

Cheatsheet

Level 6

```
print '5 plus 5 is ' 5 + 5
print '5 minus 5 is ' 5 - 5
print '5 times 5 is ' 5 * 5
```

You can use addition, subtraction and multiplication.

```
name = Hedy
number = 20
answer = ask 'What is the answer?'
```

You can replace the word is with the = sign.

```
answer = ask 'What is 10 + 10?'
if answer is 20 print 'Correct!'
else print 'Mistake'
```

You can check if the answer to a question is right with if.

Other commands: *print, ask is, sleep, add, remove, if, else*
