## EXECUTIVE SUMMARY

The current call for expression of interest aims to collect applications for two virtual pilots in the context of the H2020 project e-SAFE. The project aims to develop a market-ready solution for integrated seismic and energy renovation of non-historic buildings (i.e. built around 1950-1990) with reinforced concrete (RC) frame. From a technological point of view, the e-SAFE system consists of the following components/solutions: e-PANEL, e-CLT, and e-EXOS, as well as e-THERM and e-TANK. In the context of the project, the system will be tested on a real pilot in Catania (Southern Italy) and two virtual pilots in Europe.

The choice of linking virtual pilots with a call for expression of interest is motivated by the need to match the design opportunities offered by e-SAFE with highly motivated early adopters, enhancing their capabilities and interests to act on deep renovation.

**The building owners** of the virtual pilots **will benefit from receiving a 3D survey of the building, 3D physical and digital models**, a survey of the energy consumptions and the potential energy savings and **a detailed design of the energy-efficient and anti-seismic renovation solution**, which will be defined through a **co-design process** that will actively involve owners and occupants.

The demonstration activity at the virtual pilots will end with the production of a detailed e-SAFE-based design, including the suggestion of possible **viable financial schemes**, according to the needs of the requesting entity. The demonstration activity does not include the actual implementation of the renovation works.

Owners or managers of multi-storey, non-historic buildings located in earthquake-prone areas in Europe are eligible. However, priority will be given to EU countries other than Italy, where the real pilot is being renovated. The public or private entities which administer social/public housing or public buildings (e.g. schools) are highly encouraged to apply, as well as private actors such as building owners and real estate brokers. The detailed eligibility conditions and application method are detailed in the call.

The current call is available in six languages: English, Turkish, Romanian, Greek, Italian and Bulgarian, these being the target countries of the call due to their relevant seismicity and different climatic conditions. The complete calls are available on the [e-SAFE website](#). Additionally, other promotional material (flyers) was elaborated, with statistics adjusted to the target country (see Appendix 1).

# 1. Call for expression of interest for virtual pilots

## 1.1 e-SAFE Project

e-SAFE Project aims at combining energy-efficient and anti-seismic renovation solutions for non-historic buildings in earthquake-prone regions of Europe. The main scope of e-SAFE is to develop a market-ready, multi-purpose deep renovation system for buildings, encompassing technological, functional, aesthetic, financial, and economic aspects, while being easily adaptable to specific climatic conditions, seismicity levels, and other boundary conditions.

e-SAFE integrates energy and seismic upgrades through innovative and integrated technological solutions, namely **e-PANEL**, **e-CLT**, **e-EXOS**, **e-THERM**, and **e-TANK** (for more details, see <http://esafe-buildings.eu/en/technologies-and-solutions/>). Hence, e-SAFE will contribute to the decarbonisation of the EU building stock, reducing the occurrence of natural hazards related to climate changes, and, at the same time, it will contribute to the improvement of the social resilience against earthquakes. The e-SAFE system consists mostly of prefabricated elements, applied from the outside of the buildings employing cranes, thus offering a cost-effective, low-disruptive renovation experience for the residents.

