

Helping You Improve Software Sustainability and Development Productivity: An Overview of the IDEAS Productivity Project

Roscoe A. Bartlett (SNL), David E. Bernholdt (ORNL), Anshu Dubey (ANL), Rinku Gupta (ANL), Michael A. Heroux (SNL), Lois Curfman McInnes (ANL), Reed Milewicz (SNL), Mark C. Miller (LLNL), Elaine Raybourn (SNL), Greg Watson (ORNL), James Willenbring (SNL), *and the rest of the IDEAS Productivity Team*

Introduction and Call to Action

- IDEAS = Interoperable Design of Extreme-Scale Application Software
- **IDEAS-ECP (2017-present)**
 - Funded by Exascale Computing Project (ECP)
 - Work with the ECP community to improve developer productivity and software sustainability as key aspects of increasing overall scientific productivity
- IDEAS-Classic (2014-2017)
 - Funded by DOE / ASCR + BER Terrestrial Ecosystem Modeling
 - Improving interoperability of key DOE numerical libraries
- **Fundamental goals**
 - Increase the awareness of, and attention to, software development, productivity, and sustainability throughout the HPC/computational science and engineering (CSE) software community
 - Engage with...
 - Research sponsors and other stakeholders
 - Specific software development teams
 - Broader HPC/CSE community

We're not a Community without You

- Be part of the community talking about and acting on software development, productivity, and sustainability!
- Join us for software-related events at SC19 and other conferences
 - Tutorial: Floating-Point Analysis and Reproducibility Tools for Scientific Software (Sunday)
 - Tutorial: Better Scientific Software (Monday)
 - Tutorial: Managing HPC Software Complexity with Spack (Monday)
 - BOF: Spack Community BOF (*proposed*)
 - BOF: Software Engineering and Reuse in Computational Science and Engineering (*proposed*)
- Organize software-focused events – on your own, or join with us!
- Follow the **IDEAS Productivity Project**: <https://ideas-productivity.org/>
 - Join us for events, including: **HPC Best Practices Webinar Series**, tutorials, minisymposia, posters, birds of a feathers, etc.
 - Tell us what topics you'd like hear (or present) in a webinar or a tutorial
 - Co-organize a workshop or minisymposium with us
 - Announcement mailing list: <http://eepurl.com/cQCcyJ5> (~1-2/month)
 - Email Us: IDEASProductivity@gmail.com
- Use and contribute to **Better Scientific Software**: <https://bssw.io/>
 - Contributing: <https://bssw.io/contributes/new>
 - Mailing list: <https://bssw.io/pages/receive-our-email-digest> (~1/month)
 - Contact Us: <https://bssw.io/contact>
- Apply for the **BSSw Fellowship**: <https://bssw.io/pages/bssw-fellowship-program>
 - Fosters and promotes practices, processes, and tools to improve developer productivity and software sustainability of scientific codes.
 - Application window for 2020 Fellowship: 12 Aug-15 Oct 2019

