Data Management Plan for Demography Project

Mario Marino

November 15, 2023

1 Data Summary

The Demography Project aims to collect and analyze demographic data from various sources to gain insights into population dynamics, migration patterns, and aging trends. The project involves gathering data from government agencies, surveys, and academic studies to address specific research questions related to population changes.

1.1 Data Sources

In this section, we will outline the sources from which data will be collected.

1.2 Data Analysis

This subsection will discuss the analytical methods used in the project.

2 How We Make Data FAIR

2.1 Findability

- We will use standardized metadata and clear naming conventions for datasets to enhance their discoverability.

- Data will be cataloged in a central repository with detailed descriptions and keywords for easy searchability.

2.2 Accessibility

- Data will be stored in a secure, cloud-based repository with access controls to protect sensitive information.

- We will provide clear access policies and guidelines for researchers and collaborators.

- Open access datasets will be published on relevant platforms and archives.

2.3 Interoperability

- Data will be formatted using standardized file types and data schemas.

- We will use common data exchange protocols to facilitate data integration with other demographic studies.

2.4 Reusability

- Datasets will be accompanied by comprehensive documentation, including data dictionaries and codebooks.

- We will provide clear licensing information, and data will be deposited in appropriate data repositories to promote reuse.

3 Data Security

- Data will be stored on secure servers with access limited to authorized personnel.

- Sensitive information, such as personally identifiable data, will be anonymized or pseudonymized to protect privacy.

- Regular data backups and encryption measures will be employed to safeguard against data loss and breaches.

4 Ethics and Privacy

- Informed consent will be obtained for data collection from human subjects.

- Data will be anonymized to protect the privacy of individuals.

- The project will adhere to all relevant data protection and ethics regulations.

- Ethical considerations will guide data collection, storage, and sharing practices.

5 Other Research Output

In addition to datasets, the project will produce research reports, publications, and presentations to disseminate findings to the scientific community and the public. These research outputs will be made available through open-access channels and academic journals.

5 Annex 1: Tables Describing Datasets

Dataset Name	Population Survey	Migration Data	Aging Trends
Description	Survey data on population trends	Records of migration patterns	Demographic data on aging
Size	500 MB	1.2 GB	750 MB
Format	CSV	Excel	JSON
Licensing	CC BY 4.0	CC BY 4.0	CC BY 4.0
DOI	10.1234/population-dataset	10.1234/migration-dataset	10.1234/aging-dataset
