# Cheatsheet

## Level 10

```
animals is a turkey, a kangaroo, an ant
for animal in animals
  print animal ' is a great animal!'
```

With for you can make a code that will be ran for all the items on your list. For example the output of this code will be:

```
a turkey is a great animal!
a kangaroo is a great animal!
an ant is a great animal!
```

**Other commands:** *print, ask is, sleep, add, remove, if else, repeat,*
