

Benefits Summary for a Data Archive

Direct Benefits	Indirect Benefits (Costs Avoided)
<p>Time and resource savings for researchers and teachers</p> <p>Verification of research through increased data citation thanks to relevant citation information and tools</p> <p>Access to data provides new research opportunities by increasing use of data within collections thanks to proper Collections Development Policy</p> <p>Re-purposing and re-use of data maximises the value of data holdings when the data is available for third parties</p> <p>Increasing research productivity</p> <p>Assisting in provision of a skills base</p> <p>Customer service ethos of data archive staff</p>	<p>No re-creation of data</p> <p>Lower future archiving costs increase the likelihood of data being available, earlier in the lifecycle</p> <p>Re-purposing data for new audiences</p> <p>Use by new audiences</p> <p>Protecting returns on earlier investments</p> <p>Reduces potential duplication of effort</p> <p>Data management at scale can lead to cost efficiencies</p>
Near Term Benefits	Long-Term Benefits
<p>Value to current researcher and students</p> <p>Single point of access</p> <p>Increasing speed of access to data</p> <p>Ease of access for researchers and students</p> <p>Quality of documentation and contextual information, and resources for teaching</p> <p>No data lost from post-doc turnover thanks to a reliable preservation system</p> <p>Secure storage for data intensive research</p> <p>Availability of data underpinning journal articles</p> <p>Research data integrity since data is of high quality</p>	<p>Data preserved for the long-term</p> <p>Secures value of data for future researchers and students</p> <p>Data management by domain experts who can add value</p> <p>Value added over time as collection grows and develops</p> <p>Enables international comparisons, visibility, and use of national research data</p> <p>Input for future research by maximising use across data user community (i.e. including students)</p> <p>Impact on wider profession as a centre of excellence</p> <p>Promotes teaching of quantitative methods and skills</p> <p>Fostering innovation in research and data management</p>
Private Benefits	Public Benefits
<p>Benefits to sponsor of research</p> <p>Benefits to sponsor of data service provider</p> <p>Benefits to researcher</p> <p>Fulfil grant obligations</p> <p>Increased visibility/citation</p> <p>Aggregator of data for data providers – providing them with one point of access to UK customers</p> <p>Higher usage (and profile) of their data for depositors</p> <p>Removes user burden from depositors</p>	<p>Source of high-quality and often unique data</p> <p>Motivating new research</p> <p>Enables research that otherwise could not be undertaken</p> <p>Research integrity since others can check the outcomes of research</p> <p>Service targeted at academic and research community and supports their needs</p> <p>Fostering transferable skills in data analysis</p> <p>Articulating user needs to data providers</p>

Summary of Data Archive Benefits arranged in a KRDS Benefits Framework.

Based on Beagrie et al 2012 Economic Impact Evaluation of the Economic and Social Data Service Box 2, CC-BY licensed.

Using the KRDS Benefits methodology (see Toolkit User Guide), by deleting non-relevant benefits; adding new benefits; making generic benefits more specific/expanding them; moving your key benefits to top of the lists, this can be used as a draft and modified to brainstorm and summarise the benefits from your archive.
