1. Introduction and background

1.1. PHIRI- Population Health Information Research Infrastructure

The Population Health Information Research Infrastructure (PHIRI) project (<u>https://www.phiri.eu/</u>) aims to:

- Provide a Health Information portal for COVID-19 with FAIR catalogues on health and health care data for structured information exchange across European countries. It facilitates access to and use of COVID-19 relevant population health data provided by EU countries' public health bodies represented in the PHIRI consortium. It provides the services and tools necessary for researchers to link different data sources and to use European data in a GDPR compliant, federated way.
- Provide structured exchange between countries on COVID-19 best practices and expertise. PHIRI allows researchers to provide relevant and evidence-based information ready for use in research, and decision-making processes by citizens, clinicians, public health practitioners and policy makers.
- Promote interoperability and tackle health information inequalities. PHIRI supports researchers and public health bodies to research queries related to COVID-19 in FAIR and ELSI compliant manners. It provides capacity building for the management of COVID-19 relevant population health and healthcare data.

1.2. HIP - European Health Information Portal

The Health Information Portal (HIP) is a web-based platform (<u>https://www.healthinformationportal.eu/</u>) hosting information about National Nodes, Research Networks, health information sources, i.e. data sources, health information studies and projects, health information publications and capacity building activities. For each of the modules, a standardized information structure has been developed. Different modules are interlinked with each other through specific elements such as country or institution.

HIP aims to serve as a one-stop-shop for health information in Europe. It will support researchers and decision-makers to find and access available information, relevant actors, and networks.

1.3. Purpose of this document

This document will provide an overview to the data model of the HIP and metadata elements of specific modules of the HIP.

2. General overview of the HIP

The HIP is based on a Web Content Management System (Web CMS) available as Open Source: DRUPAL (<u>https://www.drupal.org/</u>). The server runs in the premises at Sciensano, Belgium (<u>https://www.sciensano.be/en</u>) on a LINUX operating system.

DRUPAL is a versatile platform allowing to build robust and complex solutions, namely thanks to thousands of modules available for free. Content management is very easy and doesn't require indepth knowledge of ICT technologies. Access to the website is public for searching and reading information, but only a set of approved people (authenticated with a username and password) are allowed to add or update content.

The data model implemented on the HIP is presented below

3. Modules of the HIP

HIP includes six different modules: <u>National Nodes</u>, <u>European Research Networks</u>, <u>Health</u> <u>Information Sources</u>, <u>Health Information studies/research projects</u>, <u>Capacity building activities</u>, and <u>Publications</u>. Elements relevant for each module are described below.

3.1 National Nodes

National Node (<u>https://www.phiri.eu/sites/phiri.eu/files/2021-05/One%20pager%20NN.pdf</u>) is an organizational entity, often linked to a national institutions or governmental units that functions as a national liaison and brings together relevant national stakeholders in the country in a systematic way.

Elements recorded for the national nodes (mandatory elements marked with *):

- Last updated*
- Title*
- Contact
 - Internal contact (e-mail)*
 - Country*
 - Coordinating institution*
 - Logo
 - Name*
 - URL*

 - E-mail*
 - National node web site (URL)
 - National node description (free text)
- Overview
 - o Legal framework and institutional responsibilities
 - Health information strategy
 - o Health information infrastructure and management
 - Existence of a unique patient identifier or general personal identifier
 - Name of identifier (* when 'Yes' to previous element)
 - Health information sources and players
 - National data/privacy protection regulation and specific data access policies
- Health information sources & institutions (uses the metadata template of HI sources)
- Health information dissemination (uses the metadata template of Publications)
- National projects (uses the metadata template of Health Information Studies/Projects)
- COVID-19 policy measures applied in the country

3.2 European Research Networks

European Research Network is an active network of national and/or regional experts from several countries that perform comparative research in a specific health area (information domain).

