# Addressing DSpace Community challenges

# Priorities for DSpace 8

DSpace 8.0 had a **shortened development cycle** and **DSpace Steering established four priorities**

## 1

Include major features which just missed the 7.x series of releases

FEATURES INCLUDE

- COAR Notify
- OpenAIRE Correction service
- Port "REST-based Quality Control Reports"
- Basic Duplicate Detection in Submission form

## 2

New features which empower users (focus on the Admin User Interface)

FEATURES INCLUDE

- Request withdrawal or reinstatement of Items
- "Processes" page reorganization
- Edit Item supports authority control lookup & lookup via external sources
- Item Submission forms can be configured for entire Community

## 3

Any other features which existed in 6.x but missed the 7.x series of releases

FEATURES INCLUDE

- Advanced Search
- Search facets on Homepage / Community / Collection
- Search within Community / Collection

## 4

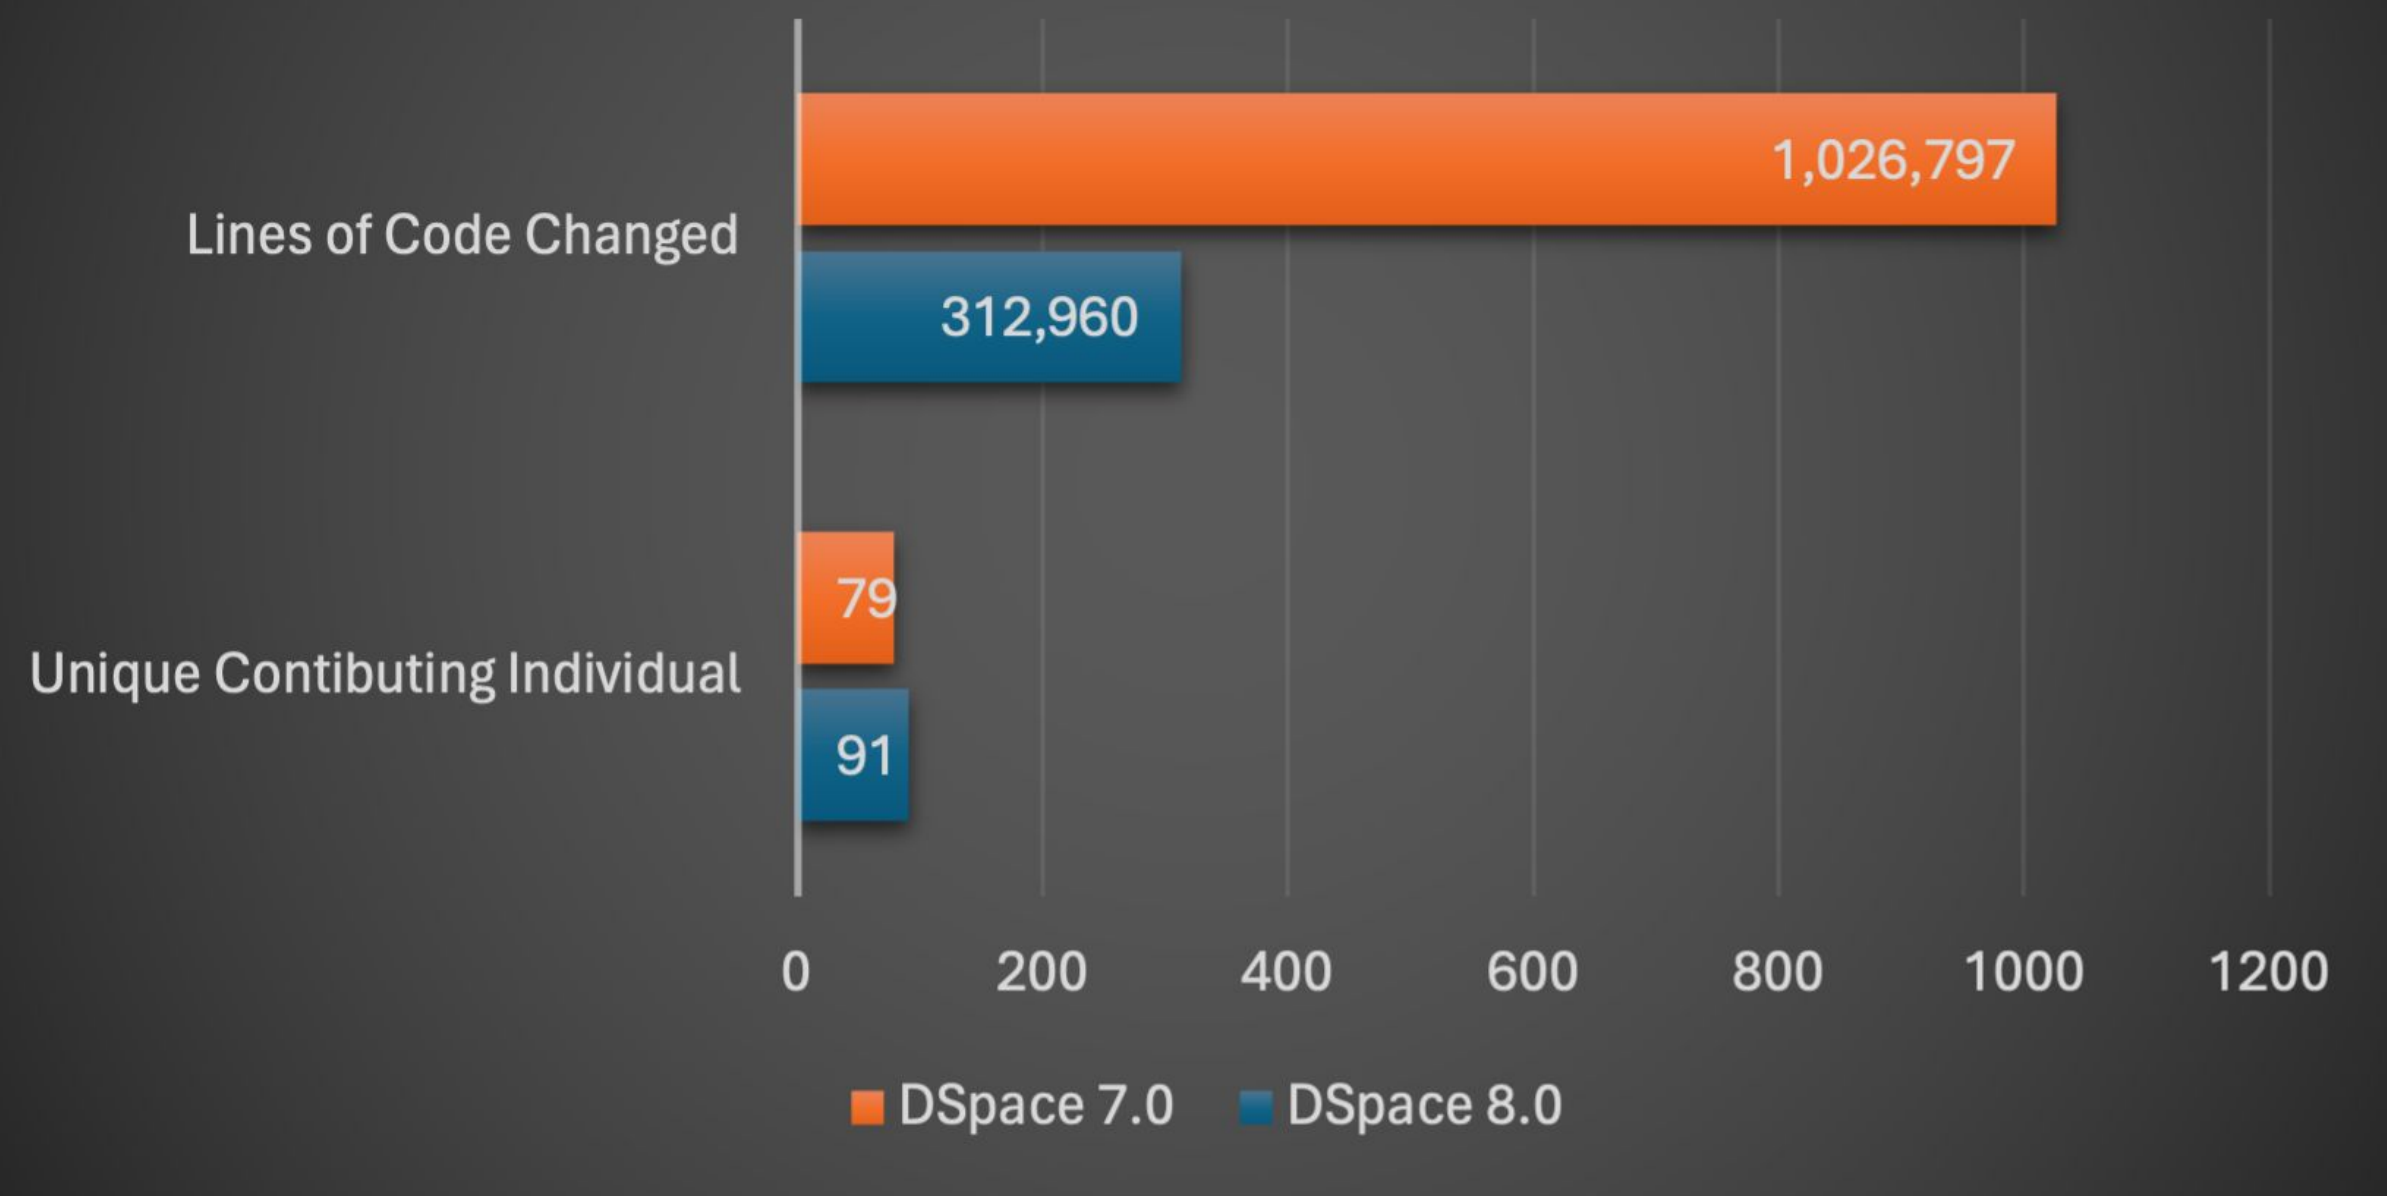

Necessary bug fixes, accessibility fixes, performance improvements & dependency upgrades

FEATURES INCLUDE

- Large number of accessibility fixes (header, navbar, search, admin tools, MyDSpace, etc.)
- Accessibility fixes backported to 7.6.2 (due in July/Aug)
- Major dependency upgrades:
  - Backend upgraded to Spring v6
  - Frontend upgraded to Angular 17

# 8.0 Statistics

## DSpace 8.0 VS DSpace 7.0

>6,000 lines of code refactored for the dependency upgrades

Testathon revealed a number of bugs which were the result of these upgrades.

