

48th MEETING OF DIRECTORS OF ISSN NATIONAL CENTERS

Promoting ISSN assignment on a national
and global scale

Thanks to a unique partnership between the
Abes networks and ISSN International Center
(CIEPS)

48th MEETING OF DIRECTORS OF ISSN NATIONAL CENTERS

The Abes galaxy: Sudoc and Sudoc-PS networks

Bibliographic consistency at its heart: Sudoc and the ISSN Portal

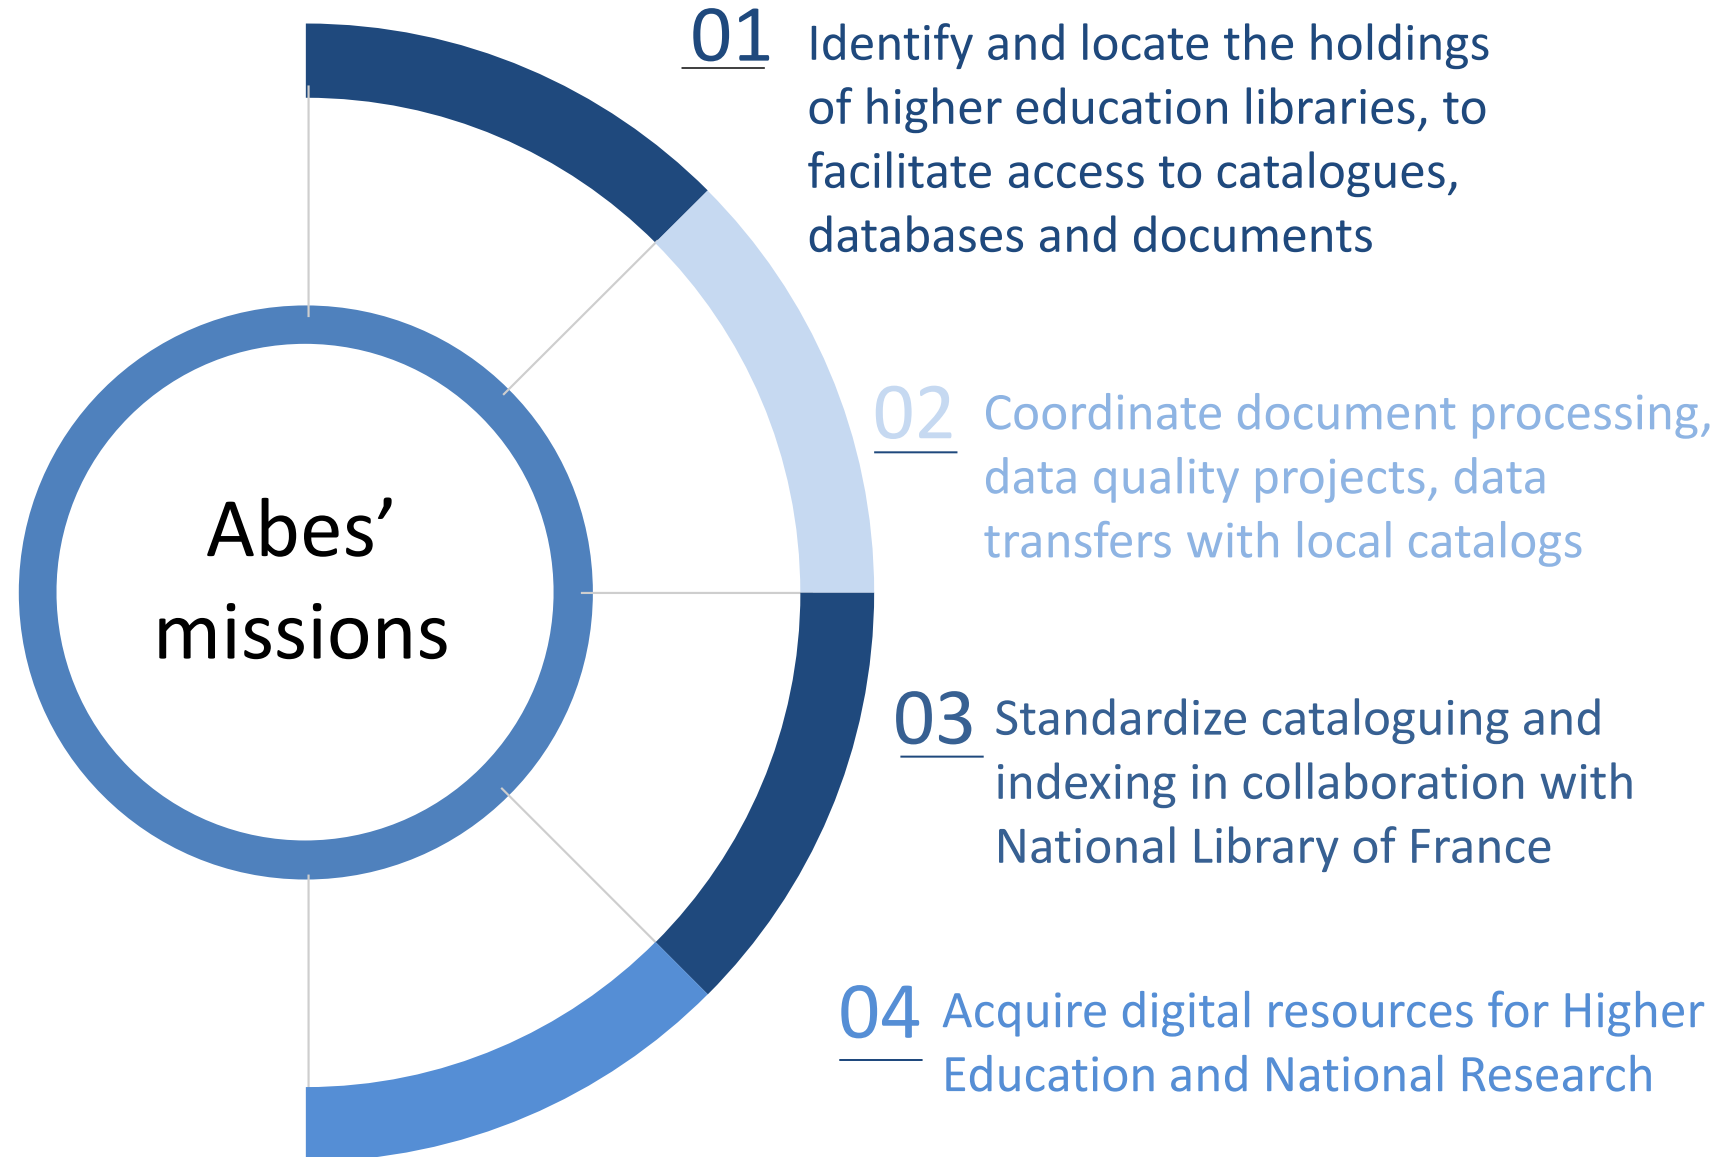

CIDEMIS: an enrichment workflow shared between French libraries and National Centers

The Abes Galaxy

Sudoc and Sudoc PS networks

Agence Bibliographique de l'Enseignement Supérieur

- Public administrative establishment (PAE)
- Supervision: Ministry of Higher Education and Research (MESRI)
- Founded in 1994, head office in Montpellier
- Website : <http://www.abes.fr>

Sudoc : a unique shared catalog

Système Universitaire de DOcumentation : French collective catalog produced by university libraries, documentation centers and Abes

- Find out which libraries hold the documents you're looking for, and if they're available
- Direct access to contents available on the Web
- Display the contact information of Sudoc network's libraries in a Library Directory
- Make interlibrary loan (ILL) requests

