

Subject Title:

Participate in a research study examining Statistical Quality in Health and Biomedical Research.

Dear colleagues

My name is Lee Jones from the School of Public Health and Social Work, Queensland University of Technology (QUT) and I'm doing a PhD examining Statistical Quality in Health and Biomedical Research.

I would like to invite statisticians (including those in data science and data analysis roles) to participate in a study reviewing published journal articles focusing on linear regression assumptions. Each statistician will be asked to review five published articles via a short survey, which should take approximately 30 minutes per paper to complete. Eligibility for this study is employment (current or past) in a statistical role (e.g. statistician, data scientist).

Please view the attached Participant Information Sheet and Consent Form for further details.

If you are interested in participating or have any questions, please contact me via email lee.jones@qut.edu.au

Please note that this study has been approved by the QUT Human Research Ethics Committee (approval number 2000000458).

Many thanks for your consideration of this request.
