AI standardisation for the EU AI Act

Renaud DI FRANCESCO

Head of delegation for Italy/European standardisation of AI

Rationale for Standards

Interoperability

-plug and play
-Ex: 4G, 5G, USB, Bluetooth

Procurement

-call for tenders
-multiple sources
-transparent/auditable

Ecosystem

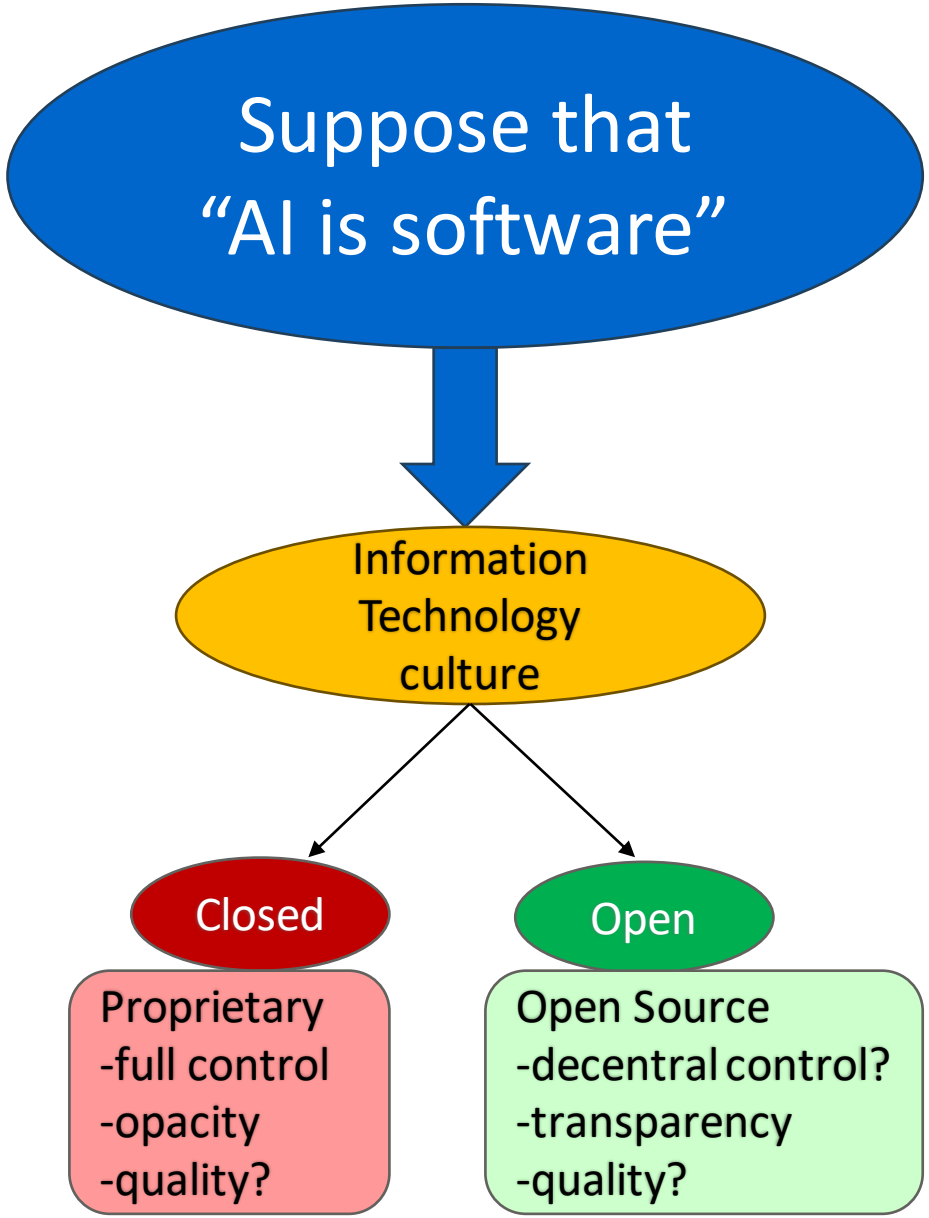
-supply-side aggregation
-demand-side aggregation