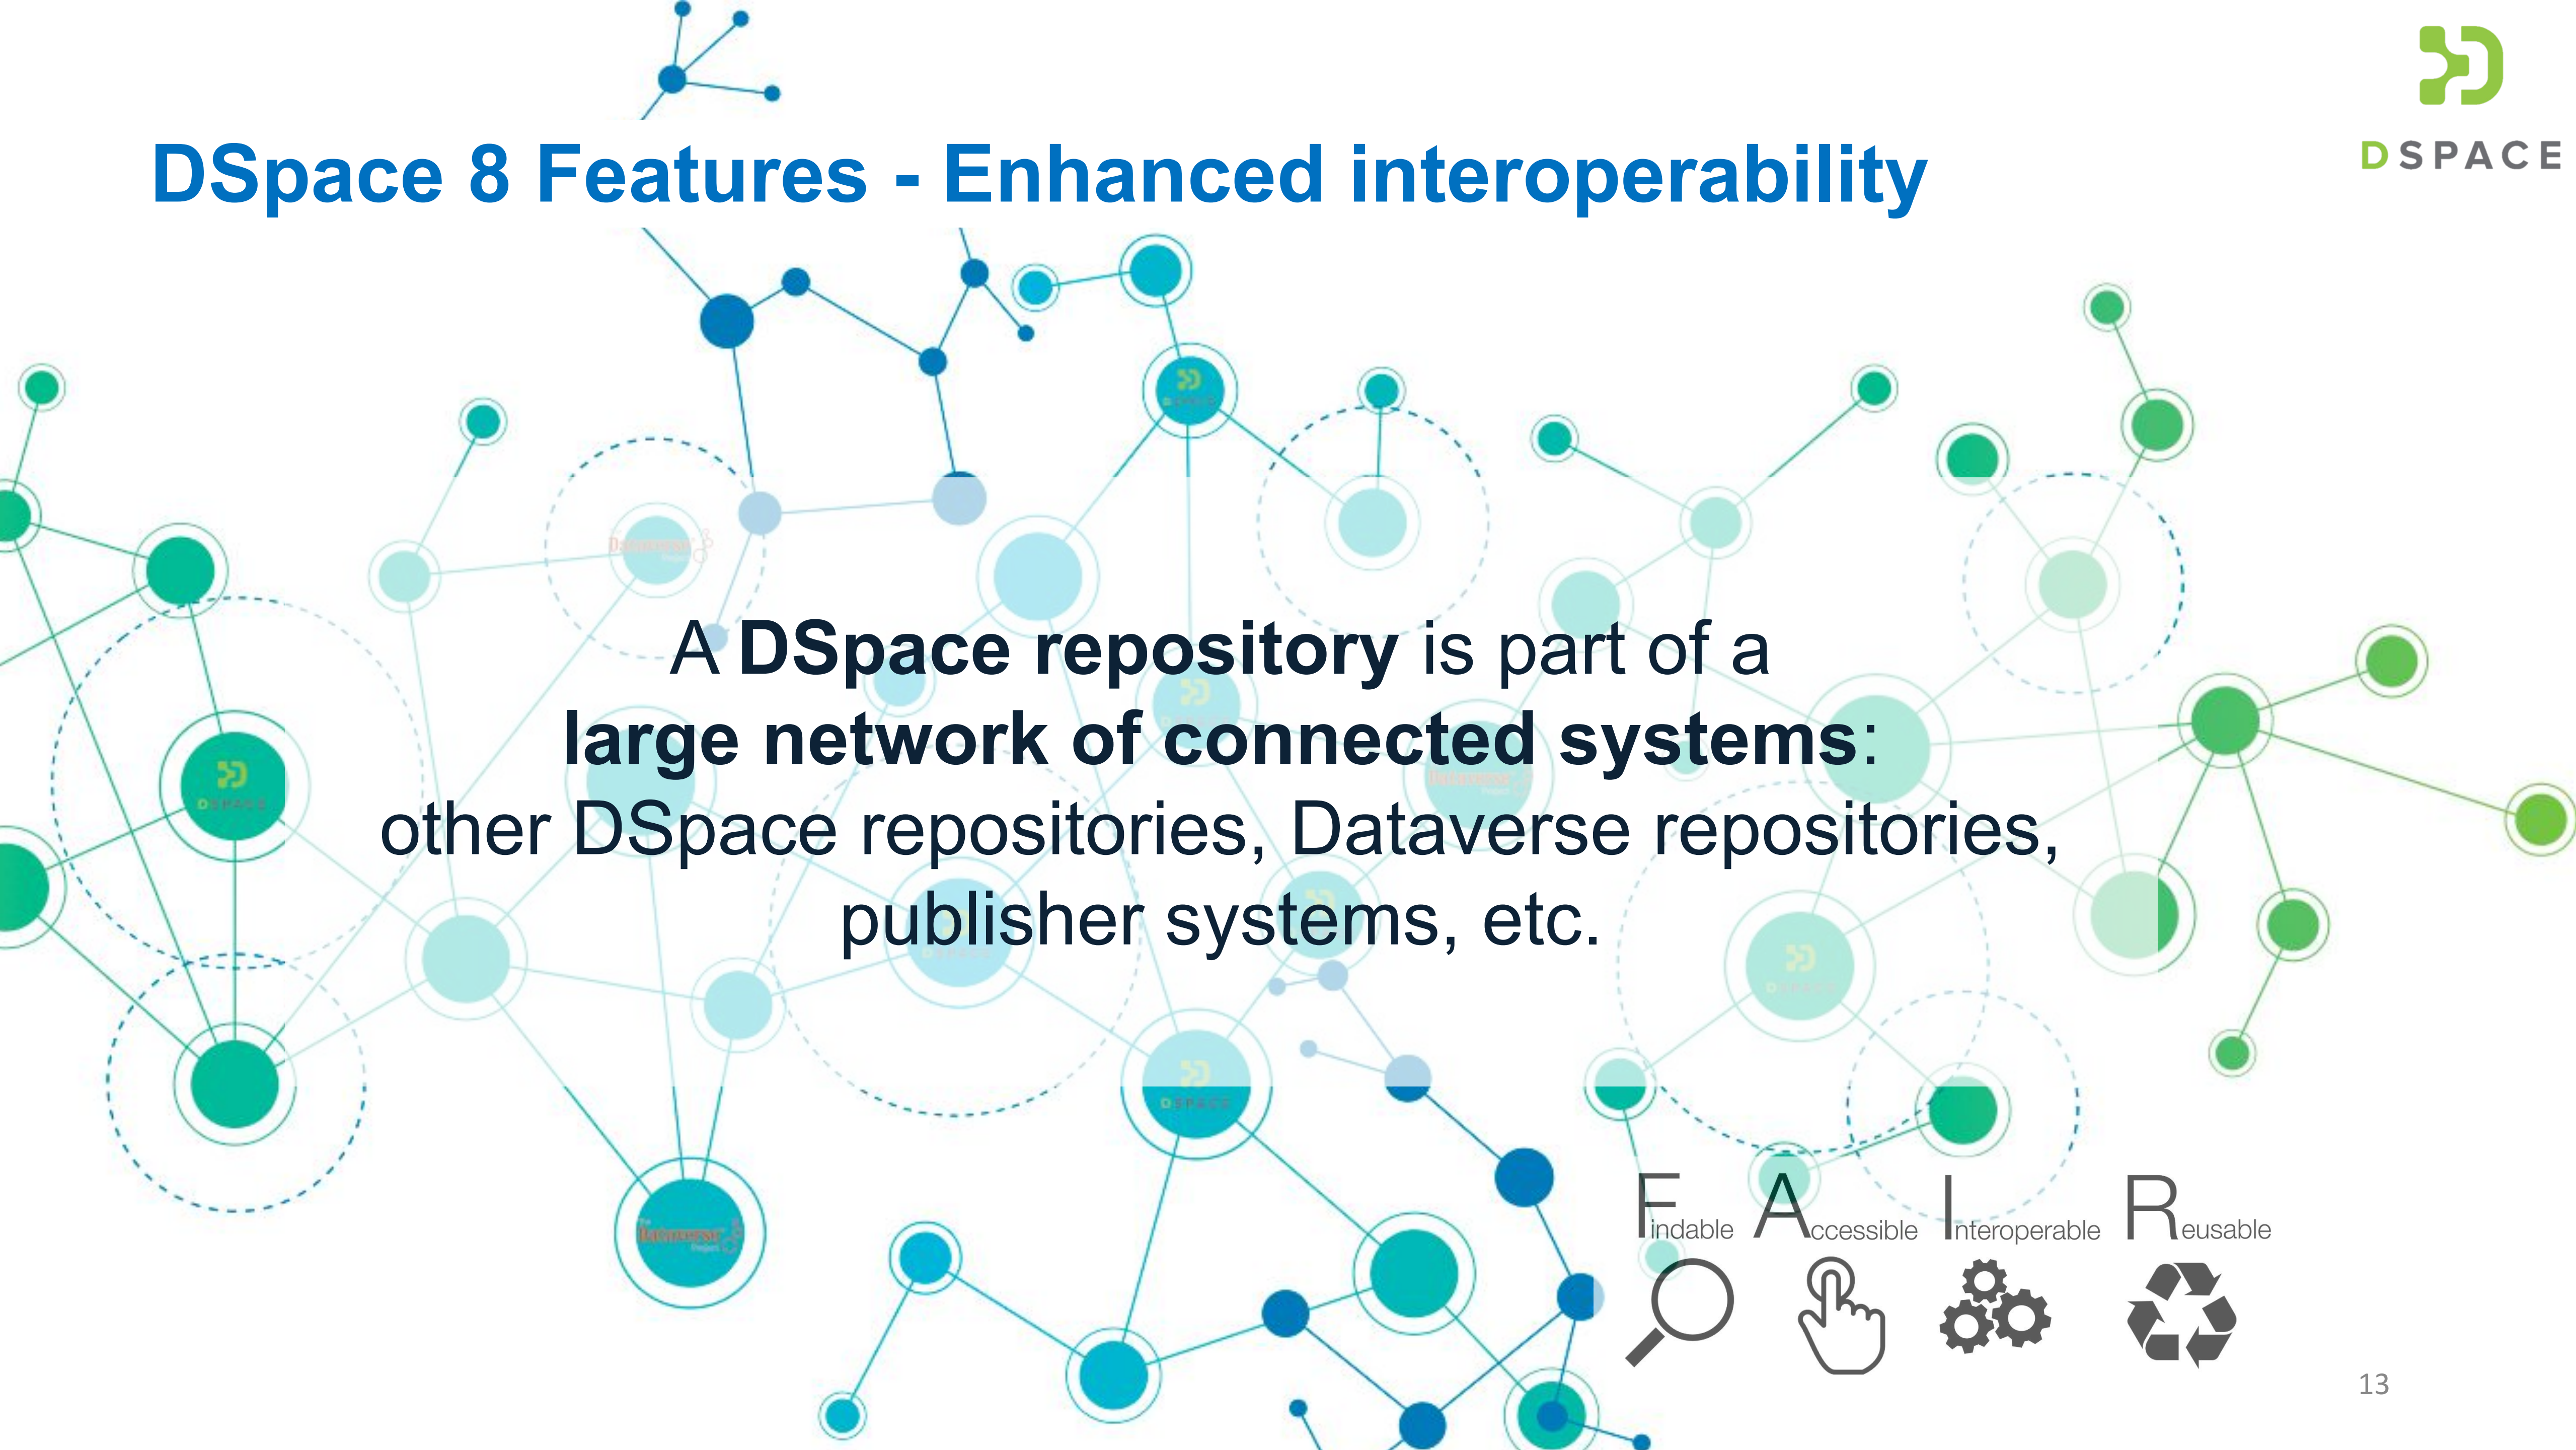

Community developers are still resolving them.

**DSpace 8.0 release: Approx. June 17-24**

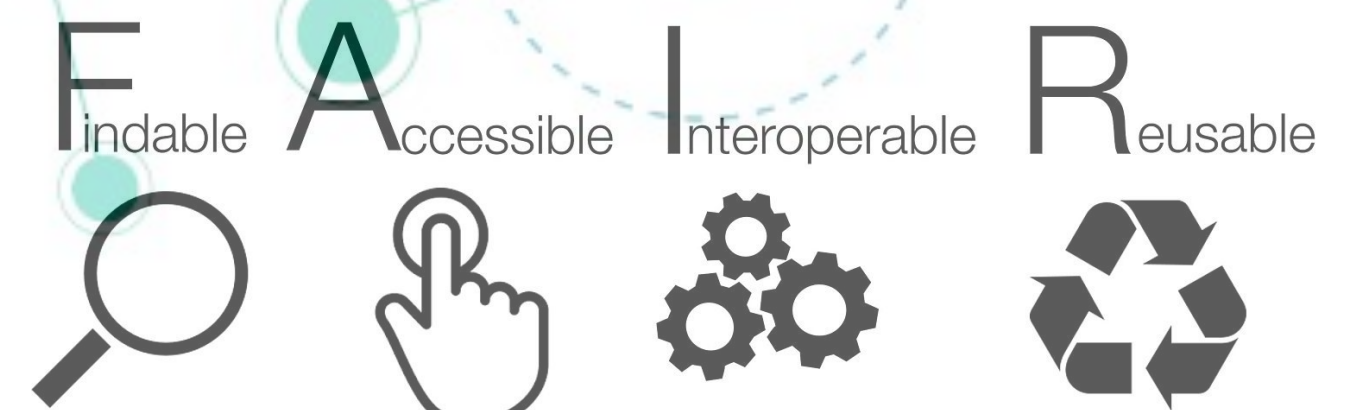

# DSpace 8.0 Feature Preview (Part 1)

OpenAIRE Data Correction & Publication Claim,  
COAR Notify, and more...

# DSpace 8 Features - Enhanced interoperability

A **DSpace repository** is part of a **large network of connected systems**: other DSpace repositories, Dataverse repositories, publisher systems, etc.

# DSpace 8 Features - Publication Claim

- Content exists elsewhere: assure that your repository showcases all the production of your community
- It is the result of the [OpenAIRE ELD project](#) awarded by 4Science back in 2020 and first implemented in DSpace-CRIS in 2021 now finally available in DSpace 8

A new researcher joins the institution and logs in for the first time in the repository.

The **publication claim service found most of their publications and prompts for import.**

The researcher reviews the list, confirms the authorship and imports  
the publication **saving a significant amount of time....**

# DSpace 8 Features - OpenAIRE Publication Claim

Communities & Collections Research Outputs Projects People Organizations Infrastructure Statistics

✓ We found **104 publications** in the OpenAIRE Graph that seems to be related to your profile. Please [review the suggestions](#)

