Listing 12.2.6.6 Pittsburgh Sleep Quality Index (PSQI)

SLEEP COMPONENTS
1. Overall Patient Sleep Quality -- 0 = Very good, 1 = Fairly good, 2 = Fairly bad, 3 = Very bad
2. Sleep Latency -- sum of question 2 (# of min takes to fall asleep each night)& question 5a (cannot get to sleep within 30 min)
   question 2 score -- 0 = <= 15 min, 1 = 16-30 min, 2 = 31-60 min, 3 = >60 min
   question 5 score -- 0 = Not during past month, 1 = Less than once per wk, 2 = Once or twice a wk, 3 = Three or more times a wk
   0 = total 0, 1 = total 1-2 2 = total 3-4, 3 = total 5-6
3. Sleep Duration -- using question 4 (number of hours of actual sleep)
   0 = >7, 1 = 6-7, 2 = 5-<6, 3 = <5
4. Habitual Sleep Efficiency -- uses questions 1 (usual bed time), 3 (usual getting up time), & question 4 (hr of sleep per night)
   Calculate number of hours in bed -- question 3 -question 1
   Calculate habitual sleep efficiency -- question 4 response/hours spent in bed)*100
   final score definition -- 0 = >=85%, 1 = 75-84%, 2 = 65-74%, 3 = <65%
5. Sleep Disturbances -- the sum of questions 5b through 5j
   0 = Not during the past month, 1 = Less than once a week, 2 = Once or twice a week, 3 = Three or more times a week
6. Sleep Medication -- question 7 (how often take medication during the past month to help you sleep)
   0 = Not during the past month, 1 = Less than once a week, 2 = Once or twice a week, 3 = Three or more times a week
7. Daytime Dysfunction -- sum of question 8 (trouble staying awake) & question 9 (problem to keep up enthusiasm to get things done)
   0 = No problems during the past month, 1 = Less than once a week and only a very slight problem
   2 = Once or twice a week and somewhat of a problem, 3 = Three or more times a week and a very big problem

TROUBLE SLEEPING
0 = Not during the past month, 1 = Less than once a week, 2 = Once or twice a week, 3 = Three or more times a week
5a. Cannot get to sleep within 30 minutes
5b. Wake up in the middle of the night or early morning
5c. Have to get up to use the bathroom
5d. Cannot breathe comfortabley
5e. Cough or snore loudly
5f. Feel too cold
5g. Feel too hot
5h. Had bad dreams
5i. Have pain
5j. Other reasons

Trouble Staying Awake - 0 = Not during the past month, 1 = Less than once a wk, 2 = Once or twice a wk, 3 = Three or more times a wk
Enthusiasm -- 0 = No problem at all, 1 = Only a very slight problem, 2 = Somewhat of a problem, 3 = A very big problem
Bed Partner/roomate
   0 = No bed partner or roommate, 1 = Partner/roommate in other room
   2 = Partner in same room, but not same bed, 3 = Partner in same bed

PARTNER'S COMMENTS
0 = Not during the past month, 1 = Less than once a week, 2 = Once or twice a week, 3 = Three or more times a week
10a. Loud Snoring
10b. Long pauses between breaths while sleeping
10c. Legs twitching or jerking while you sleep
10d. Episodes of disorientation or confusion during sleep
10e. Other restlessness while you sleep