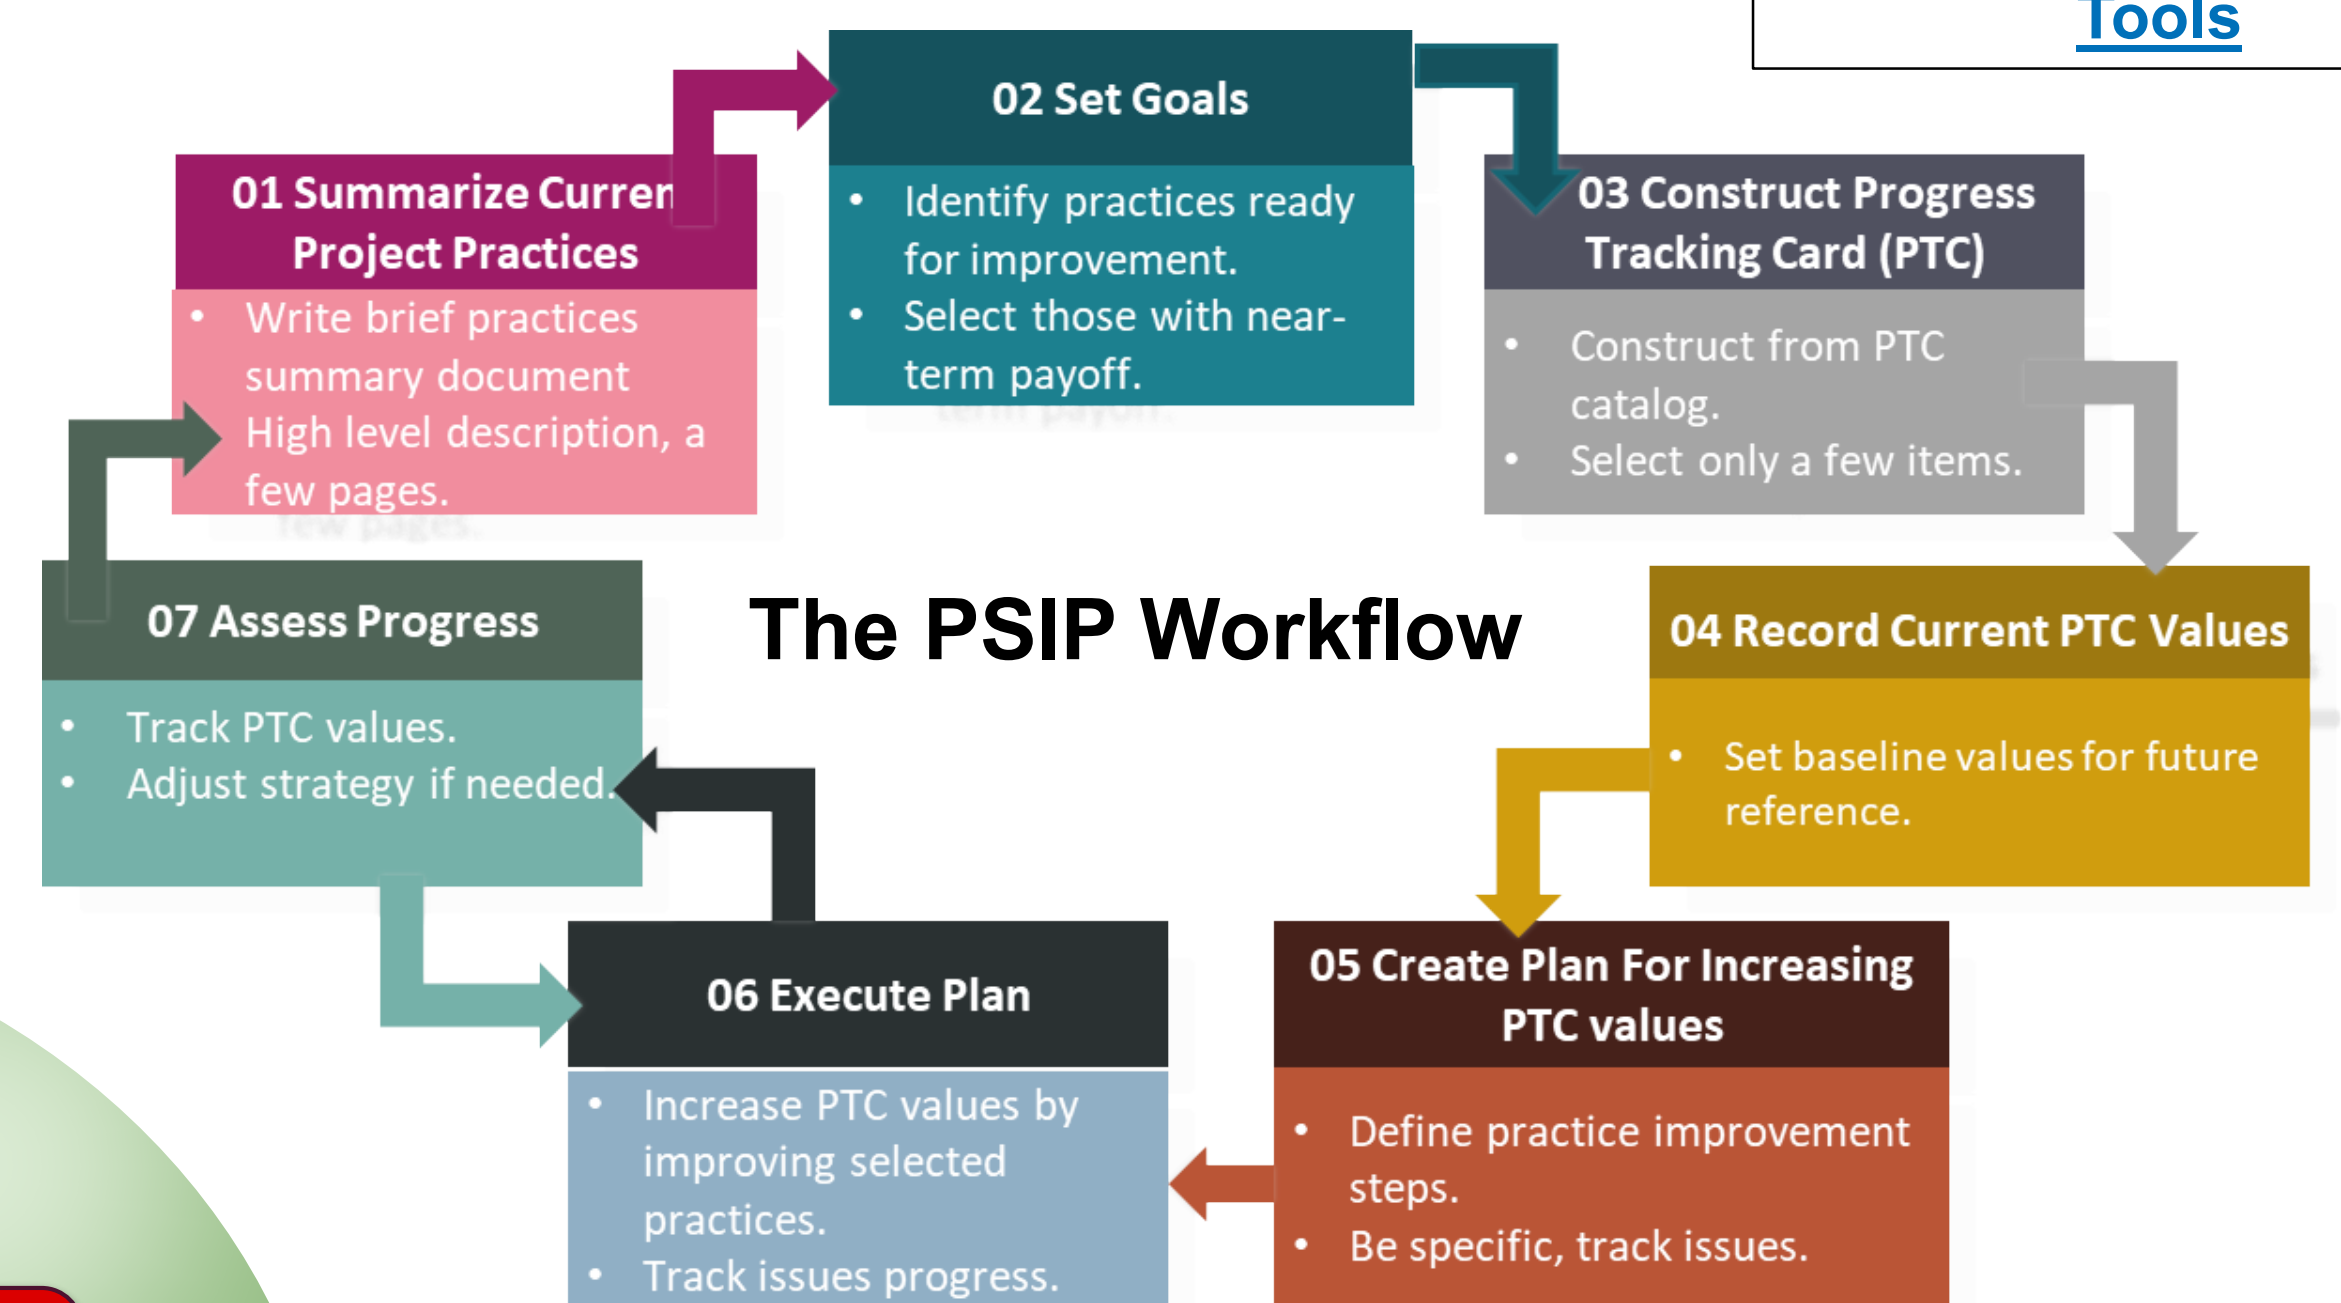

Improving the Development Experience

Productivity and Sustainability Improvement Planning (PSIP)

- A simple methodology to help improve software development practices
- Focus on small, measurable improvements over a short time frame (months)
- Numerous incremental improvements add up over time
- IDEAS Productivity project members assist ECP software teams
 - Interview to document current practices and challenges
 - Assistance selecting target for improvement and tracking progress
- Can be implemented without outside help
- Leverage available resources to learn new techniques (see [Outreach](#) and [Better Scientific Software](#) sections below)

The **PSIP Tools** GitHub repo is a collection of documents that enable the adoption and use of PSIP for a software team:
<https://github.com/better-scientificsoftware/PSIP-Tools>

Common Challenges

- Implementing or expanding testing
- Onboarding and offboarding of team members