Elements recorded for the research networks (mandatory elements marked with *):

- Last updated*
- Description
 - o Is the research network active*
 - Reason: Text field, Mandatory if value is "No"*

- Start date

 - Organization of participation other (text field, Mandatory if value is 'Other, describe')*
 - Related projects, network nodes (uses the metadata template of Health Information Studies/Projects)
 - Data (uses the metadata template of Health information Sources)
- Interoperability

•

- How is the data gathered from the partners?
- How often do you collect data from partners?
- How is the data transferred from partners to RN?
- How do you ensure data security for data transfer?
- How do you ensure data security for data access?
- Outputs (uses the meta data template of Publications)
- Training
 - Training (uses the meta data template of Capacity building)
 - o Capacity building activities that could be offered
- COVID-19

- o Is the data collected relevant to COVID-19?
 - Describe the frequency, scope, ...
- Is the analysis relevant to COVID-19?
 - Please describe your activities (Mandatory if value "Yes" is select for related field)
- Is the capacity building relevant to COVID-19?
 - Please describe your activities (Mandatory if value "Yes" is select for related field)
- Is there interaction with policy makers/knowledge translation relevant to COVID-19?
 - Please describe your activities (Mandatory if value "Yes" is select for related field)
- Topics/Forum
 - Are there any topics covered by the research network, but that could not be reported in the previous sections?
 - $\circ~$ If a forum or discussion platform is dedicated to the research network, please enter link here (URL)

3.3 Health Information Sources

Health information sources are data on health and health care in the EU Member States involved in the PHIRI.

Elements recorded for the health information sources (mandatory elements marked with *):

- Last update*
- Overview

•

- Title*
 - Alternative title
 - Abbreviation
 - Type of information*
 - URL of the data source*
 - Description
 - Governance and Legal Framework

 - Free keywords*
- Demographics
 - Geo coverage*
 - Country(ies)*
 - Target population fixed*
 - Age range lower
 - Age range upper
 - Number of observations
 - ∘ Sex*
- Dataset
 - $\circ \quad \text{Data collection period}-\text{starting date} \\$
 - Data collection period end date
 - Language of data source*
 - Updating periodicity
 - Personal identifier*
 - Level of aggregation*
 - Linkage possible
- Access
 - o Permanent identifier of the data source
 - Terms of data access URL

- Terms of data access
- Regulations for data sharing
- Contact/Data owner
 - Data owner (uses the metadata elements of institutions)*
 - Data owner English
 - Data owner acronym
 - URL data owner
 - Contact name*
 - Contact e-mail*
 - Contact phone number
 - Contact info (address)*

3.4 Health Information Studies/Research Projects

Elements recorded for the studies and projects (mandatory elements marked with *):

- Last update*
- Overview
 - Title*
 - o Alternative title
 - o Abbreviation
 - Study design*
 - Type of used information/type of used data sources*
 - URL of the project/study*
 - Description*

 - Age upper
 - Number of observations*
 - ∘ Sex*
- Contact
 - Project Principal Investigator/Contact person*
 - URL organizer
 - Contact info (address)
 - Contact phone*
 - Contact e-mail*

3.5 Capacity Building Activities

Elements recorded for the capacity building activities (mandatory elements marked with *):

- Last updated*
- General information on the activity
 - o Title*
 - o Acronym
 - Activity Description*
 - \circ Topics
 - o Free keywords
 - o COVID-19 Related Activity
 - PHIRI Related Activity
 - Associated research networks and national nodes (uses the list research networks and national nodes defined by their specific metadata template)
- Venue/Location of the Activity
 - URL of the activity
 - Type of setting*
 - Category of capacity building activity*
 - Activity Schedule*
 - Activity Local Date
 - For monthly schedule and fixed date(s)
 - Start date
 - End date
 - Registration deadline
 - Venue/Location URL
 - o Target audience
 - Language*
 - Available in other languages
 - o Geo coverage
- Organiser & Contact Information
 - Leading Organizer Name*: (uses the metadata elements of institutions)
 - Name in national language.
 - Leading organizer (English)
 - Leading organizer acronym
 - o URL organizer
 - o Organizer Country
 - o Partner Name
 - o Activity Contact person
 - Contact info (address)

3.6 Publications

Publications cover several types of publications including scientific peer-review publications, country reports, fact sheets or leaflets, guidelines, infographics, legislations and regulations, newsletters, policy briefs, portals or websites, presentations, reports, video presentations and other documents. Therefore, some of the listed elements under Publication details are relevant only for specific publication types as identified below.

