

# Advancing Research Data Management and Open Science in Austria

FAIR-IMPACT

National  
Roadshow  
Series

ONLINE WORKSHOP

Austria

18<sup>th</sup> June 2024

Partner

Research Data  
Management and  
Open Science  
Landscape in Austria

Ilire Hasani-Mavriqi  
Graz University of  
Technology

# Opportunities and Challenges

- Collaborations and interdisciplinary research to address societal challenges
- Funding organizations: goals, strategies and measures
  - Research results are discoverable and accessible
  - Their exploitation potential is maximized

# National Developments

Implementation

Austrian Policy on Open Science & EOSC

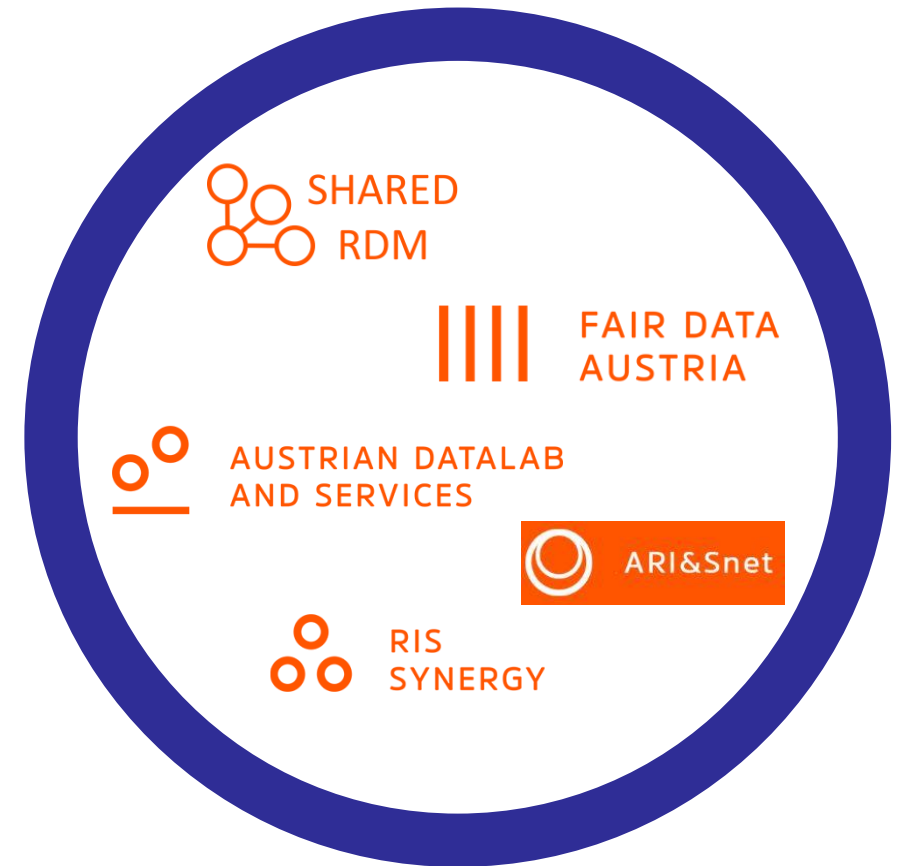

Open calls

# Cluster Research Data

- Joint strategy: Ensuring continuous exchange and active cooperation
- Identification of synergies and potential for resource-optimized cooperation between Austrian research institutions

<https://forschungsdaten.at/en/>

# FAIR Data Austria

 Federal Ministry  
Republic of Austria  
Education, Science  
and Research

Lead TU Graz

Duration: January 2020 - December 2022

Partners:

A...kademie der  
bildenden Künste Wien  
Academy of Fine Arts Vienna

Main achievements:

- Development of a basic RDM infrastructure taking into account the FAIR principles
- Professionalization of Data Stewards in Austria and establishment of Data Steward Models

### DATA STEWARD MODELS

Depending on the size of the university, the resources available, the profiles of the data stewards, and the training offered, there are different models that meet different needs. For the Austrian context, three main models can currently be identified.

