COAR Annual Meeting 2018 - Repository Metrics Workshop

Hamburg, 2018-05-15

ECONSTOR – at a glance

Make Your Publications Visible.

- Is a subject repository for scholarly economic literature:
<https://www.econstor.eu>
- It contains:
 - Working- und discussion paper series
 - Journal articles and research papers
 - Conference proceedings, reports and thesis
 - Currently more than 150.000 PDF full text files in open access
- Is DINI (German Initiative for Network Information) certified (2010)

ECONSTOR – at a glance

Make Your Publications Visible.

- Is based on DSpace 5.x
- Is a data provider for national and international service providers:
 - RePEc – Research Papers in Economics - <http://repec.org>
 - LeibnizOpen – OA Documents of Leibniz Association researchers - <http://www.leibnizopen.de/home/>
- Is optimized for Google und Google Scholar
- Its documents are found in Google, Google Scholar, BASE, WorldCat, OpenAire and EconBiz

ECONSTOR – Usage statistics statistics

Make Your Publications Visible.

- Publicly accessible
 - Self compiled EconStor download statistics based on project COUNTER rules and robotslist – (COUNTER - Counting Online Usage of Networked Electronic Resources – <http://www.projectcounter.org>)
 - RePEc usage statistics compiled by its service LogEc – Contains Documents of EconStor which are available in RePEc - <http://logec.repec.org/>
- Publicly inaccessible
 - Website views are tracked with etracker (not publicly available)

ECONSTOR – Usage statistics by LogEc

Make Your Publications Visible.

- LogEc – Is the usage statistics of the network of RePEc services
 - It shows views and downloads per month
 - Provides push mail notification for maintainers of data provider

ECONSTOR – Usage statistics by LogEc

Make Your Publications Visible.

- LogEc – procedure for compiling the statistics
 1. Removal of robots identified by:
 - a) The IP number has requested robots.txt at some point
 - b) An excessive no of items has been downloaded by hosts of the same C-class net
 - c) IP belongs to a Domain known to be used by robots, like googlebot.com
 2. Double click removal
 - Only one view/download per resource per IP and month
 3. Application of additional non open heuristics

ECONSTOR – Usage statistics by LogEc

Make Your Publications Visible.

Access Statistics for Working Paper Series

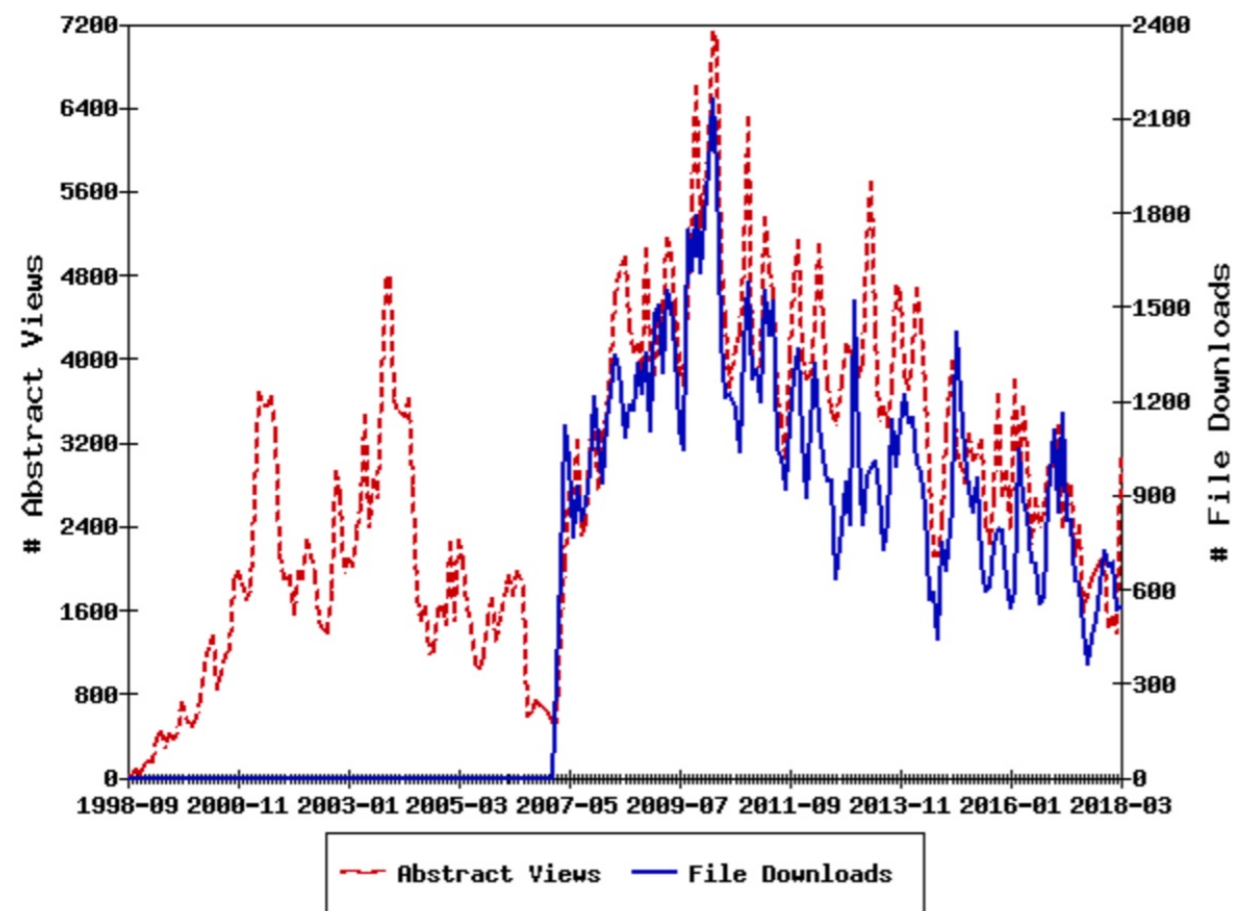

Working Paper Series

ZEW Discussion Papers

ZEW - Zentrum für Europäische Wirtschaftsforschung / Center for European Economic Research

There are currently 2013 items in this series, of which 2010 are downloadable.

2000-04	0	1,237

ECONSTOR – Usage statistics

Make Your Publications Visible.

- The usage statistics is compiled at the beginning of the following month and can be viewed online for:
 - Communities, collections and items
 - By year, month and day
 - Also a ranking of the communities and collections is provided, based on the no. of downloads
- For each statistics item a top ten of the countries, from which the requests originate, is provided
- Partner institutions get a push mail notification, once a month

ECONSTOR – Usage statistics procedure

Make Your Publications Visible.

- Implementation is based on „COUNTER Code of Practice“
- Filtering of apache log files is done by applying the COUNTER rules
 - Only valid views/downloads (HTTP codes 200/304)
 - Double click checking 10s/30s interval for views/downloads
 - User agent filtering by robots pattern list (derived from COUNTER robot pattern list)

ECONSTOR – Usage statistics procedure

Make Your Publications Visible.

- Additional filtering of the apache log files, by checks defined by the EconStor team
 - Filtering by conspicuous class C-nets (excessive no. of downloads has been recorded in the past)
 - Count only one download per item and day from one IP
 - If more than 100 different items have been downloaded on a day, from a single IP, all downloads from that IP are dismissed for that day (IPs are stored as a salted SHA-256 hash, the salt is randomized and changed every day)

ECONSTOR – Usage Statistics – march, 2018
