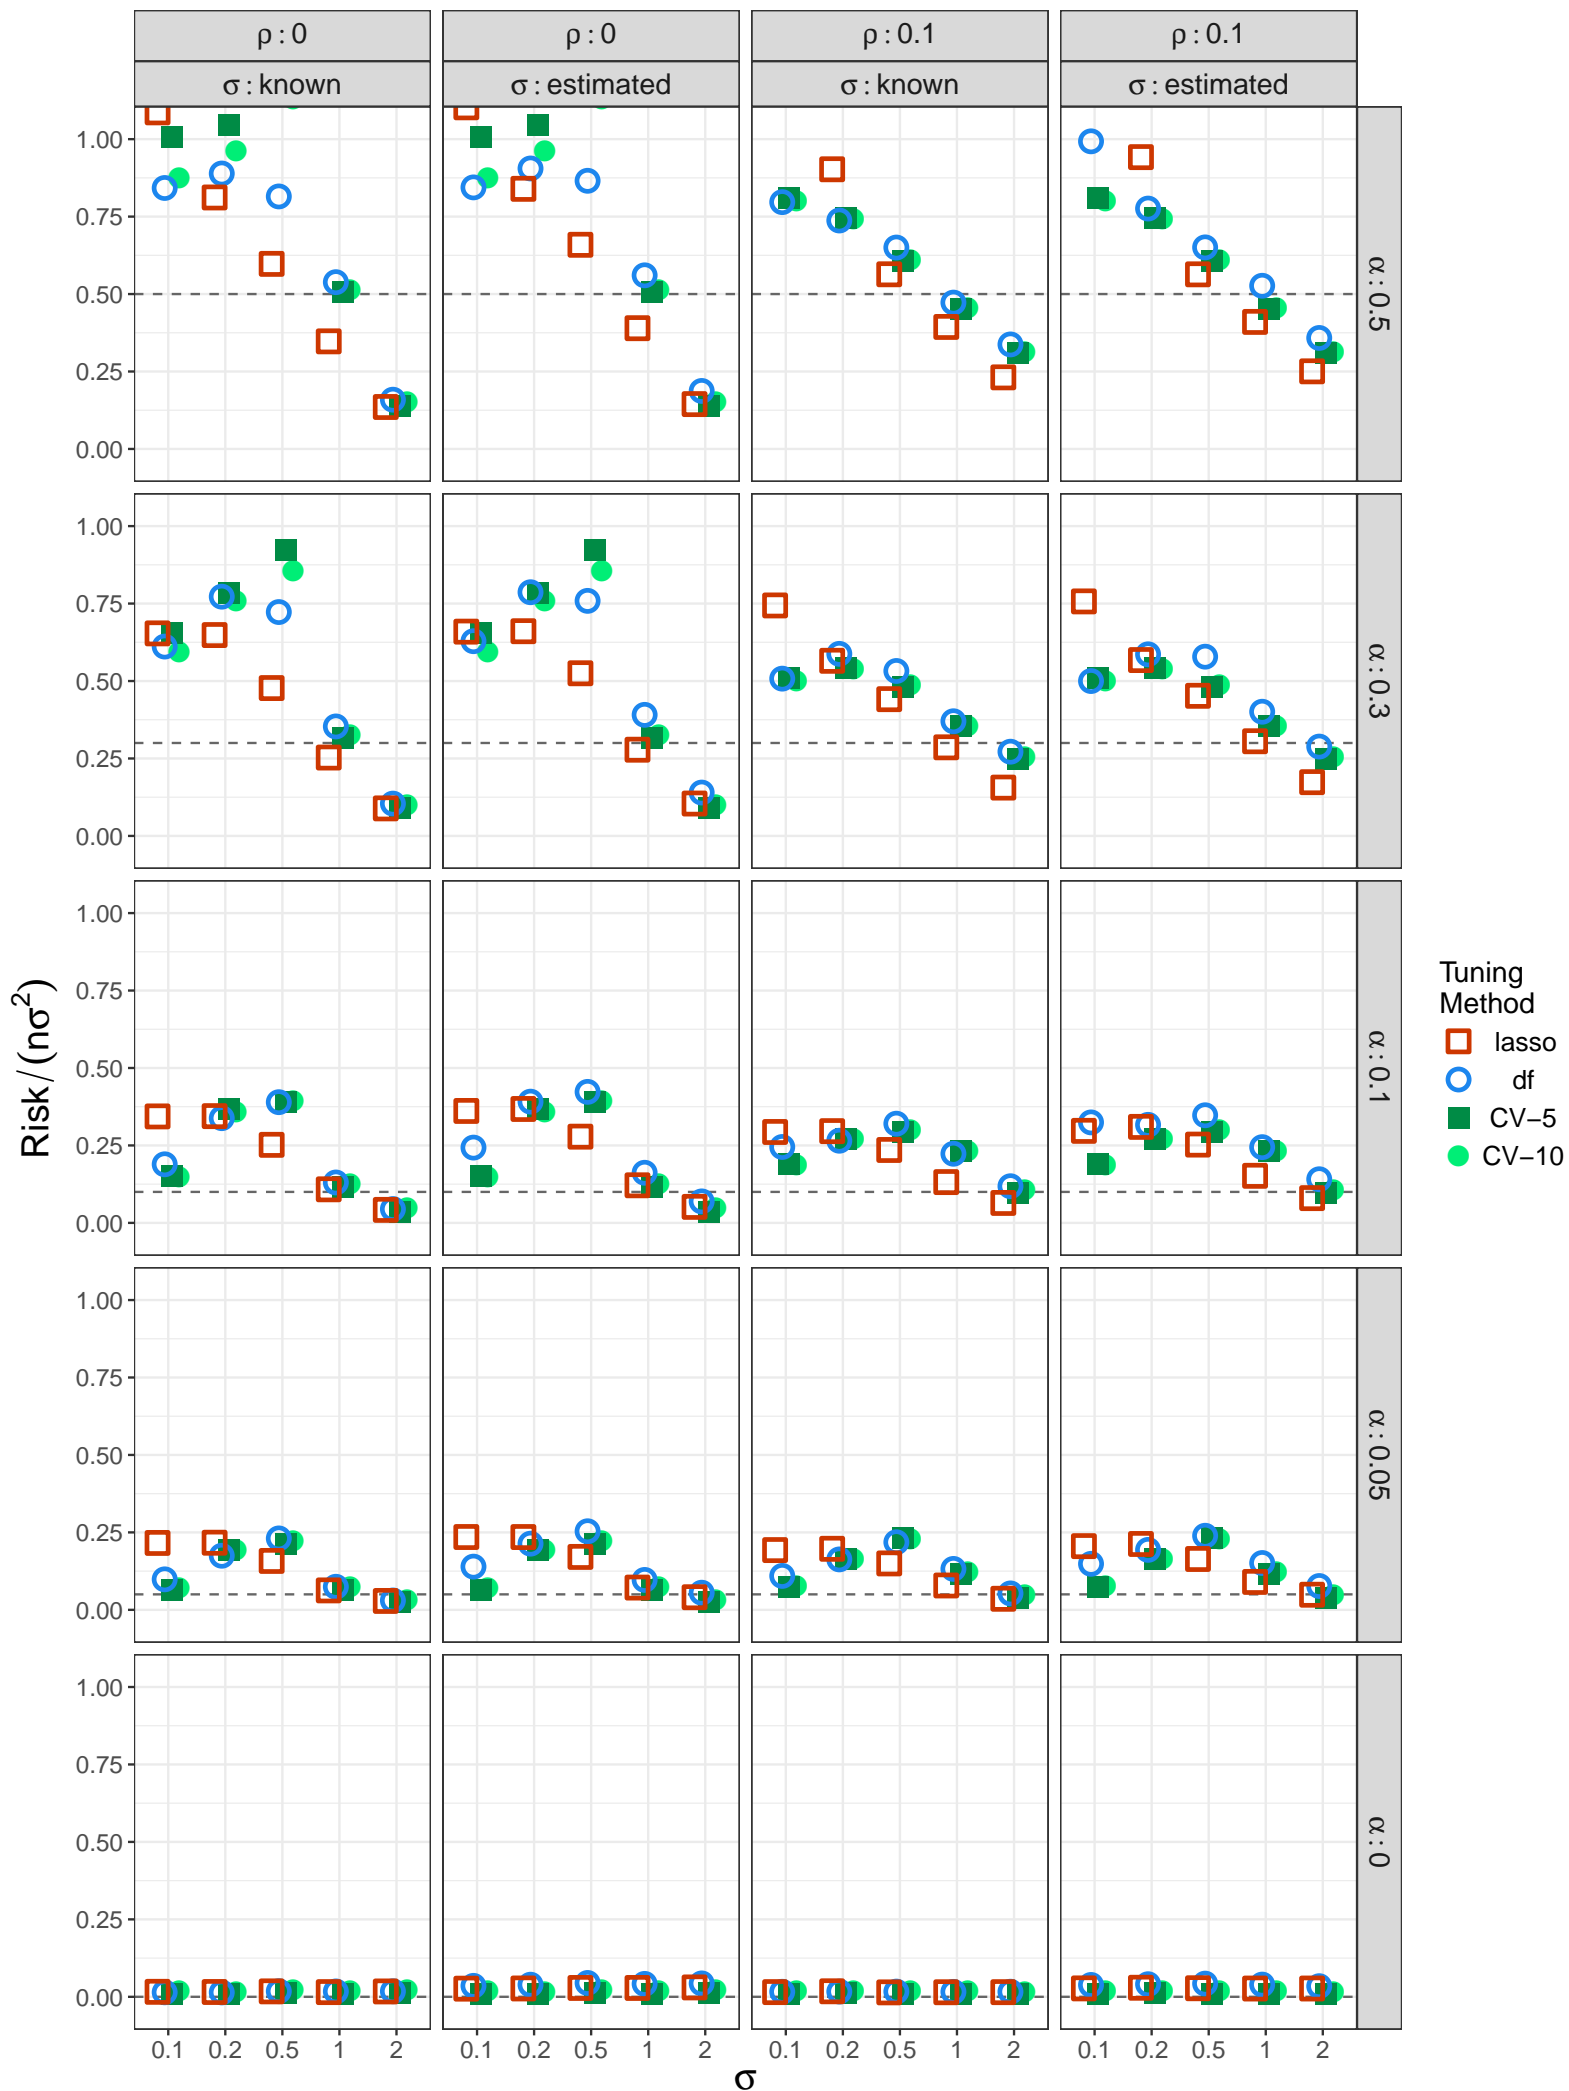

$\gamma = 0.9$, $n = 200$ and noise = N

Predictors with Constant Correlation: $\gamma = 1$, $n = 100$ and noise = N

Predictors with Constant Correlation: $\gamma = 1$, $n = 200$ and noise = N

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 100$ and noise = N

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 200$ and noise = N

Predictors with Constant Correlation: $\gamma = 1$, $n = 100$ and noise = N

Predictors with Constant Correlation: $\gamma = 1$, $n = 200$ and noise = N

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 100$ and noise = N

