University of Turin, Department of Management

NEB Stewardship Lab?

One of the newest community-led NEB Lab project:

Collaboration and emerging network to co-develop NEB Stewardship working model and explore its practical implementation in different contexts.

Coordinated by Metropolia UAS, Nuova Accademia di Belle Arti, IADE Universidade Europeia, Green Growth Generation, the University of Turin, Amsterdam UAS, and the Cyprus Institute

NEB Stewardship Lab Coordination team

Paola De Bernardi
*Associate Professor, Department of
Management, University of Turin*

Gabriella Esposito
*Founder & Project Developer,
GreenGrowthGeneration*

University of Applied Sciences*

Mareile Zuber
*Project Developer, Centre of
Expertise for Creative
Innovation, AUAS*

Constantinos Kritiotis
*Innovation Assistant,
The Cyprus Institute*

Envisioning **positive,** *attainable* future!

Stewardship =

Active shaping of trajectories of social-ecological change to support resilience and human wellbeing

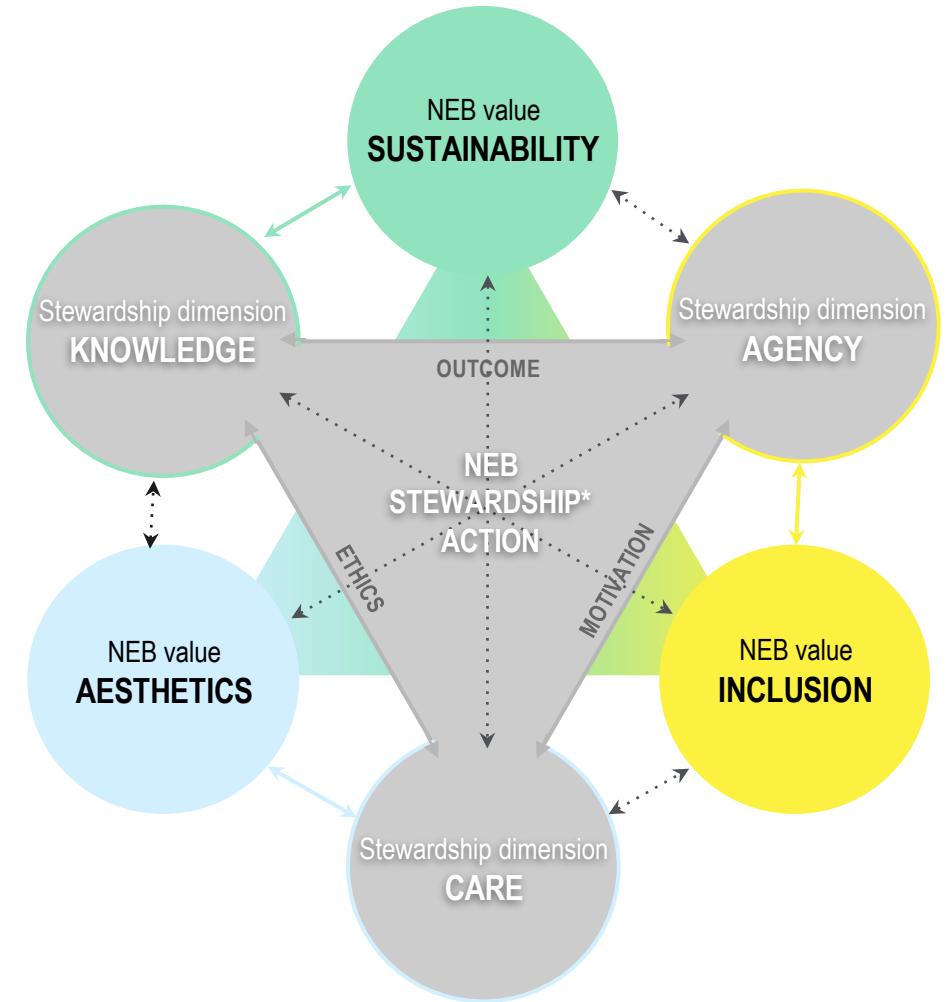

Enqvist, J. P. et al. (2018)

Enqvist, J. P. (2017)

West S. et al. (2018)

Framework for nurturing NEB Stewardship action

The layer of stewardship dimensions draws attention to the **capacities needed for effective individual and collective actions for pursuing sustainability** while the NEB values describe the aspired characteristics of the development process and its outcomes.

Our aims

To harness the full potential of higher education for the realisation of the NEB!

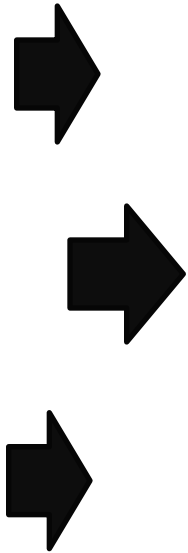

By co-developing the NEB-S model.

By exchanging knowledge to apply the NEB-S model in different contexts.

To explore the actor-level aspects of the NEB implementation through stewardship dimensions of knowledge, agency and care.

*From climate anxiety to **NEB stewardship!***