- Making better use of modern language features
- Improving and maintaining documentation
- Understanding performance and opportunities for improvement
- Ensuring citation and credit for software
- Bringing best practices to long-lived codes
- Version control workflows
- Effective, but lightweight management of development

Outreach

Tutorials

- Full-day and half-day variants
 - Hands-on in full-day
- Recent venues
 - ATPESC (2016-2018)
 - ECP Annual Meeting (2017-2018)
 - ISC (2018-2019)
 - SIAM CSE17
 - Supercomputing (2016-2018)
- Current tutorial modules
 - Overview of Best Practices for HPC Software Developers
 - Git Workflows
 - Better (Small) Scientific Software Teams
 - Improving Reproducibility through Better Software Practices
 - An Introduction to Software Licensing
 - Verification and Refactoring
 - Code Coverage and Continuous Integration

Best Practices for HPC Software Developers Webinar Series (HPC-BP)

- Monthly series, since May 2016
 - Traditional time slot is 1-2pm ET on a Wednesday
 - Which Wednesday varies
- Offered live and archived
- Presented by the community to the community
 - Not just IDEAS
- 29 webinars to date
 - 77 attendees per webinar on average
 - 1702 attendees total, to date
- Series info, archives, and mailing list for announcements
 - <https://ideas-productivity.org/events/hpc-best-practices-webinars/>

Webinar Site

Technical Meetings and Birds of a Feather Sessions

- We help create opportunities to talk about software development, productivity, and sustainability in more “academic” environments
 - <https://ideas-productivity.org/events/>
- Birds of a Feather sessions
 - Software Engineering and Reuse for Computational Science and Engineering
 - SC15, SC16, SC17, SC18, ISC 2019
 - See <http://bit.ly/swe-cse-bof>
- Minisymposia
 - SIAM Computational Science and Engineering (2015, 2017, 2019)
 - PASC (2018, 2019)
- Thematic poster sessions
 - SIAM CSE (2017, 2019)