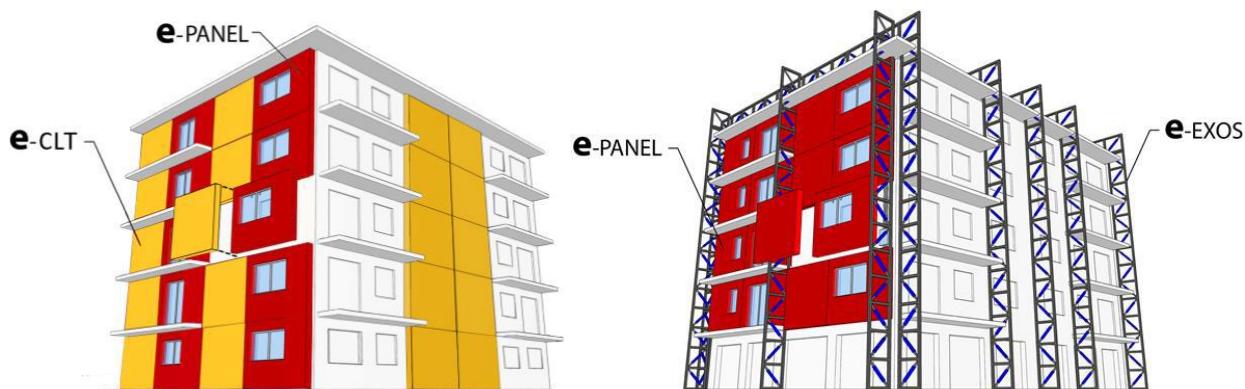

Figure 1. Technological solutions of the e-SAFE system – BUILDING ENVELOPE

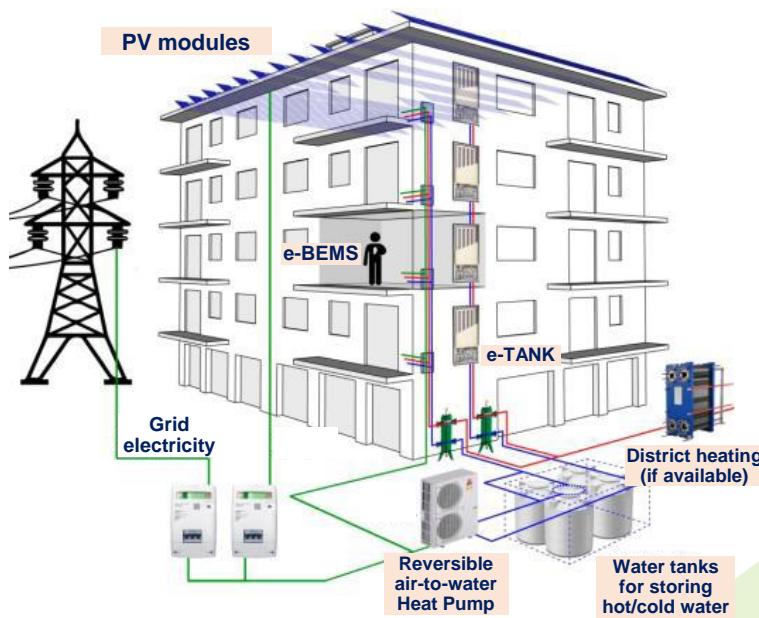

Figure 2. Technological solutions of the e-SAFE system – TECHNICAL SYSTEMS

## 1.2 Advantages of participating as a virtual pilot

The virtual pilots will be used as case studies for the virtual implementation of the e-SAFE system, including its technical, co-design, engagement, and financial protocols.

The building owners of the virtual pilots will benefit from receiving:

- 3D survey of the building;
- 3D physical and digital models of the building;
- energy audit, energy analysis, and structural simulations of the building;
- detailed design of the architectural, energy-efficient and anti-seismic renovation solutions obtained through a co-design process that will actively involve dwellers;
- suggestion of attractive and viable financial schemes according to the needs of the requesting entity and the specific socio-economic context;
- strengthening of relationships with residents through co-design;
- strengthening of relationships with local stakeholders of the building sector through the establishment of a [local platform](#);
- increased visibility at the local and European levels.

The demonstration activity in the virtual pilots thus ends with the production of the detailed e-SAFE-based design associated with viable financial schemes, without actual implementation of the renovation works in the pilot.

Property owners will be able to use the detailed design offered by e-SAFE for future actual renovation to be implemented with their funding.

The following **benefits** are expected from the implementation of the e-SAFE renovation system:

- **primary energy savings** and **reduction of the CO<sub>2</sub> emissions** of **at least 70-80%** compared to the current energy performance;
- **significant reduction of the energy bills** for space heating, cooling and domestic hot water;
- **decrease of the renovation cost by at least 20%** in comparison with traditional renovation solutions;
- **reduction of time needed on-site for renovation works by at least 45%** in comparison with traditional renovation solutions;
- **increase of the seismic resistance** up to levels comparable to those required by current standards.

## 1.3 Services provided by e-SAFE in a virtual pilot

As a first step, e-SAFE experts will perform preliminary data collection and co-analysis. They will collect spatial data on the building geometry, through laser scan technologies, if necessary assisted by drones, with the goal to develop physical and digital 3D models of the building.

The second phase will consist of co-design activities with residents. The co-design activities will be assisted by a Decision Support System software tool (called e-DSS), developed by the e-SAFE experts, which will allow the residents to be aware of the benefits ensured by renovating their building with the e-SAFE solution, in terms of energy savings, reduction in the energy bill and decarbonisation potential, as well as the time and costs needed for the renovation works.

Then, based on the outcomes of the co-design activities, e-SAFE experts will work on:

- preliminary simulations of the energy performance of the renovated building;

- preliminary simulations of the seismic resistance of the renovated building;
- detailed co-design of the e-SAFE building envelope components needed for renovation;
- detailed co-design of the e-SAFE technical systems, with the sizing of all the necessary components and a suggested piping distribution scheme;
- 3D renders of the building after renovation;
- identification of the most attractive and viable financial schemes;
- identification of possible shortcomings and the corresponding necessary adjustments.

## 2. THE PROCEDURE OF THE CALL

### 2.1 The procedure and important dates

The present call is a two-round process: the first round is a request for a letter of interest. Applications will then be examined to select a reduced number of potential buildings. The owners of the selected buildings will then be asked for more information, allowing a more thorough final selection of the two virtual pilots on September 25<sup>th</sup>, 2022.

#### Stages of the call

- Phase 1: Submission of a letter of interest;
- Phase 2: Presentation of more detailed documentation.

#### Timeline

**15<sup>th</sup> July 2022** deadline of Phase 1, submission of expression of interest, by filling in the [form](#).

**1<sup>st</sup> August 2022** announcement of the shortlisted candidates.

**10<sup>th</sup> September 2022** deadline of Phase 2, submission of documentation.

**25<sup>th</sup> September 2022** final selection of two virtual pilots.

### 2.2 Eligibility criteria

#### Location

The buildings must be located in European countries with **medium-to-high seismic hazards**, such as Bulgaria, Croatia, Cyprus, Greece, Portugal, Romania, Slovenia, and Spain, as well as countries that do not belong to the EU-28 group, such as Turkey, Ukraine, Albania, Kosovo, Serbia, Montenegro, Macedonia, Bosnia, Iceland.