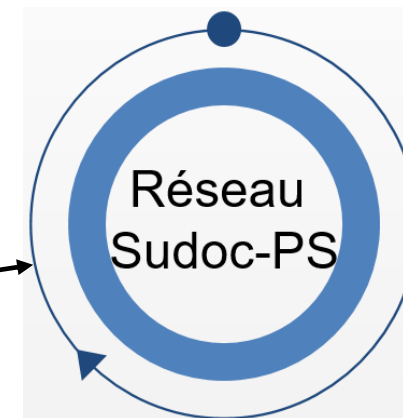

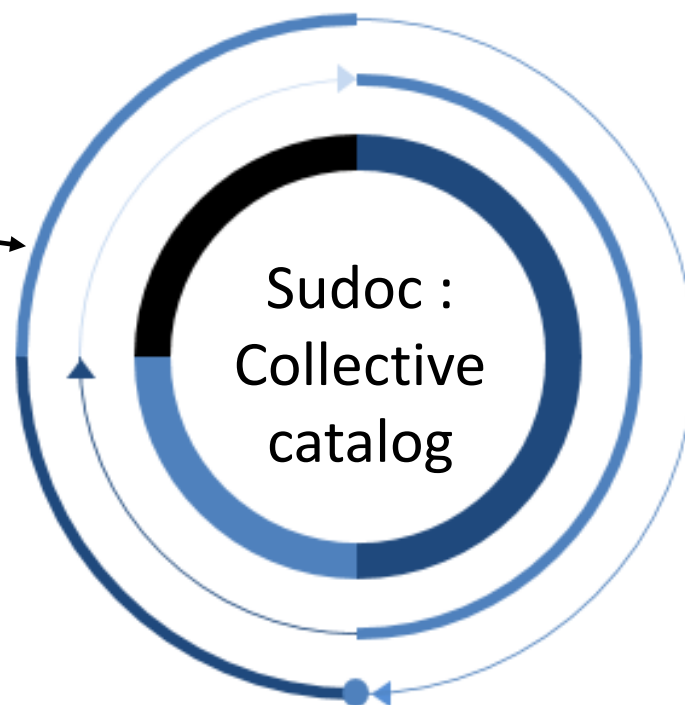

SUDOC in 2023 :

- 19.5 M localized bibliographic records, including 644,000 records for titles of continuing resources
- 52 M localisations/items
- + 6M authority records

Sudoc networks

163 higher education libraries
1,536 university and/or research libraries reporting all their resources

Specialized network for continuous resources reporting 32 Network Centers coordinating 1,500 public libraries or documentation and archive centers

*Sudoc data under the ETALAB license
= reuse beyond the catalog*

Bibliographic consistency at the heart Sudoc and the ISSN Registry/Portal

Bibliographic consistency at the heart

« *Taming the serials jungle* »

- Continuous resources: a natural trend to change, accelerated by electronics resources
- A multiplicity of forms and media, unstable availability of collection status, problems of access to content, ...
- The ISSN identifier, the cornerstone of identification and conservation

Enriching Sudoc with the ISSN Portal

Enriching records through shared cataloguing

CIDEMIS

An enrichment workflow shared between French libraries and National Centers

CIDEMIS : Online ISSN request circuit

Identify undiscovered documentary french resources and beyond

Abes benefits from a unique wealth of documentation thanks to the power of shared cataloging, which is the result of both :

- The Sudoc network: fine specialists in academic resources, they aim for exhaustiveness as much as quality of reporting
 - for resources of interest to researchers, teachers and students
 - to promote the resources produced by their researchers

- The Sudoc-PS network: a network of professionals from a variety of backgrounds, centralized by the 32 CR Managers, who guarantee the bibliographic quality of the records in their networks
 - Rare and little-known excellence/rare collections
 - Documentary repositories of scientific or heritage collections

Who contributes to the international quality of Continuous Resources reporting

- 2 130 Numbering requests and 688 Correction requests issued in 2023 **on 2023/09/01*
- 3 740 Numbering requests and 992 Correction requests issued in 2022
- 2 655 Numbering requests and 805 Correction requests issued in 2021

The Mir@bel network's contribution

The Mir@bel network : **facilitating access to ejournals**

Mir@bel

“(RE) CUEILLIR
LES SAVOIRS”

A network of over 300 professional contributors
~17,000 journals listed, including 14,000 open-access
journals

One-stop access to information on the entire life cycle of
each resource : over 160,000 external links.

A data verification interface for powerful curation work.
Reliable, up-to-date, high-quality information on how to
access journals online and promotion of open access

Mir@bel & Cidemis

Improving referencing

Improve identification of the open access resources, and possibly of their genealogy, by requesting an ISSN number

Free access to foreign electronic titles

With print ISSN but no electronic ISSN

Scope

Mir@bel detects titles without ISSNs

A lever for improving the referencing and visibility of resources "off-radar" of the Abes networks

Mir@bel

Target

In early 2022, Abes will launch a project to assign ISSNs using Mir@bel data.

Around 750 titles

Covering 88 countries and 75 different ISSN centers

Volume

Work still in progress

709 requests submitted
302 requests validated
12 requests refused

Report