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 200$ and noise = N

Autoregressive Predictors: $\gamma = 1$, $n = 100$ and noise = N

Autoregressive Predictors: $\gamma = 1$, $n = 200$ and noise = N

Autoregressive Predictors: $\gamma = 0.9$, $n = 100$ and noise = N

Autoregressive Predictors: $\gamma = 0.9$, $n = 200$ and noise = N

Autoregressive Predictors: $\gamma = 1$, $n = 100$ and noise = N

Autoregressive Predictors: $\gamma = 1$, $n = 200$ and noise = N

Autoregressive Predictors: $\gamma = 0.9$, $n = 100$ and noise = N

Autoregressive Predictors: $\gamma = 0.9$, $n = 200$ and noise = N

$\gamma = 1, n = 100$ and noise = T

$\gamma = 1, n = 200$ and noise = T

$\gamma = 0.9, n = 100$ and noise = T

$\gamma = 0.9, n = 200$ and noise = T

Predictors with Constant Correlation: $\gamma = 1$, $n = 100$ and noise = T

Predictors with Constant Correlation: $\gamma = 1$, $n = 200$ and noise = T

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 100$ and noise = T

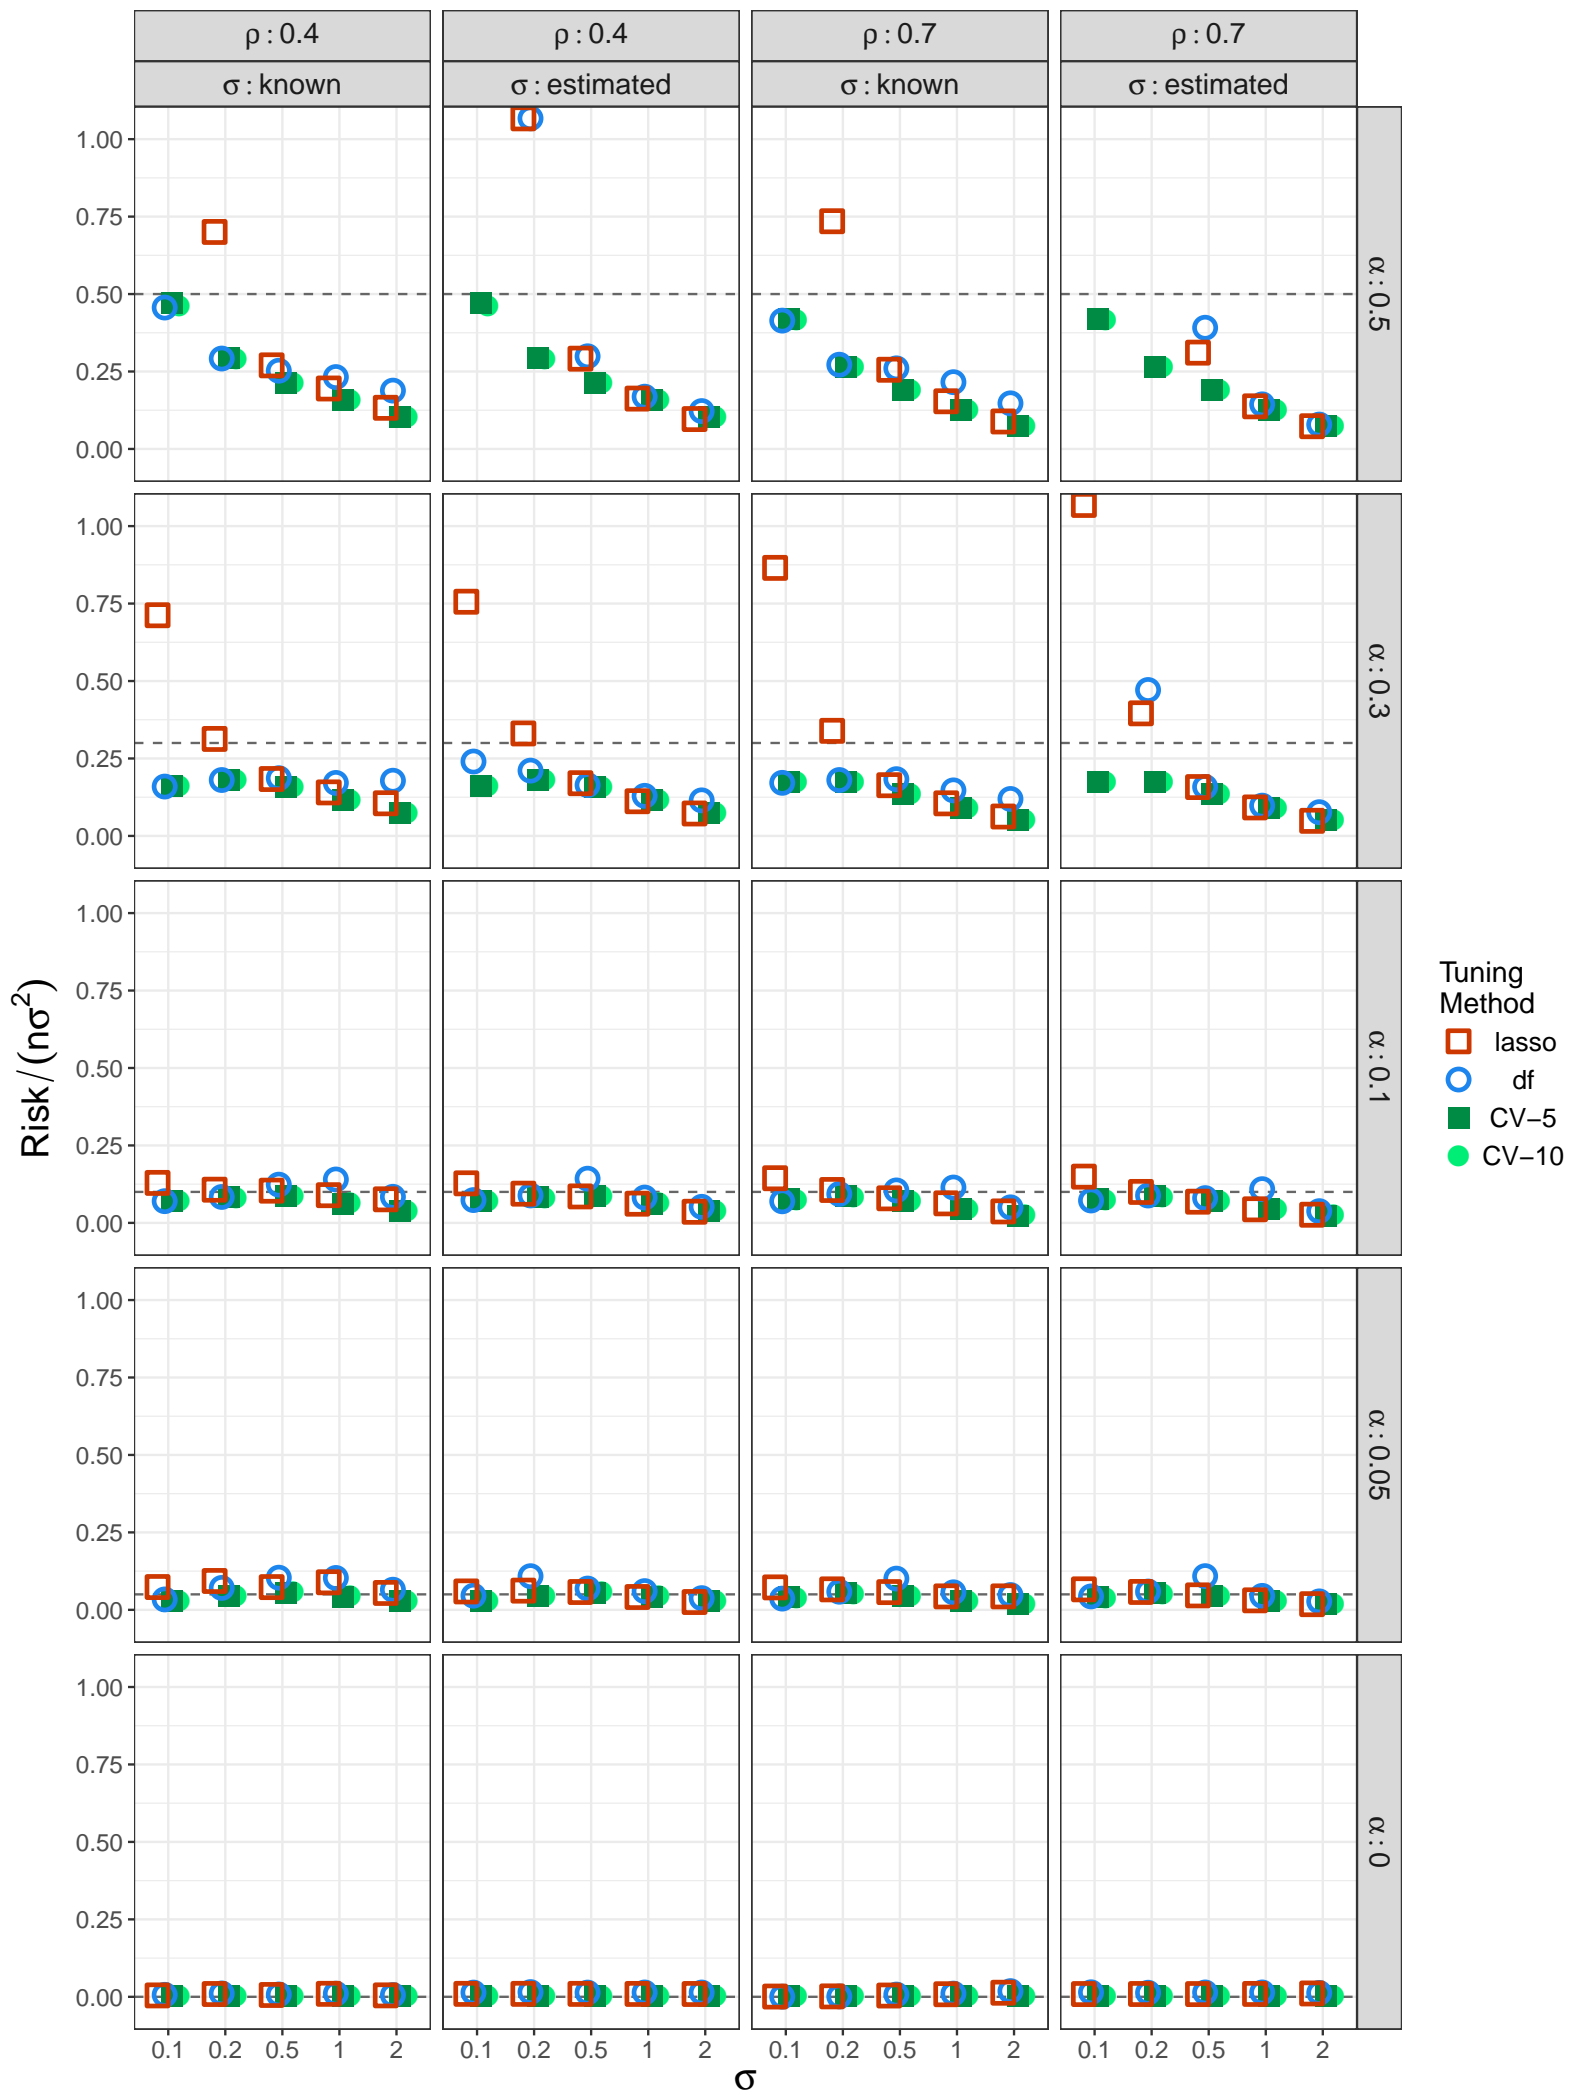

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 200$ and noise = T

Predictors with Constant Correlation: $\gamma = 1$, $n = 100$ and noise = T

Predictors with Constant Correlation: $\gamma = 1$, $n = 200$ and noise = T

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 100$ and noise = T

