

Questions and questionnaires group

DDI Scientific Community annual meeting

Romain Tailhurat - May 2024

Inception

- *Sciences Po* meeting, April 10th
- 12 participants
- Identify usage, needs and issues
 - "There are no expert guidelines for building questionnaires"
 - "Migration choice from DDI-C to DDI-L"

Mission

Objectives

- *Provide guidelines* for building and managing questions and questionnaires using different DDI products and related standards.
- Work with other expert groups to *help identify* needs for new material (e.g. training material) or evolution of the standards.

Collaboration

- We have initially identified potential collaboration with the Training Working Group, Technical Committee, the DDI Developers Community and the Paradata Working Group. More collaboration will likely arise over time.

Longevity

- The group intends to be a long-running initiative; may at some point evolve to a data collection working group (i.e. could also cover administrative data collection, etc.).

Next steps

- Next meeting, June 4th
- Set up collaboration
- Will work on:
 - Designing a survey to identify tools and experts (including non-directly DDI tools)
 - Identifying training topics
 - Updating the DDI website tool page

More info

- A dedicated **wiki section**
- Objectives, meeting notes, member list

Thank you!
