Civil Rights and Algorithms

At the beginning of 2014, as an answer to the growing concerns about the role played by data mining algorithms in decision-making, US President Obama called for a 90-day review of big data collecting and analysing practices.

**Informed Refusal:
Toward a Justice-
based Bioethics**

Ruha Benjamin¹

Abstract

"Informed consent" implicitly links the transmission of information to the granting of permission on the part of patients, tissue donors, and research subjects. But what of the corollary, informed refusal?

(...)

In their confrontation with biomedical uncertainty, research participants must weigh, situate, resist, and integrate new facts and new ignorance in a vulnerable context."

A Feminist Theory of Refusal

Ruha Benjamin

Keywords

bioethics, feminist theory, refusal, research subjects, tissue donors, patients, informed consent, informed refusal, justice, vulnerability, biomedical uncertainty, research participants, weighing, situate, resist, integrate, new facts, new ignorance, vulnerable context

An Algorithm Audit

THE MANY FLEXIBLE LECTURES OF BETH MARSH COLLEGE

Algorithmic Reason: The new government of self and other

Table of Contents

Introduction 3

The world as data 3

Algorithmic reason 4

Methodology of the scene 10

Politics of orientation 10

Structure of the book 10

1. Knowledge 10

Two iterations of big data 10

Cambridge Analytics and inferential computations 10

Truth telling, truth doing 10

2. Decision 10

The obsolescence of decision 10

Issues between generation of algorithmic decision 10

Pushing with algorithms 10

3. Others 10

The many multiple 10

Knowing the other like an algorithm 10

Algorithmic reason 10

4. Platforms 10

Platformation: large and small forms 10

Platform power: Resonating and resonating 10

Platform humanization 10

5. Value 10

Digital surplus value in a capitalist world 10

How values, how capitalization 10

Subjectivity and the politics of value 10

6. Ethics 10

Ethics of governance/politics of biomedicine 10

Human/non-human: politics of public things 10

11

Accountability

- Rendering AI governable entails producing an epistemic relation that includes human in the reasoning of machines
- Subject as a consumer of this accountability
