The original Fig. 6 presented incorrect thermodynamic data for the conversion $4c + \text{KO}t\text{Bu} \rightarrow 2 + \text{KOMe}$. A revised Fig. 6 is now provided. These changes do not affect the article text and its conclusions.

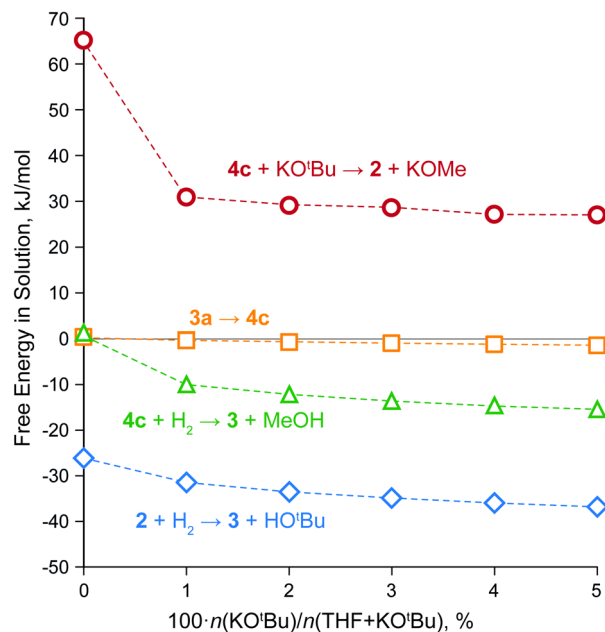

Figure 6. Concentration-dependent free energy changes for the key elementary steps at the reaction conditions (373K, 50 bar H_2) computed using a realistic COSMO-RS solvent model.