Element record for the publications (mandatory elements marked with *):

- Last update*
 - Description
 - Title*

 - Contact e-mail
 - o URL of the contact person or his institution
- Publication date

4. Best practices

4.1 Data Documentation Initiative (DDI)

DDI (<u>https://ddialliance.org</u>) is an international standard for describing the data produced by surveys and other observational methods in the social, behavioural, economic, and health sciences. DDI is a free standard that can document and manage different stages in the research data lifecycle, such as conceptualization, collection, processing, distribution, discovery, and archiving.

PHIRI metadata model for Health Information Sources has been mapped to DDI Lifecycle 3.2. It is designed to document and manage data across the entire life cycle, from conceptualization to data publication, analysis and beyond. It encompasses all the DDI-Codebook specification and extends it. This version also supports improvements in Classification management (based on GSIM / Neuchatel), non-survey data collection (Measurements), sampling, weighting, questionnaire Design and support for DDI as a Property Graph.

Main five section of the DDI are:

1. Document description.

- 2. Study description including dataset creators, keywords, abstract, sampling procedures, data collection, units of observation, target population, terms of access.
- 3. Data file description including data structure and format, number of variables, size of files, software.
- 4. Variable description including variable and value labels and question texts.
- 5. Other study-related material includes information related to the data that is not described elsewhere.

For example, CESSDA data catalogue (<u>https://datacatalogue.cessda.eu/</u>) uses DDI Lifecycle 3.2.

4.2 DCAT and DCAT-AP

Data Catalogue vocabulary (DCAT) (<u>https://www.w3.org/TR/vocab-dcat-2/</u>) is a metadata standard developed by W3C (World Wide Web Consortium) for publication of data descriptions. It has orginally been developed to support data catalogues of public sectors. DCAT-AP (Data Catalogue vocabulary – Application profile) (<u>https://joinup.ec.europa.eu/collection/semic-support-centre/solution/dcat-application-profile-data-portals-europe/news/get-started-dcat-ap</u>) has been developed for needs of data portals of Europe. The aim of the DCAT-AP is to ensure interoperability of data sources across Europe.

Currently the health extension of DCAT-AP is under development to support data documentation under the European Health Data Space (EHDS) regulation (proposal).

4.3 Schema.org

Schema.org is a metadata standard used to provide structured descriptions for Internet, web pages, e-mails etc. (<u>https://schema.org/</u>). Schema.org supports major search engines by improving machine readability of web pages.

4.4 Dublin Core[™] Metadata Initiative (DCMI)

Dublin Core[™] Metadata Initiative (DCMI) (<u>https://dublincore.org/</u>) is an organization supporting innovation in metadata design and best practices across the metadata ecology. Dublin Core metadata standard is used to describe information resources such as publications in machine readable format.

Dublin Core Metadata Element Set (DCMES) defines 15 main elements:

- 1. Title
- 2. Creator
- 3. Subject
- 4. Description
- 5. Publisher
- 6. Contributor
- 7. Date
- 8. Type (collection, dataset, event, image, interactive resource, moving image, physical object, service, software, sound, still image, text)
- 9. Format
- 10. Identifier
- 11. Source
- 12. Language

- 13. Relation
- 14. Coverage (for example in time or by geography)
- 15. Right (copy rights).

Additional to these Qualified Dublin Core defines following three elements:

- 1. Audience
- 2. Provenance (history information, resource tenure)
- 3. RightsHolder.

Dublin Core[™] is commonly used by libraries to index their collections.

4.5 Controlled vocabularies (CVs) and ISO standards

In the HIP, controlled vocabularies (CVs) and International Organization for Standardization (ISO) standards are used whenever possible. CVs are lists of predefined terms that are used for indexing and/or information retrieval. Terms are both human and machine readable.

Following Controlled Vocabularies have been used:

• NUTS (Nomenclature of territorial units for statistics, <u>https://ec.europa.eu/eurostat/web/nuts/background</u>) 2021 classification.

Following ISO standards have been used

- ISO-3166 for country,
- ISO-8602 for date and year, and
- ISO-639-1 for language.

4.6 Conceptual framework

In the HIP, PHIRI conceptual framework is used for different modules to provide a structured keyword (Topics). The conceptual framework is based on the work done in the Joint Action on Health Information (JA InfAct, <u>www.inf-act.eu</u>) and later on updated during the PHIRI to include topics on COVID-19.

