

COEOSC FAIR-IMPACT Expanding FAIR solutions across EOSC

FAIR-IMPACT in brief

National Roadshow in Finland

Sara Pittonet Gaiarin **Trust-IT Services** FAIR-IMPACT outreach manager

Expanding FAIR Solutions across Europe

Call HORIZON-INFRA-2021-EOSC-01-05

Enabling discovery and interoperability of federated research objects across scientific communities

3year EU funded project started in June 2022

28 partners involved in the project Coordination and Support Action

Now: 2nd year of the project

Successful 1st year having achieved all goals and outputs for the period 4 project management and governance bodies (PCO, EXC, GA, HLAC)

3 coordination mechanisms (TBT, FIT, SF)

4 Support Tiers to enable adoption and implementation

1 Body of ambassadors: EOSC FAIR Champions

The Consortium

FAIR-IMPACT overall objective

WHAT:

to realise a FAIR EOSC by supporting the implementation of FAIR-enabling practices across scientific communities and research outputs at a European, national, and institutional level;

How:

- Engaging a wide range of stakeholders early and using a matrix of coordination and support mechanisms => Optimising cross-collaboration and alignment
- ★ Identifying current/emerging FAIR-enabling components (practices, policies, tools, technical specs)
- ★ Translating viable solutions, guidelines and frameworks that have been developed for one domain or research output and supporting their application in others
- ★ taking the next step in implementation by defining the support, governance, and coordination mechanisms required to ensure the continuous function of FAIR-enabling practices in the EOSC

FAIR-IMPACT Workplan

Contribution to EOSC SRIA action areas

Main relevant EOSC SRIA action areas:

- Identifiers
- Metadata and ontologies
- FAIR Metrics and certification
- EOSC Interoperability Framework

FAIR-IMPACT integrated use cases supporting practical implementation of the FAIR principles

National Roadshow in Finland

Integrated use cases => Added value

- ★ The "bridge" to four scientific domains
- ★ Provide expertise in defining requirements, identifying gaps and implementation opportunities across the FAIR-IMPACT focus areas
- ★ Being involved in translating what works for them and support adoption beyond their original domains, stakeholder groups and output types

Examples of integrated use cases in FAIR-IMPACT:

Social Sciences and Humanities: The F-UJI tool is adapted to fit SSH relevant community standards for FAIR

Photon & Neutron science: A range of components for cross-domain research data description will be tested

Life science: Data provenance will be better documented by extending RO-Crate to practices on PID usage

Agri-food: Metadata providers will implement a common API for federating access to semantic artefacts Change triggers impacting PID generation for sensitive data within the Social Sciences

Adoption & Implementation support

Route 1: via support programmes providing guidance and one-to-one support:

The second open call under this route opened on 30 April 2024:

- Targeting Repositories & Data Services Providers
- Webinar to introduce support programme 8 May 2024 (recording available)
- Virtual clinic 5 June 2024 to answer questions from potential applicants
- Deadline for applications: 14 June 2024
- Notifications to applicants: end of July / early August 2024
- Start of support action: later September 2024

Route 2: via cascading grants to enable testing of specific tools, approaches and methods

The call is currently closed, the support programme is ongoing The final Route 2 open call opens on **30 September 2024.**

Find out more and register to be kept informed about the open calls at

FAIR-IMPACT

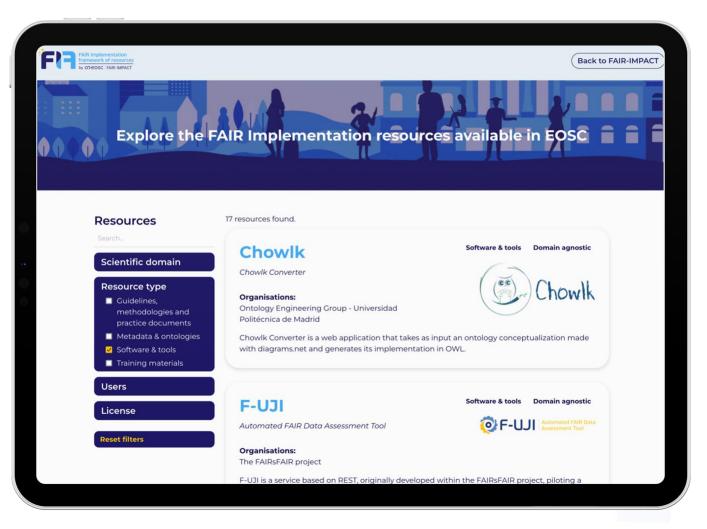

meosc

Recent technologydriven advances in **biodiversity research** have created a need for more, new types of FAIR repositories. In this meetup, we discuss two of these.

FAIR Implementation Catalogue

FAIR-IMPACT has developed the FAIR Implementation Framework (FIF) to help different stakeholders assess their drivers for becoming (more) FAIRenabling and their current practices. A key component of the FIF is a catalogue or resources that users can use to identify tools and solutions most appropriate for their use, with direct links to the original resources.