EU AI Act

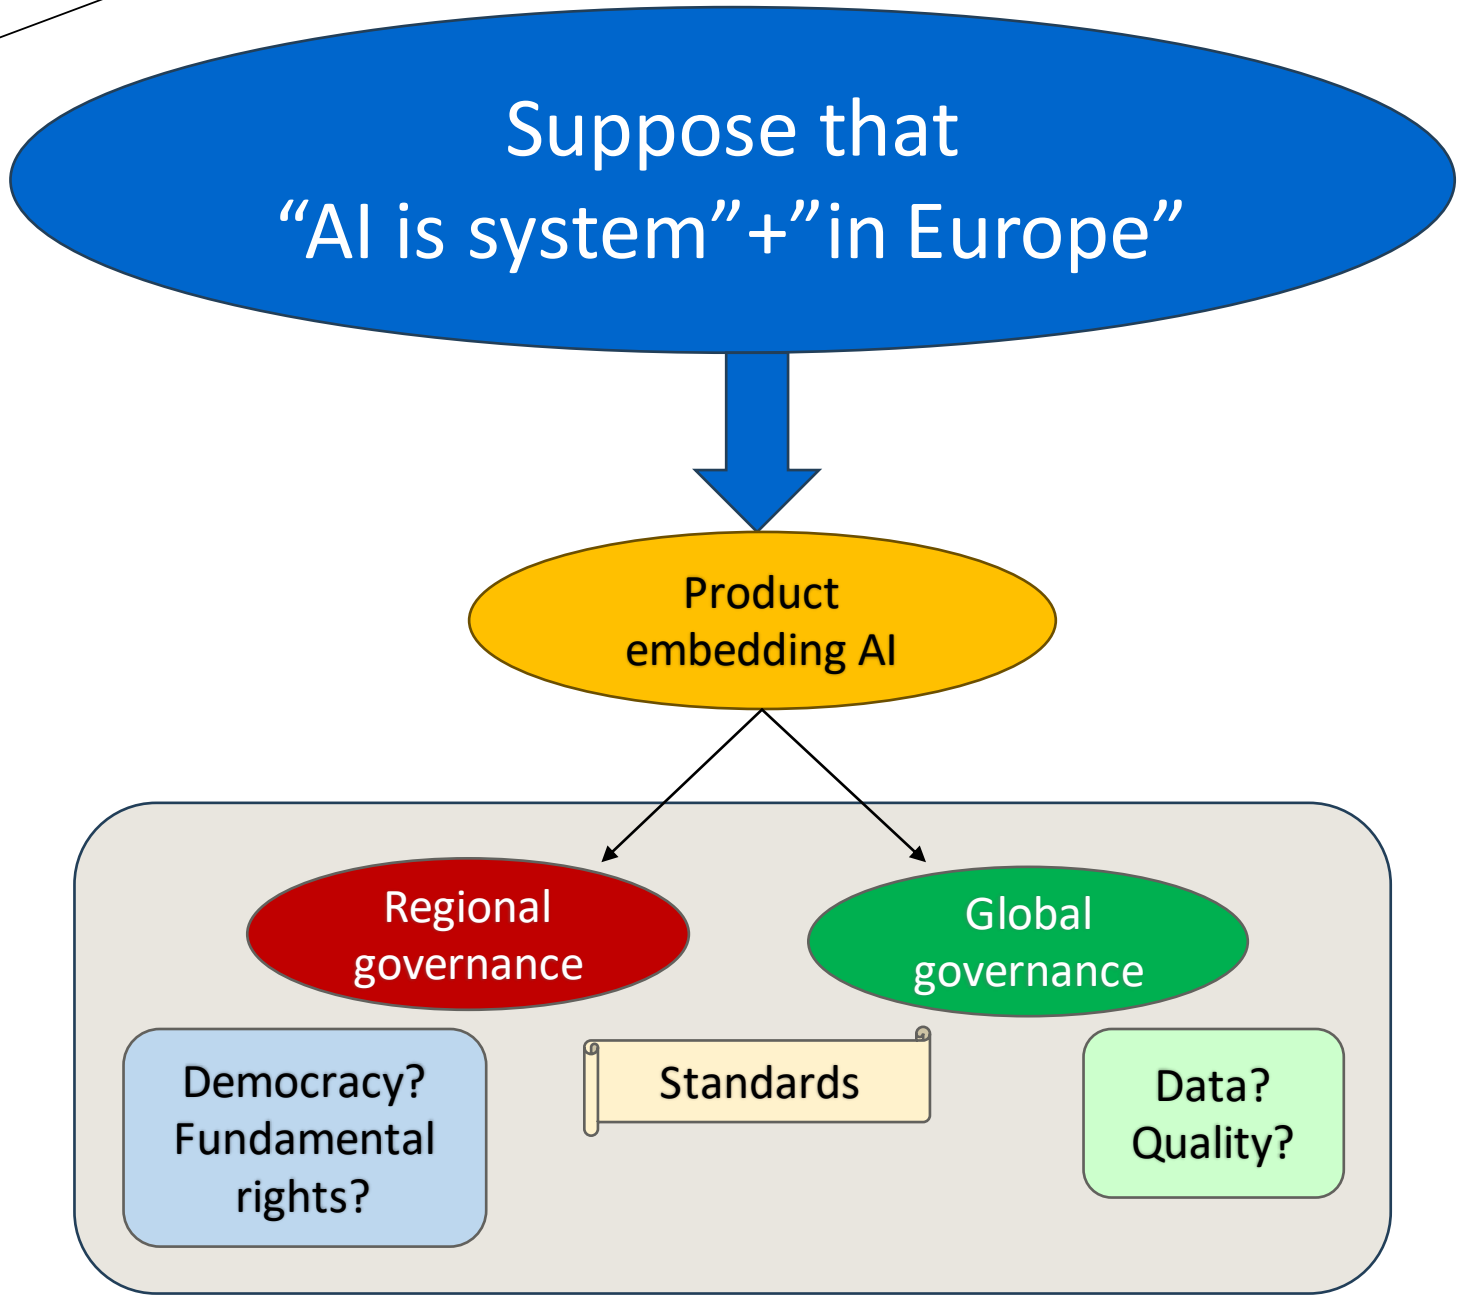
Presumption of conformity

-meet regulation
-no legal exposure

Cultural context(s)