Level 1	Level 2	Level 3	Level 4	Level 5

5. Notes about PHIRI metadata documentation

PHIRI aims to implement the Health Information Portal (HIP) on health and health care data for COVID-19 to support structured information exchange between EU countries. The portal follows the

FAIR (Findable, Accessible, Interoperable, and Reusable) principle by offering catalogues with overviews of COVID-19 population health data sources, studies, and capacity building exercises in EU countries in the framework of PHIRI and beyond. These metadata templates aim to facilitate identification, access to, and use of high quality and standardized COVID-19 relevant population health (health status and determinants of health) and health care (meta-)data available to the public health bodies represented in the PHIRI consortium. HIP does not store or share any individual level or aggregated data but supports secondary use of existing data by enhancing findability and accessibility of data.

To harmonize metadata and support effective search, the use of free text fields is minimized, and the template controls the information by limiting it to a set of predefined terms or categories. The information is either provided by the data owner or automatically harvested and screened by the administrator of the Health Information portal before it is published.

6. Metadata elements

6.1 Basic elements

Basic elements are those which are used in several of the HIP modules with same value alternatives. Mandatory elements for each module are marked with *.

Element	Module					
	National nodes	Research networks	HI sources	HI studies/ projects	Capacity building	Publications
Last updated	√*	√*	√*	√*	√*	√*
Language			√*	√*	√*	√*

keywords						
Funding			\checkmark	√*		
Target population – fixed			√*	√*		
Age range – lower			√*	√*		
Age range – upper			√*	√*		
Sex			√*	√*		

Each basic element is described below.

Element	Last updated
Description	Date when the metadata description was last updated.
DDI Lifecycle 3.2 element	
Controlled vocabulary	ISO-8601
Usage notes	This information is updated automatically in the HIP.
Element	Language
Description	The language of the project/study, data source (language of the variables), publication or in which the capacity building activity is given in.
DCAT-AP 2.1.1 element	dct:language (from class:Cataloged Resource)
DDI Lifecycle 3.2 element	ddi:DDIInstance:/s:StudyUnit/I:LogicalProduct/@xml:lang (for Health Information Sources)
Controlled vocabulary	ISO-639-1
Usage notes	
Element	Geo coverage
Description	Geographical regions which are covered by the data or in which the project/study took place or where the capacity building activity is organised in.
DCAT-AP 2.1.1 element	dct:spatial (from class:Dataset, for Health Information Sources)
DDI Lifecycle 3.2 element	ddi:DDIInstance:/s:StudyUnit/r:Coverage/r:SpatialCoverage/r:Descr iption (for Health Information Sources)
Controlled vocabulary	Europe, Multinational, NUTS 1, NUTS 2, NUTS 3, Outside Europe.

Usage notes	
Element	Country
Description	Country in which the project/study took place, where the health information source or leading organizer of capacity building activity is registered in or country of the national node.
DCAT-AP 2.1.1 element	dct:Location
DDI Lifecycle 3.2 element	ddi:DDIInstance:/s:StudyUnit/r:Coverage/r:SpatialCoverage/r:Descr iption/r:Content (for Health Information Sources)
Controlled vocabulary	ISO-3166
Usage notes	
Element	Topic (from conceptual framework)
Description	Topic of the project/study or Health Information Source.
DCAT-AP 2.1.1 element	dcat:theme (from class:Cataloged Resource)
DDI Lifecycle 3.2 element	ddi:DDIInstance/s:StudyUnit/r:Coverage/r:TopicalCoverage/r:Subje ct (for Health Information Sources)
Controlled vocabulary	Conceptual framework (see table 1 on page 12).
Usage notes	
Element	Keywords – free text
Description	Keywords that specify the content of the project/study or topic of capacity building activity.
DCAT-AP 2.1.1 element	dcat:keyword (from class:Cataloged Resource)
DDI Lifecycle 3.2 element	ddi:DDIInstance/s:StudyUnit/r:Coverage/r:TopicalCoverage/r:Keyw ord (for Health Information Sources)
Controlled vocabulary	-