## Welcome to the DSpace Cris 7 Preview

DSpace is the world leading open source repository platform that enables organisations to:

- easily ingest documents, audio, video, datasets and their corresponding Dublin Core metadata
- open up this content to local and global audiences, thanks to the OAI-PMH interface and Google Scholar optimizations
- issue permanent urls and trustworthy identifiers, including optional integrations with handle.net and DataCite DOI

Join an international community of [leading institutions using DSpace](#).

# DSpace 8 Features - DSpaceUsers Data Correction

The screenshot displays the DSpace 8 interface for a withdrawn item. At the top, the navigation bar includes the DSpace logo, 'Communities & Collections', 'All of DSpace', and 'Statistics'. A search bar and user profile icon are also present. Below the navigation bar, a breadcrumb trail reads: Home • Publications • Publications 2 • The ionized gas in nearby ...

The main content area shows a 'Back to Results' button and the title: 'Publication: The ionized gas in nearby galaxies as traced by the [N II] 122 and 205 μm transitions'. To the right of the title are three icons: a document, a pencil, and a trash can. A tooltip above the trash can icon says 'Withdrawn this Item', and a red arrow points to it. Below the title, a 'Research Projects' section shows a 'Research Project' tag and the ID 'RSA1427378'. To the left of this section is a box that says 'No Thumbnail Available'.

