

Education for Standardisation in the EU

- H2020 project (January 2024 - December 2026)
- The overall objective is to innovate education of standardisation within European Higher Education Institutes.
- Specific objectives:
 - Develop and pilot an innovative teaching concept for standardisation (ITCoS)
 - Raise awareness through events (ex. Academic Standardisations Days)
 - Expand higher education courses on standardisation
 - Build a community of standardisation educators and learners
 - Establish an EU Student Standardisation Association.
- Coordination: Fraunhofer-Gesellschaft
- 17 partners (universities, HEIs, standardisation bodies and associations, and SMEs) from 11 countries

University of Graz

- **Prof Dr Elisabeth Staudegger**
Department of Law and IT
- **Prof Dr Jörn Kleinert**
Institute for Economics
- **Dr Barbara Reiter**
Institute for Philosophy
- **Ass Prof Dr Sabine Haring-Mosbacher**
Institute for Sociology
- **Prof Dr Manfred Füllsack**
Institute for System Sciences
- **David Bierbauer, LLM, CIPP/E**
Department of Law and IT
- **Hristina Veljanova, MA**
Department of Law and IT

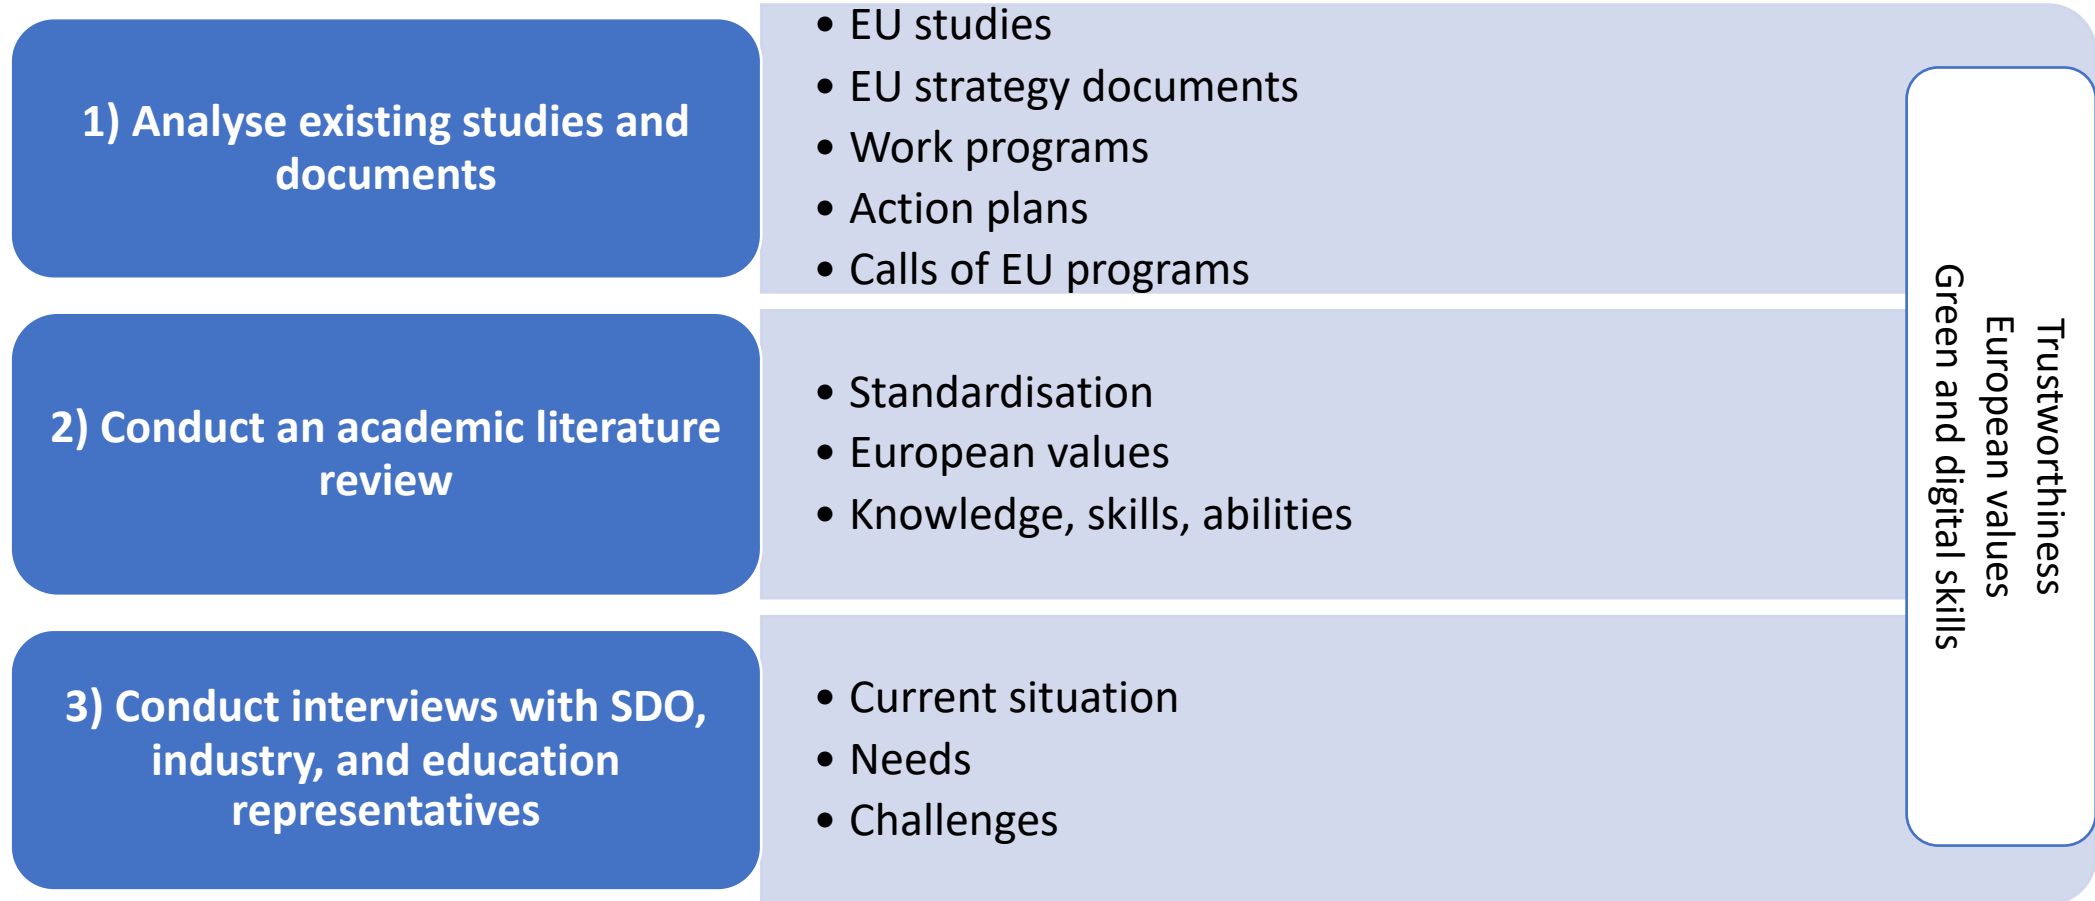

University of Graz contribution

- 1) Take part in the design of teaching concepts of standardisation**
 - 2) Organise a summer school on automated driving to validate the ITCoS**
- Define actions for promoting *European values* in education on standardisation
 - Analyse which green and digital skills are relevant to standardisation education

Human-centred approach

Expected result:

- List of intended learning outcomes – ILOs (knowledge, skills and abilities) for standardisation professionals which reflect European values

➤ ILOs for standardisation professionals: knowledge, skills, and abilities

What is a standard?

We use it to connect.

Example: Graz and Maribor are two European cities that were connected by train at some point in the 19th century.

In order to catch that train you had to find a time **standard**: a shared and reliable timetable had to be found for people to travel.
