This spreadsheet contains an analysis of a whitelist comprising 153 entries issued by the Home Department, Government of Jammu and Kashmir on 18 January 2020: https://www.scribd.com/document/443380803/Temporary-Suspension-of-Telecom-Services#download&from_embed. The department issued an order with the accompanying whitelist in response to a Supreme Court judgement dated 10 January 2020 (*Anuradha Bhasin vs. Union of Indian and Ors.*) directing the Government of India to review the blanket suspension of Internet services in Jammu and Kashmir since August 2019.

The empirical analysis was conducted by Rohini Lakshané and Prateek Waghre on 22 and 23 January 2020, IST. A Chrome browser extension was used to simulate access to only the URLs mentioned in the government order.

| Legend | |
|--------|---|
| | Duplicate entry |
| | Invalid URL/ Inconclusive entry/ Indeterminate URL |
| | No URL specified/ No qualifying information about the whitelisted entry |
| NA | Not applicable |

The results have been logged and categorised according to this schema:

| Testing on an unrestricted connection | |
|--|---|
| Is the URL accessible? | <p>This column logs the results of a preliminary check for URLs that lead to error messages, such as broken links and websites/ webpages that are misconfigured.</p> <p>The results are categorised as: Yes: The URL is accessible</p> <p>Invalid URL; Duplicate URL; No URL specified; Inconclusive entry/ Indeterminate URL: The URL or whitelist entry are not accessible for reasons described above.</p> |
| Does the URL redirect to another? | <p>The column indicates whether a URL redirects to another URL by default. Categorised as: Yes/ No</p> |

| | | |
|--------------------------|---------------------------------|--|
| | | <p>This column specifies the redirect target URL, if it exists.</p> <p>Categorised as: No redirect</p> <p>https: The initial URL on the whitelist either contains http or no protocol is specified. It redirects by default to its https version, with the rest of the URL being identical. E.g., www.moneycontrol.com on the whitelist redirects by default to https://www.moneycontrol.com.</p> <p><URL>: The initial URL on the whitelist redirects by default to a URL with a different path or prefix. In such cases, the redirect target URL is specified here. E.g., https://www.icidirect.com redirects to https://www.icidirect.com/idirectcontent/Home/Home.aspx</p> |
| | Redirects to | |
| | Remark/ observation | Observations based on the testing so far. |
| Whitelist testing | | |
| | Page Layout | <p>This column logs how the page appears visually to the viewer. Classified as either Intact or Broken.</p> <p>Intact - The website was visually identical with and without the whitelist restriction in place.</p> <p>Broken - Its appearance was significantly altered when accessed with the whitelist restrictions.</p> <p>Inaccessible due to redirects - The website automatically redirected to another domain which was not on the whitelist. No further analysis was possible in such cases.</p> |
| | Images Loading? | <p>Categorised as Yes/ No/ Partial.</p> <p>Yes - All Images appeared on the website even with the whitelist restrictions.</p> <p>No - No images appeared on the website with the whitelist restrictions.</p> <p>Partial - Some images on the website loaded with the restrictions.</p> |
| | Has sign-in? | This column logs whether the website provides its users with an option to sign-in for its services or for personalised content. Categorised as Yes/ No. |
| | Sign-in Section Visible? | <p>Is the sign-in page accessible or is the sign-in section on the website functional with the whitelist restrictions in place?</p> <p>Yes - Sign-in page was under the whitelisted domain OR Sign-in section of the website was responsive even if the page layout was broken</p> <p>No - Sign-in required accessing a non-whitelisted domain OR Sign-in section of the website was non-responsive.</p> <p>Partial - The website provided 3rd Party Authentication options via Facebook/Google etc which were not accessible.</p> <p>Note: The actual sign-in process was not tested for every website. There is potential for additional website failures if this process relies on calls to non-whitelisted domains.</p> |

| | | |
|--|----------------------------------|---|
| | Other Functions Affected? | A subjective assessment of whether other parts of the website were impacted by the whitelisting restrictions. If any were found, these were listed in the 'Specify' column. This assessment should be considered indicative and not exhaustive. |
| | Practically Usable? | A subjective assessment of whether the website could still be used or not. Yes - Main features were not affected OR The website offered limited functionality that wasn't impacted. No - Website is unusable as main features are not functional OR Visual elements were missing/broken such that it could not be used in any meaningful way. Partial - Some features (mainly informational) were still functional |