Below the main content area, a metadata table is visible. The table has columns for 'Date' and 'Author'. The 'Date' row shows '2016' and 'Home'. The 'Author' row lists several names: Herrera-Cabrera, Bolatto, A., Smith, J.D., Draine, B., Pellegrini, G., Wolfire, E., Croxall, K., de Looze, I., Calzetti, D., and Kennicutt, Robert. A 'Show 10 more' link is at the bottom of the author list.

At the bottom of the page, there is a large orange banner with the text 'This item has been withdrawn'. To the right of this banner are two buttons: 'Take me to the home page' and 'Request reinstate'. A red arrow points to the 'Request reinstate' button.

Below the orange banner, the abstract text is partially visible: 'KINGFISH and Beyond the Peak surveys, we have compiled 141 spatially resolved regions with a typical size of ~1 kiloparsec, with observations of both [N II] far-infrared lines. We measure [N II] 122/205 line ratios in the ~ 0.6 - 6 range, which corresponds to electron gas densities  $n_e \sim 1 - 300 \text{ cm}^{-3}$ , with a median value of  $n_e = 30 \text{ cm}^{-3}$ . Variations in the electron density within individual galaxies can be as high as a factor of ~ 50, frequently with strong radial gradients. We find that  $n_e$  increases

# DSpace 8 Features - COAR Notify

The screenshot displays the DSpace 8 COAR Notify dashboard. A modal window titled "Message Detail" is open, showing the following information:

- Type: message
- Id: urn:uuid:658e26e0-2e8d-4117-a0d1-ee713523bc45
- COAR Notify type: Review action
- Activity stream type: Accept
- In reply to: urn:uuid:ab0e1072-355f-4c89-ac20-d8599c4b37f9
- Queue attempts: 1
- Queue last started: 2023/11/24 11:15:00
- Queue status: Processed
- Queue timeout: 2023/11/24 12:15:00

