Comparative analysis of records across multiple datasets is difficult

How do I link these data sets?

- ❖ **A free and open knowledge base**
→ **everybody can add and edit**

- ❖ central storage for structured data of **Wikimedia** projects

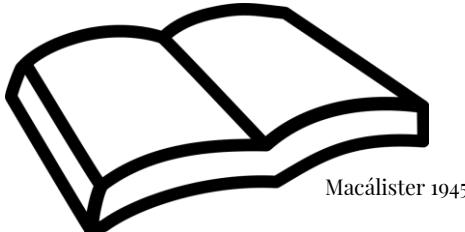

data in **Wikidata** is:

- ❖ available under a free license (CC 0)
- ❖ multilingual
- ❖ accessible to humans and machines (GUI & API & SPARQL)
- ❖ exportable using standard formats (JSON, RDF, XML)
- ❖ interlinked to other open data sets on the LOD Cloud