	Keywords that are found in ontologies are added in Keyword – controlled field. Free text field is for keywords that are not found in ontologies.
Element	Funding
Description	Information about funding sources.
DDI Lifecycle 3.2 element	ddi:DDIInstance/s:StudyUnit/r:FundingInformation /r:Description (for Health Information Sources)
Controlled vocabulary	Public funding, private funding, combination of public and private funding, no funding
Usage notes	
Element	Target population – fixed
Description	The population of interest considered in the project/study or covered in health information source.
DDI Lifecycle 3.2 element	ddi:DDIInstance/s:StudyUnit:/c:ConceptualComponent/c:UniverseS cheme/c:Universe/r:Description/r:Content (for Health Information Sources)
Controlled vocabulary	General population, specific groups (i.e., young, elderly, workers, migrants/minorities), patients, hospitalized, deaths
Usage notes	
Element	Age range - lower
Description	Age range of the target or studied population (starting).
DDI Lifecycle 3.2 element	
Controlled vocabulary	
Usage notes	Number
Element	Age range - upper
Description	Age range of the target or studied population (max age).
DDI Lifecycle 3.2 element	

Usage notes	Number
Element	Sex
Description	Sexes included in the HI source or studied population.
DDI Lifecycle 3.2 element	
Controlled vocabulary	Woman, Man, Both, Unknown
Usage notes	

6.2 Institutions/Organization

Elements of institutions/organizations are those reported using same format in different modules. Institutions/organization may represent institution of responsible for the activity (National Nodes, Research Networks, Projects), data owner (Health information Sources), or organizers of the capacity building activities.

Element	Module					
	National nodes	Research networks	HI sources	HI studies/ projects	Capacity building	Publications
Name	√*	√*	\checkmark		√*	
Name in English	\checkmark	~	√*		~	
Abbreviation	\checkmark	\checkmark	\checkmark		✓	
URL/website	√*	√*	\checkmark	~	✓	
Country (linked to existing basic element)	√*	√ *	\checkmark		✓	

Element	Name		
Description	Official name of the institution (e.g. data owner, coordinating		
	institution) in national language.		
DCAT-AP 2.1.1 element	dct:publisher (from class:Cataloged Resource, for Health		
	Information Sources)

	Sources)		
Controlled vocabulary			
Usage notes	Free text		

Element	URL / Website
Description	URL for the organization's website.
DDI Lifecycle 3.2 element	ddi:/DDIInstance/g:ResourcePackage/a:OrganizationScheme/a:Org anization/a:OrganizationIdentification/r:URN
Controlled vocabulary	
Usage notes	Web link

6.3 Persons

Elements of persons are used in different modules to describe contact persons or authors of the publications. Mandatory elements are marked with *.

Element	Module					
	National nodes	Research networks	HI sources	HI studies/ projects	Capacity building	Publications
First name	✓*	√*				\checkmark
Last name	√*	√*				\checkmark
e-mail	√*	✓	√*	√*		✓
Contact – address			√*		\checkmark	 ✓ (for some publication types)
Contact – phone number						 ✓ (for some publication types)
Institution (linked to the existing elements of institution above)		√*				

Element	First name
Description	First name of person (contact persons for health information source, research project, for example project PI, capacity building activity).
	Principal investigators are the main researchers involved in producing the data
DCAT-AP 2.1.1 element	foaf:firstName?
DDI Lifecycle 3.2 element	ddi:/DDIInstance/g:ResourcePackage/a:OrganizationScheme/a:Indi vidual/a:IndividualIdentification/a:IndividualName/a:FirstGiven (for Health Information Sources)
Controlled vocabulary	
Usage notes	Free text
Element	Last name
Description	Last name of person (contact persons for health information source or research project, for example project PI).
	Principal investigators are the main researchers involved in producing the data.
DCAT-AP 2.1.1 element	foaf:family_name?
DDI Lifecycle 3.2 element	ddi:/DDIInstance/g:ResourcePackage/a:OrganizationScheme/a:Indi vidual/a:IndividualIdentification/a:IndividualName/a:LastFamily (for Health Information Sources)