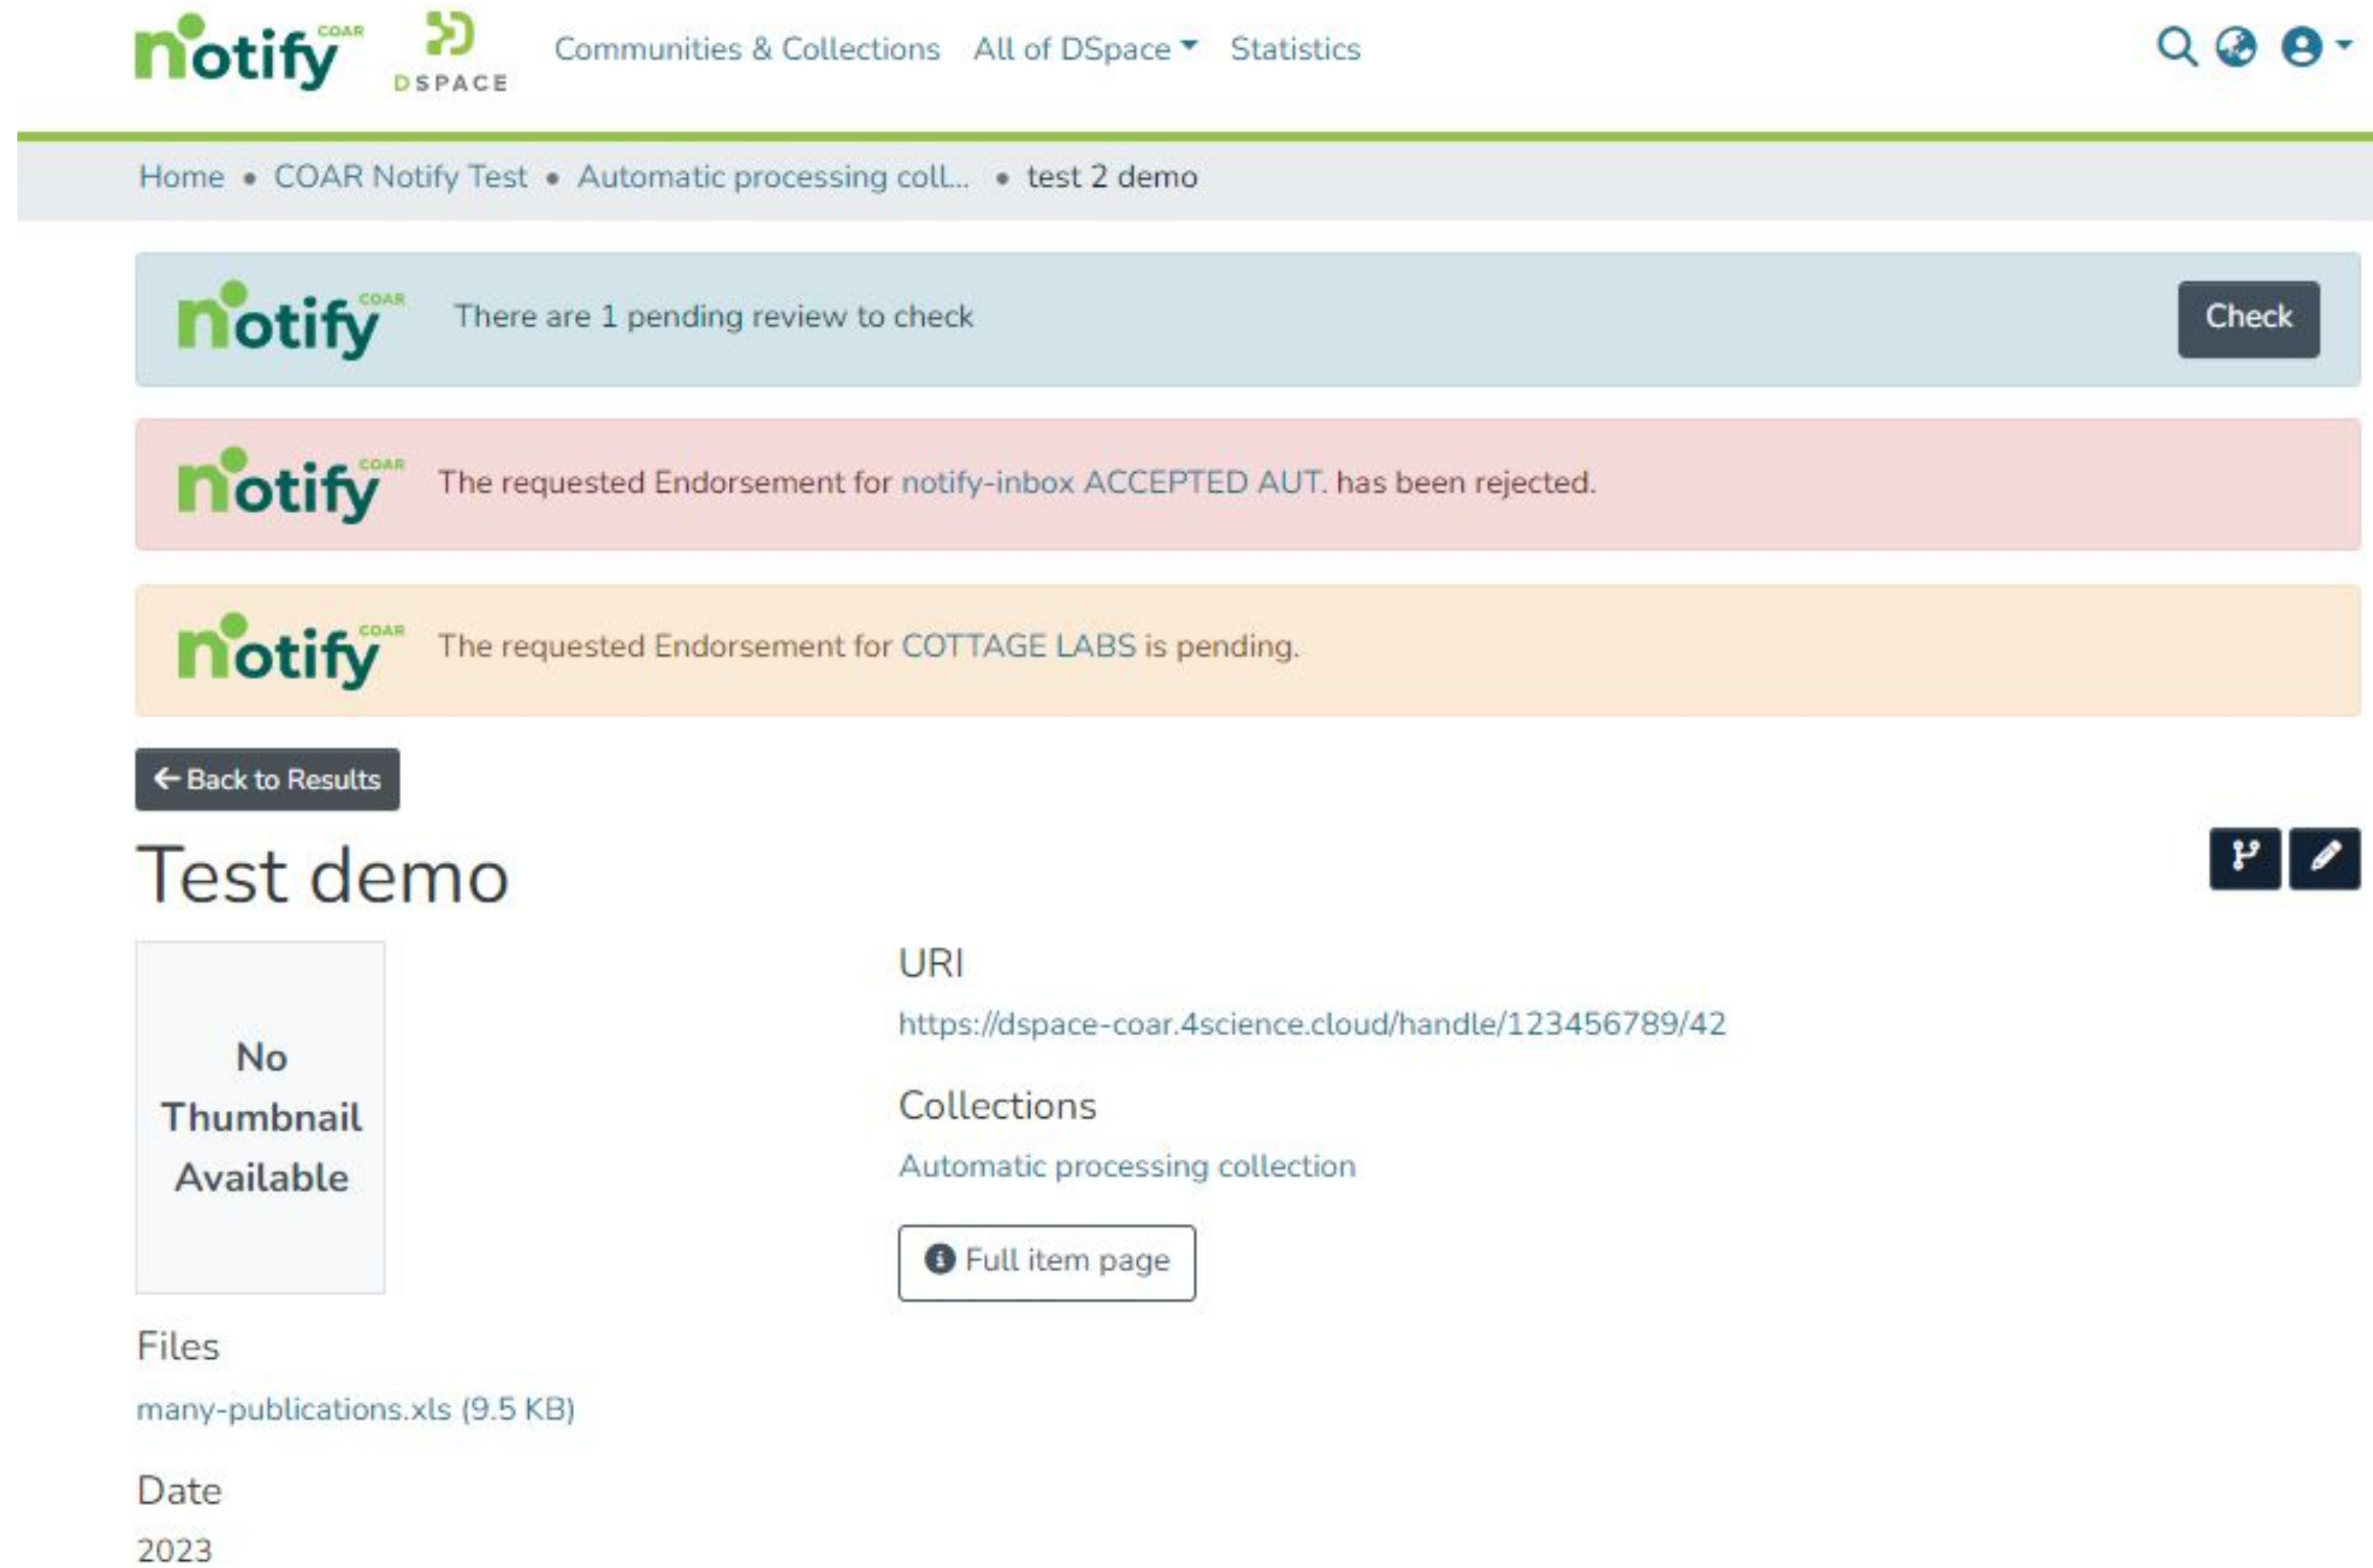

Below the modal, a "Show message" button is visible. At the bottom of the modal, a JSON snippet is shown:

```
{
  "@context": [
    "https://www.w3.org/ns/activitystreams",
    "https://purl.org/coar/notify"
  ],
  "id": "urn:uuid:658e26e0-2e8d-4117-a0d1-ee713523bc45",
  "type": [
    "Accept",
    "coar-notify:ReviewAction"
  ],
  "to": [
    "mailto:example@example.com"
  ]
}
```

