

Documenting mapping community practices
24 November 2023

Research Software use case
with codemeta / HAL crosswalk

Alain Monteil (INRIA)
Morane Gruenpeter (Software Heritage)
Yannick Barborini (CCSD)

Agenda:

- Brief presentation of CodeMeta
- CodeMeta crosswalks
- CodeMeta crosswalk for HAL

CodeMeta Initiative

- CodeMeta the answer for specific metadata to describe Source Code
- A subset of schema.org and specific field proposal to be include by schema.org
- An academic community discussing software metadata
- A crosswalk table - mapping the metadata landscape

<https://codemeta.github.io/>

CodeMeta crosswalks

CodeMeta to other Schema

- <https://github.com/codemeta/codemeta/tree/master/crosswalks> or <https://codemeta.github.io/crosswalk/>
- No governance
- No metadata or readme
- List of CSV files available on github
- Individual Initiative everybody are free to participate
- Some are not yet done like Dublin Core for example

CodeMeta crosswalks

FAIRECORE4EOSC context WP 6

CodeMeta for infrastructures in progress API and Connectors Between Software Heritage and

- Scholarly repositories: InvenioRDM - (CERN) / DataVerse - (KNAW-DANS)
- Publishers: Dagstuhl - (LZI) / Episciences - (INRIA)
- Aggregators: swMATH - (FIZ) / OpenAire - (OPENAIRE)
-

CodeMeta and HAL

HAL French national open repository for open science

- since 2017 collaboration to create a new item research source code
- core metadata sharing with other item in Hal: title, author, keywords, classification...all compliant with schema.org
- specific metadata for source code: code repository, licence, operating system, language... based on CodeMeta

Why crosswalk?

- HAL2CodeMeta: increase citation, interoperability, findable, reusable
- CodeMeta2HAL: connexion with Software Heritage using SWHID for deposit

CodeMeta crosswalk for HAL

Make with CSV file : CodeMeta | HAL | XML-TEI | Bibtex

New fields created

- Code Repository

- Licence

- Operating System

- Programmation Language

New properties for existing field

- Role for describe function of contributor (Designer, Maintainer, Developer, documentation etc.)

New referentiel for Licence : SPDX (<https://spdx.org/licenses/>)

Exemple of codemeta provide by HAL : uri/codemeta

<https://hal.science/hal-04056972/codemeta>

CodeMeta crosswalk for HAL

Hackathon between expert

HAL developer => Yannick Barborini

Software Heritage => Morane Gruenpeter

Inria's Librarians => Estelle Nivault, Jozefina Sadowska, Alain Monteil

When necessary Roberto Di Cosmo as expert software

Crosswalk sharing inside CCSD for Episciences => Benefit for FAIRCORE4EOSC WP 6.2

No governance for maintaining/updating the mapping

Mappings only use in HAL System for minimal required fields

Not directly available

Next step:

CodeMeta 3.0

Finish the crosswalk for XML-TEI and RDF

Include more fields from CodeMeta to HAL: funder, isPartof,..

Open and sharing the crosswalk with meta-metadata (title, Id, authors, description...)?