Data Steward Contact Point	Data Steward Office	Data Steward Network
Data stewards of this type forward inquiries, network, offer general advice, but do not perform any operational activities (e.g., create data management plans or develop policies)	Data stewards are positioned at a central organizational unit that bundles different competencies and offers appropriate services/advice. The competencies are broader because they are shared among several people	Data stewards are based at the faculties, main research areas or institutes. They have discipline-specific knowledge and research experience and can therefore provide advice on a particularly discipline-specific basis

# Shared RDM Services and Infrastructure

 Federal Ministry  
Republic of Austria  
Education, Science  
and Research

Lead: TU Graz

Duration: July 2023 – June 2026

Partners:

A...kademie der  
bildenden Künste  
Wien

Associated partners:

# Shared RDM Services and Infrastructure

## Project Mission

Create **framework conditions** to offer selected tools and infrastructures in the field of RDM as **shared services** for Austrian universities and research institutions

# Shared RDM Services and Infrastructure

## Project Goals (Technical)

Develop concepts for cross-university (operating) models for shared RDM services & infrastructures

- maDMPs: DAMAP
- Analysis platforms: CyVerse Austria
- Electronic lab notebooks: eLabFTW
- Repository systems: InvenioRDM, Phaidra, DBRepo

# Shared RDM Services and Infrastructure

## Project Goals (Human)

- Inter-institutional RDM training, data stewardship skills transfer and exchange of experience
- Building networks & collaborations
- Strengthening RDM practices and support across institutions

# Shared RDM Services and Infrastructure

## Project Goals Social (Alignment)

- Utilizing synergies with the ARI&Snet project and jointly developing use cases
- Networking with European and international initiatives (e.g. EOSC, RDA), projects and (research) infrastructures

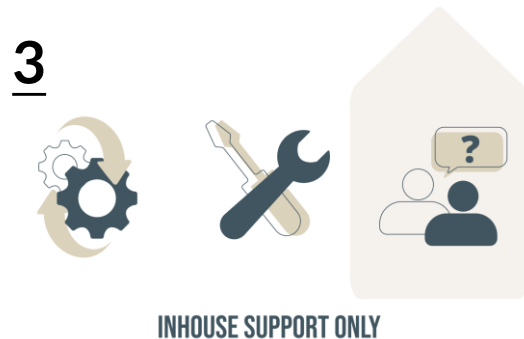

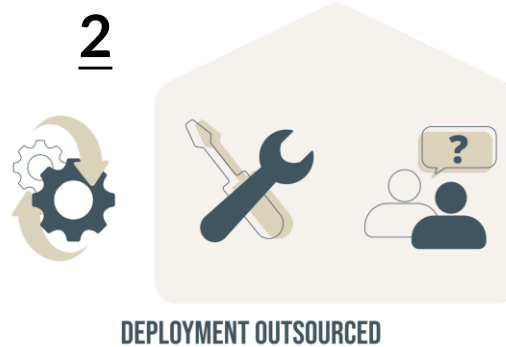

# Approach

Define cross-university (operating) models considering the resource requirements in all affected departments and organizational and legal prerequisites

- Analyze the individual initial situation at the target institution (needs assessment)
- Define a preliminary model and its implementation, by evaluating and comparing available models against institutional needs
- Adjust processes and monitor progress

# Identified (Operating) Models

## 1: All in-house

- Internal: Deployment & maintenance of the tool, support activities
- External: -

## 2: Mainly internal / Deployment outsourced\*

- Internal: Maintenance of the tool, support activities
- External: Deployment of the tool

## 3: Mainly external / Support in-house\*

- Internal: Support activities
- External: Deployment & maintenance of the tool

## 4: All external / outsourced

- Internal: -
- External: Deployment & maintenance of the tool, support activities

\*M2 and M3: internal / external components may vary

# Identified Use Cases

Vetmeduni Wien

eLabFTW/ CyVerse

Uni Innsbruck

eLabFTW/ CyVerse

MedUni Graz

DAMAP/ InvenioRDM

WU Wien

DAMAP

Uni Graz

DAMAP/ InvenioRDM

A...kademie der  
bildenden Künste  
Wien

A...kbild

eLabFTW/ CyVerse

BOKU Wien

DAMAP/InvenioRDM

JKU Linz

eLabFTW/DAMAP

# Communities & Networks

## Technical Communities

- Regular Core-Team meetings (further development)
- Knowledge transfer and support for national institutions
- Alignment - international

## National RDM Exchange

- Exchange on RDM topics (Community Engagement, RDM Tool - Awareness and Support)
- Open to external persons (national & international)

## Webinar series "Research data management in Austria"

- Recordings are made available on YouTube (<https://www.youtube.com/@rdm-austria>)

# Success Factors and Challenges

Benefits for research through reduced complexity and increased accessibility of applications

## SharedRDM

*We don't do it for us, but for the researchers*

# SHARED RDM

Shared RDM Services and Infrastructure