Applications from Italy are possible, but they will be considered in case the applications from other countries are not eligible since a pilot building is already being renovated in Southern Italy.

#### Typology and technical requirements of the building

Private and public buildings are eligible, with any type of use. However, public, and private entities administrating multifamily **social/public housing**, or public buildings, such as **schools**, are strongly encouraged to apply and will be given priority.

We require **non-historic buildings** (i.e. built around 1950-1990) that are **not listed** under heritage protection and **with a reinforced concrete structural frame**. The building must be highly representative of the building features in the same district/city/country in order to increase the potential replication of the e-SAFE renovation system.

Detached buildings are better suitable since the prefabricated panels proposed by e-SAFE (i.e. **e-PANEL** and **e-CLT**, Figure 1) can be externally added to each front. These panels are applied by means of cranes, hence sufficient space for crane operation around the building is needed.

Specific technical requirements will be checked by e-SAFE experts to verify the applicability of the two e-SAFE anti-seismic solutions, as specified below.

### *Seismic strengthening by e-EXOS*

**Detached buildings are mandatory, with at least 3 m of free space** around the whole building envelope, which is necessary for the installation of the external vertical trusses (metal exoskeleton, Figure 1).

### *Seismic strengthening by e-CLT*

The target buildings must have regular openings on façades, vertically aligned, which allows to uniformly apply the structural e-CLT panels to each building storey.

Garages located at the ground floor of the building or commercial premises with many and large shop windows preclude the e-CLT application unless the surface of the openings will be reduced during the renovation works. Moreover, also a large use of bow-windows limits the application of the e-CLT panels, which in this case cannot be connected directly to the beams of the RC structure, reducing considerably the effectiveness of this solution.

Another limitation to the effective use of the e-CLT regards the number of floors. The solution is less efficient for high-rise buildings and specific simulations are ongoing to adequately investigate in this regard. Hence, **buildings with more than 6 floors are not eligible**.

### *Other selection criteria*

Preference will be given to buildings that:

- are located in climates other than the Mediterranean (e.g. continental climate);
- provide the opportunity for testing e-EXOS or e-EXOS and e-CLT for structural strengthening;
- offer the possibility for designing the e-SAFE system in relation to different building typologies and functions;
- are connected to district heating networks.

### *Logistics requirements*

Applicants will be requested to support e-SAFE experts in contacting local residents and interacting with them (with translation from and to English) and providing a working space/room on-site.

## **2.3 How to apply**

To apply as a virtual pilot within the e-SAFE Project, please fill in the following [form](#).

For further inquiries, visit the [e-SAFE page](#) and do not hesitate to contact Giuseppe MARGANI ([margani@unict.it](mailto:margani@unict.it)) from UNICT or Victoria TARANU ([victoria.taranu@bpie.eu](mailto:victoria.taranu@bpie.eu)) from BPIE.

## ACKNOWLEDGEMENTS

This deliverable was carried out in the framework of the *Energy and seismic affordable renovation solutions* (e-SAFE) project, which has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 893135.

## APPENDIX 1 - FLYERS

# BECOME AN e-SAFE PILOT SITE!

Upgrade your building to be energy efficient and seismic safe!

It is estimated that 500,000 detectable earthquakes occur in the world each year.

### WHAT YOU GAIN

Building owners will receive, **free of charge**:

- 3D survey of the building
- 3D physical and digital models
- An energy audit and energy analysis of the building
- A detailed e-SAFE-based renovation project through a co-design process with the residents
- Visibility at the local and European level

Although being selected as a pilot does not entail the actual implementation of the e-SAFE renovation technologies, the building owners will be able to use the detailed design project for future renovation works. Building owners will benefit from a tailor-made renovation design made by e-SAFE technical experts in addition to suggestions about available funding instruments and subsidies for building renovation.

### WHO'S ELIGIBLE?

Multi-storey non-historic buildings that are located in earthquake-prone areas in Europe (e.g. Romania, Bulgaria, Turkey, Macedonia, Greece, Cyprus, Croatia, etc.) and in need of renovation.

The application can be submitted by:

- Building owners or building managers
- Public or private entities that administer social housing or public buildings (e.g. schools)
- Real estate brokers

Find more about the building's technical requirements [here](#)

### WHAT WE NEED FROM YOU

Building owners should provide:

- Access to the building to do a detailed survey
- Support in interacting with the residents in the local language (3 weekends)
- Availability to participate in the co-design activities
- A working space/room on-site

### TIMELINE

**15<sup>th</sup> July 2022**  
Deadline of **Phase 1**  
Submission of expression of interest

**1<sup>st</sup> August 2022**  
Announcement of the shortlisted candidates

**10<sup>th</sup> September 2022**  
Deadline of **Phase 2**  
Submission of documentation

**25<sup>th</sup> September 2022**  
Final selection of two pilots

Learn more about the project by visiting the website <https://esafe-buildings.eu/en/> and watching this [short video](#)

### ABOUT THE e-SAFE TECHNOLOGIES AND THE PILOT BUILDING

The European H2020 project e-SAFE is developing a **market-ready solution for integrated seismic and energy renovation** of non-historic buildings with reinforced concrete structure. The e-SAFE renovation package includes innovative components and efficient solutions for renovating both the building envelope and the thermal systems.