The background dashboard shows the "Notify Dashboard" with tabs for "Metrics", "Logs/Inbound", and "Logs/Outbound". The "Inbound messages" section is active, displaying a table of messages:

## Publication: Practitioner Profile: An Interview with Syble Solomon

**Files**

Primary [An Interview with Syble Solomon.pdf](#)  
(493.17 KB)

[book-solid.png](#) (5.87 KB)

**Date**

2016

**Authors**

Solomon, Syble

**Journal Title**

Journal of Financial Therapy

**Volume Title**

Journal of Financial Therapy Volume 7

**Journal Issue**

Journal Issue

Volume 7, Issue 1

7 - 1

**Abstract**

Syble Solomon is a speaker on the psychology of money and the founder and president of LifeWise Strategies. She is best known for Money Habitudes® a deck of cards (and now an online version) that makes it easy to talk about money and discover what motivates our financial behaviors. Before becoming interested in why people manage money as they do, she had careers in early childhood special education, gerontology and executive coaching. Seemingly unrelated, they all provided experience training, developing educational material and empowering people at all socio-economic levels to work through challenging times and transitions. An excellent background for helping people work through money-related issues!

**Keywords**

financial therapy, money habits, money habitudes, financial tools

# Basic Duplicate detection

Basic detection mechanism to prevent duplicate items in the repository.

- Compares item titles in SOLR with the submitted item's title
- Configurable degree of variation (uses levenshtein distance)

Duplicates can be found:

- By submitters or editors **via a submission step** to warn submitters or editors of potential duplicates
- **By Workflow reviewers or editors** through a warning for claimed and pooled tasks indicating the total number of potential duplicates.
- **Through a new /duplicates REST item link** which will search and retrieve a paged list of potential duplicates for any item

# Basic Duplicate detection

# Search Facets on Homepage

The screenshot shows the DSpace 7 homepage. At the top, there is a navigation bar with the DSpace logo, links for 'Communities & Collections', 'All of DSpace', and 'Statistics', a search icon, and a 'Log In' link. The main banner features the text 'DSpace 7' and a description of the platform's capabilities. Below the banner, a search bar is highlighted with a red box. Underneath the search bar, the 'Communities in DSpace' section is visible, listing several communities with their respective item counts.

## DSpace 7

DSpace is the world leading open source repository platform that enables organisations to:

- easily ingest documents, audio, video, datasets and their corresponding Dublin Core metadata
- open up this content to local and global audiences, thanks to the OAI-PMH interface and Google Scholar optimizations
- issue permanent urls and trustworthy identifiers, including optional integrations with handle.net and DataCite DOI

Join an international community of [leading institutions using DSpace](#).

### Evolutionary Developmental Biology

(2021) Tom Helen

Evolutionary developmental **biology**, or evo-devo, is the study of the reciprocal relationships between ontogenetic development and evolutionary processes. This still relatively new research field, of roughly four decades, is highly heterogeneous

-  The breathtaking world of human respiratory in vitro models: Investigating lung diseases and infections in 3D models, organoids, and lung-on-chip.
-  A Systematic Quality Assessment of Online Resources on Eyelid Ptosis Using the Modified Ensuring Quality Information for Patients (mEQIP) Tool.
-  Author Correction: Mucosal vaccine-induced cross-reactive CD8 T cells protect against SARS-CoV-2 XBB.1.5 respiratory tract infection.
-  Long term outcomes of hyperbaric oxygen therapy in post covid condition: longitudinal follow-up of a randomized controlled trial.
-  Inequalities in regional excess mortality and life expectancy during the COVID-19 pandemic in Europe.
-  Cyclosporine A in hospitalized COVID-19 pneumonia patients to prevent the development of interstitial lung disease: a pilot randomized clinical trial.
-  Comparison of the level of physical activity after the COVID-19 pandemic in Poland, Slovakia and the Czech Republic.
-  Impact of COVID-19 on food security and diet quality in Chilanga District, Zambia.
-  COVID-19 in patients with anemia and haematological malignancies: risk factors, clinical guidelines, and emerging therapeutic approaches.

# Add relationships via external sources

DSpace 7 introduced **additional external lookup sources**:

- Pubmed
- Scopus
- Crossref
- ...

And **extended the ORCID lookup**.

➔ In DSpace 7, this lookup is only available when submitting a new item.

➔ In DSpace 8, lookup functionality is also available in the item edit section.

# Administrator Reports (beta)

DSpace 8 will introduce basic administrator reports. There are two reports available:

- **Filtered Collection reports:** these reports count the numbers of item per community/collection. Administrators will also have access to a number of filters they can apply to narrow down the result.
- **Metadata Query reports:** These will provide item counts based on metadata queries to specify what should be counted and what not (and some other available filters).

# DSpace 8 dependencies: keep this in mind

For security purposes, DSpace 8 features upgrades to:

- **Angular 17** (and standalone components)
- **Jakarta EE** (to support Tomcat 10+ and Spring 6+)

When you upgrade to DSpace 8, you should be aware of these changes. They may require you to update custom code/plugins you have in your DSpace. See **Breaking Changes section\*** of the Release Notes for more details.

# Reviewing Bug Fixes and new features

DSpace development is **driven by the community**. But developing also implies:

- code reviews
- practical testing

This needs to happen for both new functionality as well as for bug fixes. But there are different degrees of overall complexity.

- New functionality: reviews need to be done by someone highly familiar with DSpace's architecture
- Bug fixes: reviews can be done by people who are less familiar with the architecture.

In practice:

- New functionality: consumes most of the available review time from a limited amount of DSpace Developing partners)
- Bug fixes: Less time left for these reviews

# Reviewing Bug Fixes and new features

## You can help!

### Bug fix reviews

- **Initial testing: someone, not necessarily super familiar with DSpace's code, tests if the bug fix really fixes the issue**
- Code review: Someone familiar with DSpace's codebase reviews the bug fix' code itself

**By testing bug fixes, you can help getting more of these fixes into every DSpace release!**

# What's next for DSpace?

Events, releases & how you can help

# DSpace Program Governance

# DSpace Community Advisory Team (DCAT)

DCAT represents the interests of repository managers and administrators across the globe.