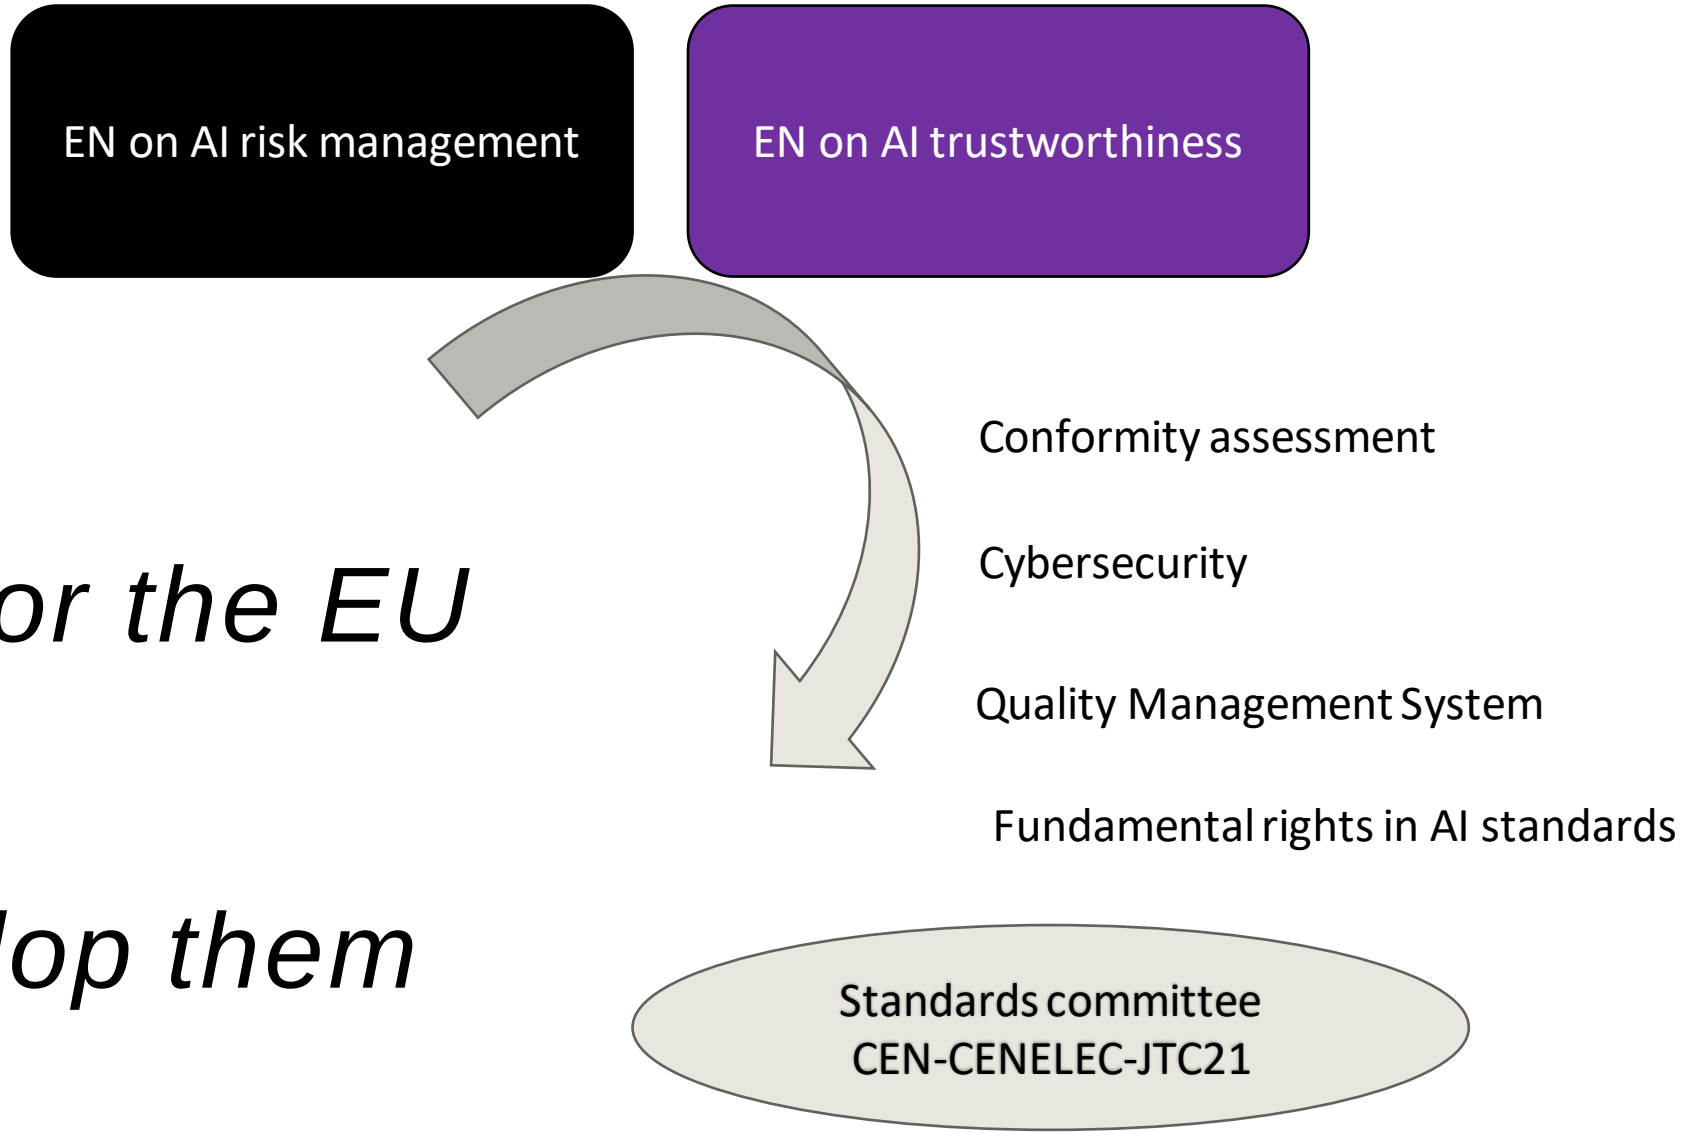


Cultural context(s)



AI standards for the EU AI Act:

-how we develop them



European standards for the EU AI Act

-contributing

EN on AI risk management

EN on AI trustworthiness

Conformity assessment

Cybersecurity

Quality Management System

Fundamental rights in AI standards

Standards committee
CEN-CENELEC-JTC21

Meet stakeholders:
-roles in value chain and society, verticals
(medical equipment, manufacturing, IT, etc)