The system is already being tested on a pilot site in Catania, Sicily, and we are now looking for two more pilot sites in seismic regions of Europe.

## Interested? Apply by **July 15th, 2022**

If you wish to submit your application and become a pilot within the e-SAFE Project, please fill in this form

[APPLY HERE!](#)

The full technical details and requirements can be found [here](#)

# BİR e-SAFE PİLOT SAHASI OLUN!

Binanızı enerji açısından verimli ve sismik açıdan güvenli olacak şekilde iyileştirin!

Türkiye'de son 30 yılda 10 büyük deprem kaydedildi ve bu depremler 20.173 kişinin canına mal oldu.

## KAZANCINIZ

Bina sahipleri **ücretsiz olarak** şunlara sahip olacaktır:

- Binanın 3 boyutlu tarihi
- 3 boyutlu fizikal ve digital modeller
- Binanın enerji denetimi ve enerji analizi
- Bina sakınları ile ortak tasarım süreci üzerinden ayrıntılı bir e-SAFE tabanlı renovasyon projesi
- Yerel ve Avrupa düzeyinde görüş netliği

Pilot uygulama için seçilmek, e-SAFE renovasyon teknolojilerinin filen uygulanmasını gerektirmesine de, bina sahipleri detaylı tasarım projelerini gelecekteki yenileme çalışmaları için kullanabileceklerdir. Bina sahipleri, bina renovasyonuna yönelik mevcut finansman araçları ve subvansiyonlar ile ilgili öneriler ek olarak, e-SAFE teknik uzmanları tarafından kendilerine özel olarak hazırlanmış bir renovasyon tasarımlarından yararlanacaktır.

## KİMLER UYGUN?

Avrupa'da (örn. Romanya, Bulgaristan, Türkiye, Makedonya, Yunanistan, Kıbrıs, Hırvatistan vb.) depreme yatkın bölgelerde bulunan ve taşitlilik ihtiyacı olan, tarihi olmayan, çok katlı, betonarme yapıya sahip binalar. Başvurular aşağıdakiler kişi veya kuruluşlar tarafından yapılabilir:

- Bina sahipleri veya bina yöneticileri
- Sosyal konutları veya kamu binalarını (örn. okullar) yöneten kamu kuruluşları veya özel kuruluşlar
- Gayrimenkul komisyoncuları

Binanın teknik gereksinimleri hakkında daha fazla bilgi için [tıklayın](#)

## SİZDEN İSTEDİKLERİMİZ

Bina sahipleri aşağıdakileri sağlamalıdır:

- Ayrıntılı bir araştırma yapmak için, binaye erişim
- Bina sakınları ile yerel dilde karşılıklı iletişim desteği (3 hafta sonu)
- Ortak tasarım faaliyetlerine katılma imkanı
- Sahada bir çalışma alanı/oda

# ПРЕДЛОЖЕТЕ ПИЛОТНА СГРАДА ЗА ПРОЕКТ e-SAFE!

Обновете вашата сграда, за да бъде енергийно ефективна и сейзмично безопасна!

Общо 51 земетресения в периода между 2010 и 2016 г. са причинили щети в размер на 60 милиона лева.

## КАКВО ПЕЧЕЛИТЕ

Собствениците на сгради получават **бесплатно**:

- 3D заснемане на сградата
- 3D физически и цифрови модели на сградата
- Енергийен одит и енергийен анализ на сградата
- Подробен, базиран на e-SAFE проект за обновяване, изготвен чрез процес на съвместно проектиране с обитателите на сградата
- Видимост на място и европейско равнище

Въпреки че изборът на сграда за пилотен обект не включва реалното използване на технологията e-SAFE за обновяване, собствениците на сградата ще могат да използват подобния проект за бъдещи дейности. Те ще разлагат с инвидуален проект, разработен от технически експерти на e-SAFE, в допълнение към предложението за налични инструменти за финансиране и субсидии за обновяването на сгради.

## КОИ СГРАДИ СА ДОПУСТИМИ?

Многоетажни неисторически сгради със стоманобетонна конструкция, които се намират в земетръсни зони в Европа (напр. Румъния, България, Турция, Македония, Гърция, Кипър, Хърватия и др.) и се нуждаят от саниране. Заявлението за кандидатстване може да бъде подадено от:

- Собственици или управители на сгради
- Публични или частни субекти, които администрират социални жилища или обществени сгради (напр. училища)
- Брокери на недвижими имоти

Повече информация за техническите изисквания на сградата можете да намерите [тук](#)

## КАКВО ОЧАКВАМЕ ОТ ВАС

Собствениците на сгради трябва да осигурят:

- Достъп до сградата за извършване на детайлното проучване
- Съдействие при общуването с обитателите на местния език (3 уикенда)
- Възможност за участие в дейностите по съвместно проектиране
- Работно пространство/помещение на място на обекта

## ИНФОРМАЦИЯ ЗА ТЕХНОЛОГИИТЕ e-SAFE И ПИЛОТНАТА СГРАДА

Проектът e-SAFE по програмата „Хоризонт 2020“ на ЕС разработка готова за употреба на пазара  
решение за интегрирано енергийно обновяване и сейзмично укрепване на неисторически сгради със стоманобетонна конструкция. Пакетът за обновяване e-SAFE включва иновативни компоненти и ефективни решения за обновяване както на външните ограждащи елементи на сградата, така и на топлинните системи.

