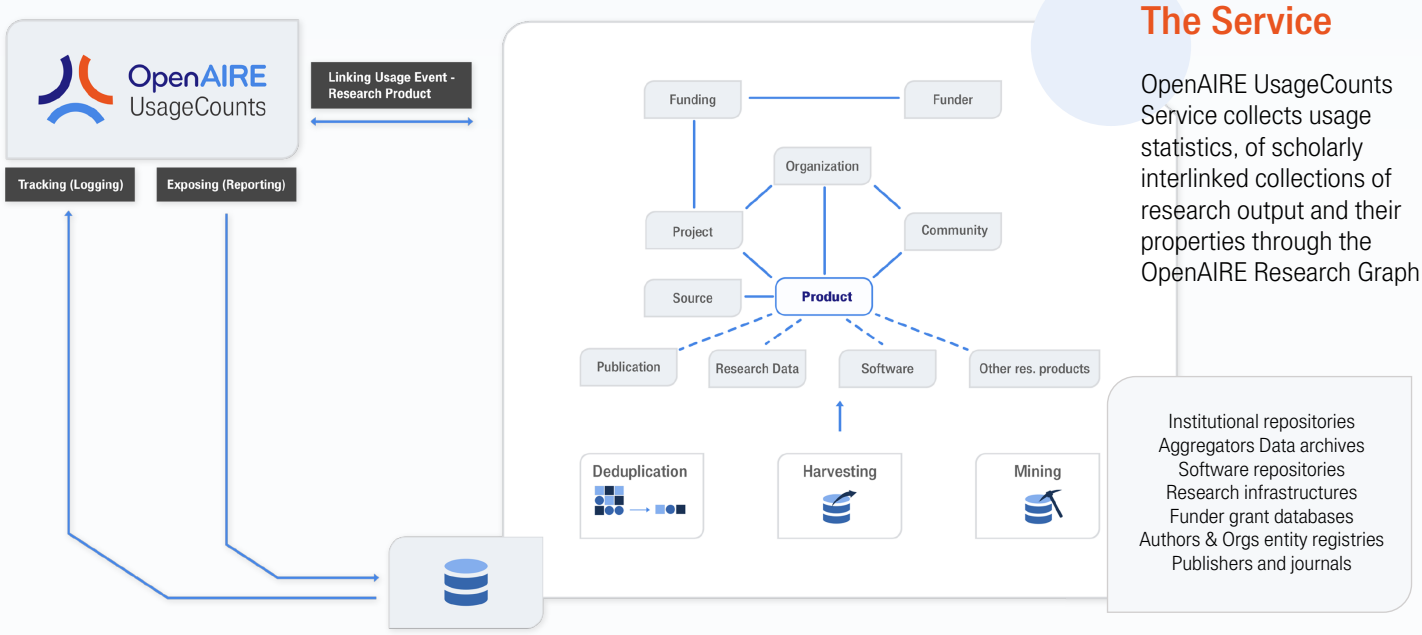
The analytics service of OpenAIRE Research Graph

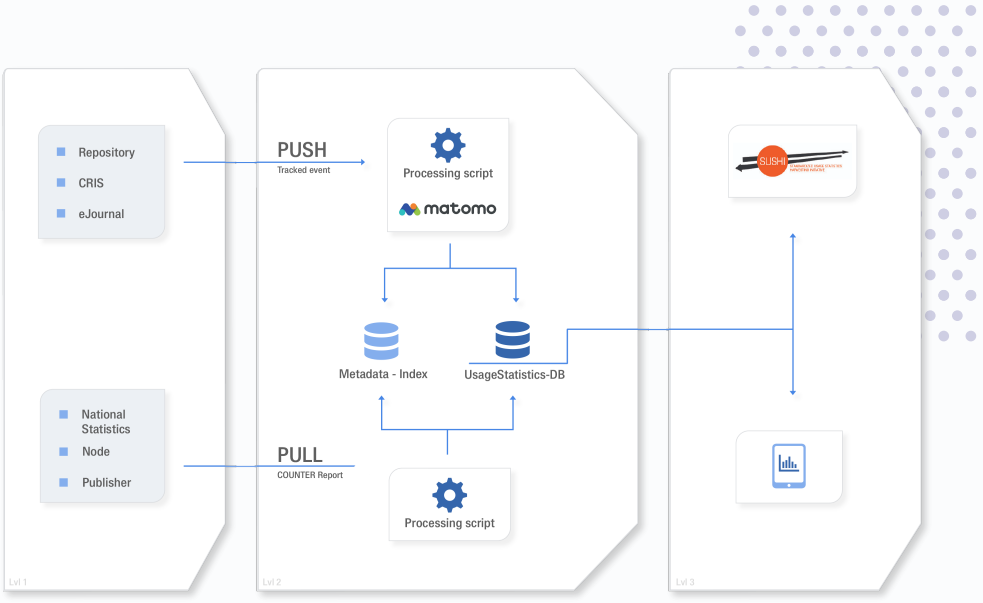


The Service

OpenAIRE UsageCounts Service collects usage statistics, of scholarly interlinked collections of research output and their properties through the OpenAIRE Research Graph

The Outcomes

- Examine accurate and objective performance measures monitoring of repository content through evidence-based metrics
- Evaluate the results of invested funds, policies, and measures on Open Science through trustable and accurate statistics
- Create and download standardized activity reports and released under CC-BY-4.0
- Support the Open Analytics Framework and Infrastructure required for scientific reward in European Open Science Cloud
- View instant visualizations of results



eg. **GERMANY**

Repositories	Views	Downloads
5	12M	25 M

Who is it for

- Institutional Repository Managers
- Research Communities
- Funders
- Policy Makers
- Research performing organizations
- Content providers

Are you a content provider or a repository manager? Contact us to learn how you can benefit from UsageCounts.