Controlled vocabulary	
Usage notes	Free text
Element	E-mail
Description	E-mail address of contact person, PI or coordinating institute of HI source, research project or capacity building activity.
DDI Lifecycle 3.2 element	ddi:/DDIInstance/g:ResourcePackage/a:OrganizationScheme/a:Indi vidual/a:ContactInformation/a:Email (for Health Information Sources)
Controlled vocabulary	-
Usage notes	Free text
Element	Contact (address)
Description	Contact details for contact person of HI source or research project (can be PI): address, city, country
DDI Lifecycle 3.2 element	ddi:/DDIInstance/g:ResourcePackage/a:OrganizationScheme/a:Indi vidual/a:ContactInformation/a:Address (for Health Information Sources)
Controlled vocabulary	
Usage notes	Free text
Used in modules	Health Information Source, Research Project, Publication, Capacity Building Activity
Element	Contact phone
Description	Phone number of the PI or contact person of research project.
DDI Lifecycle 3.2 element	ddi:/DDIInstance/g:ResourcePackage/a:OrganizationScheme/a:Indi vidual/a:ContactInformation/a:Telephone (for Health Information Sources)
Controlled vocabulary	-
Usage notes	Number. Provide also country code

6.4 National Node

See Section on National Nodes for the list of all elements. National Nodes includes elements from following sections: the Basic Elements, Institution/Organization, Person, Health Information Sources, Health Information Projects/Studies, and Publications. These are described under each section and not repeated here.

For type of information reported for National Nodes, there is no specific metadata standard, therefore, mapping for metadata standards is not provided for following National Node specific elements.

Element	Title
Description	Name of the national node
Status	Mandatory
(Mandatory/Recommended/Optional)	
Controlled vocabulary	-
Usage notes	Free text
Element	National node web site
Description	
Status	Optional
(Mandatory/Recommended/Optional)	
Controlled vocabulary	-
Usage notes	URL
Element	National node description
Description	Description of the national node

Chatua	Ontional
Status	Optional
(Mandatory/Recommended/Optional)	
Controlled vocabulary	-
Usage notes	Free text
Element	Legal framework and institutional responsibilities
Description	Short description of legal framework (list of relevant acts, regulations, etc, with links if possible), together with description of division of institutional responsibilities (e.g. which institution is responsible for communicable disease surveillance, for major health system performance indicators, etc). Include the description of centralisation or decentralisation of the HI system.
Status (Mandatory/Recommended/Optional)	Optional
Controlled vocabulary	-
Usage notes	Free text
Element	Health information strategy
Description	Short overview of existing health information strategies and links to the documents.
Status (Mandatory/Recommended/Optional)	Optional
Controlled vocabulary	-
Usage notes	Free text
Element	Health information infrastructure and management
Description	Short description of HI infrastructure and management -
Description	the existence of centralized database (or several databases).

6.5 European Research Networks

See Section on Research Networks for the list of all elements. Research Networks includes elements from following sections: the Basic Elements, Institution/Organization, Person, Health Information Sources, Health Information Projects/Studies, Capacity building activities and Publications. These are described under each section and not repeated here.

For type of information reported for European Research Networks, there is no specific metadata standard, therefore, mapping for metadata standards is not provided for following Research Network specific elements.

Element	Is the research network active
Description	
Status	Mandatory
(Mandatory/Recommended/Optional)	
Controlled vocabulary	Yes, No
Usage notes	
Element	Reason
Description	Description why the research network is no longer active.
Status	Mandatory if value above is "No"
(Mandatory/Recommended/Optional)	
Controlled vocabulary	
Usage notes	Text field

Element	Start date
Description	The date when the research network was established.
Status	The date when the research network was established.
(Mandatory/Recommended/Optional)	
Controlled vocabulary	ISO-8602
Usage notes	100-0002
Element	Name of research network

6.7 Health Information Studies / Research Projects

See Section on Health Information Studies/Research Projects for the list of all elements. Health Information Studies / Research Projects includes elements from following sections: the Basic Elements, Institution/Organization, and Person. These are described under each section and not repeated here.

For type of information reported for Health Information Studies/Research Project, there is no specific metadata standard, therefore, mapping for metadata standards is not provided for following Health Information Studies/Research Projects specific elements.

Title
The title of the project/study.
Mandatory
-
Free text.
Alternative title
Alternative title of the project/study.
Optional
-
Free text
Acronym
Abbreviation of the title.
Optional
-
Free text
Study design
The set of methods and procedures used to collect and analyze data.