Системата вече се тества на пилотен обект в Катания, Сицилия, и в момента търсим още две пилотни сгради в сейзмични региони на Европа.

## Зainteresovani ли сте?

Кандидатствайте до **15 юли 2022 г.**

Ако желаете да кандидатствате за участие в  
проект e-SAFE с пилотна сграда, моля,  
попълнете следния формулар.

 КАНДИДАТСТВАЙТЕ ТУК!

Цялата информация за техническите подробности и изисквания можете да намерите [тук](#)

## СРОКОВЕ НА ОТДЕЛНИТЕ ЕТАПИ

**15 юли 2022 г.**

Краен срок на Фаза 1,  
подаване на документи  
за изразяване на интерес

**1 август 2022 г.**

Обявяване на  
избрани кандидати

**10 септември 2022 г.**

Краен срок на Фаза 2,  
подаване на  
документацията

**25 септември 2022 г.**

Окончателен  
избор на две  
пилотни сгради

За повече информация относно проекта, моля, посетете <https://esafe-buildings.eu/en/> и гледайте това [кратко видео](#)

Figure 5. Promotional material for the call, flyer in Bulgarian

## ΠΑΡΤΕ ΜΕΡΟΣ ΩΣ ΠΙΛΟΤΙΚΗ ΤΟΠΟΘΕΣΙΑ ΣΤΟ ΠΡΟΓΡΑΜΜΑ e-SAFE!

Αναβαθμίστε το κτίριό σας για να γίνει ενεργειακά αποδοτικό και σεισμικά ασφαλές! Κάθε χρόνο, το Τμήμα Γεωλογικής Επισκόπησης Κύπρου καταγράφει περίπου 500 σεισμικές δονήσεις.

### ΠΟΙΑ ΟΦΕΛΗ ΘΑ ΑΠΟΚΟΜΙΣΕΤΕ

Οι ιδιοκτήτες των κτιρίων θα λάβουν χωρίς χρέωση:

- Μια τρισδιάστατη μελέτη του κτιρίου
- Τρισδιάστατα φυσικά και φυγαδικά μοντέλα
- Ενεργειακό έλεγχο και ενεργειακή ανάλυση του κτιρίου
- Λεπτομέρες πρόγραμμα ανακαίνισης, βασισμένο στο e-SAFE μέσω μιας διαδικασίας από κοινού σχεδιασμού με τους ενοίκους
- Προβολή σε τοπικό και ευρωπαϊκό επίπεδο

Αν και η επιλογή ως πιλοτική τοποθεσία δεν συντίμεται στην εφαρμογή των τεχνολογιών ανακαίνισης e-SAFE στην πράξη, οι ιδιοκτήτες των κτιρίων θα μπορέσουν να χρηματοποιήσουν το αναλυτικό έργο σχεδιασμού για μελλοντικές εργασίες ανακαίνισης. Οι ιδιοκτήτες κτιρίων θα ωφελήσουν από το προσαρμοσμένο στα μέτρα τους σχέδιο ανακαίνισης που θα εκπονηθεί από τους τεχνικούς εμπειρογνόμονες του προγράμματος e-SAFE, από τις προτάσεις σχετικά με τα διαβέσματα εργαλεία χρηματοδότησης και τις επιδοτήσεις για την ανακαίνιση κτιρίων.

### ΠΟΙΑ ΚΤΙΡΙΑ ΕΙΝΑΙ ΕΠΙΛΕΞΙΜΑ;

Πολυάριθμα μη ιστορικά κτίρια από οπλισμένο σκυρόδεμα που βρίσκονται σε σεισμογενείς περιοχές στην Ευρώπη (π.χ. Ρουμανία, Βουλγαρία, Τουρκία, Δημοκρατία της Βόρειας Μακεδονίας, Ελλάδα, Κύπρο, Κροατία κλπ.) και χρήζουν ανακαίνισης. Άλτηση μπορούν να υποβάλουν:

- Ιδιοκτήτες ή διαχειριστές κτιρίων
- Δημόσιοι ή ιδιωτικοί φορείς που διαχειρίζονται εργατικές κατοικίες ή δημόσια κτίρια (π.χ. σχολεία)
- Κτηματομεσίτες

Μάθετε περισσότερα για τις τεχνικές προϋποθέσεις του κτιρίου [εδώ](#)

### ΤΙ ΧΡΕΙΑΖΟΜΑΣΤΕ ΑΠΟ ΕΣΑΣ

Οι ιδιοκτήτες κτιρίων πρέπει να παρέχουν:

- Πρόσβαση στο κτίριο για τη διεξαγωγή λεπτομερούς μελέτης
- Υποστήριξη κατά την επικοινωνία με τους ενοίκους στην τοπική γλώσσα (3 σαφβατούρακα)
- Διαθεσιμότητα για τη συμμετοχή στις δραστηριότητες του από κοινού σχεδιασμού
- Ένα χώρο/δωμάτιο εργασίας στο σημείο των εργασιών

### ΣΧΕΤΙΚΑ ΜΕ ΤΙΣ ΤΕΧΝΟΛΟΓΙΕΣ e-SAFE ΚΑΙ ΤΟ ΠΙΛΟΤΙΚΟ ΚΤΙΡΙΟ

Το πρόγραμμα e-SAFE, που διεξάγεται στο πλαίσιο του ευρωπαϊκού προγράμματος «Ορίζοντας 2020», προσφέρει μια έποιημα για εφαρμογή στην αγορά λύση σεισμική και ενεργειακή ανακαίνιση μη ιστορικών κτιρίων. Το πακέτο ανακαίνισης e-SAFE περιλαμβάνει κανονόμες συντονώσεις και αποτελεσματικές λύσεις για την ανακαίνιση τόσο του κελύφους, των κτιρίων όσο και των θεμιτών συστημάτων.

Το σύστημα βρίσκεται ήδη υπό δοκιμή σε μια πιλοτική τοποθεσία στην Κατάνια της Σικελίας και επί του παρόντος αναζητούμε δύο επιπλέον πιλοτικές τοποθεσίες σε σεισμογενείς περιοχές της Ευρώπης.

## Σας ενδιαφέρει;

Μπορείτε να υποβάλετε αίτηση έως τις **15 Ιουλίου 2022**

Εάν επιθυμείτε να υποβάλετε την αίτησή σας και να συμμετάσχετε πιλοτικά στο πλαίσιο του προγράμματος e-SAFE, συμπληρώστε αυτή τη φόρμα.

### ΜΠΟΡΕΙΤΕ ΝΑ ΥΠΟΒΑΛΕΤΕ ΑΙΤΗΣΗ ΕΔΩ!

Τα πλήρη τεχνικά στοιχεία και οι προϋποθέσεις δημοσιεύονται [εδώ](#)

### ΧΡΟΝΟΔΙΑΓΡΑΜΜΑ

15 Ιουλίου 2022	1η Αυγούστου 2022	10 Σεπτεμβρίου 2022	25 Σεπτεμβρίου 2022
καταληκτική ημερομηνία 1 <sup>η</sup> στάδιο Υποβολή αίτησης εκδήλωσης ενδιαφέροντος	ανακοίνωση των επικρατέστερων υποψηφίων	καταληκτική ημερομηνία 2 <sup>η</sup> στάδιο Υποβολή έγγραφων	τελική επιλογή των δύο πιλοτικών κτιρίων

Μάθετε περισσότερα για το έργο στον ιστότοπο <https://esafe-buildings.eu/en/> και δείτε αυτό το σύντομο [βίντεο](#)

## ΠΑΡΤΕ ΜΕΡΟΣ ΩΣ ΠΙΛΟΤΙΚΗ ΤΟΠΟΘΕΣΙΑ ΣΤΟ ΠΡΟΓΡΑΜΜΑ e-SAFE!

Αναβαθμίστε το κτίριό σας για να γίνει ενεργειακά αποδοτικό και σεισμικά ασφαλές!

Η Ελλάδα δοκιμάζεται συχνά από σεισμούς μεγάλης κλίμακας, ενώ ένας σεισμός μέτριας ή μικρής κλίμακας γίνεται αισθητός κάθε 2-3 ημέρες κατά μέσο όρου.

### ΠΟΙΑ ΟΦΕΛΗ ΘΑ ΑΠΟΚΟΜΙΣΕΤΕ

Οι ιδιοκτήτες των κτιρίων θα λάβουν χωρίς χρέωση:

- Μια τρισδιάστατη μελέτη του κτιρίου
- Τρισδιάστατα φυσικά και φυγαδικά μοντέλα
- Ενεργειακό έλεγχο και ενεργειακή ανάλυση του κτιρίου
- Λεπτομέρες πρόγραμμα ανακαίνισης, βασισμένο στο e-SAFE μέσω μιας διαδικασίας από κοινού σχεδιασμού με τους ενοίκους
- Προβολή σε τοπικό και ευρωπαϊκό επίπεδο

Αν και η επιλογή ως πιλοτική τοποθεσία δεν συντίμεται στην εφαρμογή των τεχνολογιών ανακαίνισης e-SAFE στην πράξη, οι ιδιοκτήτες των κτιρίων θα μπορέσουν να χρηματοποιήσουν το αναλυτικό έργο σχεδιασμού για μελλοντικές εργασίες ανακαίνισης. Οι ιδιοκτήτες κτιρίων θα ωφελήσουν από το προσαρμοσμένο στα μέτρα τους σχέδιο ανακαίνισης που θα εκπονηθεί από τους τεχνικούς εμπειρογνόμονες του προγράμματος e-SAFE, από τις προτάσεις σχετικά με τα διαβέσματα εργαλεία χρηματοδότησης και τις επιδοτήσεις για την ανακαίνιση κτιρίων.