BOF Site

SIAM CSE19
Miniposterium
posters, archived
on FigShare

Better Scientific Software

Building an Online Community

- A [community-based resource](#) for scientific software improvement information exchange
- A central hub for sharing information on practices, techniques, experiences, and tools to improve developer productivity and software sustainability for computational science & engineering (CSE)

Goals

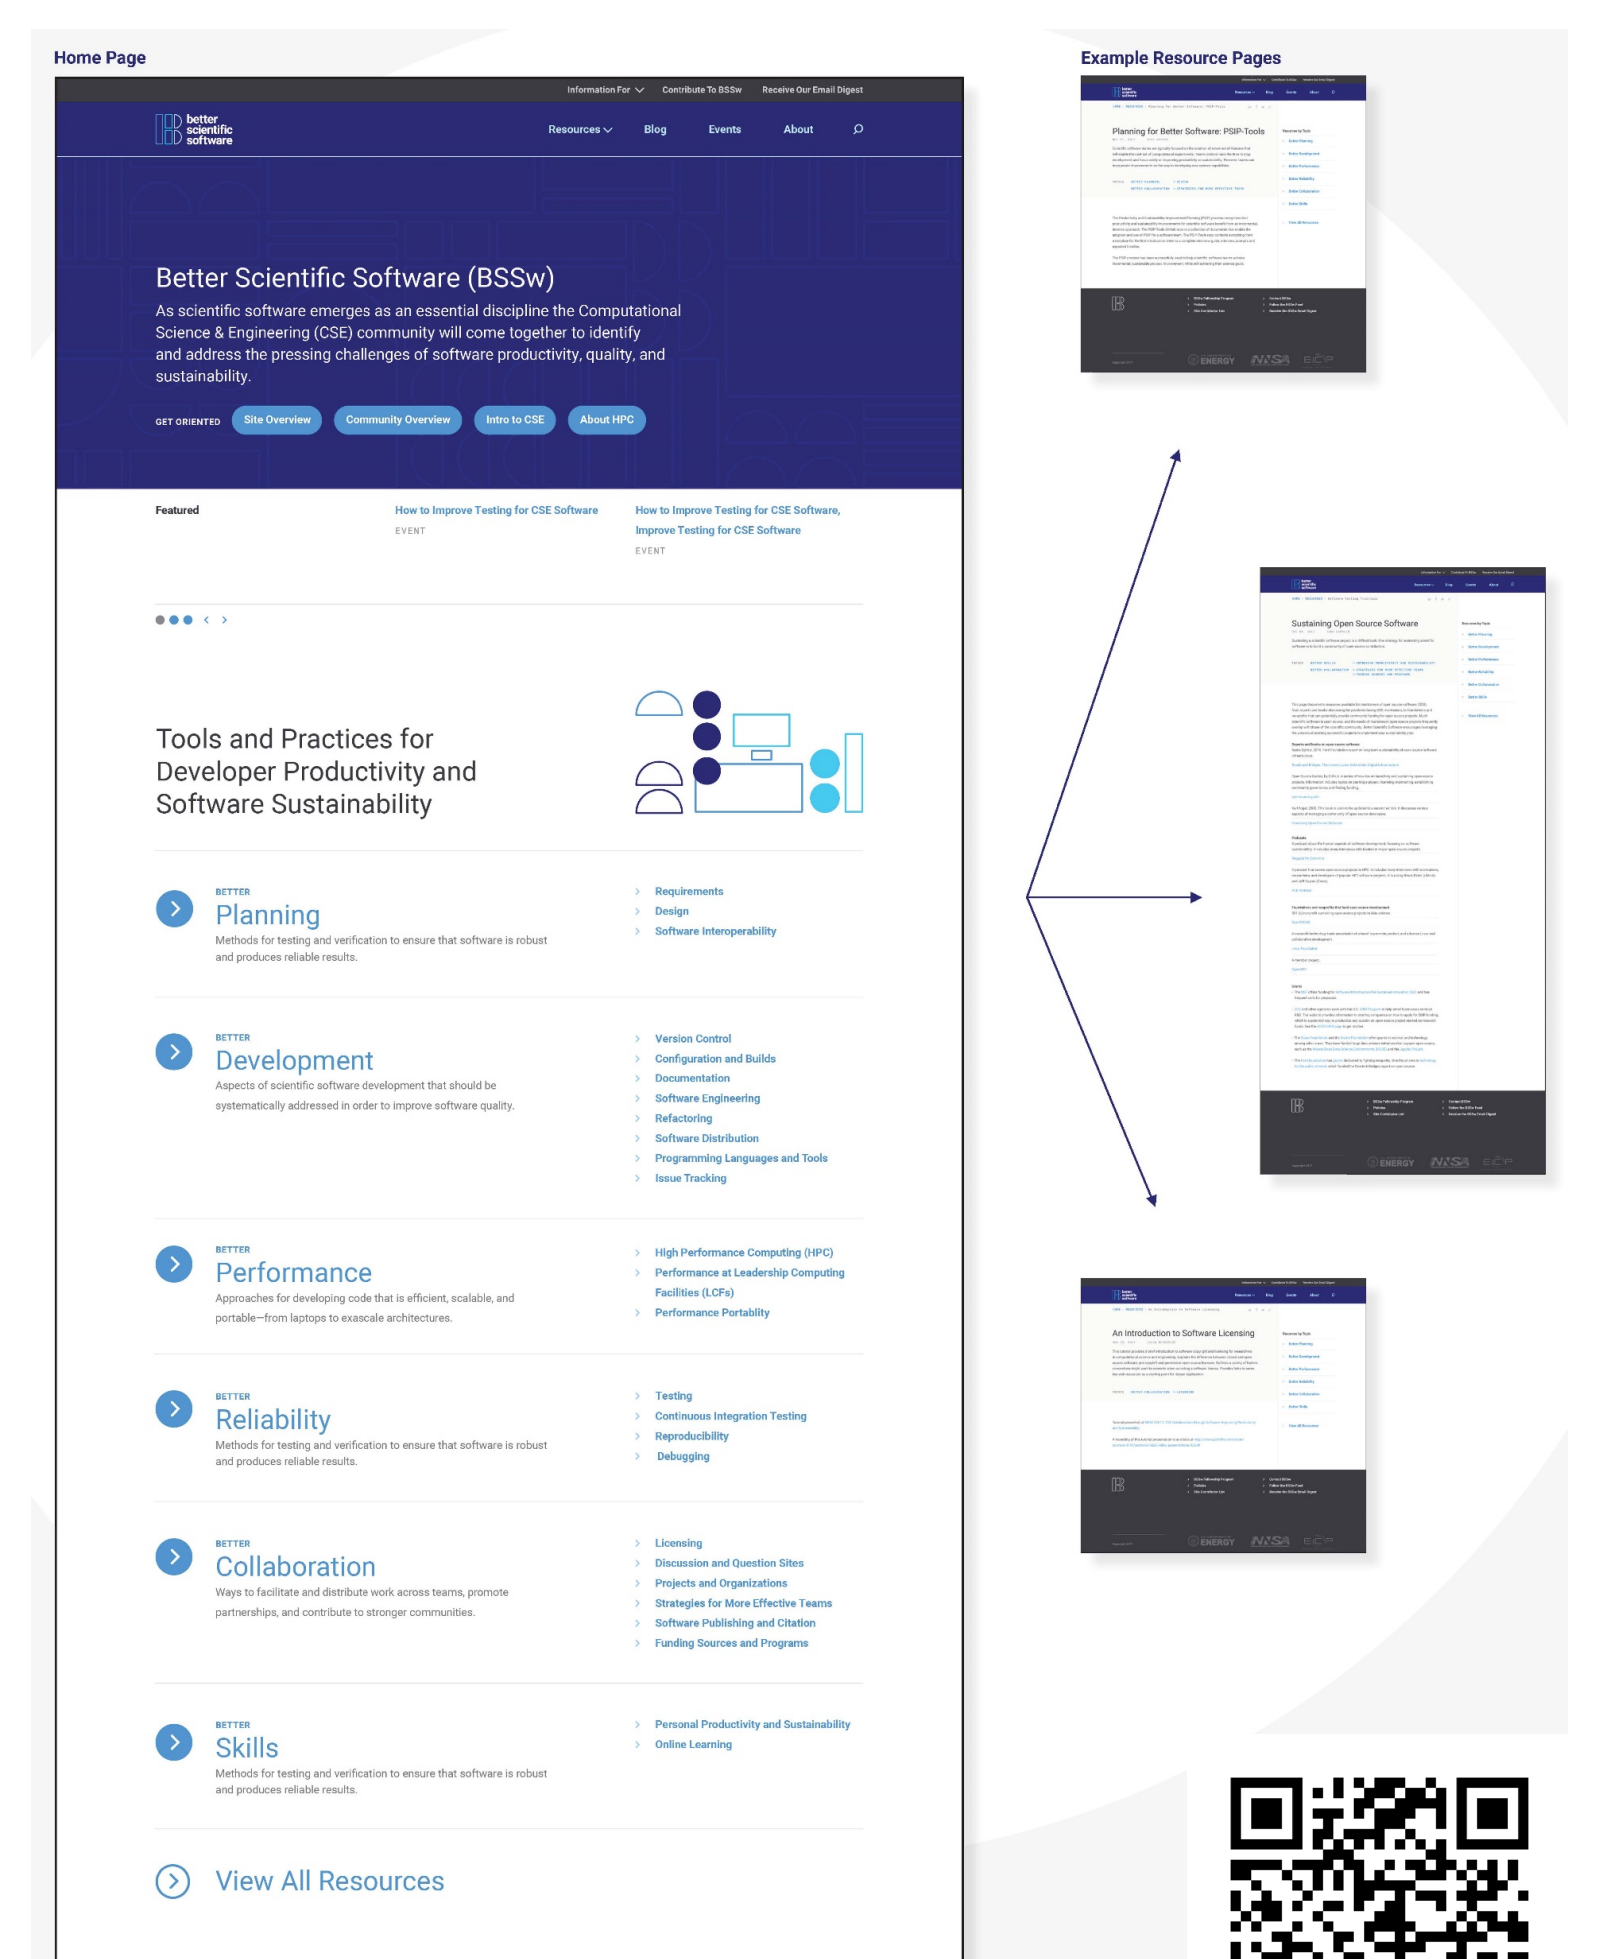

- Raise awareness of the importance of **good software practices** to scientific productivity and to the quality and reliability of computationally-based scientific results
- Raise awareness of the **increasing challenges** facing CSE software developers as high-end computing heads to extreme scales
- Help CSE researchers **increase effectiveness** as well as leverage and impact
- Facilitate **CSE collaboration via software** in order to advance scientific discoveries

Site users can...

- **Find information** on scientific software topics
- **Contribute new resources** based on your experiences
- Create content tailored to the unique needs and perspectives of a focused scientific domain

Types of content on BSSw

- **Blog articles**: success stories, perspectives, opportunities, and more
- **Curated content**: short pointers to useful material already hosted elsewhere
- **Original content**: content primarily hosted on BSSw
- **Events**: increase awareness of events related to better scientific software
- **Community Landing Pages**: provide an perspective on BSSw resources tailored to a particular technical community

BSSw Monthly Email Digest
