INNOVATIVE METHODS OF TEACHING ENGLISH EFFECTIVELY

Mo'minova Oyzoda

Student of Samarkand State Institute of Foreign Languages

Abstract: English is often considered one of the most difficult languages to learn fluently, if you haven't grown up speaking it. As a second language, mastering secondary level English can be a challenge, but helping your students gain a strong command of the language is far from impossible. In this atricle, we talk about popular innovative teaching strategies that help drive better student outcomes. These strategies often focus on student engagement. After all, students that are actively engaged in their learning are less likely to be absent from the class and more likely to succeed academically. In this article, we will discuss the ways and benefits of innovative technologies in foreign language teaching.

Key words: new teaching methods, effective result, information technologies, flip the classroom, personalized learning, ask open-ended questions.

Currently, not only foreign language teaching, but all subjects to find new teaching methods and try them in practice a lot of work is being done on vision. This is education today one of the most important problems to be solved in order to improve the process is one. If teaching a foreign language was previously considered as learning this language system, In the following years, an important goal of teaching is to teach students a foreign language was to develop his speech. It should be said that this is in foreign language learning goals are not set by oneself or by other people or persons, but changes in linguistics and psychology and the social of society is closely related to its development. Today, the ability to know foreign languages is part of professional education is becoming one of its integral parts. Foreign experts in various fields since the rate of cooperation with fifty partners is high, they have the demand for language learning is high. Foreign languages are professional in modern society is becoming an important component of education. Different levels of language today. There are large collections of educational materials for people with knowledge. This achieving success in achieving the goal, practical methods of teachers and depends on the qualification. Information technologies and modern teaching methods the ability to use helps to quickly understand new materials. By combining methods, the teacher is able to solve specific educational programs. Using several methods of teaching and learning is an effective result will give. Teaching is done in small steps and the student's existing knowledge based on the system. As time progresses, there is more and more innovation in every field is going Different styles are also emerging in language teaching. English language the learner's potential and level in teaching, depending on his age step-by-step training gives good results. In this, students are beginners based on teaching at the primary level, teaching at the middle level, and teaching at the higher level divided into groups. A special program by the teacher for each stage will be developed. The role of modern technology in language learning and teaching is incomparable. Technological every aspect of foreign language learning using

tools (reading, writing, listening used in understanding and speaking). For example, to listen and understand, of course this process cannot be done without a computer, player, and CDs. Listening comprehension is one of the most important parts of language learning. The student is one pronunciation of the speaker at the time, observance of grammatical rules, word it is required to pay attention to wealth and its meanings. In the process of education when using modern technologies, it is important for students to know information and communication technologies well and be able to use them is considered teaching a foreign language using modern technologies and learning is one of the most effective ways. In this process, including: − when using computers, the student watches videos in a foreign language, watching and listening to demonstrations, dialogues, movies or cartoons possible; - listen to foreign language radio broadcasts and television programs and can be watched; - CD players can be used. This is technical the process of students learning a foreign language using tools makes it more interesting and effective. Today, it is a tradition in schools to teach through interactive games is turning. It is known that the lesson is conducted on the basis of various games demonstration of students' abilities, concentration, knowledge and will improve their skills and make them strong. From game technology activity that activates and accelerates the student constitutes. Language teaching programs on computers and phones are also basic and It helps to teach the language at the secondary level. Talk (English speaking practice), Daily English, Learn English (English master), How to speak real English we can take examples like these programs are designed in such a way that they reading, listening, and test sections have all taken place. Listen to the new words you have learned by recording them on the phone dictaphone in your free time. Another good way to practice. Also with English subtitles showing more films and cartoons is also an effective way to teach the language is considered. Speech skills in trainings during the educational process sufficient attention to formation and development of social flexibility should be given. In addition, the success of each lesson in education has many aspects it depends on the correct organization of training. The lesson belongs to the teacher and the student should be based on creative cooperation. Only then students can think independently takes.

Solving a number of didactic problems using the Internet in English in lessons can do: reading skills using global network materials and formation of skills; improving the writing ability of schoolchildren; filling students' vocabulary; students' English language learning formation of motivation. In addition, this work is the horizon of schoolchildren expansion, with peers in English-speaking countries to establish and maintain business relationships and connections. It is aimed at exploring the possibilities of Internet technologies.

Basics of teaching foreign languages using Internet resources one of the requirements is to create interaction in the lesson, which is usually in the methodology called interactivity. Interactivity is "using the means of speech unification, coordination of communicative goals and efforts in the result and fill in". Internet speaking skills by teaching real

language and helps build skills, as well as vocabulary and grammar a sincere interest in teaching and therefore ensures efficiency. Interactivity not only creates real life situations, but also students forces them to give appropriate answers in a foreign language. This is one technology that enables student-centered learning is a project method as a method of development of creativity, knowledge activity and independence. The typology of projects is diverse. Projects are monoprojects, collective, oral can be divided into speech, concrete, written and Internet projects. In actual practice often research projects, creative, practice-oriented and informative you have to deal with mixed projects where characters are present. Project work language. A multi-faceted approach to learning that includes reading, listening, speaking and grammar covers Project method to develop active independent thinking of students helps and directs them to joint research work. In my opinion,project-based teaching teaches children to cooperate, to cooperate and learning moral values such as mutual aid and the ability to empathize educates, forms creativity and activates students. In general, in the project teaching process, teaching and education are inseparable.

To conclude, using innovative methods in English lessons as a result, students' logical thinking skills develop, speech become fluent, the ability to answer quickly and correctly is formed. Such methods and games make the student eager for knowledge. The student is thoroughly prepared for classes wants to see. This makes students the subjects of the educational process and the use of different tables in the process of teaching a foreign language the effect is high. Students are known to use tables in the educational process a grammatical rule, for example, making sentences using tenses, is new can place words. The need to learn a foreign language was high at the same time, in the educational process, from modern information technologies, innovative. Effective use of educational technologies makes this process effectively.