### ΠΟΙΑ ΚΤΙΡΙΑ ΕΙΝΑΙ ΕΠΙΛΕΞΙΜΑ;

Πολυάριθμα μη ιστορικά κτίρια από οπλισμένο σκυρόδεμα που βρίσκονται σε σεισμογενείς περιοχές στην Ευρώπη (π.χ. Ρουμανία, Βουλγαρία, Τουρκία, Δημοκρατία της Βόρειας Μακεδονίας, Ελλάδα, Κύπρο, Κροατία κλπ.) και χρήζουν ανακαίνισης. Άλτηση μπορούν να υποβάλουν:

- Ιδιοκτήτες ή διαχειριστές κτιρίων
- Δημόσιοι ή ιδιωτικοί φορείς που διαχειρίζονται εργατικές κατοικίες ή δημόσια κτίρια (π.χ. σχολεία)
- Κτηματομεσίτες

Μάθετε περισσότερα για τις τεχνικές προϋποθέσεις του κτιρίου [εδώ](#)

### ΤΙ ΧΡΕΙΑΖΟΜΑΣΤΕ ΑΠΟ ΕΣΑΣ

Οι ιδιοκτήτες κτιρίων πρέπει να παρέχουν:

- Πρόσβαση στο κτίριο για τη διεξαγωγή λεπτομερούς μελέτης
- Υποστήριξη κατά την επικοινωνία με τους ενοίκους στην τοπική γλώσσα (3 σαφβατούρακα)
- Διαθεσιμότητα για τη συμμετοχή στις δραστηριότητες του από κοινού σχεδιασμού
- Ένα χώρο/δωμάτιο εργασίας στο σημείο των εργασιών

### ΣΧΕΤΙΚΑ ΜΕ ΤΙΣ ΤΕΧΝΟΛΟΓΙΕΣ e-SAFE ΚΑΙ ΤΟ ΠΙΛΟΤΙΚΟ ΚΤΙΡΙΟ

Το πρόγραμμα e-SAFE, που διεξάγεται στο πλαίσιο του ευρωπαϊκού προγράμματος «Ορίζοντας 2020», προσφέρει μια έποιημα για εφαρμογή στην αγορά λύση σεισμική και ενεργειακή ανακαίνιση μη ιστορικών κτιρίων. Το πακέτο ανακαίνισης e-SAFE περιλαμβάνει κανονόμες συντονώσεις και αποτελεσματικές λύσεις για την ανακαίνιση τόσο του κελύφους, των κτιρίων όσο και των θεμιτών συστημάτων.

Το σύστημα βρίσκεται ήδη υπό δοκιμή σε μια πιλοτική τοποθεσία στην Κατάνια της Σικελίας και επί του παρόντος αναζητούμε δύο επιπλέον πιλοτικές τοποθεσίες σε σεισμογενείς περιοχές της Ευρώπης.

Figure 7. Promotional material for the call, flyer in Greek for Cyprus

e-SAFE has received funding from the European Union's Horizon 2020 research and innovation programme under grant agreement No. 893135.

# DEVENIȚI CLĂDIRE-PILOT e-SAFE!

Renovați-vă clădirea, pentru protecție împotriva seismelor și pentru eficientizare energetică!

În anul 2020, în România au avut loc 118 mișcări seismice cu o magnitudine de peste 3,0 grade.

## CE AVEȚI DE CÂȘTIGAT?

Proprietarii clădirii vor beneficia, **în mod gratuit**, de următoarele:

- un relevu 3D al clădirii
- machete 3D fizice și digitale
- un audit energetic și analiză privind consumul de energie al clădirii
- un proiect de renovare detaliat, bazat pe sistemul e-SAFE, realizat în urma unui proces de proiectare participativă cu locatarii
- vizibilitate la nivel local și european

Deși selectarea ca proiect-pilot e-SAFE nu implică și implementarea propriu-zisă a tehnologilor de renovare, proprietarii imobilului vor putea folosi proiectul detaliat pentru lucrările de renovare viitoare. Proprietarii clădirii vor primi un proiect de renovare perfect adaptat clădirii lor, realizat de către experti tehnici e-SAFE, împreună cu recomandări cu privire la instrumentele de finanțare și la subvențiile disponibile pentru renovarea clădirilor.

## CARE CLĂDIRI SUNT ELIGIBILE?

Clădirile cu mai multe etaje, care nu fac parte din categoria patrimoniu, care sunt construite pe structură din beton armat, care se află în regiuni cu risc seismic din Europa (de ex., România, Bulgaria, Turcia, Macedonia, Grecia, Cipru, Croația etc.) și care necesită lucrări de renovare. Solicitările pot fi depuse de către:

- proprietarii clădirii sau administratorii acestora
- entități publice sau private care administrează locuințe sociale sau clădiri de utilitate publică (de ex., școli)
- dezvoltatori imobiliari

Aflați mai multe despre cerințele tehnice ale clădirii [aici](#)

## CE TREBUIE SĂ NE OFERIȚI DVS.

Proprietarii clădirii trebuie să ofere următoarele:

- acces în clădire, în vederea efectuării unui relevu detaliat
- asistență în discuțiile cu locatarii, în traducerea în limba română (3 weekenduri)
- disponibilitate de implicare în activitățile de proiectare participativă
- un spațiu de lucru/o încăperie la fața locului

## MAI MULTE INFORMAȚII DESPRE TEHNOLOGIILE e-SAFE ȘI DESPRE CLĂDIREA-PILOT

Proiectul e-SAFE, finanțat prin programul Horizon 2020 al UE, dezvoltă o soluție integrată pentru renovare **antiseismică și eficientizare energetică** a clădirilor care nu fac parte din categoria patrimoniu și care sunt construite cu structură din beton armat. Pachetul de renovare e-SAFE include componente inovatoare și soluții eficiente pentru renovarea envelopei clădirii și a instalațiilor termice care o deservesc.

