One can find useful stuff in the EOSC Marketplace, such as secure cloud storage services, data anonymization and processing tools, etc. These tools may be affordable or free to use and very efficient, but most researchers will still stick to their old practices and tools they are already familiar with.

Institutions and researchers should use standardised licences. Using custom licences makes it difficult to understand the details of each licence and verify whether they are compatible.

Mythbusting

**Only affiliated
researchers can access
data on the EOSC Portal
and Marketplace.**

Answer

**Everyone
can access data
on the EOSC Portal
and Marketplace.**

Mythbusting

I need to pay for services and data I find on the EOOSC Portal and Marketplace.

Answer

Users may be required to pay for some services available via the EOSC Marketplace. However, there are still many services available free of charge.

Mythbusting

It's not possible to compare various services on the EOSC Marketplace and order them in a couple of clicks.

Answer

Users can easily select the services they would like to compare. The comparison results will be displayed in a table, helping them choose the most suitable service. In case ordering is required, this can be done in a couple of clicks via the EOSC Marketplace. Otherwise, users can follow the link in the EOSC Marketplace to access and use the chosen service.

Mythbusting

The EOSC Marketplace includes services but not resources and can't be used to find publications, data, software or training materials.

Answer

In the EOSC Marketplace, one can browse and search for a wide range of resources, including services, data sources, software, publications, datasets and training materials.

Mythbusting

The EOSC Portal and Marketplace is not for researchers, but for institutions to promote their tools and services.

Answer

The EOSC Portal and Marketplace is intended for various user groups, including researchers. Select the 'For researchers' tab on the EOSC Portal home page to see the resources available to researchers.

Mythbusting

**EOSC resources
(services, data, publications,
training materials, etc.) are hosted
on the EOSC Portal and you
can find them by searching in
the EOSC Marketplace.**

Answer

It is true that you can find various resources by searching the EOSC Marketplace. However, they aren't hosted on the EOSC Portal. They remain on the websites of their providers and you can follow the links in the EOSC Marketplace to access and use them.

Mythbusting

EOSC?
**Why should I care
about that? All that
matters are citations
and impact factors.**

Answer

Citation counts and impact factors are merely metrics used in some research evaluation systems. In order to improve the quality of your research, you need access to data, publications, tools, services and training. That's where EOSC can help.

Mythbusting

EOSC?

**I do not need that –
it is only for engineers
and scientists.**

Answer

The EOSC Portal and Marketplace provide access to resources relevant for all research disciplines and various user groups (researchers, citizen scientists, trainers, policy makers, etc.).