Statua	Mondaton
Status	Mandatory
(Mandatory/Recommended/Optional)	
Controlled vocabulary	Observational, experimental
Usage notes	
Element	Type of used information/type of used data sources
Description	Data sources used in the project/study.
Status	Mandatory
(Mandatory/Recommended/Optional)	
Controlled vocabulary	HIS, HES, cohort study, registers, administrative health data (HDR-hospital discharge records, mortality), health facilities data, biobank/sample/specimen data, consumer
	record data, insurance health data, socio-economic data, environmental data
Usage notes	
Element	URL of the project/study
Description	A reference to a web resource that specifies the location
•	of the project/study.
Status	Mandatory
(Mandatory/Recommended/Optional)	
Controlled vocabulary	-
Usage notes	web link of the project/study
Element	Description
Description	Brief description of the project/study, including the
Description	
	purpose, nature, and scope of the data collection,
	characteristics of its contents, major subject areas
	covered, etc.
Status	Mandatory
(Mandatory/Recommended/Optional)	
Controlled vocabulary	-
Usage notes	Free text
Element	Project/study duration
Description	Duration of the project/study.
Status	Mandatory
(Mandatory/Recommended/Optional)	
Controlled vocabulary	ISO-8601
Usage notes	Start date and end date
Usage notes Element	
	Start date and end date
Element	Start date and end date Target population – free

6.8 Capacity Building Activities

See Section on Capacity Building Activities for the list of all elements. Capacity Building Activities includes elements from following sections: the Basic Elements, Institution/Organization, and Person. These are described under each section and not repeated here.

For type of information reported for Capacity Building Activities, there is no specific metadata standard, therefore, mapping for metadata standards is not provided for following Capacity Building Activities specific elements.

Element	Title
Description	Capacity Building Activity official name as referred on the source portal.
Status	Mandatory
(Mandatory/Recommended/Optional)	
Controlled vocabulary	-
Usage notes	Free text
Element	Acronym
Description	The acronym for the Capacity Building Activity.
Status	Optional
(Mandatory/Recommended/Optional)	
Controlled vocabulary	-
Usage notes	Free text
Element	Activity description
Description	Summary of the topic, target, objectives and lecturer of the activity.
Status	Mandatory
(Mandatory/Recommended/Optional)	
Controlled vocabulary	-
Usage notes	Free text
Element	COVID-19 Related Activity
Description	Indicate if there is a relationship between the Capacity Building Activity objectives and the Covid-19 pandemic.
Status (Mandatory/Recommended/Optional)	Optional
Controlled vocabulary	-
Usage notes	No text, just selection of a "box" if there is a relationship.
Element	PHIRI Related Activity
Description	Indicate if the Capacity Building Activity is a PHIRI initiative or is under the responsibility of another project or organisation.
Status	Optional
(Mandatory/Recommended/Optional)	
Controlled vocabulary	
Usage notes	No text, just selection of a "box" if it is a PHIRI initiative. In portal: True, False
Element	Associated research networks and national nodes
Description	Links to the activities of the associated research network and national node.
Status (Mandatory/Recommended/Optional)	Optional
Controlled vocabulary	
Usage notes	Select from the list of research networks or national nodes
Element	URL of the Activity

Description	Web address of the activity.
Status	Optional
(Mandatory/Recommended/Optional)	
Controlled vocabulary	Hyperlink
Usage notes	URL
Element	Type of setting
Description	Describes the method or way used to practically organize
	or develop the activity and allows to make distinction
	based on this specific characteristic.
Status	Mandatory
(Mandatory/Recommended/Optional)	
Controlled vocabulary	Online, Classroom based, Blended
Usage notes	Selection of one of the choices
Element	Category of capacity building activity
Description	Classifies and associates the activities by specific characteristics like the nature, form or length of the
	activity.
Status (Mandatory/Recommended/Optional)	Mandatory
Controlled vocabulary	Asynchronous Training, Case discussions/visits,
	Conference, Course, Drills, e-Learning, Educational
	Resources Repositories, European School on Health
	Information, Fellowship Programme, MOOC/Massive
	Open Online Course, Multi-day Course, One-day
	Course, One-week Course, Podcast/Communication,
	Seminar/Webinar, Symposium, Table-Top Exercises,
	Team Building, Workshop
Usage notes	Selection of one of the choices
Element	Activity Schedule
Element Description	Activity Schedule Indicates if the activity is dedicated to repeat itself in a regular pattern or occurrence.
Description Status	Indicates if the activity is dedicated to repeat itself in a
Description Status (Mandatory/Recommended/Optional)	Indicates if the activity is dedicated to repeat itself in a regular pattern or occurrence.