Sistemul este deja în curs de testare într-un proiect-pilot din Catania, Sicilia, iar în prezent căutăm alte două clădiri-pilot în zone cu risc seismic din Europa.

## V-am trezit interesul?

Depuneți solicitarea până la **15 iulie 2022**

Dacă dorîți să depuneți o solicitare și să deveniți clădire-pilot în cadrul proiectului e-SAFE, vă rugăm să completați acest formular.

[DEPUNEȚI SOLICITAREA AICI!!](#)

Toate informațiile și cerințele tehnice pot fi găsite [aici](#)

## DATE IMPORTANTE

**15 iulie 2022**

termenul-limită pentru **Etapă 1**  
Depunere sollicitărilor

**1 august 2022**

anunțul listei candidaților preliminari  
Depunere sollicitărilor

**10 septembrie 2022**

termenul-limită pentru **Etapă 2**  
Depunere documentelor

**25 septembrie 2022**

selecția finală a două clădiri-pilot

Figure 8. Promotional material for the call, flyer in Romanian

# DIVENTA UN EDIFICIO PILOTA DI e-SAFE!

Riqualifica il tuo edificio per renderlo antisismico ed energeticamente efficiente!

Si stima che si verifichino circa 500,000 terremoti ogni anno nel mondo.

## COSA GUADAGNI

I proprietari degli edifici pilota riceveranno, **senza alcuna spesa**:

- Rilievo 3D dell'edificio
- Modello digitale 3D dell'edificio
- Audit energetico, analisi energetica e simulazioni strutturali dell'edificio
- Progetto preliminare di riqualificazione basato sulle tecnologie e-SAFE, tramite un processo di co-progettazione con i residenti
- Visibilità su scala locale ed europea

Anche se gli edifici pilota non verranno fisicamente ristrutturati nell'ambito del progetto e-SAFE, i proprietari potranno utilizzare il progetto preliminare, preparato dagli esperti e-SAFE, per avviare i lavori di ristrutturazione a proprie spese o tramite opportune forme di finanziamento. Gli esperti e-SAFE saranno in grado di suggerire le forme di finanziamento disponibili, in base al contesto socio-economico in cui si trova l'edificio.

## CHI PUÒ PARTECIPARE?

Edifici non storici a più piani con struttura in calcestruzzo armato, siti in aree a rischio sismico in Europa (ad esempio Romania, Bulgaria, Croazia, Cipro, Grecia, Portogallo, Slovenia, Spagna, Turchia, Albania, Italia, etc.), che necessitano di riqualificazione. La richiesta può essere effettuata da:

- Proprietari e amministratori di condominio
- Enti pubblici o privati che amministrano edifici pubblici (ad esempio, scuole) e case popolari
- Agenzie immobiliari

Puoi trovare maggiori informazioni sui requisiti tecnici degli edifici [qui](#)

## LE TECNOLOGIE e-SAFE E L'EDIFICIO PILOTA

Il progetto Europeo H2020 "e-SAFE" sta sviluppando una soluzione innovativa per la **riqualificazione integrata sismica ed energetica** degli edifici non storici e non vincolati, caratterizzati da struttura in calcestruzzo armato. Il sistema e-SAFE include componenti innovativi ed efficienti per riqualificare sia l'involucro edilizio, sia gli impianti termici.

Il sistema e-SAFE sarà testato su un edificio pilota sito a Catania, ma stiamo cercando altri due edifici pilota situati in regioni sismiche d'Europa.

## Sei interessato?

Fai domanda entro il **15 Luglio 2022**

Se vuoi fare domanda per diventare un edificio pilota di e-SAFE, compila il modulo

[CANDIDATI QUI!!](#)

I requisiti e tutti i dettagli tecnici sono disponibili [qui](#)

## DI COSA ABBIAMO BISOGNO DA PARTE TUA

I proprietari degli edifici pilota dovranno fornire:

- Accesso all'edificio per effettuare il rilievo
- Supporto per interagire con i residenti (3 weekend)
- Disponibilità a partecipare alle attività di co-progettazione
- Uno spazio di lavoro sul sito

## TIMELINE

**15 Luglio 2022**

Scadenza **Fase 1**  
Manifestazione di interesse

**1 Agosto 2022**

Annuncio della lista di candidati selezionati

**10 Settembre 2022**

Scadenza **Fase 2**  
Invio documentazione dettagliata

**25 Settembre 2022**

Selezione finale dei due edifici pilota