- Advises DSpace Steering and Leadership
- Solicits community feedback through community-wide discussions, surveys, and other activities.
- Helps ensure future software releases address the needs of the community.

## Open Monthly Meetings

Open Forum each 2nd  
Tuesday of the month

## End user documentation

Created end  
user  
documentation  
for DSpace 7

## DSpace 8 Testathon

Conducted community  
testathon of DSpace 8  
release candidate (spring  
2024)

## UX Testing

Sponsored a UX project  
team to perform targeted,  
lightweight user testing,  
aiming to propose UX  
improvements to DSpace8+  
versions

# Future DSpace Releases

**DSPACE**

DSpace 8.0 Release: Approx. June 17-24

DSpace 7.6.2 Release: shortly after 8.0  
(estimated for July/Aug).

DSpace 9.0 Release: April 2025

Bug/accessibility fixes  
backported from 8

Priorities for 9.0 not  
yet finalized by  
Governance

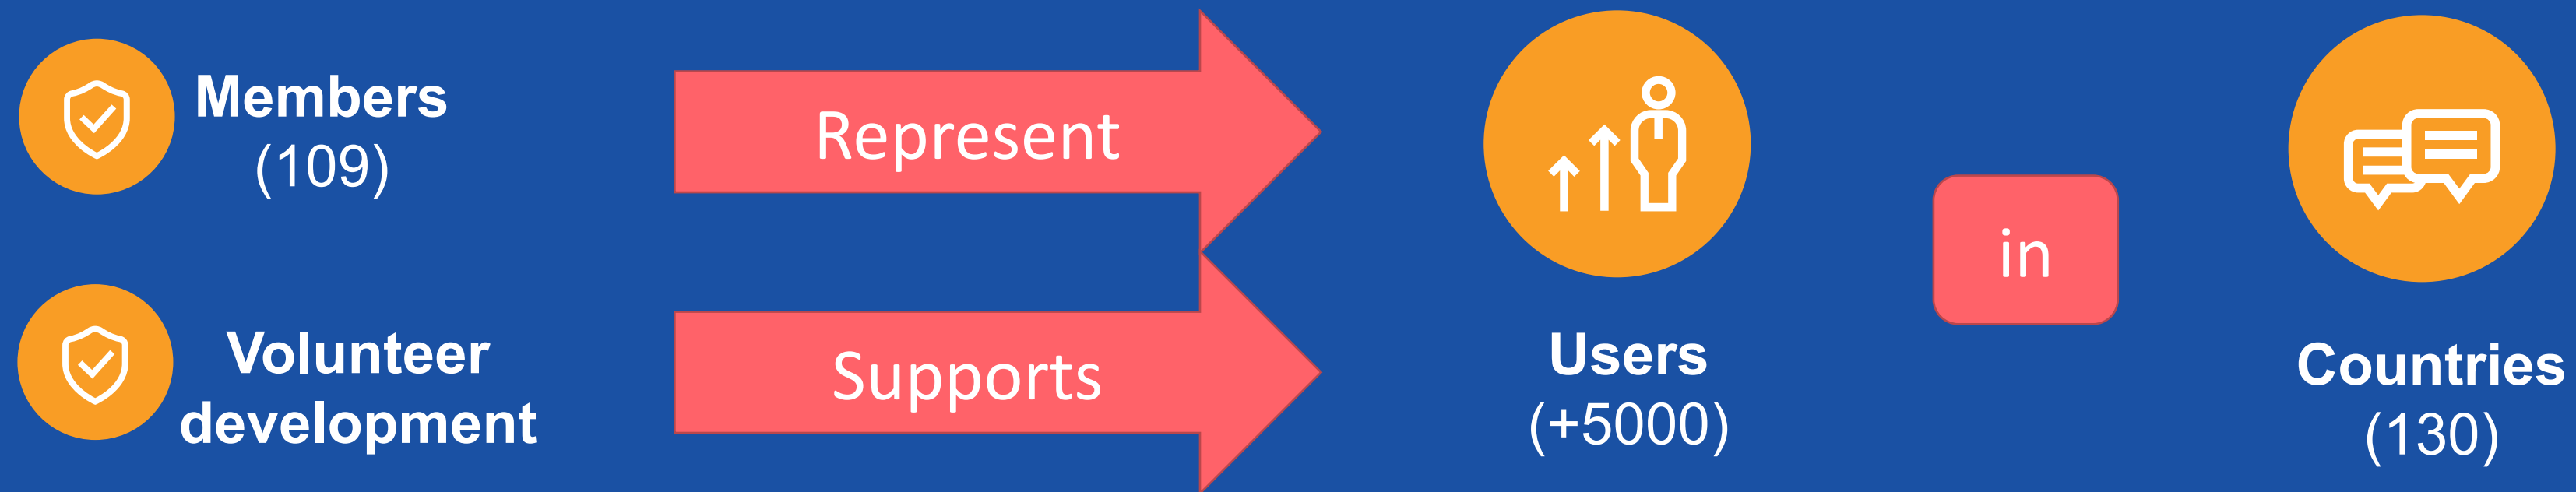

Additional bug-fix releases of 7.6.x and 8.x will  
be released in 2024, as necessary.

# Upcoming Events

<p><b>JULY 2024</b></p>	<p><b>DSpace 8 Q&amp;A Webinar</b></p> <p>Online &amp; free to attend Stay tuned to DSpace mailing list for details</p>
<p><b>SEPT 23-25</b></p>	<p><b>DSpace North America User Group Meeting</b></p> <p>University of Minnesota</p>
<p><b>COMING SOON</b></p>	<p><b>Inaugural DSpace India User Group Meeting</b></p> <p>Sometime in 2024, Details TBD</p>

# The Pursuit of Happiness (= sustainability)

**Open Source is not free, it is a collective responsibility**

## We need to rethink engagement and participation

Open Source projects need the contribution of the whole community, not just a portion of it

# How can you help?

- [Become a Member](#) of DSpace
- Contribute to the [DSpace Development Fund](#)
  - ◆ Trusted service providers funded to do development for community
  - ◆ Priorities decided by Steering/Leadership
  - ◆ Priority for 2023-24 was Enhanced Accessibility
- Contribute code, review or test ([Guidelines](#))
- Participate in [DCAT](#)
- Join (or create) your local [DSpace User Group](#)
- Try out DSpace 8 : <https://wiki.lyrasis.org/display/DSPACE/Try+out+DSpace+8>