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 200$ and noise = T

Autoregressive Predictors: $\gamma = 1$, $n = 100$ and noise = T

Autoregressive Predictors: $\gamma = 1$, $n = 200$ and noise = T

Autoregressive Predictors: $\gamma = 0.9$, $n = 100$ and noise = T

Autoregressive Predictors: $\gamma = 0.9$, $n = 200$ and noise = T

Autoregressive Predictors: $\gamma = 1$, $n = 100$ and noise = T

Autoregressive Predictors: $\gamma = 1$, $n = 200$ and noise = T

Autoregressive Predictors: $\gamma = 0.9$, $n = 100$ and noise = T

Autoregressive Predictors: $\gamma = 0.9$, $n = 200$ and noise = T

$\gamma = 1, n = 100$ and noise = SN

$\gamma = 1, n = 200$ and noise = SN

$\gamma = 0.9, n = 100$ and noise = SN

$\gamma = 0.9, n = 200$ and noise = SN

Predictors with Constant Correlation: $\gamma = 1$, $n = 100$ and noise = SN

Predictors with Constant Correlation: $\gamma = 1$, $n = 200$ and noise = SN

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 100$ and noise = SN

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 200$ and noise = SN

Predictors with Constant Correlation: $\gamma = 1$, $n = 100$ and noise = SN

Predictors with Constant Correlation: $\gamma = 1$, $n = 200$ and noise = SN

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 100$ and noise = SN

Predictors with Constant Correlation: $\gamma = 0.9$, $n = 200$ and noise = SN

Autoregressive Predictors: $\gamma = 1$, $n = 100$ and noise = SN

Autoregressive Predictors: $\gamma = 1$, $n = 200$ and noise = SN

Autoregressive Predictors: $\gamma = 0.9$, $n = 100$ and noise = SN

Autoregressive Predictors: $\gamma = 0.9$, $n = 200$ and noise = SN

Autoregressive Predictors: $\gamma = 1$, $n = 100$ and noise = SN

Autoregressive Predictors: $\gamma = 1$, $n = 200$ and noise = SN

Autoregressive Predictors: $\gamma = 0.9$, $n = 100$ and noise = SN

Autoregressive Predictors: $\gamma = 0.9$, $n = 200$ and noise = SN
