1. Part of the research data life cycle.
2. Legal regulation for provision and use of data.
3. Your research is based on it.
4. Organizes your research.
5. When you save all aspects of your work not just selected data to avoid loss, you create this.
6. Four basic aspects of Research Data Management.
7. Makes your data unique.
8. Long-term storage option.
9. Data about your data.
10. Final step of your research.
11. A place where things are stored and can be found.
- 12.2nd FAIR principle.

Solution is on the next page.

For teaching purposes only print the first two pages.
